STATISTICAL DEPARTMENT,
The 12th February 1897.

M. FINUCANE,
Secy. to the Govt. of Bengal.

STATISTICS OF THE FOOD-GRAIN TRAFFIC OF THE LOWER PROVINCES CARRIED BY RAIL.

No. 393 Statistics.—The following memorandum and statements are published for general information.

STATISTICAL DEPARTMENT,
The 16th February 1897.

M. FINUCANE,
Secy. to the Govt. of Bengal.

MEMORANDUM.

THE consolidated provincial statements of rail-borne traffic in food-grains for the month of November 1896, as compared with the figures for 1895, are published below, with a brief review of the salient points.

The following statement compares the total quantity of food-grains carried by rail to and from these provinces during the month of November 1895 and 1896 :—

Food-grains.	Imports.		Exports.	
	1895.	1896.	1895.	1896.
	Mds.	Mds.	Mds.	Mds.
Rice	4,92,277	4,22,016	5,73,151	6,04,376
Paddy	83,300	2,14,171	84,516	2,39,868
Wheat	2,44,863	70,138	1,21,226	52,957
Gram and pulses ...	3,06,231	1,95,398	2,76,344	5,68,759
Other food-grains ...	2,62,129	2,44,787	3,83,318	5,50,572
Total ...	13,88,800	11,46,510	14,38,555	20,16,532

The import trade fell off by 17·44 per cent., but the exports rose considerably, viz., by 40·17 per cent. Compared with 1896, the total rice traffic during the month shows a decrease of 70,261 maunds under imports and an advance of 31,225 maunds under exports. The month of November is not a fair representative month for the rice trade, which is most brisk during the early spring, and is large during all the months from January to September, but the greater activity of the trade shown during this month is attributable to the increased demand that occurred after the premature cessation of the rains. In the case of paddy, the import trade showed an advance of 1,30,871 maunds, and the export trade of 15,53,342 maunds. As regards wheat, there has been a falling off, namely, 1,74,725 maunds under imports and 68,269 maunds under exports. The importation of gram and pulses declined by 1,10,833 maunds, while the exports rose by 2,92,415 maunds. Concerning miscellaneous food-grains, the figures under imports remained nearly the same as in the preceding year, but the export trade showed a large increase of 1,67,254 maunds.

The total trade of the districts in each division is illustrated in the following statement :—

NAME OF DIVISION.	Rice.		Paddy.		Wheat.		Gram and pulses.		Other food-grains.		Total.	
	Import.	Export.	Import.	Export.	Import.	Export.	Import.	Export.	Import.	Export.	Import.	Export.

Total ... 1896 ...	4,22,016	6,04,376	2,14,171	2,39,868	70,138	52,957	1,95,398	5,68,759	2,44,787	5,50,572	11,46,510	20,16,532

The total quantity of these grains imported into, and exported from, the Lower Provinces, from and to other parts of India, is shown below :—

Food-grains.	Imports into Bengal from other Provinces in India.		Exports from Bengal to other Provinces in India.	
	1895.	1896.	1895.	1896.
	Mds.	Mds.	Mds.	Mds.
Rice	3,268	17,142	84,142	1,99,502
Paddy	91	427	1,307	26,114
Wheat	1,65,461	30,125	41,824	12,944
Gram and pulses	85,278	8,610	55,391	3,81,971
Other food-grains	4,298	10,060	1,25,478	3,15,845
Total ...	2,58,376	66,364	3,08,142	9,36,376

The quantities received into Bengal showed a decline of 74·31 per cent., while the despatches from the Bengal districts increased more than three times in comparison with the preceding year. By far the largest quantity, aggregating 8,57,352 maunds against 2,80,835 maunds in 1895, was consigned to the North-Western Provinces and Oudh alone, as the following statement will show :—

Articles.		Exports to the North-Western Provinces and Oudh.			Total.
		From Bengal Proper.	From Bihar.		
			Patna Division.	Bhagalpur Division	
1		2	3	4	5
		Mds.	Mds.	Mds.	Mds.

	1896 ...	31,075	95,004	1,75,608	3,01,687
Total ...	1895 ...	27,144	97,161	1,56,530	2,80,835
	1896 ...	2,28,530	2,63,541	3,65,254	8,57,325

The Panjab drew a large quantity of gram and pulses and miscellaneous food-grains, namely, 21,305 maunds and 13,465 maunds, respectively, chiefly from Calcutta, Monghyr, Sonthal Parganas, and Patna, while a large supply of rice, amounting to 26,519 maunds, against 3,307 maunds in 1895, was shipped for Assam chiefly from Calcutta.

The internal traffic of the Lower Provinces will be considered separately, first, as regards the inter-district trade of Bengal; secondly, with regard to the trade of the Bengal districts with Bihar; and lastly, the circulation of food-grains within the Bihar Province.

The following statement shows the total inter-district food-grain traffic of Bengal Proper, as distinguished from Bihar, during 1896, as compared with the figures for the corresponding period of 1895 :—

	1895.	1896.
	Mds.	Mds.
Food-grains—		
Rice	2,21,335	2,48,562
Paddy	28,724	1,14,178

Total ...	1895	1,96,601	66,443	2,63,044	1,566	8,432	9,998	2,73,042
	1896	88,482	33,077	121,559	12,215	58,440	70,655	1,92,214

The falling off in the imports into Bengal from Bihar amounted to 1,41,485 maunds, or 53·79 per cent., but the exports to that Province from Bengal advanced by 60,657 maunds, or 606·69 per cent., owing chiefly to larger despatches of rice, paddy, and gram and pulses.

The following abstract shows the local trade of Bihar in food-grains during the month of November 1895 and 1896:—

Articles.		Local trade of the Bihar Province.				Total.
		Exports from the Bhagalpur Division.		Exports from the Patna Division.		
		Inter-district or local trade of the Division.	To Patna Division.	Inter-district or local trade of the Division.	To Bhagalpur Division.

The total fall from 1st January to 13th February 1897 ...		1·46
The average fall of the corresponding period for 24 years, Surveyor-General's Office		0·99

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h., 16h. and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed, open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph and Munro's anemometer and a dial anemometer by L. Casella.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; ⛅ dew; d, drizzling rain.

NOTE.—The daily movements of the wind from 7th to 10th are from 8 A.M. to 8 A.M.

Printed at the Printing Office, and published by the Book Depôt, of the Bengal Secretariat, Writers' Buildings, in the City of Calcutta, on 17th February 1897.

DISTRESS IN PATNA AND CERTAIN OTHER DIVISIONS.

No. 494 Fam.).—*The 19th February 1897.*—The following papers are published for general information.

M. FINUCANE,
Secretary to the Govt. of Bengal.

No. 455Agri. (Fam) dated Calcutta, the 16th February 1897.

From—M. FINUCANE, Esq., Secretary to the Govt. of Bengal, Rev. Dept.,
To—The Secretary to the Government of India, Rev. and Agri. Dept.

IN continuation of this office letter No. 118Fam., dated the 15th January 1897, I am directed to submit herewith the monthly report required by section 29 of the Bengal Famine Code for the period ending 30th January 1887. The districts most severely affected continue to be the four northern districts of the Patna Division; but since the last monthly report was submitted, reports under Part II of the Famine Code have been received from other districts in which distress requiring relief measures exists, and the particulars required for a general report under section 29 (8) of the Bengal Famine Code have been incorporated in my letter No. Agri. (Fam.) of this date, in which the conditions and prospects of other Divisions are reported in detail. I am, therefore, in this letter to deal only with the Patna Division, submitting, with respect to it, the information required by section 29 (6) of the Bengal Famine Code, together with a copy of the reports of the Commissioner of the Patna Division, No. 55F.G., dated 20th January and No. 283F.G., dated the 6th February, with enclosures.

2. *Rainfall and prospects of the crops.*—The month of January was marked by unsettled weather, and the rainfall continued to be of the character described in paragraph 2 of my letter of the 15th January. The marginal table shows the total of rainfall for each district of the division in the three months, November and December 1896 and January 1897, compared with the rainfall of the corresponding period of 1873-74, and with the normal. The rainfall in every district was greater than during the corresponding period of 1873-74, and except in Saran and Muzaffarpur, approximated closely to the normal. Mr. Bourdillon is therefore able to report that "crop prospects are good everywhere"; the prospects of *rahar* (*cajanus indicus*), sugarcane, mustard and poppy being especially favourable.

November, December, and January.

	1873-74.	1896-97.	Normal.
Patna ..	0·54	0·87	0·93
Gaya ...	0·92	1·24	1·10
Shahabad ...	0·51	1·38	1·24
Saran ...	0·26	0·65	1·08
Champaran ...	0·27	0·85	0·90
Muzaffarpur ...	0·40	0·48	0·86
Darbhanga ...	0·41	0·75	0·81

NOTE.—The figures shown are the mean totals of the district; the normals are as calculated by the Meteorological Department.

3. *Estimates of area and population affected.*—In the *Patna, Muzaffarpur and Darbhanga districts* no change has been made in the estimates of affected area and population since my report of the 16th December.

Shahabad district.—During the period now under report, distress has become acute in the area of the Bhabhua subdivision of Shahabad (400 square miles with a population of 115,000), which was described in paragraph 3 of my letter of 15th January, though at the time that letter was written it was not considered that there was an urgent demand for work in this tract. Mr. Marindin, the Collector, now reports that an additional tract of 60 square miles, with a

population of 27,000, being the Chenari outpost in the south-west corner of the Sasaram subdivision, requires relief at once; and that he also anticipates distress in a portion of the sparsely-populated Rhotas plateau, the area of which he estimates at 220 square miles and the population at 2,000 only.

Saran district.—In my letter of the 15th January, the area immediately affected in Saran was provisionally estimated at 880 square miles, with a population of 779,705. There are peculiar difficulties in forming an approximate estimate of the areas affected in this district, because the purely rice-producing tracts are in it much scattered, and do not form, as in the other districts of North Bihar, large homogeneous areas. The detailed scarcity map which was being prepared by the Settlement Department has now been completed; and the result has been to raise the estimate of area affected to 1,426 square miles with a population of 1,341,000; but in this area the amount of distress varies from village to village, even more than is usual. Mr. Earle, the Collector, does not anticipate that distress will spread greatly beyond the area now affected, and his present estimate may therefore be taken as a final one, unless unforeseen developments should occur.

Champaran district.—In my letter of 15th January, the area then immediately affected was estimated at 1,242 square miles with a population of 729,120. The area affected has again increased, as in the previous month, and is now estimated at 1,620 square miles with a population of 972,000.

A revised famine map of the Patna Division is annexed to this letter.

4. *Relief-works.*—The numbers on relief works have continued to rise in all four districts of North Bihar, the increase having been greatest in Darbhanga and Muzaffarpur. Darbhanga had, at the close of the period now under report, the largest number of labourers on relief works. Both in that district and in Champaran the great rush of labourers, which was noticed in paragraph 4 of my letter of 15th January, has been brought under control, and discipline has been restored. The transfer of large works to the charge of the Public Works Department was commenced towards the close of the period under report, and is now actively proceeding. During the month instructions were issued for the guidance of officers engaged in the management of relief works under the Public Works Department which are in details based upon the instructions issued by the Government of the North-Western Provinces and Oudh, but differ from them, amongst other matters, in the following important particulars. In the North-Western Provinces and Oudh it was found necessary to exact a task from able-bodied men-diggers only, the numbers of this class being in the proportion of 1 to 3 to the numbers of women, children and weakly persons who are employed as fillers and carriers; but in Bengal these conditions do not prevail, and a task will be exacted not alone from diggers but from the gang as a whole, the task being calculated with due regard to lead and lift. The responsibility of the Collector for the administration of famine relief in his district generally, and the subordination to him, except in matters of purely professional detail, of all officers of every department engaged in administration of it has been maintained as laid down in the Famine Code. I am directed to append a copy of the instructions referred to, which were circulated with the Resolution of this Government in the Public Works Department, No. 420M.P.I, dated the 25th January 1897. They will be followed in carrying out smaller works under the direct control of civil officers also, so far as possible.

The following statement shows the average wages paid to the male unit in each district at the close of the period:—

	On task-work.	Irrespective of task.
	A. P.	A. P.
Saran	1 2	1 2
Champaran	1 3	1 8
Muzaffarpur	1 4	1 9
Darbhanga	1 5	1 4
Patna	2 4	2 3
Shahabad	1 7	1 7

In Patna the wage given was too high, and the Commissioner's attention has been directed to effecting a reduction of it.

The following statement shows the reported cost per 1,000 cubic feet of earthwork :—

Week ending—	5th December.	12th December.	19th December	26th December.	2nd January.	9th January.	16th January.	23rd January.	30th January.
1	2	3	4	5	6	7	8	9	10
	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.
Saran	2 5 10	2 2 0	2 15 2	3 14 10	3 1 7	2 5 6	2 12 4	2 15 5	2 12 4
Champaran	1 10 6	2 0 11	3 5 3	5 15 3	5 6 3	7 12 4	6 5 7	5 14 8½	4 14 4
Muzaffarpur	1 5 7	1 5 1	1 4 6	1 1 5	1 2 1	1 0 2	1 3 4	1 0 10	1 1 6
Darbhanga	2 4 7	2 2 6	2 2 0	2 7 10	4 3 6	3 6 3	3 0 11	2 9 2	2 14 7
Patna	1 14 3	2 1 6	1 15 4	1 15 9	1 15 9	2 1 0	2 1 7	2 1 0	1 13 9
Shahabad	1 10 8	1 9 1	1 9 11	1 13 0	1 12 7	1 15 10	2 7 8	2 15 1	3 7 2

It will be seen that at the end of the period under report the cost rate was moderate in all the districts except Champaran where, however, the Collector reports that the relief-works are many of them tanks with long leads, averaging 150 feet. There was a great improvement in Champaran during the last week of the period under report. In Muzaffarpur the rate per 1,000 cubic feet was extremely low and appears to show that the task exacted is excessive. The Collector's attention has been called to the matter.

The number of relief works open at the close of the period under report was 191, and on the 9th February 194.

5. *Private relief works.*—The private works which were mentioned in paragraph 5 of my letter of 15th January, and in paragraph 7 of my letter of 16th December, as being carried on by indigo-planters and zamindars in the Champaran district, have now been mostly closed, and the Government organisation has taken their place; but a few works still remain open. In Saran six works continue to be provided by the Hatwa Raj ; and the Maharaja of Darbhanga has relief works open in Muzaffarpur, and on a large scale in the Darbhanga district. The information regarding the private relief-works is still incomplete; but, so far as reports received show, it would appear that about 13,000 people were employed on the Maharaja's works in Darbhanga on Saturday, 30th January. There are also smaller private relief-works open in a few places.

6. *Poor-houses and village relief.*—There were eight poor-houses open under Government at the end of January, and more have since been opened. Private poor-houses and kitchens are reported to have been opened by zamindars and indigo-planters, and relief committees were formed at various places in all the districts except Patna. It has not yet been found necessary to provide artizans with relief in their own house; but stocks of cotton have in Champaran and Darbhanga been laid in, so as to provide work for women.

7. *Charitable relief.*—At the close of the period under report, the number of adult units in receipt of gratuitous relief was 4,798 in Saran, 4,255 in Champaran, 2,418 in Muzaffarpur, and 41,942 in Darbhanga : in the first named and last named districts the numbers gratuitously relieved were 57·84 and 58·74 per cent., respectively, of the numbers relieved on works. As regards Saran, Sir Alexander Mackenzie has already, in paragraph 4 of my letter of the 15th January, expressed his concurrence with the view of the Commissioner and Collector, that the organization of poor-houses and charitable relief was, in the peculiar circumstances of that district, more important than the provision of relief-works. In Darbhanga, the dependants of labourers on relief-works are fed chiefly in their own homes and not at the works; and the Collector and his officers were so fully occupied in controlling the rush to the relief-works that they had no time to give close attention to the classification and scrutiny of recipients of gratuitous relief. The village organisation for distribution of gratuitous relief is also reported to have been completed earlier in this district than elsewhere.

8. *Physical condition of the people.*—The public health continues to be unusually good, and there is very little fever considering the season of the year. The only sign of deterioration to be found is in the slightly inferior physique of the persons admitted to some of the jails. From Darbhanga it is reported that two beggars died of starvation, and in Saran five deaths among waifs and strays are reported to be due to want of nourishment combined with cold and illness, but, as the Collector remarks, such cases occur in ordinary years

9. *Loans.*—The liberal offers of Government with regard to loans for village works have not met with a very ready response, although district officers have made them widely known. Only in Saran have many applications for the loans been received. Rs. 88,000 odd have been advanced under the Agriculturists Loans Act.

10. *Food-stocks and importation of grain.*—During the five weeks under report the imports of food-grains into the Patna Division amounted to 7,71,186 maunds, and the exports to 3,75,650 maunds, leaving a balance of 3,96,536 maunds in favour of the Division. There were large imports of Burma rice, which has, it is reported, found its way to almost every large mart in the Division, but the statements submitted do not distinguish it from other kinds of rice. Prices have not risen recently, but show rather a tendency to fall; and the Commissioner now hopes that private trade will not allow stocks to run out.

11. Statements A and B are appended, giving the information required for the districts of the Patna Division; similar statements regarding the distressed districts of the Presidency Division will be submitted to the Government of India with a separate letter as soon as they are received.

No. 487Agri. (Fam.), dated Calcutta, the 16th February 1897.

From—M. FINUCANE, Esq., Secretary to the Government of Bengal, Revenue Department,

To—The Commissioner of the Patna Division.

I AM directed to acknowledge the receipt of your letter, No. 283-F.G., dated the 6th February 1897, with its enclosures, reporting on famine relief operations in the Patna Division for the second half of January 1897, and in reply to forward a copy of my letter No. 455-Fam., of this date, to the Government of India, and to convey the following observations and orders of the Lieutenant-Governor.

2. *Paragraph 4 of your letter.*—The Lieutenant-Governor notices with satisfaction that you are now in a position to report that the prospects of crops in the district of Patna are excellent, and that a full average *rabi* crop may be expected in all districts of the Division.

3. *Paragraphs 13 and 14 of your letter.*—The state of the Bhabhua subdivision of the district of Shahabad, in which distress was not felt when you visited it in December last, is now reported to be such as to require immediate measures of relief. Mr. Marindin, the Collector, who has recently spent some time there on tour, finds that considerable deterioration in the condition of the affected tract has, since your visit, set in, of which no intimation had been given by the Subdivisional Officer or the local police. The Lieutenant-Governor considers the failure of the Subdivisional Officer and the police to keep the Collector fully informed of the condition of the people very unsatisfactory, and desires that an explanation be called for from the former and submitted to Government. His Honour has no objection to the affected tracts in the Sasaram subdivision being administered, for purposes of famine relief, as if they were part of the Bhabhua subdivision.

4. *Paragraphs 19 to 21 of your letter.*—The Lieutenant Governor agrees with the conclusion arrived at by yourself and the Collector that distress will not in all probability largely increase in the district of Saran, and hopes that when the *rabi* crops (which are very important in that district) are harvested, the numbers on relief works and in receipt of gratuitous relief will decline. His Honour thinks that the estimates of the requirements of the district, prepared by the Superintending Engineer, Mr. Mills, were very excessive.

5. *Paragraph 23 of your letter.*—The number of persons in receipt of gratuitous relief under Government in the district of Saran during the week ending 9th January is shown at 19,729. I am to request that an explanation may be submitted of the large number in that week compared with the lower numbers in other weeks.*

* 2nd January	...	4,207
16th „	...	3,568
23rd „	...	5,836
30th „	...	4,486

6. *Paragraph 36 of your letter.*—The orders of the Government of India on the question of the examination of district accounts have been communicated to you with Government order No. 429(Fam.), dated the 13th February 1897. The Government of India direct that the accounts will be audited in the Accountant-General's office in Calcutta, but Mr. C. W. Sandford will visit the district and subdivisional offices, examine the method of keeping the accounts, advise the responsible officers as to registers and details of classification, and bring to notice any points on which the issue of orders appears to be desirable. This will, it is believed, considerably facilitate the audit of the district accounts by the regular audit officers. The Government of India have accordingly been moved to sanction the deputation of Mr. Sandford to special duty under this Government.

7. *Paragraph 41 of your letter.*—I am to request that you will draw the attention of the Collector of Muzaffarpur to the figures given in column 10 of his statement of gratuitous relief (Form 7), and report to Government whether they represent the average daily dole or the dole given for the whole week. For the week ending the 23rd January, the dole shown is Re. 0-1-6, which can scarcely be sufficient for seven days. On the other hand, if the figures for the other two weeks, Re. 0-3-4 and Re. 0-3-2, represent the average daily dole, they would be clearly excessive.

8. *Paragraph 52 of your report.*—The Lieutenant-Governor agrees with you that having regard to the great rush of labourers to relief works, Mr. Carlyle and Mr Macpherson and their officers deserve credit for what they have been able to effect in meeting the rush and for their efforts to restore

order and insist on task work being exacted; but His Honour does not understand why the staff in Darbhanga should be so bad as it is described to be in paragraph 12 of the Collector's report No. 809G., dated the 2nd February 1897.

9. *Paragraph 53 of your letter.*—As regards the large numbers shown on gratuitous relief in Darbhanga, the Lieutenant-Governor agrees with you in thinking that they are justified by the circumstances stated in paragraph 5 of Mr. Carlyle's report, viz.—

(1) that the great rush of labourers to relief works made it impossible for the Collector and the Charge Superintendents to give the matter all the attention it deserved;

(2) that there are practically no dependents on the relief works in Darbhanga, as the dependents of the relief workers receive gratuitous relief from the Circle Officers at their homes.

10. *Paragraphs 51 and 59 to 63 of your letter.*—The table given in paragraph 59 shows the principal statistics, as regards numbers on relief works, cost-rates, wages and numbers in receipt of gratuitous relief, of the three weeks ending the 30th January, in comparison with those of the fortnight ending the 9th idem. The Lieutenant-Governor notices with satisfaction the reduction in the cost-rate per 1,000 cubic feet of earthwork in the district of Darbhanga, as compared with the half-month ending the 9th January. With reference to columns 3 and 11 of the table, His Honour further notices with satisfaction that the average outturn of work per male unit per diem has increased, but there is still room for further improvement, especially in the case of Champaran, where the average task, as observed by you, is smallest. In Muzaffarpur, on the other hand, the rate per 1,000 cubic feet is extraordinarily low, and there is danger that the tests enforced are too stringent. The low outturn of work per unit in Champaran is believed to be due to a large number of dependants and sickly persons being included amongst the relief workers. The Collector should take steps to remedy this in the manner suggested in paragraph 60 of your letter by sending more dependants and sickly persons off the relief works to their villages, or, if kept on the works, by showing them as dependants on gratuitous relief.

As observed in paragraph 61 of your letter, although the average daily wage per male unit now shows greater uniformity than in previous periods, the rate in Patna (Re. 0-2-4) is still very high. I am again to request that you will draw the Collector's attention to this, and ascertain why the rate is so much in excess of that in other districts. The average doles of gratuitous relief in the districts of Patna, Muzaffarpur and Darbhanga, as shown in column 17 of the table, are Re. 0-2-1, Re. 0-2 0 and Re. 0-2-8, respectively. The Lieutenant-Governor does not understand why the doles allowed are so high.

11. *Appendix A.*—No expenditure has been shown in column 16 under the head of bounties for wells. The total grant sanctioned for this purpose for the current year is one lakh. I am to enquire whether nothing has been spent under this head.

12. I am also to draw your attention to the fact that columns 2 to 6 of the Famine Statement B have not been filled up by all of the District Officers in accordance with the instructions conveyed in Government order No. 173(Fam.), dated the 25th January 1897. The result has been that in the statement submitted by this Government to the Government of India, these columns have been left blank. I am to request that when submitting your next and future reports for the second half of the month, you will see that the Famine Statements B accompanying the district reports are filled up strictly in accordance with the instructions of 25th January above referred to.

13. In paragraph 23 of your previous report No. 55F.G., dated the 20th January 1897, it was stated, with regard to Champaran, that there was some misunderstanding between the Collector and his District Engineer, and that the latter did not fully carry out the orders he received. I am to enquire what notice has been taken of the District Engineer's conduct.

No. 283F.—G., dated Bankipore, the 6th February 1897.

From—J. A. Bourdillon, Esq., Offg. Commissioner of the Patna Division,
To—The Secretary to the Government of Bengal, Revenue Department.

I have the honour to forward herewith my report under sections 13 and 24 of the Famine Code for the second half of January. The figures are those of the weeks ending 16th, 23rd and 30th January.

PART I.—INTRODUCTION.

2. Since the date of my last report I have made a short tour in the Darbhanga district accompanied by the Honourable Mr. Glass, C.I.E., Chief Engineer, and by the Collector Mr. Carlyle. Leaving Bankipore on the night of the 24th I reached Darbhanga on the morning of the 25th (Monday), where Mr. Glass joined me *viâ* Mokameh a few hours later On that day we visited a tank and a road in the vicinity of Laheria Sarai, and discussed many matters with the Collector. On the 26th (Tuesday) we drove and rode 13 miles out to the Raghaoli tank on the Kamtaul road, where about 3,000 people were at work: Mr. Geneste, Officiating District Engineer, and Mr Blackwood, Assistant Magistrate, accompanied us. On the 27th (Wednesday) we drove and rode out to Banipati (32 miles in all) *viâ* Kamtaul and Basaitha, visiting on the way a road and tank at the latter place, and passing for several miles along a road which had been raised and repaired as a relief work. At Basaitha we were met by Mr. H. U. Baker, Superintendent of the Banipati charge, and on reaching the latter place we found Mr. Smither, C.S., Subdivisional Officer of Madhubani, and Mr. R. King, Assistant Manager of the Darbhanga Raj, awaiting our arrival. On the 28th (Thursday) we drove into Laheria Sarai *viâ* Rahika (32 miles), passing on our way some irrigation works carried out by the Darbhanga Raj as relief works, and travelling along the metalled road from Darbhanga to Rahika, the sides of which are being raised and improved by famine labour. I left Laheria Sarai at midnight of the 28th, and reached Bankipore the next evening after halting for a few hours at Muzaffarpur to consult Mr. Stevenson-Moore, the Settlement Officer, as to the curtailment of Settlement and Survey proceedings, and the deputation of his subordinates to famine relief work Mr. Glass returned to Calcutta the same day.

3. During this tour we found that the conditions under which work was being carried out were much the same as those stated in my last report as existing in Champaran. Appropriate orders were passed on all points which required them.

PART II.—DISTRICT REPORTS.

4. *Patna.*—There is nothing in the report from this district which need cause anxiety. Prices are stationary, in fact that of rice is falling in some places owing to the importation of Burma rice. Crop prospects are excellent, and it is clear that a full average *rabi* crop may be expected. The *rahar*, which here as elsewhere is a fine crop, will soon be ready for consumption.

5. In the matter of food-grain traffic, the excess of exports hitherto reported has now turned into one of imports. The figures given are those for railway traffic for three weeks, and of boat and steamer traffic for two weeks. It is therefore difficult to compare them with the figures given in previous returns; but taking them as they stand, the Collector's report shows that for the period under review the imports exceed the exports by 9,269 maunds, whereas in my last two reports the excess was 56,433 maunds and 7,984 maunds on the side of exports. Of the imports, more than three-fourths or nearly 90,000 maunds, were rice, and 13,900 maunds were "other food-grains." Of the rice, 11,535 maunds were consigned from Howrah; doubtless Burma rice, and a large proportion of the remainder came from stations in the Burdwan Division. Of the exports, three fourths were "other food-grains," viz., more than 75,000 maunds.

6. The Collector gives figures for the imports of rice in January of the years 1895, 1896 and 1897; but I do not wait to examine them here, as I hope to do this in a separate memorandum hereafter, when dealing with the whole question of food-grain traffic in the present and past years.

7. No general distress is anywhere reported: the agricultural poor are said to be quite safe; but, as was expected, there is some distress among the dependent poor, the beggars and wanderers. The Collector is having his village lists checked, and will shortly start poor-houses; the former operation should already have been completed, the latter will be taken up in a day or two when Mr. Inglis returns from a prolonged tour in the south of the district.

8. I await his return also to go into the question of relief works with him and the District Engineer. I am not satisfied that they are required, and that work should not be carried on under ordinary conditions. The rates of wages given in Form No. 7 are a good deal above famine rates, and the daily outturn of work per male unit is about twice as much as is expected for famine labourers according to Mr. Glass' calculations.

9. Public health continues good, and the state of health of prisoners admitted into jail is not unsatisfactory.

10. *Gaya.*—Mr. Savage has little to report. The crops are excellent and prices are practically stationary: the stock of food is reported to be ample, and the import and export traffic is still very small, the imports being 4,567 maunds against 3,210 in the previous half-month, and the exports 5,668 maunds as against 7,321. Three-fourths of the imports are "other food-grains," and almost the whole of the exports consist of the same and of Indian-corn.

11. The only part of the district where there are any signs of distress is the Grand Trunk Road with its numerous travellers, mostly, I understand, from the North-Western Provinces. The Mohunt of Bodh-Gaya at Kusa, and a Relief Committee at Aurungabad, are affording relief in the shape of cooked food at kitchens: as these places are about 40 miles apart, I am suggesting to the Collector that kitchens might be opened at other spots along this well-frequented route.

12. Since writing the above, I have been reading the Collector's tour diary for January, and find that he estimates a bumper *rabi* crop all over the Aurungabad subdivision.

13. *Shahabad.*—I regret to say that the Collector's present report shows that distress is increasing in the Bhabua subdivision, and that immediate measures are required to relieve it. This tract has always been the weak spot in the district, but when I was there with the Officiating Collector in December last, the people were not in bad case. Mr Marindin has now spent some time there on tour, and finds that considerable deterioration has set in, of which no intimation had been given by the Subdivisional Officer or the local police.

14. The whole of the Bhabua subdivision south of the Grand Trunk Road, including the hills, has from the first been considered affected, although I had hoped that it would be possible soon to remove it from that category. Mr. Marindin now reports, however, that this cannot be done, and that distress is becoming acute. He has also added two more areas which are in the Sasaram subdivision. The first of these, though placed second in his report, is that of the Chenari (or Chundaree) outpost, and consists of the low country in the extreme south-west corner of the Sasaram subdivision; its area is 60 square miles and its population 27,000: relief here is wanted at once. The second area is the whole of the hilly tract in the south of the Sasaram subdivision, usually called the Rhotas plateau. This will require relief in May, and, as the *bhadoi* there is insignificant, it will require watching till next December when the winter rice comes in. The area of this tract is 220 square miles, but the population is only 2,000. The Collector proposes to administer both these tracts as if they were part of the Bhabua subdivision; there seems to be no objection to the proposal.

15. In the Bhabua subdivision and the attached tract of the Chenari outpost relief works are required. The Hata-Durgaoti road, which I hoped it might be possible to close, has remained open, and the attendance has steadily increased from 931 male units to 1,3.0. The number of persons actually present on the 30th January was 2,274. The condition of the labourers is said not to be good, but the Collector and the District Engineer are now on the spot, and are doing what is necessary. A special report has been asked for. The Collector is doubtless right in saying that a large number of those entered as receiving a daily wage irrespective of task,

which has always been high in this district, should have been treated as dependents, and should have received gratuitous relief either on the works or in their homes. I have more than once called attention to this point. The cost per 1,000 cubic feet given in Form No. 7 is extraordinarily low if the measurements are correct. It is remarkable that the wage earned by male units both on task work and irrespective of task should be the same. A relief work has been opened in the Chenari outpost.

16. Gratuitous relief has been given for some time at Bhabua by an unofficial Committee. The Collector has arranged to take over the work and place it on a proper footing by giving cooked food and by sending outsiders back to their villages. I have from the first been urging the Collector to complete his village lists; and as this has now been done, Circle Officers can start at once the administration of gratuitous relief in villages throughout the affected area. It has already been reported that poor-houses and kitchens have been opened at Dehri and elsewhere along the Grand Trunk Road.

17. The Collector's list of charges and circles has not yet been received, but there should be no trouble in setting the organisation to work at once in so limited an area. I am making arrangements for two Charge Superintendents to join at once.

18. The condition of the rest of the district is good. The prospects of the *rabi* are excellent, the showers which have fallen having been beneficial on the whole: the public health is unusually good, and prices are stationary. As regards food-grain traffic, the railway figures, which are for the three weeks ending the 30th ultimo, show that the imports were 46,806 maunds, as against 32,454, and the exports 23,647, as against 16,460: considering the longer period covered, the volume of traffic is about the same, and the balance in favour of the district is 23,159 maunds instead of 15,994. Almost the whole of the imported grain is rice, mostly from the Burdwan Division, and almost the whole of the exports are "other food-grains," but a good deal of this is going eastward in exchange for the rice. The Collector's particular attention has been drawn to the necessity of considering whether the hill tracts in the south of Shahabad should not be specially treated under the permission granted by the letter of the Government of India No. 298F. of the 20th January 1897. Bhabua itself is very inaccessible, and I have to-day, in a separate letter, addressed to the Public Works Department, urged that a telegraph office should be opened there without delay.

19. *Saran.*—The Collector, encouraged by the favourable prospects of the *rabi* crops and by the conclusions at which he has arrived after an examination of the resources of the district, now takes a much more favourable view of the situation.

20. A small change has been made in his computation of the area to be affected, and his estimates may now be taken as complete. In Siwan and Gopalganj some increase of distress is reported, but in the Sadar subdivision Mr. Earle now considers that the zenith of distress has been reached, and that his numbers both on relief works and in the receipt of gratuitous relief, will not materially increase. Indeed, he goes so far as to say that he expects to be able by the 1st April to close relief works in the greater part of the district, and to largely curtail charitable relief.

21. These conclusions are based partly on a consideration of the *rabi* crop which is now estimated at 10 or 12 annas for the district, and partly on an examination of the information available as to imports, food-stocks and consumption. Mr Earle's note on these subjects is not before me, and I am unable to appraise the value of his deductions. I need only say here that they strongly corroborate the opinion I have held from the first as to the improbability of general distress in this district; but they differ so much from the latest estimates prepared by the Superintending Engineer, Mr. Mills, after consultation with the Collector, that I am unable to accept them for the present without further enquiry.

22. Food-grains are pouring into the district, and Mr. Earle reports that Burma rice is now for sale almost everywhere. The fact illustrates once more the security which is afforded to this district by the circumstance that it always imports the greater part of its food stuffs so that its grain-dealers are familiar with every detail of the import trade. The imports by rail in the three

half-months ending 21st December and 15th and 31st January, have been respectively 74,405, 85,907, and 93,351 maunds, while exports have been 5,951, 16,014 and 6,215 maunds respectively: the balance in favour of the district during the last half-month is, therefore, 87,136 maunds, and the total excess of imports over exports since the middle of December has been 2,25,483 maunds, or more than 8,000 tons. The Revelganj figures are far smaller, but show an excess of imports amounting to 5,156 maunds. Lastly, a muharrir posted to register traffic at the principal ghat on the Gandak reports an average of 1,000 maunds a week from the Champaran side; this is probably rice from Nepal. The Collectors of Shahabad, Champaran and Darbhanga all report that grain is going from their districts into Saran.

23. The following abstract statement gives at one view information as to the progress of numbers on relief works and in receipt of gratuitous relief during the past five weeks:—

Week ending.	No. of works open.	Average Daily Number of Male Units on—			
		Task work.	Daily wage irrespective of task.	Gratuitous relief including dependents.	Total.
1	2	3	4	5	6
		A—Under Government Management.			
2nd January	10	2,211	199	4,207	6,617
9th „	17	3,884	343	19,729	23,956
16th „	22	7,162	562	3,568	11,292
23rd „	24	8,158	731	5,885	14,774
30th „	23	9,185	947	4,486	14,618
		B—Under the Hutwah Raj.			
21st January	6	1,858	160	931	2,949
28th „	6	1,734	186	558	2,478

24. The above figures, which are taken from the statements forwarded by the Collector, differ from those given in the body of his report, but I have no time to obtain an explanation before submitting this report. There seems to be some doubt as to the numbers on gratuitous relief during the week ending the 9th January. Taken as they stand above, they show that the numbers are not excessive, the largest work not having more than about 6,000 persons, and most of them being much smaller than that. The outturn per male unit is very small, being on the average 28, 25, and 29 cubic feet in the three weeks under report. The average wage earned has, however, been kept very low, so that the rate per 1,000 cubic feet (if the measurements have been correct) is only about Rs. 2-13-6, which is wonderfully low. The total number of persons employed in the last week under report was as follows:—Men 25,447, women 32,962, big children 18,492, small children 6,740, total 83,641. In this district the number of men as compared to the women and children is necessarily small for reasons already explained, and this partially explains both the smallness of the outturn and the low average wage per male unit. The number of men on daily wage irrespective of task is large for reasons explained by the Collector. No persons are entered as dependents in Form No. 5: it is clear that the dependents of relief workers are among those relieved in their villages, and in thus treating them, Mr. Earle has adopted the right system. In the Raj relief works the average daily wage and the cost per 1,000 cubic feet were a little higher.

25. The number in receipt of gratutous relief has again been large; but, as has already been stated in previous reports, the circle organization was early completed in this district, and, in comparison with other districts, many more persons are relieved at their homes instead of on the works. The remarks in Mr. Earle's 16th paragraph are sound.

26. Some small relief is being given in towns, and poor-houses have been opened at 7 places in all, of which 2 are maintained by Government, 4 by the Hutwa Raj, and 1 by the Zamindar of Manjha.

27. *Champaran.*—Mr. Macpherson's report shows that during the period no great change has occurred in the condition of the district, and affairs appear to be proceeding in an even course.

28. The prospects of the crops are somewhat better; showers fell over the greater part of the district on the 15th and 22nd January, giving a rainfall which reached nearly three-fourths of an inch at Bagaha, and nearly half an inch at Bettiah. Prices are steady with a tendency to fall, thanks partly to the improved prospects of the *rabi*, and partly to the increased importation and the expected arrival of Burma rice in the district. In writing of Darbhanga below I notice the amount of grain consigned to Champaran from Semaria Ghat, and Mr. Macpherson's figures confirm the information I received at Samastipur. A careful watch is being kept by the Collector, and by the Charge Superintendent, Mr. Still, on the remote tracts which lie to the west and north of Bettiah; it is satisfactory to learn that grain is coming freely into Chainpattia, which is the principal market to the north of Bettiah, and that prices have fallen a little at Ramnagar and Bagaha.

29. The public health is remarkably good, though the condition of prisoners admitted to Motihari Jail is not so good as in ordinary years.

30. Imports of food-grain have increased and exports decreased, as compared with those of the period comprised in my last report. Mr. Macpherson shows that the average excess of imports in each of the last three weeks was 3,391 maunds as against an average excess of 1,743 maunds for each week of the previous period. The total net importations in the three weeks have been 14,745 maunds, or just double those of the previous fortnight, and the exports were 4,573 maunds. The balance in favour of the district is, therefore, 10,172 maunds against 3,486. Of the imports, paddy accounts for 9,356 maunds, of which 5,354 came from Howrah. The Collector says that Mr. Hill, of Tarkaulia, has been importing largely for his tenants. Most of the exports went to Saran.

31. The following abstract statement shows at a glance the progress of relief works and gratuitous relief during the period under report and the previous fortnight:—

Week ending—	Number of works open.	Average daily number of male units on—			
		Task work.	Daily wage irrespective of task.	Gratuitous relief including dependents.	Total.
1	2	3	4	5	6
2nd January	.....	27,849	1,107	1,857	30,313
9th „	43	43,163	582	2,404	46,149
16th „	.....	81,373	1,874	3,532	86,779
23rd „	.....	74,977	1,216	4,604	80,697
30th „	61	74,264*	1,746	4,730	80,740

* Including 2,153 on major work taken over by the Public Works Department.

32. In my last report it was stated that the rush of persons swarming to the relief works in this district had been so great that for the time being the officials had been overwhelmed. Great efforts were made, however, by all concerned to regain control, and I instructed the Collector that no new works should be opened unless complete arrangements had been made for controlling them, while at the same time he was directed to close for a day or two works where the crowd was too great until tasks could be set out. He was also told to be strict in allowing no more people to come on to a work than it was capable of containing. These orders have been carried out as far as possible, and at the same time the Public Works Department began to take over the larger works in accordance with the policy now decided on. The result has been that the rush has been checked, there has been a small advance in the outturn of work as shown in Form No. 7, and a reduction in the cost per 1,000 cubic feet. I make no detailed comments on the Collector's rates of wage and his remarks, as I am in daily expectation of receiving the modified

version of Public Works Department Resolution No. 420 as regards tasks and wages.

33. The number of persons on private relief works is now comparatively small. The Collector's further report on this subject is awaited.

34. No poor-houses have yet been opened. The Collector will be urged to push on the work of construction.

35. Gratuitous relief, as a reference to Form No. 6 will show, has been given in three ways—partly by the police under sections 12 and 166 of the Famine Code, partly on the works to dependents of relief workers under sections 83 and 84, and partly in the villages under Chapter V of the Code. The second method has been most largely employed. As soon as the local officers find leisure, it will no doubt be best to adopt the last method more and more largely, thus clearing the works as far as possible of all but labourers. At present the circle organization is not in full work, and I am advising the Collector to extend its operations.

36. I agree with the Collector when he urges in his 26th paragraph the importance of deputing trained officers to examine the district accounts, and trust that orders will soon be passed on the subject.

37. I also invite the attention of Government to the allegations in the Collector's 7th paragraph. I have asked him to make a special representation on the subject, and will look into the matter. It was understood at the Sonepur Conference that the Manager and Chief Engineer, Bengal and North-Western Railway, would make every concession possible to allow of the freest movements of food stuffs over his line of rail.

38. *Muzaffarpur.*—Matters in this district remain in much the same condition as before, except that larger numbers are now coming on to relief works and for gratuitous relief, and that there has been some falling off in the importation of food-grains.

39. As regards works, there were open on the 31st January 23 works distributed as follows, as against 12 on the 9th January:—Sadar subdivision 13, Sitamarhi 8, Hajipur 2. The average daily number of male units employed on tasks in each of the three weeks covered by the present report was 3,014, 11,723 and 7,981 respectively, against 1,582 and 2,322 in the two weeks dealt with in my last report. The numbers on daily wage irrespective of task have advanced to 225, 184 and 217 from 92 and 136, and the average daily number of recipients of gratuitous relief has increased from 151 in the week ending 9th January to 1,035, 4,291 and 1,928. It is explained that in the second week of the present period there was a rush of persons for gratuitous relief, which was subsequently controlled.

40. All these figures show that distress is growing more acute, and this is stated by the Collector in his report. He notes also that in his district the administration of relief works is in a transition state between the Famine Code System and that recommended by the Government of the North-Western Provinces. As final orders on this subject are now under issue, I make no comment on Mr. Hare's remarks, nor have I passed orders on them. I will only note here that the outturn of work per male unit disclosed by his Form No. 7 is extraordinarily high, and his cost per 1,000 cubic feet so low that it is difficult to understand how it has been attained by famine labour. One explanation of the figures lies in the fact that out of a total of 47,886 male units employed on task work during the week ending the 31st January, the number classed as A, or professional labourers, is 28,729, and there are no C or D class workers: again, out of the total of 55,723 labourers of all sorts, the number of males is 35,571, or nearly 64 per cent. I propose to make a tour in Muzaffarpur next week, and will look into these results with the Collector.

41. The average dole given in column 10 of the same Form (No. 7) is probably the average weekly dole. To obtain the daily allowance it should be divided by 7.

42. Private relief works and gratuitous relief are being carried out by the Darbanga Raj in their villages in the Muzaffarpur district, but no reliable information is available. I will endeavour to arrange with Messrs. Hare and Bell that they shall be punctually submitted in future.

43. Two poor-houses have been opened, at Sitamarhi and Shiuhar, besides that at Parihar managed by the Darbhanga Raj, apparently on very liberal terms. Three others are under construction. Mr. Wilson of Pupri

has opened a relief kitchen at which 126 persons were fed on the 30th ultimo. I consider this a crucial test of distress, and have informed the Collector that no objections need be raised to the opening of kitchens under the same conditions by other planters, if they wish to do so.

44. As regards the traffic in food-grains, the net imports into the district have been 55,935 maunds, and the net exports 11,111 maunds, giving a net result in favour of the district of 44,824 maunds: this compares unfavourably with the balance of 43,163 maunds reported last time as the result of a fortnight's operations. Of the imports, 35,192 maunds were rice, including 6,418 maunds from Howrah, mostly Burma rice it is believed, as to which the Collector's remarks should be noted. Of the exports, 6,720 maunds represent rice.

45. The Collector's remarks as to agricultural loans will be separately dealt with.

46. *Darbhanga.*—As in the case of Muzaffarpur, no material alteration has to be reported in this district save in respect of the numbers on relief works, and in the receipt of gratuitous relief.

47. Prices show a tendency to fall slightly under almost all heads. Crop prospects are fairly good, and the Collector estimates a full average *rabi* crop in the south of the district, an 8-anna crop in the centre, but no more than a 4-anna crop in the north. The public health continues good.

48. Two poor-houses have been opened, and another is in course of construction. The Collector proposes to open several others after consulting his Charge Superintendents; he is now on a tour of visitation to each of them.

49. The tide of food-grain traffic has turned strongly in favour of the district. For the fortnights ending 26th December and 9th January, the excess of exports over imports was 12,596 and 12,158 maunds, respectively; the result of the traffic of the three weeks now under report is an excess of imports equal to 36,792 maunds, the imports having been 50,058 maunds and the exports only 13,266 maunds. Of the former, rice accounts for 20,504 maunds, paddy 15,943 maunds and "other food-grains" 13,387 maunds, and the rice includes 7,036 maunds from Howrah. Two-thirds of the exports come under the head of "other food-grains." When at Samastipur on the 28th ultimo, the station-master reported that he could not send wagons fast enough to Semaria Ghat to carry away the grain coming to it: he stated that it was going in about equal volume up the Bettiah and Chapra branches. He further informed me that Burma rice was selling freely in the Samastipur bazar at the same price as the common country rice, although it was of better quality.

50. As regards relief works and gratuitous relief, the following abstract, taken from Form No. 7 (Famine Statement E), shows clearly the progress in numbers during the last five weeks:—

Week ending—	Number of works open.	Average daily numbers of male units on—			
		Task work.	Daily wage irrespective of task.	Gratuitous relief including dependents.	Total.
1	2	3	4	5	6
2nd January ...	29	16,159	273	9,949	26,381
9th " ...	27	21,165	561	15,133	36,859
16th " ...	47	60,713	234	29,281	90,228
23rd " ...	77	67,582	872	43,316	111,770
30th " ...	83	89,232	2,988	53,228	145,448

51. These figures which purport to include those for the Raj works are, however, very incomplete, inasmuch as for the week ending the 9th instant several returns were not received in time for incorporation, and the figures for Raj works and gratuitous relief are incomplete throughout. In these circumstances, it is difficult to criticise with confidence the figures presented. So far as they go, however, they purport to show that the work done daily by each male unit averaged as follows during each of the five weeks: 21·1 cubic feet, 26·1 cubic feet, 28·9 cubic feet, 34·4 cubic feet and 29·09 cubic feet. The wage earned by each male unit has been kept low throughout, and the reported cost per

1,000 cubic feet has been as follows: Rs. 4-3-6, Rs. 3-6-3, Rs. 3-0-11, Rs. 2-9-2 and Rs. 2-14-7.

52. In this connection I desire to call attention to paragraph 12 of the Collector's report submitted herewith, which contains a simple statement of facts. My visit to this district, which has already been reported above in paragraph 2, showed me very clearly the difficulties with which Mr. Carlyle and his officers have had to contend, and I consider that they deserve credit for what they have been able to effect. As soon as the large works are taken over by the better trained and more numerous staff of the Public Works Department, I have no doubt that the administration will settle down and a full task be exacted.

53. As regards the large numbers on gratuitous relief, attention is also invited to Mr. Carlyle's 5th paragraph, which in my opinion shows that his action is justified by the circumstances of the case.

PART III—CONCLUSION.

54. The leading features in the famine history of the three weeks to which this report refers are four, viz., the considerable increase in numbers in Muzaffarpur and Darbhanga, some check in the increase of numbers in Champaran, improved prospects in part of Saran, and the report of acute distress in the Bhabua subdivision of Shahabad. This period has also witnessed the further development of the policy by which all but small relief works are to be made over for execution to the Public Works Department.

55. Crop prospects are good everywhere. During part of the time the weather was unsettled, and showers have fallen at several places which have had the effect of freshening the *rabi*, and have done no injury, not even to the poppy crop. *Rahar* and sugarcane are good everywhere, and I never remember to have seen such good crops of mustard. The reports of the poppy crop, which I receive regularly through the courtesy of the Opium Agent, are without exception favourable; and given suitable weather for the next few weeks, the outturn should be most satisfactory, thus bringing into the Division large sums of money for distribution at the beginning of April. I believe I have already reported that Mr. Grierson, in order to assist the cultivators, has this year arranged for a third distribution of advances, which took place in the month just past.

56. Prices are practically stationary, with a tendency to fall. Burma rice has reached most of the large marts in the Division, and is reported as freely sold almost everywhere, though in parts of Muzaffarpur it is stated that a prejudice exists against its use.

57. In food-grain traffic there has been considerable development, as the following table will show:—

Districts.	Imports.		Exports.		Excess—I. or E.		Remarks.
	Fortnight ending 9th January.	Three weeks ending 30th January.	Fortnight ending 9th January.	Three weeks ending 30th January.	Fortnight ending 9th January.	Three weeks ending 30th January.

Champaran ...	7,110	14,745	3,624	4,573	I. 3,486	I. 10,172	
Muzaffarpur ...	58,836	55,935	15,673	11,111	I. 43,163	I. 44,824	
Darbhanga	36,012	56,058	48,170	13,266	E. 12,158	I. 36,792	
Total ...	3,03,426	4,67,760	1,96,409	1,79,241	... ...	.....	

58. This statement compares as usual the statistics of the period under report with those of the previous period, but as I am now reviewing the operations of three weeks as against two dealt with in my previous report, it is fair to make a deduction of one-third from the net result in each district. At the time of my last report, Patna, Gaya and Shahabad all showed an excess of exports over imports, now Gaya alone remains in that category; and whereas the total imports have increased more than 50 per cent., the exports have fallen off by 8·74 per cent. These figures imply that private trade is fully alive to the necessity of supplying the depletion of stocks, and seem to me to afford satisfactory evidence that stocks will not be allowed to run out, nor prices to rise to a prohibitive rate.

59. As regards relief works and gratuitous relief, the statement below supplements what has already been said in dealing with the district reports, and presents in tabular form some of the principal statistics connected with the subject:—

District.	Fortnight ending January 9th.								Three weeks ending January 30th.							
	Task work.				Daily wages irrespective of task.		Gratuitous relief.		Task work.				Daily wages irrespective of task.		Gratuitous relief.	
	Average daily number of male units.	Work done by each per diem.	Wages earned by each per diem.	Cost per 1,000 cubic feet.	Average daily number of male units.	Daily wages earned by each.	Number of adult units in receipt of gratuitous relief.	Average dole.	Average daily number of male units.	Work done by each per diem.	Wages earned by each per diem.	Cost per 1,000 cubic feet.	Average daily number of male units.	Daily wages earned by each.	Number of adult units in receipt of gratuitous relief.	Average dole.

Total ...	60,162	.....	.....	.....	1,736	.....	26,790	.....	166,037	.....	.....	.....	4,347	.....	53,656	.....

60. It will be seen that the numbers on relief works have gone up everywhere: the increase has been greatest in Darbhanga and Muzaffarpur followed by Saran and Champaran, although the actual numbers are largest in the latter district. Both in Darbhanga and Champaran the great rush of labourers has been stopped, and controlled to a greater extent than before. The task exacted is extraordinarily high in Muzaffarpur in spite of the numbers employed having quadrupled in the period under report: even so they are only one-tenth of those employed in the neighbouring districts of Champaran and Darbhanga. As before, the Champaran task is lowest; but, on the other hand, the numbers on receipt of gratuitous relief in this district bear a smaller ratio to those of relief workers than is the case anywhere else: if Mr. Macpherson were able to send more dependents and sickly persons off the works to their villages, his outturn would be better and he will be urged to take this step.

61. The average daily wage per male unit shows greater uniformity than in previous periods, but is too high in Patna.

62. Gratuitous relief is most fully developed in Darbhanga and in Saran in proportion to the numbers on task work, the ratio being 58·74 and 57·84 per cent. in either case, in Muzaffarpur the ratio is 31·92 per cent. It has been explained above why these ratios are so high.

63. The dole appears to have been calculated differently in different districts: but this will be further enquired into.

64. I give in Appendix A a statement showing the expenditure up to date, so far as it can be compiled in my office. I have not yet received any replies from District Officers who were asked to criticise the figures given with my last report, and I have therefore included them without modification in the present statement. Adding the figures of the three weeks under report to those reported on the 20th ultimo, it appears that the expenditure in Champaran and Darbhanga had nearly reached two lakhs, that the total expenditure to date according to this statement aggregates Rs. 4,35,833, of which Rs. 3,10,669 were spent in the three weeks under review.

65. The last point to be noticed is the transfer of all large works to the charge of the Public Works Department, which has practically been decided on during the period under report, and which has already been taken in hand. A commencement was made in Champaran, and Mr. Mills, Superintending Engineer, having started the work there, passed on to Darbhanga. The necessary organisation has been sketched out, and as fast as establishment can be supplied, the works will be given over. Meanwhile the civil officers are making every effort to improve the administration in anticipation of the work being transferred. Just at the close of the period, also, North Bihar was divided into two parts over each of which a Superintending Engineer has been placed. This partition of duties will greatly tend to efficiency.

66. The usual statements and the monthly maps are appended.

APPENDIX A.

PATNA COMMR'S. OFFICE, BANKIPORE,

The 7th February 1897.

J. A. BOURDILLON,

Offg. Commissioner.

Circular No. 44 (Fam.), dated Calcutta, the 13th February 1897.

From—E. M. KONSTAM, Esq, Under-Secretary to the Government of Bengal, Revenue Department,
To—All Commissioners of Divisions.

I AM directed to invite your attention to this Government Public Works Department Resolution No. 420—M.P.I., dated the 25th January 1897, on the "Organisation of Relief Works in Bengal under the orders of the Public Works Department," and to say that the instructions and principles therein laid down should be followed, so far as possible, in the case of relief works which have not been placed under the officers of the Public Works Department.

2. I am to add that whenever adequate arrangements can be made by the Public Works Department for the supervision of works capable of employing more than 1,000 persons for three months, such works should ordinarily be made over to that Department, and you should communicate with the officers of that Department with a view to having the necessary arrangements made. In deciding what works are to be made over to the Public Works Department, care should, however, always be taken to retain a sufficient number of works under the "Superintendents of charge" and "Circle Officers" to keep them fully employed, if the whole of their time is not required for the efficient administration of gratuitous relief and for the performance of the general duties laid down in the Bengal Famine Code other than the supervision of relief works. No work should be made over to the Public Works Department till that Department is prepared to undertake it.

No. 420M.P.I.

GOVERNMENT OF BENGAL.

PUBLIC WORKS DEPARTMENT.

MIS. PUB. IMPROVEMENTS.

Calcutta, the 25th January, 1897.

Organization of Relief Works in Bengal under the orders of the Public Works Department.

READ—

Resolution by the Government of North-Western Provinces and Oudh, Public Works Department, No. 18P.W. of 1896, dated the 5th December 1896.
Note by the Hon'ble J. G. H. Glass, Secretary to the Government of Bengal, Public Works Department, dated the 23rd January 1897.

RESOLUTION.—In view of the prevailing scarcity in Bengal and more particularly in the Patna Division, where it has already been found necessary to start relief works on a large scale under the Agency of the Public Works Department, it is deemed advisable to draw up detailed Rules for the guidance of the various Officers engaged in carrying out Relief works. This has been done, and the Rules are attached hereto.

All Commissioners of Divisions.
„ Superintending Engineers of Public Works Circles.
Superintendent of Works, Famine Relief Operations, Bihar.
All Inspectors of Works.
Examiner, Public Works Accounts, Bengal.

ORDER.—Ordered that this Resolution and the Rules referred to be forwarded to the Officers noted in the margin for information and guidance; also to the Judicial, Financial and Revenue Departments of this Government, and to the Government of India, Revenue and Agricultural Department (Scarcity), for information.

J. G. H. GLASS,

Secretary to the Government of Bengal.

[*Accompaniment to Resolution No. 420M.P.I., dated the 25th January 1897, by the Government of Bengal, Public Works Department.*]

GOVERNMENT OF BENGAL, PUBLIC WORKS DEPARTMENT.

FAMINE RELIEF WORKS.

THE following rules and orders are issued for the guidance of officers employed on relief works conducted under the provisions of the Famine Code and carried out by the Public Works Department. They generally follow in details the lines laid down in the North-Western Provinces Resolution No. 18P.W., dated Allahabad, the 5th December 1896, but are modified in some important respects especially in regard to the exaction of the task from the gang as a unit to suit local conditions.

By order of the Lieutenant-Governor of Bengal,

J. G. H. GLASS,

Secretary to the Government of Bengal.

CALCUTTA,
The 25th January 1897.

THESE instructions are for guidance in conducting the field relief works under the Famine Code in tracts officially recognised as distressed. They are not applicable to works conducted by the Department of Public Works as ordinary works under article 52, Famine Code, or as test works undertaken in districts or tracts under observation, but not officially recognised as distressed. The attention of all officers is directed to section 22 of the Bengal Famine Code, which lays down that officers of all departments employed on famine duty will take their orders from the Collector on all points not strictly professional.

2. The most suitable form of labour on which to employ the people is earthwork on—

(1) Raising and improving existing roads.

(2) Constructing new roads either as feeders to existing or projected lines of railway, or through tracts where there are none at present and where it is a public convenience to give means of communication.

(3) Extension of irrigation works and the construction of new channels or *pynes* as they are locally known.

(4) Flood embankments.

(5) Railway embankments.

(6) Deepening existing tanks and digging new ones at selected sites. The quantity of work available under the above heads has been worked out in sufficient detail for each district in North Bihar, and statements giving full information in regard to them have already been circulated to the several officers concerned.

3. The work which has to be done in the field may be conveniently considered under the several following headings, which are placed more or less in the order in which they will call for attention:—

I.—Establishment.
II.—Tools and baskets.
III.—Funds and supply of coin.
IV.—Drinking water.
V.—Food.
VI.—Field hospitals.
VII.—Hutting.
VIII.—Conservancy.
IX.—Organization of relief labour. The gang.
X.—The task. Setting out work and getting it done.
XI.—Wages.
XII.—Reports and accounts in the field.
XIII.—Checking work, numbers and payments.

I.—Establishment.

4. The districts of Bihar in which relief works on a large scale are to be carried out will be formed into two Public Works Circles each under the charge of a Superintendent of Works. The districts of Darbhanga and Muzaffarpur will comprise the 1st Circle, and those of Saran, Champaran and Shahabad the 2nd Circle. The Superintendent of Works of the 1st Circle will also be in charge of any relief works, which may be necessary in the Patna district. Both officers will take their orders from the Commissioner, Patna Division, on all matters relating to relief operations which are not of a strictly professional nature. The head-quarters of the Superintendents of Works will be determined by the Commissioner of the Patna Division. Each district will be a Public Works Division, with an Executive Engineer in charge. The district will be broken up into as many subdivisions as may be necessary according to the requirements which have to be met. The subdivision will usually be held by an Assistant Engineer, and the number of upper and lower subordinates attached to it will be determined on a consideration of the relief works which have to be undertaken. Any number of workers, up to 5,000, or at the outside 6,000, will form a 'charge' and will require an 'officer-in-charge,' whose duties are described in article 59 of the Famine Code. If the numbers on a work exceed 6,000, an additional work should be commenced without delay; another part of the same road may suffice, but it *must be* a separate 'charge.' If the 'charge' contains less than about 3,000 workers, it will be sufficient to give him one sub-overseer to help; but if there are more than that number, he must have two such men.

The duties of the 'officer-in-charge' are of a responsible nature, and it is essential that he should be a person in whom complete confidence can be placed. He will be appointed by the Commissioner of the Division or the Superintendent of Works, and will be a part of the Public Works establishment. He will be posted by the Superintendent of Works on the indents of the Divisional Engineer. He will be the cashier and general supervisor on the spot, and one of his duties is to see that work is really done, or else proper fines actually recovered for short work. It is to be clearly understood that the officer-in-charge has control of the entire staff and operations of the charge. The Sub-overseers are immediately under him and should implicitly obey his orders. He may employ them on any duty connected with the charge which he may think necessary.

5. It is the duty of the sub-overseers to obey the orders of the officer-in-charge. They are required to lay out work in advance, to have profiles ready where necessary, to measure up the work done by each gang of workers, to assess the requisite fines for short work in the manner explained further on, and may be called on to assist in mustering and paying the workpeople. Where there are two or more such men, one of them, if a road is being constructed has to look to the setting out of work ahead, and the other to the proper finishing up of it behind the gangs. One of them is put in charge of all tools on the work. The men will be posted by the Superintendent of Works on indents from the Divisional Engineer, whose duty it is to regulate his indents in

accordance with the probable number of workers, and to apply a fortnight in advance of requirements, wherever that is possible, so as to have the officials on the spot in time to prevent the organization being overpowered by a rush of relief workers. When no more Public Works sub-overseers are available, suitable men of the class of overseer, or sub-overseer, should be temporarily engaged by the Superintendent of Works or Divisional Engineer on a salary of Rs. 50 to Rs. 65 per month, on the terms stated in the form of appointment put in as Appendix VII. The Divisional Engineer should keep a list of any suitable local men he can hear of, and appoint them as occasion arises, reporting each such appointment to the Superintendent of Works, with the information required for the purpose of filling in the appointment form in the office of the Superintendent of Works.

6. When there are only three or four separate charges going on in a district, the Subdivisional Officer can look after them himself ; but when there are more than that number, he will require the assistance of a Public Works Upper Subordinate, whose services will be obtained by an indent from the Divisional Engineer on the Superintendent of Works. The subordinate will act under the orders of the Subdivisional Officer, and it will be his duty to go round his parties in succession, spending three days with each when possible, to correct all faults in organization, to check the numbers and payments, check the quantity of work and look into its quality, and also assist in aligning new work, or anything else the Subdivisonal Officer may require help in. When it is impracticable to depute a Public Works subordinate for these duties, a temporary Officer will be appointed by the Superintendent of Works, ordinarily on a consolidated salary (including travelling allowance) of Rs. 150.

7. Every 'charge' requires the following minor establishment:—

One vernacular clerk qualified to act as sub-cashier under the officer-in-charge. He will ordinarily be appointed by the officer-in-charge, who is responsible for him. Salary, Rs. 15 to Rs. 20.

One clerk who can keep accounts in English. May best be appointed by the officer-in-charge, whose assistant he will be. Salary, Rs. 25 to Rs. 40.

One muharrir able to read and write for about every 500 to 600 relief workers. These should be reputable men known to some local official as being trustworthy. Salary, Rs. 10 to Rs. 15.

One tools muharrir. Salary, Rs. 8 to Rs. 12.

The duties of the first two are obvious, they are assistants to the officer-in-charge. The muharrirs calculate the wages and do the greater part of the actual counting out and disbursing of wages, each for his own gangs. The tools muharrir, or store-keeper, has immediate charge of the tools under one of the sub-overseers, who is responsible for him and should make the appointment.

In addition to these there has to be a foreman of the water arrangements. Salary Rs. 12 to Rs. 18 per month. Two or more 'mates' on daily wages under him. An experienced 'mate' or '*tindal*' for nicking out the work set out by the sub-overseer or work-agent. His gang of 10 to 20 men should all be intelligent professional labourers, accustomed to that sort of work and paid as Class B. There must also be a *jamadar* of sweepers in charge of the sweeper-gang.

For the equipment of each gang in the way of tools, &c., see Appendix VII. Arrangements should at once be made for the supply of all articles therein enumerated.

II.—Tools and Baskets.

8. For every 1,000 attendants on a relief work, including both workers and their dependants, a supply of 120 digging tools and a first outfit of 600 baskets will be required. The digging tools will ordinarily consist of 10 to 20 per cent. of pickaxes and the rest *kodalis*. The proportions of these tools will vary greatly with the nature of the soil to be dug. It is impossible to give any general directions on this point, and the Divisional Engineer must see to the right kind of tools being provided for the work that has to be done. Ample provision requires to be made for keeping up the supply of

baskets, and clear instructions in regard to the sufficient supply of these articles should be issued by the Divisional Engineer.

9. It sometimes happens that the people rush on to a relief work in the most unexpected manner, and 9,000 or more people may be present on a work four days after it is opened and before there is time to start another one, or get tools. To provide against such accidents, every new work should have a supply of tools for 10,000 persons when it opens. If a rush occurs, it can be met and there will be time to draft off the surplus numbers with a supply of tools, &c., on to a new work opened for the purpose with the Collector's sanction and assistance. If there is no such rush during the first ten days or so, tools for 6,500 persons should be kept on the work and the balance sent to any new work about to open, or any other work which may be in want of them at the time. In every case a newly opened work must open with tools enough to give employment to 10,000 persons (including dependants) in case there is a rush. This is never to be omitted.

10. In all road and embankment work large numbers of wooden *thappis* for breaking up clods will be required: a supply of 4,000 *thappis* should be ready to start with. These will require to be of the pattern in local use, but rather light, and should be made up in advance on the spot or wherever most convenient to start with A small gang of carpenters should be employed on every work to keep up the supply of these and of tool handles of which latter a supply of 3,000 should always be on hand.

III.—Funds and Supply of Coin.

11. The credit order is obtained in the usual way through the Examiner of Public Works Accounts, but the problem is to keep the different relief works in funds on the spot without a very large floating balance in process of transit. An imprest of over Rs. 1,000 is forbidden; it is therefore of no use to give the officer-in-charge an imprest on any large work. He must keep a cash-book, but he may not have a separate credit in the treasury. The following method of keeping the relief works in funds has proved very successful and economical in the North-Western Provinces.

12. The Divisional Engineer, in consultation and with the help of the Collector, selected two or more sub-treasuries as paying centres, and arranged that the official in charge should cash cheques sent him in his name, but for certain pre-arranged officers-in-charge of relief works. The Subdivisional Officer himself started each work and kept the officer-in-charge in funds while there. A few days of open work showed how things were going. When leaving the work, the probable expenditure for the next week was computed, and the officer-in-charge given enough money to keep him going for that time. After that a watch on his daily reports was kept, and before he had run out of funds, his expenditure for the next week was calculated, and a cheque for the amount sent to the sub-treasury officer in the name of that officer, but endorsed 'for' the officer-in-charge to whom the money was intended. The cheque was cashed by the sub-treasury officer and the money sent under guard to the officer-in-charge, who entered it in his cash-book in the usual way.

13. Each 'charge' will require one iron safe about $2\frac{1}{2}' \times 1\frac{1}{2}' \times 1\frac{1}{2}'$ high. There must also be two wooden chests, iron bound and tin lined, with two hasps and padlocks. Size of chest, $2\frac{1}{2}' \times 2' \times 2'$ high. One of them remains on the work and holds the pice, the other is used in transporting money from the treasury. If the chest is not tin lined, the pice fall through the cracks which occur in green wood.

14. At least three weeks' supply of copper coin should be available in local treasuries to begin with. At first it will mostly soak into circulation and disappear, but after a short time it will begin to flow back in exchange for silver; and after the works have been going for six or eight weeks, the rupee will be at a premium, and Baniahs will give something more than 16 annas in copper for the silver rupee.

IV.—Drinking Water.

15. To keep this pure it is necessary to guard the wells from contamination for some days before a work is started. Select some respectable, cleanly man of good caste who can be trusted to attend to the business, and make him

foreman of the water arrangements. He must have four or five Brahman mates, a Kahar mate, about 20 Kahar carriers, and the same number of Brahman drawers and distributors under him. He will require about 10 iron buckets (*dóls*) of the country shape (with a round bottom) for drawing water, and about 60 kerosine tins for carrying water. This will probably be enough to commence with, but the proportions will of course differ with the distance of the wells from the work; and in any case the staff and plant will probably have to be increased at one time or another.

16. The kerosine tins require to be strengthened with an iron strap under them and a handle for carrying about. Half of the top should be cut away and hinged on again to prevent water splashing out. The water foremen should take possession of all wells close to the future work a week or so ahead of the workers, and at once put each in charge of a Brahman with one or more assistants, and arrange so that these men shall draw water for any one who requires it: but they must *allow no one else to do so*, or even to come on the well platform. From that time till the workers leave the locality each such well should remain in charge of the same set of men, and they should never allow any other person to dip a *lota* into it, or to stand on the platform. The rigid preservation of the purity of the water-supply is one of the very few sanitary measures which the people will heartily approve of, and in which they will assist so far as they can do it without taking trouble.

17. The actual distribution is most readily effected by utilizing the old established method of setting up *piaos*, or drinking places, at short distances apart. A large earthen jar, called a *gol*, is purchased for three or four annas and set up, a little aslant, on a low mud platform. By the side of it a narrow trough some five feet long is set up on two stakes, with a slight slope through it and the further end about two feet above the ground. It is important to take care that this trough shall always be of iron, never of wood.

18. The jar is filled from the kerosine tins (earthen *ghárás* must never be used for carrying water in) by the water Kahars, and by them alone; no one else may touch it. By the side of it sits the distributing Brahman, and when any one comes for water, he fills his brass pot, or *lota*, and pours water into the man's jar, or pot, by means of the trough. He must never pour directly into any man's pot or jar, but always into the trough and thence into the jar, placed below the trough and filled from it. It is important to have the trough well above the ground, so that it may not be touched by the jars or splashed from them. It is important to have the trough of iron, because if it does happen to get infected, it will, what with rust and heating in the sun when dry, almost certainly disinfect itself very soon after. The great jars, *gols*, should never be carried on to a fresh place, but should be broken up, and new ones used at each new *piao*. One such *piao* should be set up at every second furlong stone along a relief work.

19. If there are more wells than need be used, the unused ones should be guarded to keep off the workers, and so also with doubtful or tainted wells. If wells are miles apart and a doubtful one has to be used, it should be disinfected with permanganate of potassium according to Professor Hankin's instructions reprinted as Appendix I. So also if cholera should break out. If water has to be carried a long distance, it will be found best to carry it in casks fitted with brass cocks and loaded two in a cart. Wells should always be drawn on in preference to tanks, if within a practicable distance. All this organization about the water-supply may seem to involve a great deal of trouble over a small matter, but a neglect of it will have sure consequences where large bodies of people are collected together, and especially when they are famine-stricken people. These precautions are of vital importance to the public health.

V.—Food.

20. It is desirable that the quality of the food supplies brought to the works should be looked into very frequently, and immediate action taken against any one found selling unsound food. The food trade on a full sized famine relief charge is greater than that in any ordinary small Indian town, and if special facilities are given to respectable local traders, they will be careful

not to lose them by selling unsound food, or worrying the people with needlessly frequent changes in their prices. Following the principles of article 80, Famine Code, the undermentioned advantages can be offered, among others, in exchange for fair trading:—a small grass hut for a shop situated near a *piao*, and within the range of the treasure or other guards and free carriage of grain from the nearest mart, if the trader is willing to sell at the current rates of that mart; prompt and free exchange of all his copper into silver paid into the local treasury to his credit. It is usually quite easy to find several respectable men who can understand the value of such advantages to their trade, and are willing to give honest goods and reasonably steady prices in exchange for them, so long as they are pretty closely looked after.

But it may occur that a relief work is situated in such a remote locality that private traders are unwilling to go there without other inducements than those noted above. In that case, or in similar cases should they occur or be likely to occur, the Collector of the district should be communicated with promptly, and he will take such measure as are necessary for supplying grain on the works.

VI.—Field Hospitals.

21. Assistant Surgeons or Hospital Assistants are deputed to these works by the Inspector-General of Hospitals, and their arrangements are looked after by the Civil Surgeon of the district. It is the business of the Public Works to construct field hospitals at sites selected by the Civil Surgeon, and on a plan approved by him. The plan must be as simple as possible, and so arranged that the whole can be burnt down when the structure is abandoned for a fresh one; while at the same time there must be provision for the patients to get quickly out of the enclosure if it catches fire while in use. This will be secured by forming one side of the enclosure of a mud, or clod, wall with a gateway in the middle, and kept quite clear of hutting. The other three sides may consist of huts; but if the enclosure is entirely surrounded by hutting, the occurrence of a fire will lead to many patients being burnt to death. All the grass hutting should be whitewashed with a thin mixture of lime and clay.

22. There must always be a spare hospital ahead of the one in use, so as to be ready for an epidemic. An abandoned hospital must be immediately burned to the ground. If it has held patients suffering from any epidemic disease, the site of the burnt hospital should be sprinkled over with about six cubic feet of quicklime sifted evenly over it, and the whole then well sprinkled over with water enough to wet the lime thoroughly.

23. Sufficient attendants, carriers and others should be supplied to the hospital assistant or other officer in medical charge according to the scale laid down by the Civil Surgeon in each case. Relatives of patients should not be allowed to swarm round them, and only so many admitted as the Civil Surgeon directs. No other relatives than those admitted under the Civil Surgeon's regulations should be given even a famine minimum wage so long as they idle at the hospital in pretended attendance on a patient. The hospital water-supply should be worked by its own staff, and not in conjunction with the general supply for the relief workers. This is an important point, and it will require some insistance to keep the two quite separate.

VII.—Hutting.

24. The workers will ordinarily require no shelter excepting in the hot months and in the rains. There seems to be nothing better on a large scale than screens about 6′ long by 4½′ wide, made of very open bamboo trellis work, strongly tied and thatched with about 1½″ thickness of any thatching grass available. These screens, either in the open or on the side parts of a road under construction, make suitable shelters.

The people are very ingenious in improvising shelter with such screens, and two screens will shelter six to eight persons, counting in little and big. Every work will have a number of men who can be profitably employed in making the screens. The question should be well considered and all due arrangements made: but the actual provision of shelter should be carefully kept down to the lowest requirements, as it is very easy to waste a great deal of

money in providing an unnecessary amount of shelter, which the people will absorb and waste to any extent so long as they have not to pay for it. When shelter becomes necessary the screens must be given out to mates of gangs.

25. Every effort will be made to procure tents enough to shelter the officials connected with the works, but there may be many left unprovided for. These should be hutted in small grass huts with the walls plastered with mud on the inside, and all other surfaces whitewashed, both inside and out, with a thin wash of clay and lime, in about equal proportions, as a protection against fire. An experiment with a bundle of coarse thatching grass washed in this way will show the men what an effective protection it is. The huts should be 9′ × 6′ with the ordinary pent roof, and made in sections so that they can be readily dismantled and re-erected, and easily carried in an ordinary cart, or by coolies. The whitewash and the mud plaster should be renewed at intervals. The sides need only be 4′ high; any extra height wished for can be got by digging out the floor. The local staff of each 'charge' should be generally hutted in this way.

VIII.—Conservancy.

26. The conservancy of every hospital should be carried out by its own staff of sweepers under the directions of the officer in medical charge. For the staff there should be the usual screen and ditch, and the officer in charge should be instructed to have it well looked after for his own sake. Experience has shown that it is not practicable to make any latrine arrangements which the workers can be induced to use. The most that can be done is to post a few stalwart men, under a competent mate of their own class, to insist on the workers going at least 300 yards off the work in their morning walks. They should generally go to the east of the work, but if there is a village near on that side they should be made to go in the other direction. It is of great importance to the health of the workers, and if worried into it for a short time they at last accept it as an admitted custom (*dastur*), and give very little more trouble about it. Any officer in charge who will take the trouble can enforce the system and keep it going.

27. There must always be deaths on these works; if unhappily an epidemic should burst out, there will be numerous deaths, and the disposal of the dead is a matter that must be attended to. The workers will not attend to it properly: in general, they have not the means. At every three or four miles of a relief work there should be a place set apart for the disposal of corpses, one for Hindus and the other for Muhammadans. The two places should, if possible, be on some locally accustomed spot; they should be far apart, and neither should be near a village, nor within half a mile of the work. Each should have a very small appropriate staff.

At the police guard or other convenient place, there should be arrangements for the disposal, free of charge, of every Hindu body which friends do not bind themselves to burn or otherwise dispose of. For the Muhammadan cemetery there should be one or two grave-diggers, preferably of the *gorkand* class, who would keep a certain number of graves ready dug. The graves should be not less than 5 feet deep, and the dead should be completely and decently covered in. Unclaimed bodies should be disposed of by the police.

28. If this organization is got into train from the first, it will be ready against the occurrence of an epidemic, and it can then be extended to any required extent. But if a skeleton organization is not ready, then it cannot be improvised in the rush of an epidemic, and corpses will be thrown into every adjacent stream or *nullah* or left lying about in the fields.

IX.—Organization of Relief Labour. The Gang.

29. The classification of the workers is given in article 62, Famine Code, and may be paraphrased as follow:—

A.— Able-bodied professional labourers accustomed to the kind of work they are engaged on.

B.—Able-bodied labourers, but not accustomed to that kind of work.

C.—Able-bodied persons who are not labourers.

D.—Persons who are weakly, but still fit for light employment.

All the officials in charge of a relief work are working under pressure; and any unnecessary addition to their work reduces the stock of time and energy available for useful work. If he does his duty, the most harassed man of all is the officer in charge, and every complexity of classification is a continual burden to him, and in a less degree to every other official connected with the work.

It is found in practice that the number of workers under class A is inconsiderable, and for that and other reasons the class need not be considered further. The vast majority of the workers are agricultural or other labourers and peasant farmers, and they rightly fall into class B. There is a sprinkling of class C. These persons are very largely utilized in the miscellaneous employments in connection with relief work, where they rightly receive the wage of class B, or in some cases a small addition to it; and the remainder is too small to classify separately. There is a larger proportion of class D (weakly persons), many of whom can work up into class B after a fortnight or so of fair feeding.

Having regard to the facts of the case as noticed above, it is better to omit classes A and C altogether, and to reduce the classification to the following terms:—

Workers—Class B	...	...	Men,* women, children.
Ditto Do. D	...	...	Ditto ditto.
Dependants (gratuitous)	...	...	Ditto ditto.

It will be seen from paragraph 47 below that the scale of wages errs, if at all, on the side of excessive liberality.

30. The children have to be divided into four grades for the purpose of giving them fairly proportioned wages. The best grading is in the following terms:—

I.—Worker—age apparently between 12 and 16 years. Above 16 years counted in as an adult.

II.—Worker—age apparently between 10 years and 12.

III.—Gratuitous—age apparently under 10 years.

IV.—Gratuitous—children in arms.

All children over 10 years of age are to be counted as workers, unless so crippled that there is no likelihood of their filling out and working. All children under 10 years of age are to be counted as "dependants on gratuitous relief."

31. The manner of starting a relief work is as follows. The Collector of the District gives timely intimation to the Divisional Engineer of the locality in which a work is required, the date by which it is to be opened, and the number of persons who may be expected. The Divisional Engineer then arranges with his Subdivisional Officer to have the necessary staff collected at the spot, such as the officer-in-charge, the sub-overseers, and the necessary clerical staff. The work is then marked out, and all points of organization gone through with the officer-in-charge, who receives full instructions from the Subdivisional Officer in regard to the various matters which have to be attended to. There should be a guard for the money chest and to give assistance in other ways. If a police guard cannot be supplied, arrangements should be made for the entertainment of pensioned sepoys for the purpose. The tools are kept in an enclosure near the work, a sort of 'zareeba' with a thorny wall or fence round it, and the storekeeper is hutted in it, with his note-book of issues and receipts ready by him. Somewhere close to the tools depôt is a large red flag on a tall bamboo, and that is the place to which new comers are told to gather together as they arrive, and here the gangs are made up. The morning is full of work, and gangs are best made up in the forenoon, commencing at about 10 o'clock, and the men started on the work in the afternoon. While the gangs are being made up, the future muharrirs must be present.

32. First select about 70 or more persons from the same or neighbouring villages if possible, then put out the able-bodied men and stand them apart; then tell their women and children to stand with them. There may, perhaps, be also one or two old men too feeble to work, who

* This is for classification only; for wages see paragraph 47.

are dependant on some of the workers, and must be let into that gang. Count out all the children under 10 years of age as non-workers, or 'dependants,' who will receive gratuitous relief, and also the one or two very feeble old men or women who belong to some one and are too weak to work. Select weakly single men (still fit to work), women, or other strays (fellow villagers if possible), till the gang is made up to about 60 workers, in addition to the dependants who are unfit for work.

33. Next, select a 'mate' for that gang from among the relief workers present, a fellow villager if possible, and make the muharrir fill up the muster or nominal roll. This form gives the names and numbers of each class of individuals in the gang, whether workers or dependants in receipt of gratuitous relief, and represents the actual gang as constituted. The several headings are given in English and vernacular. The first page is practically a measurement book for the work done by the gang day by day, and in addition to giving the progress, *i.e.*, the amount of work done, it also shows the actual payments made. On the last page is a detailed abstract showing the numbers employed daily and the wages due after deducting fines which may have been imposed for short work, &c. The nominal roll must be filled up under the eye of the officer-in-charge: the gang must be given a distinguishing number at once: and the gang number, mate's name, and muharrir to whom consigned should be recorded in the note-book of the officer-in-charge at the same time. Each man (or woman or child) of the gang should be given a card-board ticket, the size of a railway ticket, on which is to be written his name, number in the gang (taken from the nominal roll) his class and rate of pay in pice. This ticket is to be retained by him so long as he remains with his gang. From the nominal roll a 'mate's list' is prepared showing the persons in his gang, *vide* paragraph 51. This list should be made over to the mate, who should always have it with him. He should be given a small circular tin case in which to keep it. Each mate will have a small flag of white linen on a pole or bamboo 6 or 7 feet long, and the number of the gang should be shown in red on the flag. The gangs will be numbered from 1 to 100, and the mate should have a badge fastened to his arm with the number of his gang upon it. Ten mates will form a 'party.' The 'party' should be under a 'muharrir,' who should be a man of some intelligence and able to read and write. The muharrir will be numbered from I to X, and each man should have his number on a badge, which he should always have with him. He will have a good sized red flag with his number on it in white for marking his charge. He will be responsible for the management and movement of his 10 gangs, aggregating from 500 to 600 persons. He will help to set out tasks, will keep the muster rolls of his gangs and be responsible for their correctness, and will assist in the distribution of wages. The muharrir sends on the gang with a slip to the storekeeper to deliver certain numbers of tools, baskets and *thappis* to the mate of the gang.

34. Arrivals in the afternoon will be given food in accordance with Famine Code, article 61, and will be made up into next day's gangs.

35. People once formed into a gang must not be allowed to stray into others without special permission. Mates should be chosen with an eye to position among labourers, intelligence, and ability to exercise some sort of authority among their people. During the selection of gangs it is necessary to keep in mind and provide for the requirements of the hour in the way of filling up depleted gangs, and of special labour, such as water-drawers and carriers, water distributors, conservancy patrols, sweepers, &c. The latter must be drafted into the special gangs formed for those purposes.

36. As regards 'dependants' attention is invited to articles 83 and 84 of the Famine Code. The proportion of children under 10 and other dependants will often rise above 10 per cent. where whole families come on relief together. As regards the persons who may be admitted on to these works, see articles 61, 83 and 84. These works are not intended for persons unable to do any work and not dependant on a worker; for such there are the poor-houses. But if any such starving persons apply at one of the works, they should be fed for a day or two until an opportunity occurs of sending them on to a poor-house.

37. The gang is the basis of all organization, and it must be kept as permanent as possible. No mate should be allowed to admit any new persons into his gang of his own authority. As soon as a gang has received its tools, it must be marched on to a previously marked out piece of work, and it will thereafter be always treated as a unit. It will be drafted from one work to another, or from one part to another (as when works are progressing along a road), as a unit, and in accordance with the procedure laid down in article 75 of the Famine Code, and with the gang registers written up to date.

X.—The Task. Setting out work, and getting it done.

38. The special gangs of water-carriers, hospital attendants, conservancy men and so forth, have their own special duties, and the practical mode of getting value from them is to take care that there are no more of them than the work requires, and that they perform their duties efficiently. But the great mass of the workers are on a different footing. If the arrangements are complete there is any quantity of work for them to do. The problem in working under the Famine Code is to find how much work they should do without being overworked, and to get them to do it.

39. Section 66 of the Code refers to its Appendix IV on the question of quantity, and the Appendix contains rules for modifying tasks in accordance with the 'lift' and the length of 'lead.' The experience of the North-Western Provinces during the recent famine in Bundelkhund is that this is quite unnecessary. It was found there that the people must be taken as they come, and the diggers must be distributed in the proportion they happen to bear to the fillers and carriers. The fillers and carriers were usually far too numerous for the diggers, and, instead of reducing the task because the fillers and carriers might be overworked, experience proved that it was only with a high lift and long lead that the diggers could do enough work to give the others a proper amount of work. Under the system of wages laid down by the Code, a man's income is very greatly increased by bringing all his women and children on to the works. In the North-Western Provinces, therefore, it was found expedient to omit all calculations as to lift and lead in any work done by famine labour under the Code system of wages.

The problem was thus very much simplified. The task depended entirely on what the digger could excavate; whatever that quantity might be, there were always enough fillers and carriers to dispose of it. From this it followed that the effectiveness of the whole gang as an instrument of labour depended entirely on the effectiveness of the digger, and on him alone. If the digger gave a good day's work, the whole gang had to do the same; and if he idled, no possible industry on the part of the remainder could make up for it.

40. It is, however, not considered probable that the same conditions will obtain in Bihar, and certainly will not in Lower Bengal. The returns received up to date of persons on relief works show that the women and children together do not greatly outnumber the men, and if the figures given are to be relied upon, and can be taken as representing what will occur during the continuance of distress, it is evident that the system of exacting a task from the diggers only, that is, from able-bodied men, which was found to answer in the North-Western Provinces, cannot be applied in Bihar advantageously. The system of exacting a task from the gang as a whole, instead of from the individual digger, will, it is thought, give better results, and in its working it will undoubtedly give less trouble and inconvenience to the officer in charge and his staff. Attached to this are tables showing the amount of earthwork which each man, woman and child should perform under various conditions of lead and lift in soft, medium, and hard soils. Taking the case of the typical gang described in paragraph 32, the quantity of work which it should do in a day is arrived at thus. The gang consists of 60 workers, of whom say 20 are strong able-bodied men, 5 weakly men but fit to do as much work as an adult woman, 20 women, 10 children from 12 to 14 years of age, and 5 over 10 years but under 12. Supposing the work on which they are engaged to be the excavation of a tank, that the lift is from 3 to 6 feet, the lead 150

feet, and the nature of the soil medium. Referring to Task Table 2(A) the following shows the task to be exacted from the gang :—

			C. ft.
20	Able-bodied men	at 47 c. ft. =	940
20	Adult women	„ 37 „ =	740
5	Weakly men	„ 37 „ =	185
10	Children 12 to 14 years ...	„ 28 „ =	280
* 5	Do. under 12 and above 10 years ...	„ 18 „ =	90
	Total day's work	=	2,235

* NOTE.—The task to be allotted to a child under 12 and over 10 years may be taken as one-third of that of an adult male.

Inspection and check.

41. The above is given as a mere example, but the principle *mutatis mutandis* should be followed in all relief works. Gangs will as a matter of course vary in numbers, but the collective task of the gang should be fixed in accordance with the tables, and the Public Works staff should by frequent inspection and close checking take steps to ensure that this important matter is carried out by the officer in charge, who will be primarily responsible that the system is properly worked. The tasks given in the tables are not excessive, and are such as the relief workers can reasonably be expected to perform, and they should, once the people have got accustomed to the work, be rigorously exacted. It may be necessary, in the case of people unaccustomed to this form of labour, to impose a somewhat reduced task for the first week they are on the works. What the extent of the reduction should be must be left to those in charge of the works to decide, but usually it should not exceed 15 per cent. of the task.

42. If the Collector of the District considers the task unsuitable, the Subdivisional Officer will alter it on receipt of orders to that effect from the Collector, but he will at once report the alteration to the Divisional Engineer. The method on which the tasks are worked is the secret of success. The task of each gang should be marked out separately, and the gang should be allowed to start work when they like and to leave off when the work is finished. The amount of work to be done should be clearly explained to the gang. In the case of the typical gang referred to in the preceding paragraph 40, the quantity required from it is given as 2,235 cubic feet. This is represented by a pit $20 \times 37\frac{1}{4} \times 3$ feet. The dimensions representing the task of the gang should be clearly explained to the people, and they should be informed what penalty they are liable to if the full task is not completed. In event of the task not being completed on any day, the mate should be warned and the adults of the gang also. Should the warning be disregarded, the mate should be told that he will be fined one day's pay, or such other amount as may appear reasonable to the officer-in-charge, and that the whole gang will only receive a minimum wage instead of the maximum for such days as the task is incomplete. The general rule should be to punish the whole gang for short work; but if the officer in charge is satisfied that particular individuals are to blame, they should be dealt with as is laid down in paragraph 48.

43. All laying out of work should be planned with three objects as regards the workers: (I) to give each gang its task; (II) to give as many days' work as possible in one place before having to march on to another reach; and (III) so to arrange the available space that the work-people will not be overcrowded. To take an example. Suppose a road 24 feet top-width, height of bank 3 feet and side slopes 2 to 1, the soil medium, and that a gang composed as in paragraph 40 is engaged on it. Taking the lead as 50 feet, the lift as 0 to 3 feet, and the soil as medium, the daily task for the gang would be [Task Table 2(A)]—

			C. ft.
20	men	at 65 c. ft. =	1,300
20	women	„ 52 „ =	1,040
5	weakly men	„ 52 „ =	260
10	children 12 to 14	„ 39 „ =	390
5	„ under 12	„ 22 „ =	110
	Total day's work	=	3,100

Then about 34 lineal feet of road embanking will give a gang one day's work, and about 204 lineal feet will give them six days' work. In order that the work-people may have plenty of room to move about in, the borrow-pits should be so arranged that each person should have a space of from 20 to 30 square feet. When the work is the excavation of a tank, the greatest care should be taken in laying out the gang-pits to prevent overcrowding.

44. Laying out work on a road is simple enough, and should be done well in advance of the workers. The setting out consists of two parallel lines for the embankment, and outside these two more such lines on each side to mark the pits. The distance apart of these last lines is of considerable practical importance, and should be such that pits of either 1′ or 2′ depth shall give a little more earth than is required for the road.

45. At the rear of every relief 'charge' there should be a finishing gang, one that has shown it has learned its work well and is under an intelligent mate. It will be the duty of this gang to properly finish up all irregularities left by the less skilful gangs in front. No particular task can be set for them, and the work very largely depends on the mate in charge, who should be a professional *tindal* on a monthly wage. The whole appearance of the work, when finished, depends on this part of it being properly attended to.

XI.—Wages.

46. The wages are laid down in Articles 101 to 106, and section 104 prescribes a scale of wages based on "grain equivalents," which is to govern the cash wages paid on these works. There are different scales of wages, and in making a selection several points have to be considered. The wages of the workers are to be regulated by the scale of grain equivalents prescribed in section 104 of the Famine Code. These equivalents are to be converted into money on the basis of the current retail price of the staple grain in ordinary local consumption by the labouring classes and in the state, husked or unhusked, in which that grain is ordinarily sold by retail for consumption.

47. The following scale will be used:—

Mates of gangs and other persons in responsible posts.	Six pies more than the maximum
Adult males, workers, and men in special gangs.	Nineteen *chitaks* of grain.
Adult males who are unable to do a full task	Fourteen *chitaks* of grain.
Adult females,—All classes ...	Thirteen *chitaks*.
Male adult dependants	Twelve *chitaks*.
Female dependants	Ten *chitaks*.
Working children, grade I—Over twelve and under sixteen years. ...	Ten *chitaks*.
Working children, grade II—Over ten and under twelve. ...	Six *chitaks*.
Non-working children, grade III—Under ten years.	Four *chitaks*.
Non-working children, grade IV—Infants in arms.	One pice extra to the mother.

If the exact money equivalent of the preceding grain wages exceeds the nearest pice below by two pie or more, the next highest pice will be given. If the exact sum exceeds the nearest pice below by less than two pies, the next lowest pice will be given.

48. Workers who fail to perform the allotted task may be punished as follows:—

(*a*) by fine, provided that the grain ration (or its money equivalent) paid as wages shall not be less than the penal ration prescribed in section 100, Famine Code; or

(*b*) by payment as wages of the penal ration in cooked food at a State kitchen established on the work; or

(*c*) by removal from the work to the nearest poor-house.

49. Wages are to be fixed by the Collector, who will keep the Divisional Engineer duly informed. They are not to be altered for variations of less than 10 per cent. in the price of food-grains. Excepting in case of urgent necessity, which should be immediately reported, they are not to be altered without previous reference to the Commissioner. It is desirable to pay the

labourers daily, and every effort should be made to do so. See sections 63, 64 and 68 Famine Code. Arrangements should be made under section 63 to get each gang to appoint its own headman, to whom the wages earned by the gang could be handed over for disbursement. For purposes of payment ten or more gangs might be placed under a muharrir. The wages earned by the gangs would be calculated in the evening after the completion of the day's work, and the amount due to each put into a separate bag with a label attached giving name of gang mate. All these bags would then be put into a larger bag with the name of the muharrir on it. In the morning the bags would be made over to the muharrir who would hand to each gang mate in the presence of the officer-in-charge or of the Sub-Overseer the bag containing the wages of his gang. It is obvious that if payments are made daily, there is less room for fraud and the workers are more certain to get what is due to them. A system of daily payments based on the above lines could no doubt be worked out, and if carefully attended to, it would probably be found satisfactory. The matter is one of extreme importance, and the Superintendent of Works should give it his early attention. A copy of the instructions issued by the Superintending Engineer, 2nd Circle, Public Works Department, North-Western Provinces, regarding the payment and distribution of wages on famine relief works, is appended for information. A similar plan could probably be followed in Bengal with advantage. A table or ready reckoner, showing the wages to be paid in accordance with the varying price of grain, is given as Appendix IV.

XII.—Reports and Accounts in the Field.

50. The Examiner, Public Works Accounts, Bengal, is now drawing up a statement showing the various accounts necessary to be kept in connection with Relief Works, and it will be circulated with a complete set of the forms and full instructions for their preparation at a very early date.

51. When a gang is first formed (paragraph 32), the "mate's list" is written up immediately after the muster-roll has been prepared and handed to the mate, who should be warned to take great care of it, as his wages depend on it. The heading gives the mate's name and distinguishing number, the name of the muharrir to whom consigned and the date on which the gang was made up. Beneath is a nominal roll of the adults of the gang (men and women, whether workers or dependants), and then a numerical list of the children of each grade. Lastly, a list of the tools to be supplied by the storekeeper. A separate slip containing an order for tools is sent with the mate, to be retained by the storekeeper as a voucher. The "mate's list" is not to be kept up as a regular nominal roll, but is merely corrected from time to time as changes occur in the gang. The mate should not be permitted to have any persons in his gang who are not entered on the list by his muharrir. The officer in charge should check a few lists nearly every day. Every officer inspecting the gangs should check a few. The list gives very little trouble, and is of constant use in examining gangs, and the entries in the muster-roll itself.

52. The first afternoon a gang is on the works the muster-roll is written up by the gang muharrir in whose charge it may be. There is no question of fines. He compares the persons present with the entries, enquires into any differences, and makes any necessary alterations. He pays a day's wages, writes up the second copy of the muster-roll and exchanges it for the first. He tells them about tasks and fines, and goes on. The sub-overseer has meanwhile pointed out the next day's tasks, and told the mate what his duties are, including a word about distributing the tasks for next day overnight, conservancy, drinking water, tool repairs, and *banias'* shops.

53. After the first day the gang muharrir checks attendance in the morning, and fills in the attendance entries. He calculates and enters wages on the muster-roll, tells the mate what they come to, and signs on the line left for the purpose. Some time in the afternoon the sub-overseer, in charge of that portion of the work, examines the work done (if properly set out, the tasks seldom require actual measurement), and enters the quantity due, and that done, on the appropriate line. If there has been scamping or short work, he assesses fines as instructed in paragraph 48 above, explains to the mate exactly what they are and why inflicted, and enters the fines and his signature

below. He makes a note of all such entries in his own note-book. The system of daily payment, as described in paragraph 49 above, can then be followed. On each day that he pays the gang's wages the muharrir takes the copy on which he has paid, and gives the other to the mate. The mate always has one copy of the muster-roll (which he should keep in a tin case supplied for the purpose). The muharrir is obliged to recover the fines as assessed by the sub-overseer and has no power to remit them. Only a written order of the officer-in-charge can remit the fines, and that order must be written on the muster-roll itself—this is necessary to prevent fraud. The copy taken away by the muharrir is submitted by him as his voucher for payments. Every such voucher requires to be examined by the officer-in-charge.

54. The officer-in-charge will despatch a daily report post-card to the Subdivisional Officer, and also to the Collector and the Divisional Engineer if required. The form for this is given in Appendix II, and the cards should be supplied ready printed. He has also to submit to the Collector the reports described in sections 94 and 86 of the Code. Every additional account or report thrown on the "officer-in-charge" is a distinct hindrance to his work, and it is the duty of the Divisional Engineer to see that no clerical work not absolutely necessary is thrown on to him.

55. From the Divisional Engineer the Chief Engineer and Superintendent of Works require a weekly report. They should be submitted with unfailing punctuality, and in accordance with the instructions on them, from the time that relief works are opened under the Public Works Department. The form to be adopted will be intimated by the Examiner. All famine relief forms should be locally printed under the orders of the Superintendent of Works, and charged to Famine Relief contingencies.

XIII.—Checking Work, Numbers and Payments.

56. It is as a safeguard against fraud, and an instrument of detection, that the gang muster-roll first shows its full value. It is of course of no use without the personal element of a man who insists on its being kept up properly, and who will utilize it fully. Every petty official whose end would be served by confusion will try to spoil the muster-rolls and exaggerate the difficulty of keeping them up. This is so marked that an inability to keep them properly may be almost regarded as the sign of a rogue. At least the man is incompetent, and therefore should go. If it is the officer-in-charge himself who fails to enforce method and a checkable system of record and accounts, there is the more reason why he should be replaced by a competent man.

57. The progress shown should be checked by test measurements extending over selected parts of the work, the recorded progress of which can be disentangled from the remainder. For this purpose it is well to have all the accounts of a road, or other long work, closed up at every four miles or so and a new start made. In the case of a tank, one or two cross sections should be taken with a level before actual work is started, so that it may be possible to check the measurements at any time. From the sections the actual contents of the tank to the depth it is to be excavated should be calculated, and the officer-in-charge should be told what the quantities are for each foot in depth. This will enable him to keep a check on the sub-overseers' measurements.

58. The numbers are checked by counting the number of gangs at work along a road, &c., and sampling the entire entries in the mohurir's day-book, by careful comparison of about 20 per cent. of the gang muster-rolls with the entries, and also with the numbers actually found present. Look through the gang muster-roll and see whether there have been any recent curious fluctuations. If so, they require explanation, and the mate's list may throw some light on the subject. The general accuracy of each of the day-books is thus checked in turn.

59. An examination should be thorough, but mostly in the way of sampling, unless something is lighted on, and in that case it should become very thorough indeed. The way in which the accounts and records are kept is often a very good guide to what one may expect to meet with. If they are kept in such a manner as to facilitate check, rigid sample checking will probably be found to be sufficient. If, on the other hand, the books are in confusion and

practically useless for checking purposes, it will be well to have a very complete examination; for there is either carelessness which many will have taken advantage of, or there is worse. Every examination must be conducted with the greatest patience and consideration of the difficulties and pressure under which all are working. Unavoidable error is, however, quite a different thing from actual fraud or criminal carelessness, and the former at least can never be passed over. If enquiries establish a substantial presumption of fraud, the officer-in-charge must be at once removed by the Subdivisional Officer; in case of carelessness the orders of the Divisional Engineer should be awaited, unless immediate removal is necessary in the interests of Government or the workers. In either case the Subdivisional Officer will forward a full report to the Divisional Engineer, and also inform the Collector of the action taken, and the reasons for it. The Divisional Engineer will report the matter to the Superintendent of Works for such further action as may seem to be desirable.

60. When a work is inspected by the Subdivisional or other public works officer the following points should be carefully enquired into, and he should enter in his report the results of the inspection under each head in the order given.

I. Hospital arrangements.
II Do. do. for contagious diseases.
III. Latrine and conservancy arrangements, fixing of boundary flags, &c.
IV. General condition and health of the coolies.
V. Arrangements for sending sick people found on the work to the hospitals and their disposal and care on first arrival there.
VI. Water arrangements for drinking purposes.
VII. Arrangement for receiving coolies when first arriving.
VIII. Hutting arrangements and shelter against rain.
IX. Classification if properly carried out.
X. Method of mustering.
XI. Do. of paying wages.
XII. Result of scrutiny and check of muster rolls by actual mustering of one or more more gangs and examining tickets.
XIII. Complaints by work people.
XIV. Method in which work is being executed.
XV. Task exacted from the workers.
XVI. Arrangements for safe custody of cash.
XVII. Orders regarding lighting of fires and their prohibition near grass shelter huts, especially the hospital.
XVIII. He should check the entries in the cash-book by comparing them with the daily abstracts, from which Form III, the supporting voucher, is compiled. This is the most important point connected with the accounts of a charge, and should be carefully looked into by an inspecting officer.
XIX. Is every coolie, whether man, woman, or child, and whether worker or dependant in possession of a ticket? And has every ticket inscribed upon it the following details:—I. Serial number of the coolie in the muster roll. II. Number of the gang. III. Wages in pice which the coolie is entitled to receive. IV. Name of coolie.
XX. Checking of equipment staff, &c.

LIST OF APPENDICES.

I.—Professor Hankin's instructions for the disinfection of wells.
II.—Daily Report Post-card.
III.—Form of Appointment for members of Work Establishment.
IV.—Wages Ready Reckoner.
V.—Mate's *List*.
VI.—Form of Inspection Report.
VII.—North-Western Provinces and Oudh instructions regarding Famine Organization.

APPENDIX I.

Directions for treatment of wells with permanganate of potassium as a means of checking epidemics of cholera.

PERMANGANATE of potassium is a crystalline salt-like substance, of a purple colour, in whose preparation only mineral substances are employed. Hence its use in wells need not be objected to by the strictest Hindu.

Put one or two ounces of the solid substance into a *dol* or bucket that has been filled with water drawn from the well about to be treated. Stir it up, and pour the red solution thus produced into the well, leaving the portion of permanganate that is not yet dissolved at the bottom of the *dol*. Lower the *dol* into the well, fill it with water, draw it up, pour back the water as before. Repeat the process till all the permanganate has been dissolved. After half an hour draw up some of the water and examine it. If a red colour is still present, enough has been added. If the red colour has disappeared, then more permanganate should be added to the water in the well. In all cases enough permanganate should be added to produce a faint red colour lasting for 24 hours.

If the water in the well is bad, more permanganate will be necessary. In such a case it will be found that the strong red colour at first produced quickly changes to brown, and then fades away. This is because the permanganate destroys dirt and is destroyed by it. Therefore, if the water in the well is clean, a smaller quantity of permanganate will be necessary. From one to four ounces of permanganate will be found to be enough for ordinary wells. If more permanganate is added than is enough to produce a faint permanent red colour, it is likely that frogs that may be in the well will be killed. This will in a few days give the water a putrid taste. If the quantity of permanganate is not enough to produce a faint permanent red colour, it is not likely to do any good. If possible, the permanganate should be added at night, in order to leave the wells undisturbed as long as possible. The water will be fit to drink on the following morning. If on the following morning a red colour is still present, the water may have an unpleasant taste, but it is perfectly harmless. If the inhabitants do not like the taste, they should be instructed to pump out the water until the colour vanishes. Always care should be taken to treat with permanganate all the wells in the place, not only those used for drinking, but also those used for washing purposes Care should be taken to explain to the inhabitants the reason of using permanganate, and they should be warned against using water from other sources that have not been treated. If one well is required for immediate use, perhaps it would be advisable to add to it a quantity of permanganate, and to employ *bhishtis* to draw out the water until the colour has disappeared, but this well should again be treated with permanganate on the following day when the other treated wells are brought into use.

Usually water is kept stored in the houses for washing or other purposes in *gharas*, &c. This should be poured away, and, if possible, the inhabitants should be persuaded to wash out their *lotas* and other vessels with water containing permanganate. Unless this is done, isolated cases of cholera are likely to occur even four or five days after the treatment of the wells. I have had experience of a case in which a woman was attacked with cholera after treatment of wells, because she was frightened of touching the red water in the well, and drank water that had been stored in the house and that had been taken from the well before the addition of the permanganate.

A pamphlet explaining the use of permanganate, entitled "The Prevention and Cause of Cholera," may be obtained from the undersigned in Urdu, Hindi, and English. It is being translated by various Local Governments into Burmese, Tamil, Telegu, Malayalam, Uriya, Marathi, Gujrati, Kanarese, and Sindhi.

APPENDIX III.

GOVERNMENT OF BENGAL, PUBLIC WORKS DEPARTMENT.

Form of Appointment of a member of the Work Establishment.

(To be prepared and signed in triplicate, one copy to be given to the person appointed, one copy to be transmitted to the Examiner, P. W. Accounts, and one copy to be recorded in the office of the authority making the appointment.)

FROM

THE SUPERINTENDENT OF WORKS, FAMINE RELIEF,

P. W. Department,

To

_____

_____

No._____

*Dated at*_____*the*_____*of*_____ — *189*

Under sanction conveyed in Government order No._____dated_____, you are hereby appointed a member of the work establishment of the_____ Division, Public Works Department, Bengal, as a Famine Relief_____ on a consolidated salary of Rupees (_____) _____per month, with effect from the morning of the day you enter upon your duties under the Executive Engineer of the_____ Division to whom you should report yourself without delay.

2. Your appointment will cease on receipt of a written notice from the Executive Engineer. If he considers your conduct and work have been satisfactory, he is empowered to then pay you a sum equivalent to your salary for ten to fourteen days in lieu of travelling allowance to enable you to return home. This cannot be claimed as a right.

3. You are liable to summary dismissal at any time, without notice, for serious misconduct or incompetence proved to the satisfaction of the district Executive Engineer.

4. While in Government employ you will be subject to, and governed by, the rules for the time being in force in the Public Works Department, supplemented by such other orders as you may from time to time receive from the officer under whom you are serving.

5. Your salary is consolidated and includes all charges, and you will not be entitled to any travelling or other allowances.

6. This appointment is cancelled should you fail to join by_____

_____

Superintendent of Works.

(Declaration by person appointed.)

I HEREBY accept the appointment conferred on me in the above order, the terms of which I clearly understand and agree to; and I hereby bind myself to observe and abide by the rules referred to in paragraph 4 of the said order.

APPENDIX VII.

NORTH WESTERN PROVINCES AND OUDH.

INSTRUCTIONS REGARDING FAMINE ORGANIZATION.

General Organization.

The following organization is to be adhered to in carrying out work by famine coolies.

The famine workers will be divided into "charges," each consisting of 5,000 work-people. A charge will be divided into 10 "Parties," each under a "Jamadar." A "party" will be divided into 10 gangs, each under a "Mate." There will be 50 people in each gang. Each charge will be under an "Officer-in-charge," who will be directly under the Public Works Department, and will ordinarily and whilst carrying out famine work take his orders from the District Engineer. He and his charge will be at the disposal of the Divisional Engineer, who will issue all orders regarding transfer of the charge from one work to another. The Divisional Engineer in all such matters will act in consultation with the Civil Officer of the District.

Officer-in-charge.

The "Officer-in-charge" will have charge of all arrangements for distributing wages to the famine workers. Separate instructions in regard to this special point will be issued.

Work Agent.

Each "Officer-in-charge" will have two Work Agents under him for the carrying out of instructions, and to assist in distributing wages. The pay of the Work Agent will vary from Rs. 25 pay and Rs. 15 horse allowance to Rs. 50 pay and Rs 15 horse allowance per mensem according to qualifications. The lower rate may be increased up to the latter limit in cases where the work done merits the increase. On this view, except for men of really good qualifications, the full rate should not be given at first. Each Work Agent will have charge of half the charge, *i.e.*, of 5 parties constituted as under.

Constitution of a gang unit under a "Mate."

The unit of the charge will be a gang of 50 coolies—men, women and children. The proportion should be so arranged that, as far as possible there are 4 carriers to one digger. Each coolie should on arrival be given a card-board ticket, the size of a railway ticket, on which is to be written his number in the gang and his class. This ticket is to be retained by him so long as he remains with his gang. The task which such a gang can be expected to do in a day is for ordinary soil 1,000 c. feet over a lead of from 50 feet to 100 feet. The wages which the gang will earn would, at an average of one anna a day, come to Rs. 3-2, and this for the earlier period of famine work may be kept as the approximate standard of wage for this class of work. The average wage at famine rates for the grain equivalent is for some time to come not likely to work out to a less average than 1½ annas for all classes of workers. This wage would give a rate of Rs. 4-11 per 1,000 c. feet, and a rate of Rs. 5 per 1,000 c. feet has therefore been taken for earthwork in the Famine Road Estimates. The question of raising or lowering the rate will always be decided by the Civil Officer.

Duties of "Mate."

Each gang of 50 will be in the charge of a "Mate," who should, if possible, be chosen from the famine workers, but if this not feasible, any man of intelligence may be selected for the post. His pay should be fixed at 2½ annas a day. He will have nothing to do with accounts, but he should be in general charge of the gang, and should be able to give information regarding the various members of it. He should keep a muster-roll by name, if possible: but if he cannot do this, then he should keep a register of the numbers of men, women and children and their classification under the various heads A, B, C, D. Under recent orders there are only two classes of workers, *viz.*, B. and D.

Constitution of a "Party" under a "Jamadar."

The Mate will have a small flag of white linen on a pole 6 to 7 feet long. The number of the gang should be sewn in red on the flag. The gangs will be numbered from 1 to 100, and Mate should have a badge fastened to his arm with the number of his gang upon it. Such badges can be made up of brass at a cost of about 2 annas each.

Ten Mates will form a "Party." The "Party" will be under a Jamadar, who should be chosen as a rule from the permanent Road Maintenance Establishment of the District or Division. His pay will be Rs. 10 per mensem. The Jamadars will be numbered from I to X, and each man will have his number on a badge, which he should always have with him. He will have a good sized red flag with his number on it in white for marking his charge. He will be responsible for the management and movement of his 10 gangs, aggregating 500 people. He will help to set out their tasks and will be responsible for their proper numbering and for the correctness of the muster-rolls prepared by the Mates, and he may be employed to aid in distributing wages.

Sub-Overseer, duties of.

The above deals with the general constitution of a famine charge. In addition to the staff above indicated, there will be a man of the Sub-Overseer class, who will be responsible for the engineering details of the work to be carried out by the charge. He will of course have the assistance of the other charge officials within their several limits. The Sub-Overseer will, when possible, be a permanent member of Public Works Department; if not a permanent member, he should be a temporary member, with a chance of permanent, employment should he do exceptionally good work. His pay will be ordinarily that of a 1st grade Sub-Overseer with the usual horse allowance. Where the Work Agents of a charge are fully qualified, it will not be necessary to employ a Sub-Overseer. The Divisional Engineer is authorized to use his discretion on this point.

Distribution of a charge when employed on work.

The following additional members will be attached to the staff of a charge:— Petty establishment.

	Rs.	A.	P.	
1 Store-keeper on ...	15	0	0	per mensem.
2 Chaukidars for Stores, each ...	6	0	0	„
1 Clerk, able to read and write English and Persian for the Officer-in-charge ..	20	0	0	„
2 Peons for ditto, each ..	5	0	0	„
1 Peon for the Sub-Overseer ..	5	0	0	„
4 Sweepers, each at ...	0	2	0	per diem.

Time, frontage, and section of road to be done can be correspondingly raised or lowered according to requirements.

The following will be the distribution of the "charge" when employed on a famine work. Each gang can do 1,000 c. feet. in 1 day and 10,000 c. feet. in 10 days, exclusive of Sundays. The 10 days' task should be taken as the unit. This will work out as follows: It will be assumed that 50 feet is the section per running foot of the road work to be made up, and for this section each gang will take up a frontage of 200 feet, and will be able to excavate during 10 days a borrow pit 200′ × 25′ × 1′ on each side of the road. Each party will be able to do this amount multiplied by 10 and will occupy a frontage of 2,000 feet. The entire "charge" will excavate in the 10 days 10 times this amount, viz., 10 × 10 × 10,000 = 1,000,000 c. feet, and will occupy a frontage of 20,000 feet, or, say, 4 miles.

This distance is not too large to be supervised by the staff provided, and hence it should be adopted as the unit of work and length of road which can be ordinarily excavated by a famine "charge" of 5,000 workers during a period of 10 days exclusive of Sundays. To give work for 5,000 coolies for a month, therefore, it would be necessary to provide a length of 12 miles of road; and if a body of 5,000 famine relief workers has to be provided with work for 3 months, it would be advisable to arrange that they are put on to a stretch of road 36 miles long, with a section of work to be done on it of 50 feet per running foot.

The complete staff for a charge will be as follows.—

Officials.	Pay.	Total.
1	2	3
	Rs	Rs.
1 Officer in charge, pay settled by Civil Department ...	...	...
2 Work Agents	40 to 65	80 to 130
1 Sub-Overseer, not obligatory	...	...
10 Jamadars	10	100
100 Mates, 2½ annas a day	...	...
1 Store-keeper	15	15
1 Clerk	20	20
2 Chaukidars for the stores	6	12
2 Ditto Treasure Chest	6	12
3 Peons	5	15
1 Muharrir	15	15
4 Sweepers 2 annas a day	...	...

Muster-rolls never now leave the custody of the Mates. Muster Rolls.

Not done now. Everything is done in the morning of the distribution. R. P.

The muster-rolls are to be written up daily by the Mates and are to be made over to the Jamadars, who, after verification, will take them to the officer in charge. From the muster-rolls the wages for the day will be made out. During the evening the amount of each gang will be calculated and placed in a small bag marked with a corresponding number. Ten of these will be placed inside a corresponding large bag, and the entire wages of the charge having thus been allocated, the bags with the money will remain overnight in the care of the Officer-in-charge and his chaukidars. The wages will be distributed along the line of work next day under the direction of the Officer in-charge at any time he may select. Special rules for the method of distributing wages have been drawn up. The Officer-in-charge should arrange for his own chaukidars; if possible a small police guard should be obtained. The Civil Officer of the district will arrange for the necessary supply of copper coin and small silver coin. Early information regarding probable requirements should be given him by the Officer-in-charge.

Payments should be made daily as a rule.

The coolies should begin work at 8 A.M. during the cold weather months, and should close work at 5 p.m. Two hours should be allowed them in the middle of the day for cooking their food, etc.

The Executive Engineer should arrange that the staff of a charge and its full equipment are on the site of any new work which it is proposed to open, at least two days before the date of opening, and the work should at once be set out over a length of 4 miles. The limits of each gang should be marked out and indicated by a white flag. The necessary look-spitting can be done by the famine workers on arrival.

Regarding classification, it should be remembered that all famine relief workers should be excluded from the A class. They will usually be B or D class. The Officer-in-charge must give special attention to the posting of the coolies as they arrive to their several gangs, and to their proper registry and classification in the muster-rolls.

Inspecting officers should examine and compare as many of the muster-rolls as possible, with a view to checking the numbers present with each gang, their classification, and the amount and cost of work done by them. A discrepancy should be enquired into on the spot, and the necessary orders given at once to the Officer-in-charge.

When the land bordering the road is valuable, it may be necessary to reduce the width of the side cuttings. In such cases the excavation should be correspondingly deepened, the prescribed frontage being always adhered to. With this view the side ditches may be given any depth up to 4 feet. This would allow of a width of about 8 feet for the side cuttings. Waste land near the road should be utilized for spoil where possible. When compensation has to be paid for land taken up for cuttings, the necessary arrangements should be made as usual by the District Engineer with the Civil Officer of the district. The best and simplest plan is to arrange, if possible, for a small direct payment being made to the owner of the land in consideration of his registering a *razinama*, giving permission to take possession of the land in question.

In addition to the petty establishment above authorized, 1 blacksmith and 1 carpenter should be provided for each charge, for the repair of tools, etc, at ordinary rates of pay.

I now give a chaukidar on the pay of a beldar to each Jamadar, who looks after the equipment of the ten gangs at night. This prevents the gangs having to go long distances before and after work to get and hand over their tools.

EQUIPMENT.

The following will be the Equipment, Tools, and plant, etc., required for each charge.

Number required.	Name of Article.	Rate.	Amount.	Remarks.
1	2	3	4	5
		Rs. A. P.	Rs. A. P.

INSTRUCTIONS BY THE SUPERINTENDING ENGINEER, II CIRCLE, P. W. D., NORTH-WESTERN PROVINCES, REGARDING PAYMENT AND DISTRIBUTION OF WAGES ON FAMINE RELIEF WORKS.

As a rule wages should be paid daily at 12 o'clock noon according to muster rolls taken between 2 o'clock and 4 o'clock on the previous day.

There is no necessity for the officer in charge to carry out with his own hands each and every one of the operations connected with the distribution of money into the bags belonging to the several gangs. Some officers whom I have seen have sat up till a late hour counting the money and placing it in the bags. This is waste of power. The ordinary practice is for money to be sent out from the Civil Treasury either in boxes containing pice done up in bundles containing 32 pice each or in bags containing 50 rupees worth of silver and copper. In any case if this is not so, the first thing for the officer in charge to do is to have the money, on arrival in his camp, counted out before him and made up into bags of Rs. 50 each. The next step is for him to call up the Jamadar Munshis of his charge and the two work agents, each of whom is responsible for and has charge of 5 Jamadar parties containing 10 gangs each. This should be done at 9 o'clock of the day on which the wages are to be distributed. Each Jamadar should have his *Goshwara* or abstract of the money due to each of his gangs calculated from the muster roll of the day before. Ordinarily the wages due to a gang will not be more than Rs. 5, and the total wages due to a jamadar's party of 10 gangs will not be more than Rs. 50. One bag, therefore, of Rs. 50, already prepared as above, will ordinarily suffice for one Jamadar. Each Jamadar should therefore be given one of these bags of Rs. 50, and he should be told to distribute it into his gang bags according to the amounts set forth in the *Goshwara* or abstract of the day. When he has done this, each Jamadar should have in his hands a balance equal to the difference between the Rs. 50 and the total of his 10 gangs. If this is so, all the officer in charge has to do is to check the balance and take the receipt of the Jamadar, which should be entered at the foot of the abstract itself. The 10 small gang bags should now be put into the large Jamadar bag which should be tied up. If the distribution is to be made next day, the bag should be sealed and placed in the charge of the Treasury Guard. As a rule, however, the distribution of the money into the bags should be done on the morning of the day on which the wages are to be paid out. This is the second step. The third step is the distribution of the money in the bags to the mates. The Jamadar should take his big bag containing the 10 small ones to some central point of his party, and should there assemble his 10 mates. To each of them he will then give his corresponding bag of money. From the *Goshwara* he can see how much each mate ought to have in his bag, and he should therefore, when giving each bag to each mate, tell him what ought to be in the bag, then make him open the bag, count the contents, and if correct, make him sign for the amount, opposite the number of his gang in the *Goshwara* abstract. The money is now ready for distribution, the Jamadar has acknowledged and signed for the wages of his party, and the mates have counted, acknowledged, and signed for the wages of their gangs. This being done, the mates should be sent to their respective gangs where their flags are; and on arrival there should collect their gangs, make them sit down, and at once distribute the wages in accordance with the muster roll of the day before. On works in which there is an interval for rest from 12 to 2, it should be a standing order that the gangs assemble on their respective flags at 12 o'clock, and there await the arrival of their mates. In any case the time fixed for the distribution of the wages amongst them should be 12 o'clock. The hours for beginning and stopping work should be intimated by some form of drum, gong, or bugle. The money having been distributed, the mate should remain at his flag until the Jamadar in charge of the party comes round. At each gang he will check the distribution which has just been carried out, should ask if there are any complaints of non-payment or short payment to any of the coolies present. He should then check the balance, if any, which remains over after the distribution. The reasons for a balance should be enquired into and noted. If the balance is due to absence of any coolie, his name should be taken down with the amount due to him, and should be entered on the back of the *Goshwara*. All such balances should be collected at once by the Jamadar, and after he has visited and verified the distribution of wages amongst his 10 gangs, he should proceed to the head-quarters of the officer in charge, whose coming he should await. The officer in charge will, on arrival from the work where he has been supervising the distribution of the wages, take each jamadar's account, place any balances in his treasure chest, and enter in a book kept for the purpose the details of the coolies who have not been paid. The money thus put aside should be kept as a separate account, from which he will pay any of the absentees who may come to claim their wages. Under ordinary circumstances it will be easily possible, if the above system is carried out, to pay wages to all the coolies of a charge every day before 2 o'clock. Finally, the wages having been distributed, the mate should take the muster of the people present, and should then communicate the abstract to his Jamadar for entry in the daily *Goshwara* form. These abstracts are then made up by the Jamadar by the end of the day, and everything is ready for the work of distributing the wages into the bags, as above explained, next morning. The muster rolls should always remain in the custody of the mates. In cases where a mate is unable to read and write, he must be assisted in the work of registering and distribution by his Jamadar.

Lucknow, the 24th December 1896.

No. $389\frac{T}{M\,R}$, dated Camp Daltonganj, the 21st January 1897.

From—A. FORBES, Esq., C.S.I., Offg Commissioner of the Chota Nagpur Division,
To—The Secretary to the Government of Bengal, Revenue Department.

IN continuation of my letters marginally noted, I much regret to say that I now consider it my duty to submit the following report, under section 9 of the Famine Code, in regard to the district of Palamau. I had been hoping for the last few weeks that it would not be necessary for me to do so, but the sudden falling off in the imports of rice from the Lohardaga district, which has occurred within the past week, now threatens to bring matters to a serious crisis. On this subject I beg to refer particularly to the accompanying copy of my tour diary for the last few days, which I have employed in visiting the mart of Lohardaga and in making enquiries in villages near my line of march from Chundwa (in the Tori pargana) to Daltonganj in regard to the stocks in the hands of the cultivators. It will be seen, as regards stocks, that while in some villages the supplies are quite sufficient for both food and seed, in others they fall very short of actual requirements. But even in these cases, having regard to the considerable profits from the large lac trade of the district and to the use of forest fruits and roots for food, to which many of the people are accustomed, there would not have been any real cause to apprehend danger had the supply of rice from the Lohardaga district not suddenly failed. It is not the high prices that I fear (for these can always be met by rateable wages on relief works), but the isolated position of the Palamau district and the unmistakeable signs of the approaching cessation of imports from all sides.

1. This office No. 827M.R., dated the 11th January 1897.
2. This office No. 828M.R., dated the 11th January 1897.

2. This is especially apparent in the marked shrinkage in the quantities offered for sale at the different *hâts* which have come under my observation as noted in the margin. The supplies at 4 out of these 5 *hâts* came chiefly from Lohardaga, and it is to be noted that in the case of the *hâts* held last week, they were obtained before the sudden falling off of exports (which began about the 15th instant, viz., the date of the *hât* held at Lohardaga on the day before my visit). I should mention also that the prices at these different *hâts* show a marked advance during the week (viz., from between 8 and 9 to about $7\frac{1}{2}$ seers per rupee), as under the circumstances was to be expected.

QUANTITY OF RICE FOR SALE (ALL OF WHICH WAS READILY SOLD).

1	Talini Hât,	Monday	11th	110 mds.	Monday	18th	57 mds.
2.	Sandar Hât,			20 ,,			1 md.
3.	Daltonganj,	Wednesday	13th	610 ,,	Wednesday	20th	191 mds *
4.	Latiyahar,	Thursday	14th	34 ,,			
5.	Herin,	Friday	15th	200 ,,			

* Besides 135 maunds condemned rice rejected by the Superintendent of the jail.

3. Since my arrival here, on the evening of the 18th instant, I have held consultations with the Deputy Commissioner, the leading zamindars of the district,* and the local dealers. The opinion of all is that immediate assistance by Government is necessary in the matter of importing rice from Calcutta or elsewhere, as the neighbouring districts can no larger be drawn upon; and there are no large traders in Palamau who can possibly undertake the business of importing from further afield. It is considered by the best judges of the position here that one lakh of maunds should be sent by rail and canal to Baroon with as little delay as possible, and be forwarded from there by bullock carts to Maharajganj (34 miles) on the border of the Gaya district, whence it can be distributed by the district *biparies* to the different principal marts. Maharajganj is 42 miles from Daltonganj, and this would be a reasonable division of labour between the pack-bullocks† of this district an carts from the other side. It would take about 2,000 carts to transport the abovementioned quantity from Baroon to Maharajganj in one month (allowing 10 maunds per cart and 5 trips backwards and forwards in the month). It would take about 10,000 to 12,000 bullocks one month to carry the lakh of grain on from Maharajganj as far as Daltonganj (allowing 2 to $2\frac{1}{2}$ maunds per bullock-load and 4 trips backwards and forwards in the month).

* 1. Rai Thakurai Bhagawat Dyal Singh Bahadur, of Chainpur.
2. Kunwar Lalji wan Singh of Ladi.
3. Babu Kishenbux Rai of Deogan.
4. Babu Bhagwatbux Rai of Birampur.
5. Bhya Drigaj Deo of Utari.
6. Rai Thakurai Gobind Perashad Singh Bahadur, of Ranka.
7. Thakurai Jadunath Singh of Ranka.

† The supposed number is between 10,000 and 15,000 The Deputy Commissioner is collecting the figures.

4. What I would suggest is that Government should at once contract with a Calcutta firm for the supply of a lakh of maunds of rice to be forwarded to Baroon, and depute a special officer to engage carts in the Shahabad and Gaya districts and to superintend its carriage to Maharajganj. Arrangements can at the same time be made by the local authorities here for its immediate transport onwards. Judging from the steadily rising prices in this district, the rice will, I have very little doubt, be readily taken up at Maharajganj by the district trade at a price which will cover the costs to Government. I may also mention that the zamindars whom I have consulted (see paragraph 3 above) are all anxious to take advances to considerable amounts under the conditions laid down in the Government orders marginally noted, and they assure me that they will willingly take the loans granted to them in grain thus imported at the cost incurred by Government, instead of in cash, if so desired. Hitherto it has not been necessary to open relief works or to arrange for charitable relief, but both measures, especially the latter, will, owing to the sudden stoppage of supplies, very shortly have to be undertaken.* For both of these grain will be required. I have no doubt whatever but that in these different ways, viz., by sale to the trade, on relief works, and in charitable relief, and, if necessary, in loans under the Land Improvement Loans Act, the quantity mentioned above will be used up in the district without any loss to Government; and I think it not improbable that it will be expended within two months or less from the time of its receipt. One measure of this is afforded by the exports from the Chainpur and Lohardaga thanas (both in the Lohardaga district) during the month of December last, which (see entry in my diary dated the 16th instant) have been estimated at 15,700+1,500=17,200 bullock-loads, or about 43,000 maunds, the bulk of which was sent to this district.

Government Order No. 76 Agri., dated the 31st December 1896.

* This is now being done.

5. If, however, Government think it advisable to act with greater caution in this matter, then I would at least ask that arrangements be made to at once supply half a lakh of maunds in the manner indicated, preparations being at the same time made for this to be followed by a further immediate supply on receiving information of the reception met with by the first consignment. I must, however, in this connection, state that the Deputy Commissioner and the zamindars with whom I have conferred agree in declaring that the transport of grain during the hot-weather months from Baroon into this district will be a matter of great difficulty and expense, if possible at all, owing to the scarcity of water and fodder at that time of year along nearly the whole route. If, then, on receipt of the first consignment, its rapid consumption gives proof of the district needs being greater than at present suspected (which will certainly be the case if the outturn of the *rabi* is disappointing or the *mahua* crop fails), it may then be too late to make good the threatened deficit. On the whole, therefore, I prefer to recommend the early despatch of a full lakh of maunds as suggested in the preceding paragraph; and I think that there is the greater need for this, and for its concentration at Maharajganj *as speedily as possible*, in view of the contingency of a failure in the *mahua* crop. And in any case the amount of importations during December go to show that the district will probably require at least half a lakh of maunds a month (or even more) during the four months, May to August, after the consumption of the *rabi*. It will be the safest plan, therefore, to concentrate the first lakh of maunds as speedily as possible at Maharajganj, in order to give time for the concentration of another 2 or 3 lakhs, if the rate of depletion of the first supply indicates the necessity of this, by the middle of April. And I would in this view of the case recommend that arrangements should be made for the employment of 4,000 bullock carts in the Shahabad and Gaya districts in order to transport the first consignment of 1 lakh to Maharajganj, if possible, within a fortnight of its arrival at Baroon.

6. The particulars required to be submitted by paragraph 9 of the Famine Code with this report are contained in the accompanying copy of Mr. Renny's letter No. 1681R., dated the 18th instant, with my marginal notes. Regarding the Statements B and C attached to Mr. Renny's report, containing proposals for the division of the district into relief charges, I will address Government in another letter, after discussing this question more fully with that officer.

7. In conclusion, I beg that Government will press upon the Telegraph Department the urgent necessity of at once completing the telegraph line from Aurangabad to Daltonganj, the want of which is very severely felt in an emergency such as the present one.

TOUR DIARY FROM 13TH TO 18TH JANUARY 1897.

13th January.—Started at 12 noon and rode and drove 45 miles to camp at Chandwa police outpost in Tori pargana, district Palamau, where I met Mr. Fullerton, District Superintendent of Police, and Maharaj Kumar Jagat Mohan Nath Shah Deo, brother to the Maharaja of Chota Nagpur and proprietor of pargana Tori.

14th January.—In company with the District Superintendent of Police and the Maharaj Kumar visited Bari-Rampur annual mêla. Scarcely any food-grains for sale until 10 A M., when one *bipari* appeared with 2 maunds of rice from Balumath (16 miles off), which readily sold at 15 cutcha seers per rupee (=8½ pucka seers), a few seers of potatoes for sale at 16 seers per rupee, and a few small baskets of gram and peas. Searched three cultivators' houses in village Bari. In one found 5 or 6 maunds of paddy; in another (an old single man's) 1½ maunds; in another nil; in the jagirdar's house found about 700 maunds, besides 150 or 200 maunds reserved for seed for his own and his raiyats' lands. He is constructing a reservoir bandh with this, paying in grain at rate which comes to about 3 annas per 1,000 cubic feet.

Women collecting *sag* in fields everywhere. This is said to be usual. Met District Board Overseer, who gave me following particulars regarding late test works in this neighbourhood. Three test works (at 2 annas per 1,000 cubic feet) were lately opened at *Chandwa*, *Nagarsanti* and *Balumath*, but only from 2 to 8 persons attended for two or three days, and then left dissatisfied with the rate, and also to plough their lands on the rain which fell on 31st December.

15th January.—With District Superintendent of Police to Balumath (12 miles) and back. On our way there and back searched several villages, house by house, with following results:—

Chitrapur—10 houses, all Uraons; population about 45 adults besides children. Stocks of paddy found in the houses were 40, 20, 6, 119, 2, 135, 15, 268, 20, 145—total 770 cutcha maunds. There are also some very fair *rabi* crops belonging to the village.

This village seemed to me a fair average one, with both high (chour) lands and low (gheera) lands. People very well-to-do.

Heraphoo—21 houses, all Uraons; 70 adults, besides children. Stocks 40, 3[illegible], 16, 0, 10, 1, 12, 4, 9, 25, 6, 6, 3, 20, 14, 23, 7—total 245 maunds. Lands high and poor; two or three families gone off this year to the Duars. Some *rabi* crops, but not very good. Decidedly badly off.

Pala Purna—(Balumath) 5 houses, 27 adults. Stocks 23, 140, 25, 50, 0—total 238 maunds. A little *rabi* round the houses. Fairly well-to-do.

Khas Balumath—19 houses. 84 adults. Stocks 0, 20, 12, 18 12, 7, 1, 8, 3, 7, 4, 25, 8, ½, 30, 80, 62, 20, 0—total 315½ maunds of paddy, *makai*, and other grains; ⅔rds badly off.

Teli Tolah.—Visited one house (of Sita Teli's) and found between 400 and 500 maunds. There were several other well-to-do Telis' houses, which we had not time to visit.

On return visited weekly *hât* at village Herin. There were about 200 maunds of rice for sale, partly from Lohardaga (20 miles on pack-bullocks) and partly from neighbouring villages, selling at 15½ cutcha seers (about 8¾ pucka seers) per rupee Some 30 to 40 maunds purchased by *biparis* for re-sale at Harang, Chiru, and Ranchi *hâts*. Potatoes 16 pucca seers per rupee. Large quantity of lac for sale at Rs. 14 per maund: trade in lac said to be 25 per cent. above last year.

16th January.—With District Superintendent of Police to Lohardaga, where interviewed Messrs. Grauzin and Lauzemis (German Missionaries), Babu Durga Das Bose, Munsif, Mr. Heberle (Agent to Maharaja of Chota Nagpur), and several grain dealers.

The weekly *hât* was held here yesterday. It is one of the largest trade centres in the Division; trade in rice, entirely export, from Lohardaga district to Palamau and Gaya; but surplus stocks are evidently suddenly running dry. About 1,500 bullocks came yesterday from Gaya and Palamau to take away grain, but about half of them had to return empty. Rate was 8½ to 9 pucka seers per rupee. The District Superintendent of Police visited the principal golahs and found only 97 maunds in stock. The missionaries say that the people about here have sufficient stocks to last for two or three months, but will probably have to eat their seed.

The Police Inspector's enquiries show exports from whole of thana Lohardaga as under:—

September 1895 to June 1896	...	57,600	Bullock loads
July—August	...	Nil	Owing to heavy state of roads (cutcha).
September 1896	...	1,888	Each bullock carrying about 2½ maunds.
October „	...	2,700	
November „	...	3,788	
December „	...	15,700	

and from thana Chainpur—

September 1895 to June 1896	7,740
September 1896	1,100
October „	1,200
November „	1,400
December „	1 500

On our way met several gangs of Kol women going 15 miles to hunt for *ság* in the jungles towards Chandwa.

Searched *en route* the following villages:—

Salgi—1 Uraon's house: 4 persons. 48 maunds paddy.
Ditto. 6 persons. 5 maunds.

Hissel—26 houses, 113 adults. Stocks 0, 20, 25, 20, 100, 0, 90, 20, 18, 14, 40, 16, 50, 0, 250, 50, 0, 10, 6, 50, 70, 60, 40, 50, 113, 0— total 1,112 maunds paddy. People fairly well off.

On our way we met a batch of 100 bullocks from near Daltonganj (75 miles) returning empty, as the price of rice at Lohardaga had levelled up to that at Daltonganj; another smaller batch returning empty from near Sherghatty in Gaya district; other droves of 20 and 50 to 6, taking rice (at 9 seers) from Lohardaga to Lattyhar (28 miles) and Loharsi beyond Daltongunge (75 miles): some of the latter were empty, as the supply for sale had run short.

17th January.—Returned with District Superintendent of Police from Lohardaga to Chandwa and on to Lattyhar. On our way searched the following villages between Lohardaga and Chandwa:—

Baizuddin—9 houses: 28 adults besides children. Stocks 0, 0, 0, 3, 300, 84, 34, 32, 5—total 458 maunds of paddy. From this village 7 men and 3 women have lately gone off to Duars.

Juris—41 houses: 145 adults besides children. Stocks 125, 5, 250, 18, 130, 30, 10, 2, 36, 20, 78, 0, 20, 16, 4, 24, 3, 0, 2, 0, 0, 2, 6, 21, 9, 10, 24, 0, 10, 12, 16, 14, 4, 20, 9, 50, 3, 35, 12, 0, 0—total 1,030 maunds of paddy. From this village about 20 persons have lately gone off to Duars.

At Chandwa again met Maharaj Kumar Jagat Mohan and ascertained list of villages in which he is willing to construct *bandhs* as famine relief works at his own expense, provided the Government officials supervise the work.

Between Chandwa and Lattyhar searched—

Tolah Kita—11 houses: 42 adults. Stocks 0, 0, 0, 0, 3, 0, 3, 0, 3, 0, 55—total 64 maunds paddy. The raiyats appear to be all in the hands of a wealthy mahajan (Mahadeo Sahu of Abu) and are very badly off.

Weekly *hát* at Lattyhar on Thursday. At last *hát* there were 20 maunds for sale (chiefly from Lohardaga) at 14 cutcha seers (= 7½ pucka seers) per rupee.

18th January.—Lattyhar to Munka, and on to Daltonganj (40 miles). *Háts* held to-day at Zalim and Munka. At former 57 maunds rice for sale, of which only 4 maunds came from neighbouring villages and all the rest from Lohardaga (35 miles). All sold, not to *biparis*, but to villagers. This rice was bought at Lohardaga at 8½ seers pucka, and sold to-day here at 7 seers 6 chitaks per rupee: all new rice: a number of persons went away without getting any. *Makai* 5½ maunds (from Lohardaga), sold at 11 seers per rupee. *Marua* 5 maunds from Lohardaga sold at 11 seers per rupee. The above information was given me by Thakurai Chatoorgaon, brother of the Rai Sahib of Chainpur, who visited the *hát* at my request.

At Munka *hát* I only found about one maund of rice for sale, which came from two or three villages six or seven miles off. Selling price 8 *kohia* pice per cutcha seer, or about 8 seers pucka per rupee. At the previous *hát* I am told that there were 10 maunds sold at 9 pucka seers per rupee. *Makai* very small quantity for sale at 10½ seers per rupee.

Between Lattyhar and Munka searched following Government villages:—

Bhanpartolah—20 houses: 58 adults, 20 children. Found 80 maunds paddy in one house, 80 in another, 3 maunds in two others, and nothing at all except very small quantities of *makai*, beans, &c., including *bair* (wild plums) and sálnuts in the others. The inhabitants are chiefly Karwars of the labouring class, with 10 cottahs to 2 and 4 bighas of land. They have a small amount of *rabi* coming in, but the paddy was only about a 2-anna crop.

Karkat—37 houses: 93 adults and 79 children. Found only 116 maunds paddy, &c., nearly all of which was in only four houses.

Doodoonges—18 houses: 109 adults, 67 children. 367 maunds paddy, of which 300 were in one house and 58 in four others, and nothing at all but small quantities of *makái*, beans, and wild plums in the rest.

Hotwag—10 houses: 41 adults, 24 children. 68 maunds, of which 60 were in one house.

Purseai—18 houses. 64 maunds paddy.

These villages are all close together, with high and poor lands. The inhabitants are chiefly labourers and very petty cultivators. They do not show any actual signs of want, notwithstanding that, we could find no stocks of food to speak of in most of their houses.

19th January 1897.—At Daltonganj. Walked though the town. Not a single beggar to be seen. Interviewed the grain dealers at the Deputy Commissioner's house and received visits from the principal land-owners of the district and conferred with them and Deputy Commissioner on famine question.

A. FORBES,

Commissioner, Chota Nagpur Division.

No. 410T.—M.R., dated Camp Daltonganj, the 26th January 1897.

From—A. FORBES, Esq., C.S.I., Offg. Commissioner of the Chota Nagpur Division,
To—The Secretary to the Government of Bengal, Revenue Department.

IN paragraph 2 of this office No. 828M.R., dated the 11th instant, I informed you that I had directed the District Officers, as a precautionary measure, to submit to me in future fortnightly reports in the manner prescribed in sections 10 and 13 of the Famine Code. In my No. 389T.—M.R. of the 21st instant, I forwarded to you, under section 9 of the Code, a report dealing with the district of Palamu. I now beg to forward, for the information of Government, and in continuation of this office No. 828M.R., a summary of the first fortnightly reports I have received from the Deputy Commissioner of the other four districts. I also annex *in extenso* the reports in question from the Deputy Commissioners of Hazaribagh and Manbhum, as they appear to me of sufficient importance to be laid before Government.

SINGHBHUM.

2. Mr. Bompas states that the police reports for the second week in January had, on the date of his letter (15th instant), been received from all parts of the district, and that they reveal no existence of distress, no wandering of needy persons, and no increase in crime. The health of the people is good, and rice is selling at 10 to 12 seers per rupee. Mr. Bompas has given no information in regard to the continuance or otherwise of exports from his district. He will be instructed to do so in future.

LOHARDAGA.

3. Mr. Streatfeild still feels confident that, unless the *mahua* crop fails, no special relief measures will have to be taken in his district The only area where scarcity may perhaps be felt is that known as the Panch Parganas, viz., the parganas of Silli, Sehey, Baranda, Bundu, and Tamar, a tract of country 40 miles by 15, on the eastern edge of the district, adjoining Manbhum, with a population of about 120,000. The Deputy Commissioner reports that there is a road from Silli to Tamar, and onwards from Tamar towards Chandil station on the Bengal-Nagpur Railway, running through this tract, which would be a useful work if the Road Cess Committee of Manbhum would undertake its continuation in that district. In view of the fact that the Deputy Commissioner also reports that the inhabitants of the tract in question are said to be having recourse in an unusual degree to the use of jungle fruits, &c., I have suggested the advisability of the Lohardaga Road Cess Committee putting this road in hand at the ordinary contract rates, an arrangement at the same time being made with the Manbhum Committee to carry it on through that district.

MANBHUM.

4. Mr. Luson's report deserves careful perusal. It shows that although Mr. Luson considers that, on the whole, the circumstances up to date are more favourable than in 1874, yet in that year the *mahua* crop gave a very abundant outturn, while special efforts by Government, at a total cost of some 14½ lakhs of rupees (including the estimated cost of 8,830 tons of rice imported by Government), had to be made to prevent a disaster. If the *mahua* crop during the present year fails, it seems probable that the scarcity will in certain parts approach that of 1874, and in this case the operations which will have to be undertaken will, Mr. Luson estimates, cost not less than some five lakhs of rupees for relief works and gratuitous relief, besides advances amounting to some two to four lakhs as loans for village works of improvement, under the orders conveyed in Government order No. 76Agri., dated the 31st December 1896. The parts of the district where the failure of the crops has been most marked are in thanas Govindpur, Tundi, and Nirsha in the Govindpur subdivision, and thanas Chas and Chundil in the Sadar subdivision ; and in these places the Deputy Commissioner proposes to start test works early next month.

5. Mr. Luson is watching the progress of events carefully, and I have every confidence in his judgment. As regards supplies of food for any relief works that may have to be opened or for the requirements of the district generally, there need be no apprehension, as the district (notably the affected

tracts) is traversed by the Bengal-Nagpur and a branch of the East Indian Railways.

HAZARIBAGH.

6. Mr. Herald has also submitted a careful report on the prospects in the Hazaribagh district. I am, however, myself inclined, having regard to the high prices of food-grains at some of the principal marts,* and to the comparatively isolated position of the district (the Giridih railway station is about 70 miles from Hazaribagh), to take a somewhat more serious view of the position than is apparently held by the Deputy Commissioner. I hope, however, to be at Hazaribagh next week and will then go into matters with Mr. Herald. Meanwhile I am asking him to start test works freely wherever the high prices show that relief works are probably needed, and I have also requested him to use his influence with the large traders at Hazaribagh to induce them to hesitate no longer to import Burma rice from Calcutta. Whether some help in the shape of loans from Government to assist them in this matter will be needed or not, I will consider after I have gone into the question at Hazaribagh.

*Mart.	Thana.	Common rice.	Makai.
1	2	3	4
Hazaribagh ...	Hazaribagh ...	7½ to 8 seers ...	9½ seers.
Hunterganj ...	Hunterganj ...	8 seers ...	10 ,,
Hosir	Gumiah	8 ,, ...	8 ,,
Tetarhar	Kasmar	8½ to 9 seers ..	Not given.
Bogda	Ditto	Ditto ...	Ditto.
Barhi	Barhi	8½ seers ...	10 seers.
Chatra	Chatra	7½ ,, ...	11 ,,
Pathalgara ...	Ditto	7 ,, ...	11 ,,
Khamhichatty ..	Ditto	6½ ,, ...	11 ,,
Maharajganj ...	Chouparan ...	8 ,, ...	11 ,,
Dumri	Ramgarh	8 ,, ...	Not given.

7. From Mr. Herald's report it appears that the portion of the district where scarcity will be most felt is the tract on the lower plateau along the Grand Trunk Road, comprised in the Barhi, Bagoda, Dumri, Chouparan, and Koderma thanas. There seems every probability, however, judging from the high prices reported, that measures of relief will have shortly to be adopted in other parts of the district also. The estimates of expenditure and for advances for village works of improvement and loans to cultivators in Government estates, referred to by the Deputy Commissioner, are being dealt with separately.

No. 1399R., dated Camp Devi, the 15-20th January 1897.

From—J. L. HERALD, Esq., Deputy Commissioner, Hazaribagh,

To—The Commissioner of the Chota Nagpur Division.

I HAVE the honour to submit the following report called for by your letter No. 1T., dated 27th December 1896.

1. Hazaribagh contains an area of 7,021 square miles and a population of 1,164,000. In this area there are only three places, Hazaribagh, Chattra, and Giridih, approaching the status of towns. The rest of the population is distributed among 195 villages containing over 100 houses, and 7,850 villages containing each less than 100 houses. The area under cultivation is estimated at 2½ million acres, leaving 2 million acres of jungle and waste. The density of population varies from 97 in Simeria thana to 239 in Giridih and 256 in Kharagdiha thanas, with an average of only 156 in the Sadar subdivision and 196 in the Giridih subdivision. The population is divided into 150,000 high-caste Hindus, 810,000 low-caste Hindus 93,000 aboriginal tribes, and 108,000 Muhammadans.

Most of the low-caste Hindus and Muhammadans and all the aborigines find a certain proportion of their ordinary food in jungle produce. With the enormous extent of jungle and the sparse population above quoted, it is evident that it is quite impossible for starvation on a large scale to occur, even under the most adverse circumstances.

The district consists of the following divisions:—

(1) In Giridih subdivision, thanas Giridih, Kharagdiha and Dhanwar, elevation about 1,000 feet, fairly dense population and comparatively little jungle (I mean by this less than one-fourth is jungle). This tract contains the coal mine region and is close to the railway. It had at least 10 annas *bhadoi* crop and 8 annas rice crop. It grows a good deal of poppy and sugarcane, but little *rabi*. *Mahua* is fairly plentiful.

This division can safely be excluded from general consideration of distress, though there may be isolated instances of villages or families suffering from unfavourable circumstances.

Parts of the thanas of Koderma, Dumri and Gawan come under the same category.

(2) Chatra and Hunterganj thanas resemble above in some respects; about 8 annas crops of *bhadoi* and winter rice and a good deal of *rabi* grown; *mahua* plentiful. Population not so dense. Most of the low castes are Kamias, who will be supported to a great extent by their masters, as otherwise they (the masters) would lose their influence over them. This quarter may also be left out of general consideration for this year.

(3) The higher plateau of Hazaribagh, thanas Hazaribagh, Burkagaon, Simeria, Ramgarh, Gumiah and Mandu. In the tract the *bhadoi* averaged 8 annas and winter crop about 7 annas; little *rabi* grown; *mahua* plentiful in most villages. This quarter calls for watchfulness.

(4) The thanas that lie along the Grand Trunk Road on the lower plateau, viz., Barhi, Chouparan, Bagoda, parts of Koderma and Dumri. In this tract *bhadoi* was under 8 annas, winter rice not more than 6 annas; little *rabi* grown, some poppy *mahua* fairly plentiful The population is about 150 to the square mile. Area about 1,400 square miles, or a total population somewhat over 200,000. It is in this region that the first signs of scarcity will show themselves.

II.—Reasons for apprehending scarcity.

The rain of 1896, up to the middle of September, was greatly in excess of the average, and the prospects of *bhadoi* were somewhat spoiled in consequence, whilst winter rice promised a bumper harvest. The *bhadoi* crop was also spoiled by the lateness of the rain, which did not fall in quantity until towards the end of June, a month late.

In September the rainfall fell short of the average in sadar by 3½ inches, but exceeded the average in Giridih by 1½ inches.

In October we should have had 3 inches of rain, but none fell until the end of December, when most of the winter rice had been harvested.

The result is that the *bhadoi* varied from 7 annas in division (4) to 14 annas in division (1), with an average for the district of probably 11 annas.

The winter rice varied from 10 annas in division (1) (which was much favoured for both crops by percolation from the plateau) to about 5 annas in division (4).

Rabi was not sown to more than 4 annas, owing to the want of rain in October and November. What has been sown has benefited by Christmas rainfall, and with occasional showers should produce a 16-anna crop, which will be of much assistance so far as it goes.

The extensive rise in prices has introduced an element into the situation which has been the source of the greatest anxiety. With rice and *makai* at 16 seers and 20 seers, the short crops would have given little, if any, cause for anxiety. But in this poverty-stricken district, where the ordinary incomes of the people prove that they are in the habit of supplementing their food-supply derived from cultivation with articles of jungle produce, the problem was how far this supplemental supply could still further encroach upon the supply of cultivated produce. With incomes which scarcely suffice for the support of the household in years of cheap food, it follows as a necessary consequence that only half the supply of cereals would be forthcoming when rice and *makai* sold at 8 and 12 seers for the rupee.

Statistics which prove that the family of a poor cultivator is supported in ordinary years at an equivalent of Rs. 8 a month are disproved in this district by the well-ascertained facts that families exist in thousands whose maintenance is not represented by more than Rs. 4 is calculated in money value.

Prices have remained on the whole fairly steady at rates below 10 seers of rice, 12 seers of *makai*, 18 seers of *marua*, and 28 seers of *mahua* for the rupee.

Rice has gone as low as six seers in some bazars, *makai* as low as eight seers, *marua* as low as 11 seers, *mahua* as low as 15 seers for temporary or local causes, but the average has been on the whole—

Rice	...	...	...	8 to 9 seers.
Makai	...	...	...	10 to 11 „
Marua	...	...	...	12 „
Mahua	...	...	...	25 „

which though extremely bad for the district, is better than anyone dared hope for two months ago.

III.—Area and population likely to be affected.

I have already given some particulars. It cannot be too often repeated that everything now depends on the outturn of *mahua* crop. If the *mahua* crop is a failure, it will be necessary to declare half the district in a state of famine at once. Coming as it does at the most unfavourable period of the year, before the cultivation season, when labour is least in demand, and when advances of any kind are hardest to get, because the mahajan has so many claims, if the *mahua* crop of 1897 is a bumper one, measures of relief will be required to only a nominal extent. I do not estimate for a failure of the *mahua* crop. I estimate for a crop something below the average. On this assumption I consider that relief may be required over division (4) to an extent which will be described, and in the other divisions to a slighter extent, in order to provide for the less fortunate villages.

I take the worst thanas—

Thanas	Total.		Unfavourable, falling within Division 4.	
	Area.	Population.	Area.	Population.
Barhi	353	51,000	250	30,000
Bagoda	442	64,000	300	30,000
Dumri	509	80,000	100	30,000
Chouparan	356	62,000	150	20,000
Koderma	442	77,000	300	30,000
Total ...	.....	3,34,000	.....	1,40,000

For other thanas I estimate as unfavourable, that is, probably requiring assistance, but to a slighter extent,—

Hazaribagh ...	...	457	101,000	150	10,000
Burkagaon ...	...	489	57,000	100	5,000
Ramgarh ...	...	364	79,000	100	8,000
Gumiah ...	...	599	59,000	150	10,000
Kasmar ...	...	321	50,000	50	5,000
Gawan ...	...	432	57,000	100	10,000
Other thanas ...	...	2,300	4,77,000	.....	12,000
Total	...	.....	.....	.....	60,000
GRAND TOTAL	...	.....	.....	.....	200,000

In submitting the figures with some confidence that they represent the maximum extent of any famine areas and population this year, I have great doubt whether the distress will assume a form calling for Government intervention in a greater portion of these areas. I do not know the extent to which the population can supplement their food by jungle products, the extent to which masters will consent to support their Kamias, the extent of emigration that will ensue from the scarcity, the amount of stocks in private stores, the possibilities of the mahajans, the generosity of the zamindars and tenure-holders, the rise and fall in prices during the ensuing months. I have endeavoured to estimate what I believe to be maximum areas after seeing almost the whole of the district. The above reasons also make it even more difficult to estimate the percentage of the population in the distressed area which will be thrown on our hands. I can only estimate at 5 per cent. at present, that is, 10,000 on the average to be provided for by charitable relief works.

IV.—COMMUNICATIONS.

The circumstances of the district vray greatly as regards communications. Giridih, Kharagdiha and Dumri thanas lie within 30 miles of the railway. Other thanas vary from 30 to 90 miles from any railway, but are fairly in touch with the big grain marts of Ranchi and Gaya. The district is fairly well supplied with roads which would throw supplies from Calcutta within 8 or 10 days at most from the date of arrival at Giridih.

Pack bullocks and *sagers* are available everywhere, and of course coolies are readily procurable. Roads are generally passable throughout the year.

V.—GRAIN-STOCKS.

I have already submitted a report on this. No one in the district lays in large supplies of food-grains. Big grain-dealers are found only in the three towns, and even they deal in hundreds rather than thousands of maunds.

VI.—SOURCES OF FOOD-SUPPLY.

Even at this late date the grain-dealers are in a state of extreme uncertainty. They are waiting for a "key-note" from other districts.

So far as I can form an opinion, I believe there will be enough food in the district as a whole to tide over till next harvest. I include prospects of coming food-crops, especially the *mahua* and other fruits, and whatever *rabi* is produced.

But I am afraid that local supplies will fail in places, and I am afraid that the unassisted commercial community will not be in a position to supply the remedy. Whilst refraining from estimating at present for pecuniary assistance to the dealers, I consider my most important task in the coming months will be to use every endeavour to ascertain where food-supplies fall short, and to endeavour to induce dealers to supply the local deficit. I am glad to say I find the dealers in this district very amenable and willing to oblige. I am afraid they are not prepared to speculate in imports from Burma, even with Government assistance; but it will not be necessary to ask them to do this if the prospects which are held out, that Burma rice will be freely available in the Calcutta market, are maintained. The local wholesome dealers may be confidently expected to replenish deficit local supplies from Calcutta without Government assistance if local prices give sufficient prospects of profit, and with Government assistance if local prices remain low in spite of deficit supplies. I consider this is one of the districts to which the limitation of the principles laid down by the Famine Commission would expressly apply, that is, a district which cannot be safely left to private enterprise for its food-supplies in time of scarcity.

VII.—PROPOSED MEASURES OF RELIEF.

In the beginning of December the Commissioner ordered test relief works to be opened. These were opened on 10th December. The rates were calculated by Commissioner's orders strictly at Famine Code rates based on 12 seers per rupee for coarse food-grains. These rates were thus very little less than ordinary labour rates for this district, yet they failed to attract coolies. The daily task and the slightly smaller wage appealed to their prejudices. I shall open test works again in the beginning of February, and think by that time we may attract up to about 1,000 workers in February and March.

I may note here that the Christmas rains have given immense assistance to cultivators and labourers, as fields are being ploughed everywhere for the first turn over of the soil before the sowing season.

In March I shall finish all road cess, khas mahal, and encumbered estates and wards' estates works which have been sanctioned this year, and which will have been kept over till then to provide work when most needed.

If prospects become gloomy, these works will be done at Famine Code rates, but in any case they will be completed to prevent funds lapsing and other complications in the accounts.

Road cess fund will amount to Rs. 5,000, and other funds will bring the total up to Rs. 10,000. This expenditure cannot be considered a measure of relief, as it would have been incurred to a great extent in the ordinary course. All that can be said is that greater interest is being taken in the matter, and it is being diverted into more or less distressed localities.

Surely relief expenditure will consist of small sums spent in relieving travellers and helpless persons abandoned by their relatives. This may cost Rs. 300 to Rs. 500 before the end of March. It will be seen that nothing is required from Provincial Funds beyond what has been already sanctioned in the ordinary course for this year's expenditure.

As regards relief works for 1897-98, I have to say the necessity of pure and simple relief works has not yet been fully proved, but it will be advisable to estimate for the relief of an average of 10,000 persons for the period between 15th April and 15th August. This estimate will include the persons who would, in the ordinary course, be working under the Executive and District Engineers at this season. It is noteworthy that road repairs and constructions are largely done during the rains in this district.

Ten thousand persons for four months, at one anna per diem, would require Rs. 75,000 to Rs. 80,000. Out of this amount, the district funds will supply Rs. 25,000 to Rs. 30,000. This is the amount which will be spent within the district in the ordinary course, and special attention will be paid to spending it in the localities that most need help, and also in spending it in the manner likely to benefit the greatest number of people. It is hardly fair to call this "famine work:" it is "work in aid." As regards the balance of Rs. 50,000 for relief works and charitable relief, should circumstances call for the expenditure, there will be no difficulty in selecting sites for bunds and village roads in the neighbourhood of distressed villages.

In this connection, I would remind you of the result of efforts to improve the water-supply of the villages. I informed you that promises of improvements of an estimated value of Rs. 30,000 at least were received by me from the leading men of the district. Many of these promises remain unfulfilled from want of funds, owing to the bad harvest and consequent arrears of rent collections. Timely loans to the persons whose names and intended generosity I have on record, would not only ensure the desirable improvement in water-supply at an early date, but would also afford a great deal of valuable assistance in wages to the village labourers. I have separately reported this matter to you.

As regards loans, I think it is most important that we should ensure that the raiyats in Government estates, wards' and encumbered estates are in a position (1) to sow the whole of their cultivated area and not a portion only, and (2) are able to do this without incurring debts at ruinous terms with the village mahajan. To attain these objects I advocate a liberal policy as regards loans, raiyats being dealt with in groups of 5 to 20, to give joint and several security and to save trouble. I have asked for Rs. 50,000 to be available for this purpose in April and May.

I have not formally marked out relief circles. These would be placed, with head-quarters at intervals of 10 to 15 miles, along the Grand Trunk Road in the first instance. At present I have two officers, the junior Deputy Magistrate at Sadar and the Sub-Deputy Collector at Giridih, whose services might be devoted entirely to relief work without entirely disorganizing district work. Further proposals will be made hereafter.

VIII.—Estimate of expenditure.

I have separately reported my estimates. I note that in 1874 the expenditure in this district was—

			Rs.
Charitable relief	...	...	25,381
Wages (1) Cash	...	...	70,835
Wages (2) Grain, 504 tons value	...	...	45,000
Total		...	1,41,216
Loans (1) Cash	...	...	72,994
Loans (2) Grain, 603 tons value	...	...	54,000
Total		...	1,26,994
			2,70,000 (round numbers.)

At present I estimate charitable relief and wages at Rs. 1,00,000, including all items of expenditure, loans for village works, &c., Rs. 50,000, and advances to help cultivators, at Rs. 50,000, as extreme estimates of expenditure.

IX.—Remission and suspension of Revenue.

With the exception of lenient pressure on khas mahal raiyats, no steps under this head are necessary.

X.—Additional establishment.

I shall not be able to say if any establishment is required for a month or two; meanwhile, existing establishments will be utilized to the full.

XI.—General.

Subscription lists have already been opened at Giridih and Hazaribagh.

At Giridih Rs. 1,150 was collected. Nothing has yet been spent.

At Hazaribagh Rs. 400 was collected. A small sum is being spent on a kitchen managed by a committee of native gentlemen. Very small numbers, not exceeding 10 per diem, attend.

A great difficulty in this district is to deal with the swarms of travellers that come down the Grand Trunk Road and minor roads from north to south. Some of these are in search of work; others are pilgrims. Many seem to be aimless wanderers.

To help these in distress, a kitchen has been opened at Barhi, on the Grand Trunk Road, under the supervision of the Rural Sub-Registrar. He spends Rs. 5 to Rs. 10 weekly in giving cooked food to those in want. His instructions are not to allow such wanderers to remain but to make them pass on in a day or two. Emigration to Assam and the Duars is going on on a much enhanced scale this year. I have not yet got figures, but I am informed some 40,000 emigrants will leave this year. They do not all belong to this district; many come from the neighbouring districts of Lohardaga and Palamau, and some from the Native States. They pass through Hazaribagh *en route* when they are approved of by the tea-garden representatives.

This report is written without the assistance of the police reports called for. Thanas in this district are scattered over an immense tract, and have an unusually incompetent set of officers in charge. However, I have, for the last three months, been getting constant communications from officers and other gentlemen in all parts of the district, and have myself seen most of the different tracts.

I may say that I have taken a less gloomy view of the situation than my correspondents, almost without exception. I have endeavoured to avoid inferences from the frequent individual case of distress that must necessarily occur in a year such as this, and have endeavoured to estimate the maximum degree of distress that the district, as a whole, can pass through. I can only again repeat the warning that a few showers of hail or cloudy weather in March and April will damage the prospects of the *mahua* crop to the extent of at least a lakh of rupees.

No. 1356, dated Purulia, the 19th January 1897.

From—H. Luson, Esq., Deputy Commissioner of Manbhum,
To—The Commissioner of the Chota Nagpur Division.

I have the honour to submit the following report on impending famine in this district, in accordance with section 10 of the Bengal Famine Code, as directed in paragraph 8 of your letter No. 1T., dated the 27th ultimo.

2. Regarding the other orders contained in your letter just mentioned, you are aware that I had already taken action by calling for weekly reports under section 1 of the Code, and for monthly reports under section 161 idem, and by advancing small sums to the police officers in charge of certain thanas and outposts, for the relief of immediate distress in accordance with section 12 idem.

3. This report will follow the headings given in section 9 of the Code.

(*a*) *Grounds for my belief that famine is imminent.*—In paragraph 9 of my special report, submitted under the orders of the Government, on food-stocks and the outturn of food-grains in this district, No. 1307R., dated the 6th instant, I stated that I did not feel any apprehension at present regarding the state of this district, and that if the *mahua* crop in March and April, which is very generally eaten, should be a good one, I did not anticipate a large amount of distress before July next. The reports which I have since received under sections 1 and 161 of the Bengal Famine Code tend generally to confirm this view, though some of them anticipate considerable distress in any case amongst those who have not reaped a crop of rice this year. In the report mentioned, I estimated that, with the *rabi* crop now on the ground, there would be just sufficient food-grain in the district, besides the amount required for seed, to last the whole population until the middle of July 1897, *if the stocks were equally divided.* I pointed out at some length that this estimate was based upon a number of uncertain factors. It is, however, the best I can give. The stocks in hand will of course not be equally divided. Many of those who have the stocks, such as zamindars and the more well-to-do cultivators, will keep them for their own future use, or possibly for sale outside the district, and there will thus be a deficiency of food for the poorer strata of the population.

4. In my report above quoted, I alluded to the export and import trade of the district, and showed that in good years there is, on the whole, an export of some 80,000 or more maunds of cleaned rice. I have been unable to estimate the trade in *rabi* produce, but perhaps it may be said that there is in a full year half as much as *rabi* and *bhadoi* together on the whole

exported as rice. Thus it may be taken that there is normally a balance of exports in all food-grains of, say, 1,50,000 maunds at most. Taking the figures of the Land Records and Agricultural Department for cultivated area of the different crops and for rates of outturn, the total produce of 16-anna crops* during the year in Manbhum would be 8½ millions of maunds of food-grains, so that in a good year the district exports $\frac{1}{57}$th (or less than 2 per cent.) only of its food-produce, and retains the rest. So much for a normal year. The year 1894-95 was, as will be seen further on, very little below a normal year. Last year, viz, 1895-96, was a poor year. I take the following extract from the Bengal Government Resolution, No. 557T.G., dated the 28th October 1896, upon the General Administration Report of the Chota Nagpur Division for the year 1895 96 (paragraph 3) :—"The average rainfall of the division was 44·69 inches, 16·75 less than in the preceding year, and was especially deficient in Hazaribagh, Palamau, and Manbhum. The crops were consequently poor, the outturn of rice throughout the division being estimated at 11 annas, whereas in each of the two previous years rice yielded a good crop. The average outturn of wheat, pulse and oilseeds was also much lower than in the preceding year, and the *mahua* tree yielded only a 9-anna crop." Taking the figures given in detail in paragraph 11 below, the outturn of food-grain in this district, for this and the two previous seasons, has been as follows:—

	Mds.
* Winter rice, 468,500 acres × 15 ...	= 70,27,500
Rabi (food-crops) 83,400 × 10 ...	= 8,34,000
Bhadoi (food-crops) 70,400 acres × 10	= 7,04,000
Total ...	85,65,500

	1894-95.	1895-96.	1896-97.
Winter rice ...	70,27,500 Mds.	(70,27,500 × $\frac{14}{16}$) =43,92,187 Mds.	(70,27,500 × $\frac{8\frac{1}{2}}{16}$) =37,33,359 Mds.
Rabi ...	(8,34,000 × $\frac{3}{16}$) =6,25,500 ,,	(8,34,000 × $\frac{12\frac{1}{2}}{16}$) =6,51,562 ,,	(18,34,000 × $\frac{2}{16}$) =1,04,250 ,,
Bhadoi ..	(7,04,000 × $\frac{2}{16}$) =3,96,000 ,,	7,04,000 ,,	(7,04,000 × $\frac{2}{16}$) =3,96,000 ,,
	80,49,000 ,,	57,46,749 ,,	42,30,609 ,,
	(=94 per cent. of normal)	(=67 per cent of normal).	(=50, nearly, per cent. of normal).

These figures account for the turn of the balance of trade in food-grains in this district from one of export to one of import, to which I drew notice in paragraph 8 of my report of the 6th instant.

5. Then there is the great rise of prices of food-grains. In paragraph 38 of the Commissioner's report for the year 1895-96, appended to the Bengal Government's Resolution above quoted, I find it stated: "In Manbhum the prices of wheat and common rice were much higher than in either of the two preceding years; the price of grain was slightly lower than in 1894-95." The average price of common rice was returned at 15 seers for the rupee. This year, since October 1896, it has never been cheaper than 12 seers, and has usually been nearer 10 than 12. It is again rising.

6. It is remarked in paragraph 3 of the Resolution of the 28th October 1896, above quoted, that the condition of the labouring and cultivating classes in these districts shows a tendency to improve, which is due principally to the growth of the coal and mica-mining industries and of the lac trade, and in paragraph 40 of the Commissioner's Report for 1895-96 it is written :—

"In Manbhum there has been a general rise in the wages of unskilled labourers during the past five years, and ordinary coolies are said to be not available in many places for less than 3 annas per diem. This is chiefly due to the demand for labourers in the newly-opened coal mines and for the tea districts, the construction of the Bengal-Nagpur Railway and the Jheria extension line having facilitated transit to new fields of employment."

In this district there is scarcely any mica-mining. Of late the coal trade has been dull, and many of the smaller collieries have been closed. The lac crop last autumn is generally reported throughout the district to have been a poor one. As I stated in paragraph 8 of my report of the 6th instant, there is plenty of money in the district, the people of Manbhum being prosperous people on the whole; but, notwithstanding this fact, there is a very large proportion of those who are poor and who will not be able to afford the excessive prices now prevailing, and the still more excessive prices which are likely to prevail. In paragraph 12 of his letter, dated the 23rd March 1893, forwarding to Government his Report on the Census of Bengal in 1891, Mr. C. J. O'Donnell observed that the chapters on occupations in that report is, like that in Mr. Bourdillon's report for the census in 1881, to a great extent an acknowledgment of partial failure. In paragraph 371 of his report, however, Mr. C. J. O'Donnell, says :—"Amongst rural occupations, the first place is naturally taken by agriculture, which supplies subsistence to nearly 45 millions of people, or rather more than 65 per cent. of the extra municipal population of British territory." In the table on pages 286-287 of the report he gives, for the Chota Nagpur Division, the percentage of field and general labourers at 22½ about. This figure excludes such labourers as herdsmen (1·73 per cent.), blacksmiths (2·38 per cent.), and the like. He gives the percentage of beggars for the division at 75 nearly. It may thus perhaps be taken roughly

that, including beggars, one-fourth of the population of this district subsists on the earnings of unskilled labour. As considerably more than 50 per cent. of the population of the division is returned as being occupied in cultivation, I take it that these labourers (including beggars) have little or no cultivation.

It is these people who have no stocks whatever in hand, and who will not be able, if the *mahua* crop fails, to earn sufficiently to purchase food at the present high prices. Although the stocks in the district would be just sufficient, if equally divided as I have calculated, to last the whole population till the middle of July next, many of these people will, I imagine, be unable, without assistance from Government, to obtain their share of food.

7. (*b*) *The area and population likely to be affected.*—From the miscellaneous statistics of the famine of 1866, printed on page 319 of Mr. Geddes' compilation (1874), it appears that in that year five-eighths of this district suffered from severe famine, whilst in three-eighths of it there was intense famine. In 1874, the portion of the country which suffered most was that lying to the north-east of the district, *vide* the district fortnightly narratives (Manbhum) printed at the Bengal Secretariat Press in 1874.

I find that there is a very considerable variation in different portions of the district in the outturn of crops In the tract to the south-east both the winter rice and the *rabi* this season are fair, but in north-east, in parts of the centre and north, and in the extreme south-east they are very poor. My revised estimate for the winter rice in the following thanas is 5 annas only, *viz.*, Gobindpur, Tundi, Nirsha, in the Gobindpur subdivision, and Chas and Chandil in the Sadar subdivision. In all these thanas the revised estimates for the *rabi* crops vary from 2½ to 5 annas on the area sown (*i.e.*, about one-third of the usual area). These five thanas, which are distinctly the worst parts of the district, comprised, at the census of 1891, the following areas and population:—

		Area.	Population.	Density per sq. mile.
Gobindpur ... Tundi ...	...	478	109,530	229
Nirsha ...	...	170	58,875	345
Chas ...	..	237	100,487	424
Chandil ...	...	395	92,673	235
Total	...	1,280	361,365	

This total area is roughly somewhat under one-third of that of the whole district, and this population forms about the same proportion to the total population. With the exception of thana Chandil, the area affected includes the greater portion of the parts described by the Deputy Commissioner in 1874 as the most affected in that year. I am about to visit Chandil to make enquiries myself concerning the state of that portion of the district.

8. (*c*) *Character of communications in the affected areas.*—This district is exceptionally fortunate in having the Bengal-Nagpur Railway running from the north-east to the south-east of the district and the Jheria Branch of the East Indian Railway running from the north-east corner directly west, through the northern part of the district. Thus there is a railway through the Nirsha, Gobindpur and Chandil thanas. Tundi is under 20 miles from the railway on a good road Chas is somewhat less accessible, but for part of the way the road is good, and for the rest passable. Neither railway existed in 1874, and from what I can ascertain, I believe that the roads are now very much superior, both in number and quality, to those of that year.

The Indian Famine Commissioners on page 127 of Part III of their report, 1885, stated that though the degree of activity of private inland trade (*i.e.*, at a distance from the railway) was somewhat disputed at the time of the famine of 1874, there was no question that it was extremely brisk along the line of railway. It is clear, I think, that no part of this district is a remote tract where the local machinery of trade is insufficient or inactive or an inaccessible tract in which, owing to the confirmation or nature of the country, the carriage of supplies on a large scale presents difficulties with which local appliances are unable to cope, such as is contemplated in paragraphs 7, 8 and 9 of the Government of India's letter to the Government of Bengal, No. 104F., dated the 4th instant, which was published in the *Gazette of India* of the 5th instant.

9. (*d*) *The condition of the gain stock.*—My estimate under this head is given in paragraph 6 of my report of the 6th instant. The way in which that estimate was obtained is described in paragraph 8 idem. I notice that in paragraph 13 of his letter* to the Government of Bengal, No 2290, dated the 8th November 1873, Colonel Rowlath, the Deputy Commissioner of Manbhum, estimated the quantity of paddy then available at 2 millions of maunds. It will be remembered that my estimate came to 2½ millions of maunds of paddy and cleaned rice (but mostly paddy) in a stock on the 1st December last.

* The first letter in the printed district fortnightly narratives (Manbhum), 1874.

10. (*e*) *Sources from which supplies of food may be obtained.*—Half of the people of this district are of aboriginal descent, and all these people eat the *mahua* fruit. Many of them eat also various kinds of jungle products. It is impossible to estimate what the outturn of *mahua* fruit and of these products usually is; but if they are good this spring, there will, I am informed on all sides, be a very great relief to the poorer portion of the population, which will be most affected by the general scarcity and high prices of food-grains. In my

report of the 6th instant, I hazarded a guess that if these crops were good, there would be an importation of rice by rail by traders of some 1,00,000 maunds of cleaned grain. If the *mathua* and jungle products fail, I cannot now at all estimate what the import of food-grains is likely to be. The food-grains imported would, I imagine, all come from Calcutta by rail.

11. (*f*) *Proposed measures of relief.*—As I reported on the 6th instant, I think that at present test relief works would be a failure, as there is now a greater demand for, than supply of, labour throughout the district. Up to date there has been no greater tendency on the part of the people of this district to emigrate than in former years. After the reaping of the main crop of the district—the winter rice—the cultivators who have reaped anything like a fair crop have various repairs executed, and make various payments (often in grain) to those who in different ways have worked for them. So that for a few weeks, even in a year of scarcity like the present, just at this time, there is a considerable demand for labour. The people of thana Chandil are fortunate in having plenty of earth-cutting work near on the Sini-Midnapore Railway in the neighbouring district

I propose starting test relief works in the north-east and east portions of the Govindpur subdivision about the second week in February, but I shall be ready to do so before, if the reports show that there is any reason for thinking them necessary.

12. (*g*) *Any estimate of the expenditure likely to be incurred on the local sources from which it can be met.*—Before dealing with this subject I wish to allude to the two previous famines which have effected this district. The Famine Commissioners on page 45 of Part III (Famine Histories) of their report (1885) wrote regarding the famine of 1866 :—

"It appears probable that in six districts alone the mortality amounted to—

	Population.	Death.
Orissa (three districts)	3,700,000	1,000,000
Manbhum	995,000	200,000
Singhbhum	415,000	50,000
Midnapore	.....	50,000 "

As to the causes of this famine, I desire to quote only the following from page 41 of the same report :—

"The years preceding 1865 had not been unfavourable. The crop of 1863 was not below the average, and that of 1864, though inferior in some parts, was good in others * * *. It was not till September 1865 that an alarm began to be felt about the rainfall * * *. It was the sudden stoppage of the rainfall after September which caused the evil. Thus the rice which was just full grown withered as it stood, and no grain formed in the ear."

It is well known that Government did not do so much as in 1874 to avert the effects as the famine of 1866. From the table in page 49 of the report already quoted, it appears that in this district 1,000 maunds of rice and Rs. 81,360 in cash were distributed from June to November 1866."

The Famine of 1874 cost Government in this district a total cash expenditure of Rs. 2,67,641, *plus* 8,830 tons of rice, at Rs. 135* a ton (*vide* page 360 of Sir A. P. MacDonnell's report) = Rs. 2,67,641 + Rs. 11,92,050 = Rs. 14,59,691. Sir A. P. MacDonnell on page 359 of his report recorded his opinion that is was manifest that the extreme distress and mortality which occurred in Manbhum in 1866 was in 1874 averted solely by the action of Government. Sir A. P. MacDonnell investigated the conditions of the two famines in this district, and as the result wrote (page 358 of his report) :—

* *Vide* page 125 of Part III of the Famine Commission's Report (1885) :— "Including the cost of transport, the total sum spent on the purchase and delivery of the 480,000 tons of rice distributed was Rs. 6,47,40,000, or Rs. 135 a ton."

"It seems to me, therefore, that taking the crops of 1873-74 as a whole, and having due regard to previous adverse seasons, the position of the district in 1874 was no better than it was in the preceding famine year of 1876."

I will now endeavour to compare the conditions of the present time with those of 1866 and 1874. I have already stated that the year 1894-95 was on the whole not much below a normal year as regards the outturn of crops here. But the year 1895-96 was considerably below the normal. The outturns were estimated at—*bhadoi* (which forms roughly 11 per cent. of the area cultivated with edible crops) 14* annas, winter rice (which forms roughly 76 per cent. of the area cultivated with edible crops) 10 annas, and *rabi* (which forms roughly 13 per cent. of the area cultivated with edible crops) 12½ annas. The *mahua* crop was put down at 9 annas. In the present year 1896-97 it will be remembered that the revised estimates are *bhadoi* 9 annas (8 including non-food crops), winter rice 8½ annas, *rabi* 6½ annas, or less than one-third the area sown = 2 annas.

*Twenty annas representing a bumper crop, 16 annas an average crop.

I have drawn up the following table for comparison, giving such figures in annas as I have found available :—

	1863-64.	1864-65.	1865-66.	1871-72.	1873-73.	1874-75.	1894-95.	1895-96.	1896-97.
1	2	3	4	5	6	7	8	9	10
Bhadoi	Not below average.	Varying ...	5½	Considerably below average.	Considerably below average.	4	9	16	9
Winter rice ...			5 to 8		10	8	16	10	8½
Rabi					Considerably below average.	7	13	12½	2
Mahua						Fair.	14	9	.....

These figures, I think, show that this season we are better off in this district than at the times of the famines of 1866 and 1874. We have had a much better outturn than that which immediately preceded the famine of 1866. We had an unfavourable season last year, but a good season the year before; and so although our outturns this season and last almost correspond to the outturns of 1872-73 and 1873-74, we have the advantage in having had a good season in 1894-95, whilst the district had a season considerable below the average in 1871-72.

The following telegram, which I despatched to you on the 10th instant, contains the information required by heading (*g*) of section 9 of the Code, viz:—

"Your telegram 8th instant, requesting estimates called for in Government Circular 78 of 31st ultimo. No money required from Government for relief of distress in Manbhum for remaining months of present financial year. Have thirteen thousand balance in Road Cess Fund this year with which to meet such demands, till April. In next financial year from same fund will have Rs. 9,000 besides this available after defraying absolutely necessary expenses for roads, &c. Some amount will also be available from municipal funds for the three municipal areas in this district. I estimate requirements from Government for next financial year till September 1897, that is five months, if *mahua* crops fail—(*a*) for relief works and gratuitous relief, five lakhs; (*b*) advances for village works, two lakhs; (*c*) advances for grain and cattle, nil; (*d*) contributions for well-sinking two lakhs; total nine lakhs. These figures most speculative, but best I can give now."

I also estimated the decrease in land revenue and provincial rates at 10 per cent.

The famine in this district in 1874 cost Government 14½ lakhs, as has been shown above (parapraph 11). The value of the currency may be taken as having fallen one-third since 1874. My estimate is thus under half the cost incurred in 1874.

If the *mahua* crop fails, I estimate that about two-thirds of the area of the district, containing about two-thirds of the population, will be affected. In calculating the estimates required for relief works and gratuitous relief, I have followed the method adopted by the Commissioner of Patna in his memorandum which was covered by Government Circular No. 78Cir., dated the 31st ultimo. Hence 8 per cent. is taken as the general average proportion of the affected population to be maintained. The population affected will be roughly 800,000. Eight per cent. of this number is 64,000, that is, 64,000 × 152 (five months) = 9,728,000 for one day. This number, at 1 anna a day, for five months, comes to say, 64,000 × Rs. 9-8 = Rs. 6,08,000. As however, the Indian-corn is reaped sometimes even in July and usually in August, I thought that not quite five months would be required, and so reduced the estimate to the round sum of 5 lakhs.

If the *mahua* crop is a thoroughly good one, I should think my estimates might safely be reduced by at least one-half under each head. I would, however, again beg leave to observe that the figures given are highly speculative, but are the best I can furnish now.

13 (*h*) *Any other matters necessary for the due information of Government.*—I will give here a brief summary of the reports I have recently received from the police, under sections 1 and 161 of the Bengal Famine Code.

In some portions of the district the recent rainfall has done a little good to the standing *rabi* crops, and has enabled lands to be sown with such crops but not to any large extent. In most places the rain did no good.

Prices are rising, and common rice is reported in a number of places to have risen above 10 seers a rupee, and in some places to have gone up to even 8 seers.

The general health in various places is, I regret to say, not good. Cholera and small-pox have appeared in different parts of the district. Cattle-pox prevails in several thanas: it has been in the district for months. From numerous places complaints come of the want of water.

From a number of thanas it is reported that thefts have considerably increased. In the last quarterly criminal returns this was also apparent, and I have no doubt that the increase is due to the general scarcity and the high prices of food-grains.

No case of wandering of needy or starving persons of this district has come to light, but it is reported that in several places needy people from Bihar and other parts have been found making their way through the district to the south in search of work. Needy beggars have come to notice on the Grand Trunk Road, but not elsewhere. Seven persons (six blind and one old and infirm) have been reported in thana Chas as in need of relief, and a few cases of the same nature are reported from the Saturi outpost. The police officers have means to relieve such cases.

A number of the reports state that increase of the scarcity is expected.

14. The only point mentioned in section 9 of the Code, which I have not dealt with above, is (*i*) the provision of additional officers who are likely to be necessary. I am addressing you separately about three kanungos, but have no further suggestion to make on this point at present.

15. I am taking measures to have everying in preparation to meet the famine early in March next, before which time I do not anticipate much distress. I shall be able, I consider, to deal, without assistance from Government, with any case in the meantime which may come to notice.

16. As this report may hereafter be published with other District Officers' reports, I beg to be allowed to place on record that I joined this district for the first time in November last, and so have been at considerable disadvantage in dealing with the subject.

No. 474T.M.—R., dated Camp Hazaribagh, the $\frac{12th}{13th}$ February 1897.

From—A. FORBES, Esq., C.S.I., Officiating Commissioner of Chota Nagpur,
To—The Secretary to the Government of Bengal, Revenue Department.

IN continuation of letters marginally noted, I have the honour to submit the following first fortnightly report under section 13 of the Famine Code, for the districts of this Division, for the fortnight ending 31st ultimo. The reason for the delay in the submission of this report is that the different district reports reached my office during my unavoidable absence at Gaya (and subsequently in Calcutta), in connection with the question of providing a food-supply for the Palamau district. This question has been dealt with separately in this office Nos. 412T.M.—R., and 460T.M.—R., dated 27th ultimo, and 8th instant, respectively.

No. 389T.M.—R., dated 21st January 1197.
No. 404T.M.—R., dated 24th idem.
No. 410T.M.—R., dated 26th idem

PALAMAU.

2. I enclose copy of the Deputy Commissioner's report. The constricted state of the supplies at the different hâts continues to increase week by week, as will be seen from the following figures :—

	Week ending 16th January.	Week ending 23rd January.	Week ending 30th January.
Number of hâts at which rice was selling at under eight seers per rupee	4	7	7
Number of hâts at which rice was selling at eight seers and under nine seers	13	26	36
Number of hâts at which rice was selling at nine seers and under ten seers	58	40	28
Number of hâts at which rice was selling at ten seers and under 11 seers	10	6	4
Number of hâts at which rice was selling at 11 seers	1	1	1
Total ...	86	80	76

It will be understood from these figures that matters are becoming daily more serious. In my No. 460T.M.—R., dated 8th instant, I have recommended, as the only alternative to treating the district on the system adopted in 1874 (*viz.*, that of Government importing largely), that a bounty of 8 annas per maund should be offered by Government on all Burma rice laid down by the trade at Daltonganj. I have reason to believe, from my enquiries at Gaya, that this will have the immediate effect of inducing the large Gaya dealers to solve the difficulty in which the isolated position of the district and the absence of grain merchants there have placed us.

3. The coloured skeleton map accompanying the Deputy Comimssioner's report shows the affected portion (in brown) as a broad tract running from east to west through the centre of the district. It is within this tract that the scarcity of supplies for sale, and the consequent high prices are most felt. In the less affected block to the north (coloured blue), the state of things gradually improve until the Gaya border is reached, where I could find no visible indications of distress; the corresponding block to the south borders on the Sirguja State and abounds in forest products, and does not as yet cause grounds for anxiety.

4. At the time of writing my reports of the 21st and 24th ultimo, I agreed with the Deputy Commissioner as to the advisability of opening relief works at the places mentioned in the latter letter. The Deputy Commissioner did not succeed in doing this as quickly as I had hoped, the difficulty being explained to be due to want of establishment. This is now being remedied, and of the establishment asked for* in my letter of the 24th, all have been ordered to join at once, and are either on their way to, or have arrived at, Daltonganj. I have also, in anticipation of sanction, allowed 4 more kanungos and 6 clerks (of works) on Rs. 20 to Rs. 25 per mensem.

* *Viz.* 2 Sub-Deputy Collectors.
4 Public Works Department Subordinates.
2 Kanungos.

For these posts the Collector of Gaya is selecting men and sending them to the Deputy Commissioner, who will report their names to me for confirmation. I now request the sanction of Government to this additional establishment. From a post-card from the Deputy Commissioner, dated 9th instant, I learn that five works were opened up to that date, on which 416 men, 168 women and 161 children, total 745, were employed.

5. The Deputy Commissioner is correct in saying that I have directed that these and other works, which are about to be opened, are for the present to be regarded still as test-works. My object in this is to get over the difficulty presented by section 67 (1) of the Famine Code, the effect of which is to induce people to crowd to the work, who do not really intend to undergo the test. I think it sufficient, at present, to pay only for work actually done, and that all danger will be sufficiently guarded against by proper care in separating from the workers all persons who are too old or too young or too weak to work, and placing them on the list for gratuitous relief. The wage paid to the workers is, however, the full rate provided by section 103, worked out on the basis of the Tables in Appendices IV and V, pages 79 to 82 of the Code. This comes to Rs. 2-3 per 1,000 cubic feet, as stated by the Deputy Commissioner. I have suggested to the Deputy Commissioner that payment should be made at Re. 1-4 in cash, and 10 seers in rice per 1,000 cubic feet. This comes to one anna per 100 cubic feet above the prescribed rate, but the difference is insignificant, while the convenience in fixing a money and grain wage, both divisible by 10, is obvious.

6. As regards superior establishment, I have already obtained your permission to place Mr. Sunder under the Deputy Commissioner's orders for famine duty. This I have done, and I have advised the Deputy Commissioner to place that Officer in charge of one of the Subdivisions proposed in his report, enclosed in my letter of the 21st instant. In addition to this, Mr. Renny will, I consider, require the assistance of a second European Gazetted Officer, and I shall be obliged if a Covenanted Civilian, of about six years' service, can be told off for the duty. When matters have shaped themselves, in two or three weeks' time, I will, if it appears necessary, submit proposals regarding the appointment of Circle Officers; but in any case the very large establishment asked for by the Deputy Commissioner (see Appendix B to his report, dated 18th ultimo) will be quite unnecessary in a sparsely populated district like Palamau. Mr. Renny has formed useful Relief Sub-Committees in each thana and outpost, for the distribution of gratuitous relief; and I think that, with their assistance and an adequate provision of relief works, in the shape of roads, tanks, and irrigation *bandhs*, the case will probably be sufficiently met. At present the number of persons on gratuitous relief is 333. This number is daily increasing, and I have asked the Honourary Secretary to the Executive Committee of the Indian Famine Charitable Relief Fund to allot a sum of Rs. 10,000 to the Palamau district for this purpose.

7. I would here add, that besides actual works under direct supervision, sums aggregating Rs. 4,358-12-9 have been advanced to headmen of Government villages, for the construction of *bandhs* and wells (improvements in Government estates). The work is done by the villagers themselves, credit being given for work done out of the sum advanced in each case, at Re. 1-6 per 100 cubic feet, the work being measured up and checked before the advance of each succeeding instalment. This is a useful method of affording relief in the Government villages, and one that is much appreciated by the villagers themselves. Should the necessity arise, the rate will be raised to that fixed for task-work by relief labourers.

8. I am disappointed to find that no advances have as yet been made to zamindars and others under the Land Improvement Loans Act, want of officers to make the preliminary inquiries required by the rules being the explanation offered. I scarcely think that this need be a serious obstacle, as the landowners concerned are men of intelligence and good position, and know very well what irrigation work their villages are in need of. There would be no danger in the first instalments asked for being at once advanced to respectable landlords under the rules published under Notification No. 69, dated 5th January 1897, the work done being subsequently checked before payment of a further instalment.

9. As regards advances to cultivators under the Agricultural Loans Act, I have informed the Deputy Commissioner that I do not approve of such advances being made at present, except for the purchase of plough-cattle to re-place proved deaths, and then only under certain safeguards that I have prescribed, to ensure that the purchase is actually made, and that the cattle bought are not again re-sold. Advances for the purchase of grain I have forbidden, until the time for sowing approaches. I am of opinion that, at a time like the present, there is a great danger in making such advances prematurely. The effect would be to induce many able-bodied cultivators to shirk gaining a living on the relief works. They would finish up at the end of the period of scarcity, saddled with a loan which they would have equal difficulty in re-paying, as the Government officers would have in realizing.

MANBHUM.

10. Distress in, apparently, an acute form has suddenly broken out in pargana Tundi in the Gobindpur Subdivision, as will be seen from the reports of the Deputy Commissioner and of the Subdivisional Officer, Mr. Ainslie, dated 3rd instant and 31st ultimo, respectively, copies of which I enclose. It appears that a so-called test-work was opened by the Subdivisional Officer on the 30th ultimo at Pokuria, in that pargana, which was immediately attended by 104 men, 58 women and 81 children, the attendance running up by the 3rd instant to the large aggregate number of 1,558, by the 8th instant to 1,862, besides 895 dependants. I am inclined, however, from Mr. Ainslie's report, to think it possible that the rule regarding test-work has not been rigidly applied, and I have telegraphed to the Deputy Commissioner desiring him, if this is so, to close the works at once and re-open them at a piece-work rate of Rs. 2 annas 3 per 1,000 cubic feet.* The work was, of course, in no sense a *test-work*, having been opened at full *relief work* rates; and if, in addition to this, the rule regarding task-work was not *rigidly* enforced, the rush of people to the work is not a matter for surprise.

* The rate fixed in Palamau.

11. That distress is, however, suddenly and unexpectedly breaking out in the several parts of Manbhum, mentioned in the Deputy Commissioner's report, there can be no doubt; and I am requesting Mr. Luson to at once open test works freely (at Re. 1 9 per 1,000 cubic feet) in whatever other places there appears need of relief, and to let me have a daily report, in future, showing the results.

12. I observe that Mr. Luson says that he will not probably have to ask for assistance, in the matter of officers, during the present month. It is evident however, that, with the rush of people to the works, with which he is threatened, some professional help should be given at once, and I beg to request that the Public Works Department may be instructed to send him, for the present, four subordinates, as noted in the margin, without delay. It is much better that this should be done now, than that we should wait until the crowds at the works become unmanageable. I have told the Deputy Commissioner that he may also at once submit any proposals he deems necessary for the appointment of kanungos and clerks of works, for my orders. I here note that in Mr. Luson's telegram, dated 31st ultimo, to the Revenue Department of Government, he estimated that he would in the end probably require the services of two Junior Civilians, one additional 1st-Class Deputy Magistrate, and two Sub-Deputies. It certainly now looks as though the distress in Manbhum were approaching that of 1874, and should this turn out to be the case, the establishment asked for by Mr. Luson will most certainly be required.

2 Overseers.
2 Sub-Overseers.

13. The case of reported starvation, referred to in paragraph 17 of Mr. Luson's report, was specially inquired into by the General Manager, Ward's Estate, whose report shows that the deceased was a wood-cutter out of work, with a father, step-mother, and her children dependent upon him. He was called upon by a money-lender to pay up a small debt, which he did by making over to him a brass plate, after which he took to his bed and died in two days. His death was attributed by the family to "his anxieties." The man was apparently in bad health, but there can be little doubt that want was the

chief cause of his death. The separate report from Mr. Ainslie, in which this case is referred to, gives a number of other instances of acute distress amongst the labouring classes, in a group of 12 villages in the neighbourhood of Pakhuria, where the first relief-work has since been opened, and it seems clear that this measure was not taken too soon. The Subdivisional Officer will, however, now understand that *relief works* must, in future, be preceded by *test-works*; and that if the latter are started freely, wherever there is any suspicion of distress, there need be no fear of a rush or confusion.

I am asking the Deputy Commissioners of Manbhum and Palamau to submit their reports for the second half of the current month (and after that, in future), in the Forms required by sections 24 to 27 of the Famine Code.

Hazaribagh.

14. The Deputy Commissioner's report is submitted. It is short and shows no material change from the preceding fortnight, but I observe that there was a steady rise in prices between the last fortnight in December and the first fortnight in January, as will be seen from the following figures:—

	Last fortnight in December.	First fortnight in January.	Second fortnight in January.
Number of *hâts* at which rice was selling at less than—			
8 seers per rupee		4	4
8 seers and below 9 seers	14	23	27
9 seers and below 10 seers ...	31	37	33
10 seers and below 11 seers ...	21	11	8
11 seers and over	2	...	...
Total number of *hâts* from which returns were received ...	68	75	72

The Deputy Commissioner's remark that test-work was not accepted at the rate offered, refers to the previous rate of Re. 1-4, which was originally fixed by me. This I subsequently raised to Re. 1-9, with effect from the beginning of the current fortnight, as I considered this advisable, having regard to the serious rise in the price of food. I am now informed by the Deputy Commissioner that work is being started at 15 or 20 places at this rate, but the Returns have not yet come in. As, however, Mr. Herald gave particular instructions that any rush of labourers was to be at once reported, and this has not been done, he believes that the works are not attracting more than the usual numbers.

Lohardaga.

15. Mr. Streatfeild reports that there are still no signs of distress in any part of his district. The report that in the tract known as the Panch Parganas, the inhabitants are having unusual recourse to forest products, turns out to be an exaggeration. So far the inhabitants appear to be very fairly off, and it is difficult to engage coolies anywhere at 2 annas a day. The fact seems to be that nearly every part of the plateau has been able to export, and the high prices obtained have thus, in some measure, made up for the shortness in the outturn. The Deputy Commissioner, under the circumstances, proposes to defer the opening of work on the road referred to in my last report, until relief is shown to be needed, and I have approved of this proposal.

Singbhum.

16. The Deputy Commissioner has received no reports from any part of the district showing the existence of distress. Rice is selling at 10 to 15 seers per rupee in different localities, being dearest along the line of Railway.

Conclusion.

17. The fortnight has shown a marked rise in prices in Palamau, owing to the restricted state of the markets there, but a less rapid rise in Hazaribagh owing, no doubt, to the large imports which the Marwari traders at Hazaribagh

are making by rail from Calcutta and elsewhere. The sudden outbreak of distress in Manbhum was not expected so soon, and there now seems but too good reason, judging from the precedent of 1874, to think that it will soon spread over most of the tracts which were affected in that year. The *rabi* crops are generally promising throughout the Division, except in parts of Manbhum; but during the last few days the weather here (Hazaribagh) has been stormy, accompanied with some heavy showers of rain, which I fear must have done some injury. Fortunately the *mohua* is not yet in flower, and if the weather is henceforth favourable, that crop may still be a good one.

No. 1770R., dated Daltonganj, the 2nd February 1897.

From—R. H. RENNY, Esq., Deputy Commissioner, Palamau.

To—The Commissioner of Chota Nagpur.

I HAVE the honour to submit, herewith, my report, under section 13 of the Famine Code, for the fortnight from 16th to 31st January 1897.

Report required under section 13 of the Famine Code for the fortnight from 16th to 31st January 1897.

Preliminary.—The report under section 10 of the Famine Code was submitted to the Commissioner of the Division on the 18th ultimo.

(1) (*a*) *The general condition during the half-month of the tract and tracts for which anxiety is felt.*—Under this head the whole of the Palamau district must be included, for there is no part now which does not cause anxiety. The southern portion of the district, *i.e.*, the jurisdiction of Mowhadand police-station was a fortnight ago considered to be safe for the present, but reports recently received show that prices are rising even there, owing to stoppage of importations from Burway, and the adjoining Native States. The general condition of the whole district during the half-month has grown from bad to worse, prices have risen very largely, and at many markets supplies of food-grains have not been sufficient to meet the demand of the people of the district, whilst traders have gone empty away.

(*b*) *The prospect of the crops.*—The fortnight under report has been one of great anxiety for the *rabi* crop. The weather has generally been cloudy, with slight rain (0·41) on one day. The *rahar* is reported to have suffered to a slight extent from blight in consequence; hail is reported from some places, but no reports of damage caused by it have reached me yet. On the whole, the *rabi* crop may be put down as doing well.

(*c*) *Prices.*—There has been an alarming rise in prices. In 45 markets the price of common rice was less than 9 seers per rupee against 17 markets in the second week of January, at 9 seers in 18 markets against 33, at above 9 seers but below 10 in 10 markets against 25, at 10 seers in 3 markets against 7, at above 10 seers but below 11 in 1 market against 3, and at 11 seers at one market.

(*d*) *Food-stock.*—From the fact that supplies were insufficient to meet the demand at several markets scattered over the district, is a sure indication that the food-stock is becoming exhausted. Even at the large Chainpur market (one of the largest in the district and situated on the opposite side of the river Koel to Daltonganj) the supplies on Saturday last, the 30th ultimo, were insufficient to meet the demand; of course, there are a large number of well-to-do persons who have stock, but mostly only sufficient for home consumption and not for sale.

(*e*) *Importations and exportations of grain.*—There were some importations at the beginning of the period of report from Shahabad, Gaya, and Lohardaga, but these have almost entirely ceased now, and this it is that is rendering our situation more and more serious each day. Exportations there are none to speak of A few pack-bullock traders from Mirzapur district in the North-Western Provinces managed to pick up some rice at the Gurhwa market on the 21st January, but this was done at the cost of the country people, who had to go away empty-handed.

(*f*) *Rainfall.*—There was a fall of 0·41 of rain on Thursday night the 28th ultimo.

(*g*) *Public health.*—Is good, so far.

(*h*) *Emigration or immigration of famished people.*—No immigration is reported, but a good many famished people have emigrated to the Tea districts, notably to Jalpaiguri, Western Duars. A large number of people go to the Duars every year to work as free labourers, but this year, on account of the prevailing scarcity it is said, the number has largely increased.

(*i*) *Condition of cattle.*—Owing to the rain that fell in November and December last there is no want of fodder at present, and the condition of the cattle is consequently satisfactory.

2. *Number and nature of public works open in or near the tract, distinguishing works,*—(*a*) *Under District Boards, Municipal Committees.* (*b*) *Under Public Works Department* (*Executive or Superintending Engineer*).—Some test works were commenced at Lesliganj and Panki in the eastern portion of the district about the commencement of the period under report, but owing to the low rate of 2 annas per 100 cubic feet, fixed by the Commissioner of the Division, people would not attend these works after the first day or two's experience and after being paid the first few wages.

The Commissioner of the Division, being in Palamau, and after satisfying himself, after careful and minute enquiry, that the people were really suffering and were underfed, directed relief works to be opened at the wage of Rs. 2-3 per 1,000 cubic feet or 3 annas 6 pies per 100 cubic feet. Works were, in consequence, arranged for at several places where need for them was most pressing, but were actually started at only two places before the close of the period under report, *viz.* at Lesliganj and Panki in the east of the district. The works are road-making and are being conducted by me as Deputy Commissioner (Collector) of the district, out of funds placed at my disposal by the District Road Committee.

Similar information should be furnished as to any test-works opened, or any ordinary works converted into test-works.—The Commissioner of the Division, when raising the rates from 2 annas to 3 annas 6 pies per 100 cubic feet, directed that the works were to be still considered in the light of test-works.

3. *Cases of relief under section 12.*—The whole area of the district being affected, action under section 12 has been taken, and each officer in charge of a police-station or outpost has been given the sum of Rs. 10 for the purposes set out in this section. No cases of any payment made have been reported up to date. It having been reported from all quarters that owing to the people of the country having run short of both grain and money, because of the prevailing high prices and scarcity of food, they had cast off their poor, and that these latter were starving in consequence. I immediately appointed Committees of respectable officials and non-officials, one to each police-station and outpost jurisdiction, sent Rs. 20 to each Committee so appointed, with written instructions how to act in all cases of urgent necessity, and to prepare the register of gratuitous relief required by section 41 of the Famine Code. Similar instructions were issued to the Daltonganj Municipality.

Gratuitous relief was urgently called, for and has been given in cases only where the recipients were either mentally or physically unfit for work, and where private charity had ceased to flow. Relief has been given either in food or cash at the minimum rate fixed by the Code.

I am unable to furnish figures showing the number of persons being relieved, as I have not been furnished with them; but I hope to do so in my next report.

4. *The number of applications received for loans under the Land Improvement Loans Act and the Agriculturist Loans Act, as compared with the number of applications received ordinarily at that time of the year.*

DALTONGANJ,
The 2nd February 1897.

R. H. RENNY,
Deputy Commissioner.

No. 1459R., dated Purulia, the 3rd February 1897.

From—H. LUSON, ESQ., I.C.S., Deputy Commissioner, Manbhum,
To—The Commissioner, Chota Nagpur Division.

I HAVE the honour to submit my first fortnightly report for the period, from 16th to 31st January 1897, under section 13 of the Bengal Famine Code.

2. In the penaltimate paragraph of my report under section 10 of the Code, No. 1356R., dated the 19th ultimo, I intimated that I did not anticipate much distress before March, and that I should be able, I considered, to deal without assistance from Government with any cases in the meantime which might come to notice, though I do not now ask for assistance, and am not likely to do so during the present month, I have to report that more distress has come to notice than I anticipated a fortnight ago.

The marginally noted correspondence (copy appended) with the Sub-divisional Officer of Gobindpur will show that the necessity has arisen for the opening of test-works in that Sub-division, and that such works have been opened with success.

Letter No. 602R., dated 21st January 1897, from Sub-divisional Officer to Deputy Commissioner.
Telegram dated 24th January 1897, from Deputy Commissioner to Sub-divisional Officer.
Telegram dated 26th January 1897, from Sub-divisional Officer to Deputy Commissioner.
Telegram dated 26th January 1897, from Deputy Commissioner to Sub-divisional Officer.
Letter dated 26th January 1897, from Sub-divisional Officer to Deputy Commissioner.
Letter No. 1423R., dated 28th January 1897, from Deputy Commissioner to Sub-divisional Officer.
Letter dated 31st January 1897, from Sub-divisional Officer to Deputy Commissioner.
Telegram dated 3rd February 1897, from Sub-divisional Officer to Deputy Commissioner.
Letter dated 1st February 1897, from Babu Rakhal Das Sircar, General Manager, Wards' and Endowment Estates, the matters dealt with in diary.

The following report is arranged in the order of the headings given in section 13, of the Code and within the correspondence quoted, will be mentioned further on when necessary.

3. *(1) General condition during the half month of the tracts for which anxiety is felt.*—In paragraph 7 of my report, under section 10, I stated the worst parts of the district were thanas Gobindpur, Tundi and Nirsha in the Gobindpur Subdivision, and Chas and Chandih in the Sadar Subdivision; these, with the exception of thana Chandih, including the greater portion of the parts worst affected in 1874. I have since visited Chandih and various parts of that thana. The result of my enquiries there is that the estimate of outturn of winter rice had been somewhat under-estimated, but there is such variation between contiguous villages, that a general estimate is very difficult; that stocks are not deficient, and that there is ample labour, within 25 or 30 miles of most parts of the thana, on the Sini-Midnapore Railway, to which several thousands of labourers, living in the thana, have already gone. For these reasons I consider that thana Chandih does not, at present, give reasons for anxiety; though, in the poorer villages, careful watch will have to be kept for cases of beggars, old and incapacitated people needing gratuitous relief. Regarding thanas Gobindpur, Tundi, Nirsha and Chas, the reports received from the police under sections 1 and 161 of the Code show the following:—

Gobindpur.—No agricultural work going on. Many up-country beggars found on the Grand Trunk Road. Health good. Common rice sells at 9 seers.

Tundi.—No standing crops and no agricultural work. Many of the people are eating herbs and jungle fruits. Health good. Common rice sells at 8½ seers.

Nirsha.—Agricultural labour at a standstill. Blind, deaf and old persons and beggars coming to the thana for food; being supplied. Health good. Price of common rice, 10 seers.

Chas.—The chaukidars report that many people do not get full meals. The condition of sugarcane on the ground is not bad. Small-pox existed in some villages, but is subsiding. Common rice sells at 9 seers.

4. Although the Bengal Famine Code prescribes the submission of reports under sections 1 and 161 by the police only, I have taken advantage of the fact that there are eleven tahsildars employed in the numerous Encumbered and Wards' Estates in this district and have called for regular reports from them, in the Forms given in those sections. I have just received their first reports. These show, as regards the tahsils of the affected areas mentioned in the last paragraph above, that numbers of people are in distress in the Tundi and Gobindpur thanas.

5. As regards parts of the district other than the affected parts mentioned above, the *Jhaldah thana* Police report states that the labouring classes are in distress owing to the want of work and the very high prices of food, some people not getting two meals a day.

Gourangdih thana.—Police report states that the invalid, blind and lame people are not getting sufficient by begging as usual, and that the labourers cannot all get work. The report from the *Satwari outpost* of the Raghunathpur thana states that some people are in distress. The report from the *Hura outpost* of the Purulia thana states that several persons are suffering from want in four villages. It will be remembered that the officer in charge of each thana and outpost throughout the district has funds for gratuitous relief in all urgent cases. The tahsildar of *Jhalda* states that the poorer classes in his tahsil are in distress, being unable to get work or sufficient food.

The tahsildars of Raghunathpur (thana) and Dobra (in the Para thana) say that the poorer classes in their tahsils are in difficulties.

From their reports it appears that Jhalda thana (area 396 square-miles, population in 1891, 102,320, density per square-mile 258) should be included as an affected area, and that the Gourangdih thana (area 173 square-miles, population 52,640) and the Saturi and Huro outposts of the Raghunathpur and Purulia thanas respectively, soon to be included also.

The affected areas are thus, as follows:—

Thanas.	Area in square-miles.	Population.	Density of population per square-mile.
1	2	3	4
Gobindpur and Tundi	478	1,09,530	229
Nirsha	170	58,675	345
Chas	237	1,00,487	424
Jhalda	396	1,02,320	258
Total ...	1,281	3,71,012	.....
DISTRICT GRAND TOTAL ...	4,147	11,93,328	288

5. *Prospects of the crops.*—The *rabi* is very poor, indeed, this year in most parts of the district. In many villages there is none at all; on the whole only about one-third of the *rabi* area has been sown; there has been scarcely any good done by the rain to the *rabi* in this district during the season. The *rabi* area in normal years is, however, estimated to be only 13 per cent. of the whole area, cultivated with edible crops; sugarcane in some places is good.

6. *Prices.*—I have arranged to receive weekly information on post-cards from school-teachers, ghatwals, &c., of prices at local markets in 31 places throughout the district. I have, however, only received 20 replies from last week up to this morning These show that the price of common rice varies from 8½ to 10 seers of 80 tolas. I found the price 11 seers at Chandil when I visited that place last week, but that figure was caused by an importation of some 20 cart-loads from over the border of the Singhbhum district.

In future reports a statement will be given comparing the prices returned on the post-cards.

7. *Food-stocks.*—This subject was dealt with fully in my report, No. 1307R, dated the 6th ultimo. The senders of the post-cards, mentioned above, state in some instances that the supplies brought to the markets are not ample.

8. *Importation or Exportation of grains.*—Practically all the importation or exportation takes place by rail. Post-cards with statements of imports and exports of food-grains

to and from the district were sent to me by each Station Master, in accordance with the orders contained in Bengal Government's Circular No. 7 (Statistical), dated the 18th ultimo. From the replies received, I drew up the following telegram which was despatched yesterday, to the Director-General of Statistics as, directed in paragraph 2 of the Circular just quoted.

"Manbhum thirtieth Imports 5,111, exports 256 maunds, total 5,367. Exclusive four small stations not yet reported."

Since then one station has been found not to exist, and a blank report has been received from another. Reports are thus wanting for the two small stations, of Ramkanali and Chandil on the Bengal-Nagpur Railway.

The figures received are given in detail thus:—

		Exports.	Imports.
Bengal-Nagpur Railway ...	Adra	40	70
	Anra	33	148
	Kustaur	...	...
	Purulia	90	410
	Kantadi	...	15
	Balarampur	78	74
	Nimdih	...	...
East Indian Railway ...	Kalubathan	13	...
	Prodhan Khunta	...	581
	Dhan Baed	...	2,517
	Katrasgarh	2	1,296
		256	5,111

It will be observed that nearly the whole of the imports were at the stations on the East Indian Railway, which runs through the north of the district where the affected areas are situated.

9. *Rainfall.*—There has been scarcely any rain during the fortnight. A few very light showers fell in some places, but did no good.

10. *Public health.*—In places not good. But the reports do not show that it is worse in the affected parts than elsewhere in the district. The following table for the district jail shows the percentages of unhealthy prisoners admitted during each of the last 8 quarters.

	1895.	1896.
1st quarter	23·14	26·15
2nd „	22·01	25·32
3rd „	31·96	27·16
4th „	35 43	23·11

Up to the 28th ultimo, 15 out of 50 (or 30 per cent.) admitted since 1st January had been declared in this quarter as unhealthy.

These figures do not show a deterioration in health among persons admitted to the jail.

Emigration or immigration of famished people.—I have not been able to obtain the most recent figures of emigration from the district, but it does not seem that emigration to Assam is yet greater than usual here. Up-country men are reported from several thanas to be making their way through the district towards the Railway works in the adjoining district of Midnapore. I have myself met several of such people.

12. *Condition of the cattle.*—There is rinderpest among the cattle in several thanas but it had existed for months and does not seem due to the scarcity. It is not reported from the most affected thanas. Fodder is generally sufficient.

13. 2(*a*) *Number and nature of public works open in or near the affected tracts.*—In the Gobindpur thana about Rs. 400 is being expended on the usual repairs to roads, and about the same amount in the Tundi thana on the same account. About Rs. 200 is being spent on the roads in the Nirsha thana. These amounts are being expended by contractors, and the works for which they have been allotted by the District Road Fund Committee will probably be completed this month.

There are no works under the Municipal Committees or the Public Works Department open in the affected tracts.

On the 31st ultimo there were employed on test relief works (i) 104 men, (ii) 58 women, (iii) 18 children. By yesterday evening the total number had risen to 1,558.

14. (3) *Cases of relief under section 12 of the Code.*—The sum of Rs. 330-2 of the Rs. 500 placed at my disposal from the Bengal Famine Relief Fund has been advanced to the officers in charge of thanas and outposts and to the Subdivisional Officer of Gobindpur. I have not yet received complete accounts of the expenditure of this money. Some police officers have not had occasion to spend any, but several have spent more than the sums originally allotted to them and have been supplied with more. The Subdivisional Officer of Gobindpur reports that 21 persons are in receipt of regular gratuitous relief from him.

15. (4) *Number of applications received for loans under the Land Improvement Loans Act and the Agriculturists' Loans Act, as compared with the number received ordinarily at this time of the year.*—These figures are not quite ready and I do not delay the report for them.

But I know that the applications being made for loans under these acts are very numerous, and are largely in excess of the normal.

16. Regarding the correspondence between Mr. Ainslie, Subdivisional Officer of Gobindpur and myself, it will be observed that he says that he thinks I expressed too hopeful a view in my report under section 10 (with a copy of which I furnished him). His addition that, perhaps, that view was more hopeful than was my "own personal opinion" has no foundation. The view I expressed in the report in question was, of course, the only view I had, which I formed to the best of my ability from the information at my disposal. Attention is drawn to Mr. Ainslie's statement about the locality where test-relief works have been opened, "until I made minute enquiries to-day and yesterday" (*i.e.*, 25th and 26th January 1897) "I do not myself understand that things were so bad as they are in this part, though I always expected distress would first show itself actually in this neighbourhood."

I may mention here that the District Superintendent of Police informs me that he thinks I have estimated the stocks in hand at too high a figure, but this is only his impression.

With reference to Mr. Ainslie's complaint about not being furnished with copies of reports under sections 1 and 161 of the Code, I am satisfied that the District Superintendent of Police directed such copies to be sent. Mr. Briscoe informs me that the copies are said to have been sent regularly to the Subdivisional Officer's office. The matter is being dealt with and does not require further orders.

17. As to the cause of starvation reported by Mr. Ainslie in paragraph 13 of his letter of the 26th ultimo, I have had a separate enquiry made. I sent out the General Manager of Wards and Encumbered Estates in this District, Babu Rakhal Das Sirkar, an excellent Officer, to enquire specially into this case and all the other cases within the Tundi Encumbered Estate mentioned by Mr. Ainslie. I attach a copy of his report, dated the 1st instant, and received this morning. It will be noticed under the heading 'Bolardi' in his diary that the case of starvation is one of some doubt. The report and diary, however, corroborate Mr. Ainslie's opinion, if any corroboration were required, that the labouring classes in the north of the Gobindpur Subdivision are much in need of work, and that the beggars and the poorest people require assistance.

18. The necessary orders will be passed at once upon Mr. Ainslie's latest references. I will send him out the money and tools required, and will follow myself shortly to inspect the test-works in progress I anticipate that I shall have to open similar works in the other affected thanas, which I shall visit, too, within a few days.

19. The statements regarding the wages to be submitted with the fortnightly reports, as directed in the Bengal Government's Circular No. 1(Fam.), dated the 6th ultimo, cannot be submitted now. Mr. Ainslie's letter of the 31st ultimo contains the only information available regarding wages paid under the Code. I shall deal fully with the subject in my next report, after visiting the works.

CAMP PAKURIA,

The 31st January 1897.

I HAVE not time to write a formal report, so I am letting you know the facts up to date (4 P. M.) this day (31st). I arrived here yesterday morning (30th) and found a crowd assembled. After studying some papers I had not seen before, I went to open test-relief work. Found a huge crowd and it is difficult to separate would-be workers from spectators. So went off to the tank in Panderah, where I propose to start work, and the would-be workers followed:—

Fixed rates at 6 pice per man.
Ditto 5 „ woman.
Ditto 3 „ child able to work.
Ditto 1½ „ child unable to work. Rice being at 8½ seers per rupee in the principal shop in this locality, and the shop-keepers agreeing to keep a big stock and sell at that rate, I think the rates fixed are a good test. In fact, some grumbled and said it was too little to work for. I said they might go, but they elected to stay as they had nothing to live on; six pies means ¾th seer of rice, without pulse, or salt, or oil, or vegetable. The work is excavation in medium soil with a short-lead and high lift; the Public Works Department rate is, I understand Rs. 2-8 per thousand cubic feet which is higher than any Bihar rate. I have fixed tasks in accordance with entries in first line (lead 50 feet) in columns 3, 10, 17 of Table 2*a*, that is—

	Cubic feet.
Adult Males	65
Adult females	52
Children	34

All the afternoon was spent in making up gangs:—result, 104 men, 58 women 18 big children, 63 infants. This morning I find the Sardar of each gang for 2 days (Saturday taken up in arranging gangs, and Sunday). In the evening (Saturday) I opened a gratuitous relief register and found 21 persons to enter. This morning I distributed rice (3½ seers per adult and 1¾ seers per child) to each of the said 21 persons, for 7 days, *i.e.*, adult 1lb per diem and child ½lb per diem. This afternoon I have entered 12 more adults and 11 more children in the gratuitous relief register. Total entries now 44 and I am just about to give

out a week's supply of rice to those entered this afternoon. Hundreds are expected to flock to the test works to-morrow. I want a supply of kodalis (300) pickaxes (300) and baskets (400). I expect a rush, but the gang system will be most rigidly adhered to. The usual wage here is 2 annas per day with rice at 16 seer per rupee.

E. F. AINSLIE.

Dated Maharajganj, pargana Tundi, the 1st February 1897.

From—RAKHAL DAS SIRKAR, General Manager,

To—The Deputy Commissioner of Manbhum.

IN obedience to your order of the 29th ultimo, I left Purulia by the morning train of the 30th and arrived here yesterday. I have the honour to submit herewith my diary for yesterday and to-day, and to state as follows.

2. From what I saw and heard, it appears to me that the labourers, as a rule, have commenced to feel the pressure of scarcity, as the cultivators, upon whom they ordinarily depend, are unable this year to give them employment owing to scanty produce of their lands. About this time of the year the cultivators generally employ the labourers in improving their lands or making *airs*, or small embankments, for bringing new lands under cultivation, but this year they, having no paddy in stock, cannot do so.

3. The cultivators of smaller scale, having one or two ploughs, will also soon be in difficulty. They came to me in numbers and enquired if they would get agricultural loans, which no doubt will be required by many. I told them to apply to the Sub-Divisional Officer, who will consider their cases.

4. I also saw many persons who own *jalkar* lands and *bandhs*. They appear willing to take taccavi advances. If these people get advances in time, it will be a material benefit to the country, as the labourers will get work and there will be improvement of the water-supply.

5. People who live by begging are in distress, as the cultivators being short in stock are unable to give alms as they used to do.

6. It appears to me it is now high time to open test-works in selected localities, as the labouring class, who are now living principally on jungle-fruits, roots and leaves may before long fall victims to diseases, while, if they get work, they will be able to earn their subsistence till the next cultivating season.

7. Yesterday I saw a *khas bandh* of the Tundi estate near Mahánad; if this *bandh* is improved people of five villages will be benefited, as the high lands of their villages will get water for irrigation from this reservoir.

8. It is said that the people of some villages on the north and west of Tundi are also in distress. I intend to start for Tundi to morrow.

9. I have not yet given anything in the shape of gratuitous relief, as I find none worthy of such gift under the Famine Code.

PURULIA TO GOBINDPUR.

30th and 31st January 1897.—Started from Gobindpur and arrived at Maharajganj in pargana Tundi. Met with the tahsildar who came from Pakhuria. Saw also some raiyats of Moradi. The Sonthals and other people of the labouring class are said to be now principally substituting on jungle-fruits, such as dumur (figs) *bhela*, plums and wood apple, as well as roots and leaves. They are scarcely getting rice.

In the afternoon saw the villages mentioned below:—

Kalaldi.—There Narir Jala, Natea Jala, Birsa Majee, Nando Lal Ghose and Gora Tuxi are said to be in want of work.

Ram Naga.—Tarka Maji is in want, as he is a labourer and has to support a wife and six children.

Korigardi.—There also the landless labourers are in want of work. Raya Majee and Logda Majee.

Bermealand.—Aklad Suri, Amrit Majee, Rajowar are in want of work and not getting rice duly.

Mahanad.—Here Porkha Bowri, Gatapsi Tasin and some other widows are in distress. I saw some of them. They did not seem much reduced. One Budhna Turi said that he had taken only roots of latas that day as he got no work. He is not also much reduced.

Tetai-taur.—Here one two Sonthals and one Dome without work.

Kanajdi.—Here only a half-mad woman is said to be in distress: she is living by begging.

1st February 1897.—In the morning went towards Balardi from where the case of starvation has been reported. Passed through the following villages:—

Rampore.—Here are old Sawdagar and a Goala are said to be in distress. I saw the Sawdagar. He is an old man and has no business now. Has no son. Lives by begging.

Woroodi.—None said to be in bad condition, but labourers want labour.

Nowatand.—Here also labourers are said to be in distress. Saw several cultivators. They said their produce was very short. They are in great anxieties.

Halkata.—Two houses of Bowris and one Bumy are in distress. They said they are thinking of going to work at Pandra, where test-work has been opened.

Latain.—Here also 1 Sonthal and 1 Bowri are said to be in want of work. They were gone out in search of work.

Sankardi.—No particular complaint.

Bakardi.—Arrived here at about 10 A.M. Saw the holder at the village and several villagers. They said that the deceased Hira Mahali did not take settlement for bamboos this year for want of means. So he used to work on bamboos taken from others. Lately he was living by begging. He was much reduced. He had to support his father, step-mother and her children. Two days before his death he could not come out of his house. He was perhaps attacked with some illness brought on from weakness. None could say what was the illness. I asked the deceased's father how his son died. 'This man's name is Jihi Mahali. It is very old and infirm. He said that one Sawdagar of Nirsá came to their house to ask for a rupee they owed. The deceased made over a *thali* (plate) they had and entered the house He did not come out again. He laid down two days and then died. A step-brother of the deceased, a lad of about 15 years, said he died of anxieties.

From Balardi returned to Maharajgunge *viâ* Gopi Nawdi, Tesra tand and Kendua tand. In these villages also the labouring class said they were in want of labour.

Second half-monthly report from 16th to 31st January 1897.

FIGURES RELATING TO WEEK ENDING 31ST JANUARY 1897.

Section 24.

1.	Area affected	No change during the fortnight.
2.	General state of affected tracts ...	No relief circles or officers.
	Crop prospects	*Rabi* promises well. Mohua not out yet.
	Food-stocks	As before reported, occasional short supply in local bazâr, made up at nearest hât.
	Importation	Importation by road from Gaya, Lohardaga and Manbhum, besides by rail to Giridih station.
	Exportation	Mohua, til and ghee to Gaya.
	Rainfall	None.
	Public health	Very good.
	Emigration	Excess emigration to Duars and Assam tea-gardens reported from 11 thanas.
	Immigration	*Nil.*
	Condition of cattle	Very little disease reported.
	General	Ploughing in progress in some parts.
3.	Number of relief works, numbers paid, rates of wages, private relief works.	Blank. People have refused to work on test-relief works throughout the district at less than ordinary rates. Works of ordinary rates are being given.
4.	Number of poor-houses open ...	Blank.
5.	Employment of artizans, &c ...	I am trying to introduce cotton-thread making.
6.	Organisation of the distribution of grain or money doles.	All thanas and outposts have funds to give cooked meal to any one in want. Small amount distributed in this manner. Some poor people in Encumbered Estates are to be fed at Estate expense. Zamindars and mohunts are giving doles to some extent. Lists of people of respectable classes, who are unable to work at earth-work and of people of all classes unable to work who require relief, are being prepared.
7.	Relief in kitchens	

Week ending 24th January 1897.

	Men.	Women.	Children.	Total.
Hazaribagh ...	96	26	50	172
Barhi	60	19	40	119

Week ending 31st January 1897.

J. L. Herald,
Deputy Commissioner.

The 12th February 1897.

No. 95G.—S.R., dated Calcutta, the 13th February 1897.

From—E. V. WESTMACOTT, Esq., Commissioner of the Presidency Division,
To—The Secretary to the Government of Bengal, Revenue Department.

UNDER sections 13 and 24 of the Famine Code, I have the honour to submit herewith my report for the half-month ending 31st January 1897, together with the skeleton maps of the areas already affected, and likely to be affected, by scarcity in the districts of Nadia, Jessore, and Khulna, and the statements prescribed by the Famine Code.

24-PARGANAS.—The position in this district remains unchanged since my report No. 55G.—S.R., dated the 9th January 1897. For the present there is no necessity for relief.

NADIA.—I have recently visited the Meherpur subdivision of this district, and discussed the situation with Mr. Garrett, the Collector, and Mr. Weston, the Joint-Magistrate in charge of the subdivision, and with the District Engineer whose work has also been inspected recently by Mr. Connan, the Superintending Engineer. I have represented that Mr. Weston must be relieved of much of the work which now confines him to office, and must be set free to move about his subdivision. Mr. Garrett has been very active in supervising all the relief operations personally, but this duty must now be undertaken by Mr. Weston for his own subdivision. It appears probable that it may be necessary to extend operations and to increase the number of relief officers. I think that the circles as at present arranged are much too extensive. They are being remodelled.

Section 24 (1).—The area affected has increased from 379 square miles, with a population of 168,571 souls, to 815 square miles, with a population of 428,644. There are at present four circles under two Superintendents of charges. The second Superintendent, Babu Banamali Pramanick, has not yet joined, and only three out of the four circle officers appointed have joined. The Collector has asked for a fifth circle officer, and I have sent him one.

Section 24 (2).—The general condition of the affected tract in Nadia is reported to be gradually deteriorating. It is observed that food-stocks are being supplied principally by importation from the *Rarh*, and it is estimated that this source of supply must be exhausted within two months. Some rice is also being imported from Dinajpur. The Collector has proposed to appoint a medical subordinate to each relief work, but as I have ascertained that very few, if any, labourers camp on the works, nearly all of them returning home at night, I do not think medical attendance necessary at present.

Section 24 (3).—Two test-works and two regular relief works under Civil Agency, and one relief work under the Public Works Department, were open during the fortnight under report. Each work is in charge of one of the subordinates of the District Engineer. In this district no relief work was paid for by daily wages, and there have been complaints of labourers not being paid before midnight. I have discussed this subject with Mr. Garrett, and more regular arrangements are being made.

No relief work under private agency was open during the fortnight under report.

Section 24, clauses (4) and (7).—No poor-houses or kitchens have been opened, and I do not at present think them necessary.

Section 24, clauses (5) and (6).—No arrangements for the employment of artizans, women, etc., at their homes in weaving, cotton-spinning or jute-twisting, or for the distribution of grain and money doles, had been made during the period under report, but are now being made.

Section 24, clause (8).—Rupees 15,950 were advanced under the Land Improvement Loans Act during the period under report among 25 applicants. No advances were made under the Agriculturists' Loans Act. The Collector has not reported the system and security on which advances were given. He has been directed to supply the omission. It is difficult to complete the necessary enquiries respecting the numerous applications for loans. Every available officer is working at them, and other important works are at a stand-still. But still the progress is very slow.

Section 24, clause (9).—The report made by the Collector under this head is not sufficient. It is stated that Rs. 12,463, including Rs. 800 paid by the Bengal Charitable Relief Fund, have been advanced, but no financial statements

as required under the clause have been submitted. He has been directed to submit such statements showing receipts, expenditure and balance, distinguishing between grants from the District Boards, from the Provincial Government and private subscriptions.

Section 24, clause (10) and (11).—There is nothing to add to the information as to the economic caution of the affected tracts given in previous reports. It is observed that the condition of the tracts outside those marked as affected in the map submitted gives cause for uneasiness, and the Collector is opening another test work.

Sections 26 and 27 of the Code.—The following errors and omissions are noticed in the report under sections 26 and 27 of the Code:—

(*i*) The number of children and adult dependents unfit to work, and allowances given to the relief workers on their account under sections 83 and 84 of the Code, has not been shown in columns 26 to 29 of the Statement D. Government sanction was had some three weeks ago to the introduction of the system, and it is being gradually introduced.

(*ii*) Statement of gratuitous relief (Form No. 6) does not show separately the amount expended for the whole period.

(*iii*) Statement E does not appear to have been correctly prepared. Column 6 should agree with columns 20 to 23 of Statement D, reduced to male unit divided by six, and column 11 with column 6 of Form 6.

(*iv*) Statements for imports and exports are not in the prescribed form.

(*v*) Famine Statements A and B with the necessary particulars are not given.

(*vi*) The information as to works likely to assist the water-supply as required by clause (*iii*) of section 27 is not full.

(*vii*) In the statement showing rates of wages prescribed by the Government Circular No. 1, dated 6th January 1897, the "Lead and lift" have not been noted in the column of remarks as directed. The Collector has been directed to rectify the errors and supply the omissions noticed. I annex copy of Mr. Garrett's report, No. 2619G., dated the 4th February 1897.

MURSHIDABAD.—There is still no immediate need of relief in this district, a small number of labourers come to the relief works in the district of Nadia from villages in Murshidabad, but although some came from a distance of 5 or 6 miles, the numbers are too small to indicate extensive distress. The situation is being carefully watched, and test works have been opened within the border of Murshidabad. I shall travel through the district of Murshidabad next week. It is estimated that in about two months the present sources of supply of rice must be exhausted at the present rate of exportation.

JESSORE.—I annex herewith Mr. Hamilton's report No. 2947G., dated the 4th February 1897, under section 13 of the Famine Code.

Section 14, clause (1).—It is noted that considerable quantities of food stocks are being imported from the eastern districts and from Khulna by boats; that some able-bodied men migrated from Magura during the half-month under report in search of employment elsewhere. I have already ordered test works to be opened in the subdivisions of Magura and Bangaon, but Mr. Hamilton has not considered it necessary to do so, because he does not believe that any labourer would come to them. This does not indicate distress. It is also noted that money-orders for small amounts are received daily in post-offices from people who have gone away in search of employment, and, as the Collector suggests, the Postmaster-General might be asked to send weekly abstracts of these remittances in order to enable the local officers to know how much is so remitted. On the other hand, numbers of people are coming to Magura from elsewhere in search of employment in digging tanks for private individuals.

Section 14, clause (2).—In order to open a test work in thana Mahamedpur, a site has been selected by the Subdivisional Officer of Magura for digging a tank; but it is reported that the poor Musulmans who applied for tuccavi loans would rather die than dig earth. I doubt whether they would adhere to this resolution if distress were really severe.

Section 14, clause (3).—Rupees 277-10, or about a rupee a head, were distributed on account of gratuitous relief among 278 persons during the period under report.

Some paddy-husking was done at Magura under section 45 of the Code. It is noted that some females refused to go to the Sub-Registrar who was charged with the duty of giving out materials. The Collector has been given to understand that they are not expected to do so, but that a system must be organised for supplying them with materials in their homes for their employment.

Section 14, clause (4).—The number of applications under the Agriculturists' Loans Act has risen from 324 for Rs. 54,567 to 422 for Rs. 61,820 in Magura. The Collector has not stated what amount of money was asked for by and given out in loans under the Land Improvement Loans Act. He has been directed to report specifically on this point. I have instructed the Collector that the agriculturists' loans should be given strictly under the provisions of section 4 of the Agriculturists' Loans Act, and the rules framed thereunder, and not with the object of keeping people in their homes doing nothing. I think that too great indulgence has been shown to people of the cultivating classes who are reluctant to work. As regards the land improvement loans, I have instructed the Collector that these should be given freely.

Mr. Hamilton has been active in moving about ever since he took charge of the district, and his diaries give me very full information. I do not think that even in the worst parts of Jessore there is any indication of such distress as is driving the people to relief works in Nadia.

KHULNA.—I annex copy of Mr. Vincent's memorandum No. 2538G., dated 1st February 1897, with copy of Mr. Bell's report No. 84S.C. of 30th January 1897, submitted therewith. It is very unfortunate that Mr. C. A. Bell, who was in charge of relief operations in the affected area, has broken down in health. Mr. Vincent has visited the area since taking charge of the district, and I think that sufficient arrangements are made for meeting distress, if it appears. But at present I do not consider that acute distress is indicated, and neither in Jessore nor in Khulna do I accept the theory that the actually cultivating classes—Muhammadans and Hindus—would rather die of starvation than labour on relief works.

Section 24, clause (1).—The area affected in this district remains the same as before, viz. 442 square miles, with a population of 262,000, and the number of relief circles remains unchanged. These are divided into two Superintendents' 'charges' with four circles in each charge. Six circle officers have been appointed by me, and two have been taken from the district staff. Both charges are now under one Superintendent only. The appointment of another Superintendent is under consideration.

Section 24, clause (2).—No remarks are necessary, as the information given on this head by the Collector is complete.

Section 24, clause (3).—Two relief works were opened when the fortnight commenced, and a third has been opened since. The number of labourers paid by daily wages and rates at which they were paid have not been given in the report, nor have they been distinguished according to the departments which are in charge of these works The Collector has been directed to supply the information. There is no relief works under private agency.

Section 24, clauses (4) and (7).—No poor-houses or kitchens have been opened in this district, nor do I think they are necessary at present.

Section 24, clauses (5) and (6).—It is observed that grain contractors have been appointed under section 196 of the Code, and paddy has been given out for husking and jute for twisting, but the result has not yet been reported. Steps are also being taken for distribution of doles in grain, and not in money, at each circle head-quarters.

Section 24, clause (8).—A sum of Rs. 275 only was advanced under the Land Improvement Loans Act to two persons, but none under the Agriculturists' Loans Act. The system and security on which such advances were given have not been reported. The Collector has been directed to supply this omission, and to explain why so small a sum has been advanced.

Section 24, clause (9).—The financial statements show receipts from the district fund Rs. 1,000, and from private subscriptions Rs. 400—in all Rs. 1,400. Of this, Rs. 672 only were expended; so the balance in hand should be Rs. 727-15-6, and not Rs. 695-10-10½ as shown. The Collector has been directed to explain or reconcile the discrepancy.

Section 24, clauses (10) and (11).—The Collector furnishes no information as to the condition of the tracts outside those marked as affected in the map. He has been directed to make good the omission in his next half-monthly report.

Sections 26 and 27.—The following errors and omissions are noticed in the statements submitted by the Collector:—

(i) The statement of gratuitous relief (Form 6) and Statement E are reported by the Collector to be inaccurate and incomplete.

(ii) Statements of imports and exports in Forms 8 and 9 have not been given.

(iii) Famine Statement A should show, in columns 3 and 5, figures in thousands, whereas in the report the exact figures are given.

(iv) Famine Statement B has not been drawn up in accordance with the instructions given in Government Circular No. 173 (Fam.), dated the 25th January 1897.

(v) No information has been given about any relief works calculated to improve the water-supply of the country, or the amount of loans, if any, advanced for this purpose. The Collector's attention has been drawn to these omissions.

No. 2619G., dated Krishnagar, the 3rd February 1897.

From—J. H. E. GARRETT, Esq., Collector of Nadia,
To—The Commissioner of the Presidency Division.

I HAVE the honour to submit herewith my report under section 24 of the Famine Code for the last half-month of January. This report deals with the figures for the weeks ending on the 23rd and 30th January.

(1) The area affected during the period under report was 815·25 square miles, the details of which are given below:—

		Sq. miles.
	Kaliganj	109
½	Nakasipara	67·50
½	Chapra	65·00
½	Meherpur	66·50
½	Gangni	63·00
	Karimpur	193·00
½	Daulatpur	72·00
¾	Tehatta	135·00
¼	Naopara	44·25
	Total	815·25

The population of this tract is 428,644. In my opinion at least 8 per cent. of this population, amounting to 34,292 souls, are likely to require relief in some form or another up to date. Two charges under two Superintendents of Famine Relief have been constituted; they are known as the Mira and Shikarpur charges: the Superintendent of the Shikarpur charge has not yet joined his duties. Each of these charges are subdivided into two circles, known as the Kaliganj and Barnia Circles, under the Mira charge, and the Karimpur and Daulatpur Circles under the Shikarpur charge. Three of these circles have been manned, but the circle officer appointed to the fourth, viz., Daulatpur, has not yet joined his duties.

(2) The general state of the affected tracts is steadily deteriorating. The portion immediately surrounding Mira is perhaps the worst off, and in this portion the famine is severe. The prospects of all standing crops are bad; there were a few drops of rain on the evening of the 1st, but not enough to do any good. The *chaiti* or *har* is suffering more than I had anticipated from want of rain. A very large proportion of the land which was sown with *rabi* crops has since been ploughed up again, as the seed did not germinate. I do not think that there has been much drain on the food stocks, such as they are, during the period under report. The amount required for the daily consumption of the people has been obtained almost entirely from small importation from the *Barh*. I have, however, noticed many carts passing through the distressed area bound for places east and south of it, and there can be no doubt that there is a very great drain upon the *Barh*, and the surplus stocks there must very soon run out. Mr. Basu in his note styles the present system of importation as an admirable one; no doubt it might be so called if the stocks in the *Barh* were unlimited: but as that stock must fall short within a very few weeks, I am of opinion that the present system of importation is a very unfortunate one, as it leads the people to believe that they need have no fears for the future, the consequence of which is that no attempts have yet been made to lay in stocks, or endeavour to arrange for supplies from other places. So far as I can see, there must be very serious trouble in the *Kalantar* when the supply of rice from the *Barh* suddenly ceases. There is nothing calling for notice under the head of Emigration and Immigration of famished people. The public health continues good, and no cases of cholera have yet been reported from the distressed area. I am, however, of opinion that one Civil Hospital Assistant should be attached to each of the major works; so that some one may be at hand to deal with an epidemic, should one unfortunately break out. I am submitting a separate report on this point. The condition of the cattle continues good, but, owing to the want of rain, the grass is rapidly drying up, and there may be some difficulty for fodder later on in villages which have not got an ample supply of straw.

(3) Two relief works under Civil Agency were open in the *Kalantar* during the period under report, viz., construction of Meherpur to Kaliganj Road, and construction of Tehatta to Katwa Road. These works are being taken over by the Public Works Department with effect from the 1st instant. They will, however, remain under the general supervision of Babu Dwarkanath Sarkar, the District Engineer of this district. Another relief work, under the Public Works Department, was open at Taragonia on the Bhairamara-Taragonia Road during the period under report. Test works were opened under Civil Agency on the Meherpur-Gopalpur Road, and on the tank at Daulatpur. The appended statements give detailed figures in connection with all these works. No relief workers were paid by daily wages during the period under report. No relief works have been opened under private agency.

(4) There are at present no poor-houses in the distressed tract, and I hope not to be placed under the necessity of opening any.

(5) I have directed the Superintendent of the Mira charge to purchase a small supply of thread and iron to be made over respectively to a few weavers and blacksmiths in the Kaliganj thana, who are now in distress. No jute or cotton has actually yet been issued to women for work at their homes, but the distribution will commence during the current month. I have divided each circle into five or six centres, each of which will be visited by the circle officer on a fixed day in each week. The circle officer will then distribute gratuitous relief to non-workers, and also issue jute and cotton to women working in their own homes, receiving back that issued in the preceding week. By this means no person will have to walk more than 3 miles for relief, and that only once a week. At present some of the duties of the circle officers are being carried out by the police, but from the 15th instant all gratuitous relief, except that strictly under section 12, will be afforded by the circle officers. Figures in this connection will be found in the appended statements. The Superintendent of Famine Relief is also distributing relief to persons whose cases do not exactly fall under the Famine Code from sums granted to him from the District Charitable Relief Fund.

(6) I have dealt with this matter sufficiently under head 5.

(7) No kitchens have yet been opened, and I trust that it will not be necessary to open any, now that Government has sanctioned the relief of dependents by money payments to relief workers.

(8) The annexed statement will show the number of applications for loans under the Land Improvement and Agriculturists' Loans Acts, filed during the half-month under report. It will be noticed that only one such application was filed during the corresponding period of last year. The total amount sanctioned during the period under report was Rs. 15,950 among 25 applicants, giving an average of Rs. 630-8 per man. No advance was made under the Agriculturists' Loans Act. Applications from villages within the distressed area are enquired into by circle officers: applications from other portions of the district are enquired into by Sub-Deputy Collectors or Kanungoes. If the enquiring officer reports favourably, the registry office is required to report whether the security offered is free from encumbrance, and it is only when this report also is favourable that the loan is sanctioned. I may add that enquiring officers are also required to report as to the necessity for the proposed improvement, and also whether it is possible with the sum applied for to carry it out satisfactorily.

(9) (*a*) The total sum advanced during the half-month under report was Rs. 12,463-9-3, including a sum of Rs. 800 from the Bengal Charitable Relief Fund.

(*b*) The statements of expenditure will follow. The accounts have not yet been properly adjusted, owing principally to the fact that expenditure was first incurred from District Board Funds, and then from Government funds

(10) All the necessary information under this head has already been given in reports previously submitted.

(11) During the last two days I have been touring in South Nakasipara and North Kotwali, and I am of opinion that this tract also gives cause for uneasiness. I have ordered the opening of a test relief work under very stringent conditions, and I am inclined to think that it will shortly be necessary to constitute another circle for distribution of gratuitous relief.

(12) The statements, with the exception of those in forms 10 and 11 which will follow, and maps required by sections 25, 26 and 27 of the Code, are appended. The maps were coloured by the District Engineer. I have made a slight addition in blue pencil to the portions coloured blue by him.

(13) The only relief work calculated to improve the water-supply of the country is the re-excavation of the Daulatpur tank. I intend, however, shortly to undertake the re-excavation of all the Government tanks excavated during the last famine. The whole of the amount advanced under the Land Improvement Act was for excavation of tanks.

No. 2947G., dated Jessore, the 4th February 1897.

From—F. S. HAMILTON, Esq., Collector of Jessore,
To—The Commissioner of the Presidency Division.

IN continuation of this office No. 2870G., dated 28th January 1897, submitting first half-monthly report, I have the honour to submit the second half-monthly report for January 1897 under section 13 of the Famine Code.

1. The general condition of the people of the tracts in thanas Mahamedpur and Bangaon, for which anxiety is felt, continues to be the same as reported already. There has been no improvement in the prospects of crops. *Rabi* crops are being harvested, but the outturns

are poor. Lands are being ploughed for *aus* and *aman* paddy in the Magura subdivision Prices of rice show a tendency to rise. They now vary from 9 to 10 seers per rupee in different parts of the district, while in the preceding report it was noticed that the prices ranged between 9 to 11 seers per rupee. Food-stocks in hand are believed to be supplemented by importations from abroad as well as inter-district importations.

The following are the statistics supplied by Railway and Steamer Companies during the fortnight ending the 30th January 1897 :—

	Mds.
Exports of food-grains and pulses	8,903
Imports ditto ditto	4,738

The above figures show that there have been more exports than imports, but in certain places in the district considerable quantities of food-stocks are imported from the eastern districts and Khulna by boats. I am trying to make arrangements to collect such statistics, but have not yet been able to organize a system. As an instance, I would cite Basundia. I asked the cutcherry naib to furnish me the statistics, and it has been found that no less than 2,950 maunds of food-stocks were imported into Basundia from other districts, while only 50 maunds were exported. If I succeed in making such arrangements in other important centres, viz., Jhinkergatcha, Keshabpur in Sadar, Kalia, Lohagarah, Abhoynagore, Narail in Narail, and Nowhata, Mahamedpur, Benodpur and Magura in Magura, I shall be able to furnish fuller statistics in future. My belief is that importations into the eastern portion of the district are going on on a much larger scale by country boats from other districts than exports. Mr. Macleod is importing rice into Kotchandpur.

There has been no rainfall during the half-month under review; so far there has been no improvement in the prospect of future crops. Public health continues to be good generally, but there are sporadic cases of cholera here and there. Emigration and im migration of famished people is unknown. Certainly the time has not as yet come when famished people are forced to migrate; but numbers of people from the north-west of Jhenida go yearly to Calcutta for work at this season, and also from Magura to the Sundarbans; the same will be the case this year, probably on a larger scale. The Subdivisional Officer, Magura, reports some able-bodied men migrated during the half-month under review from his subdivision in search of employment abroad. A comparatively large number of money-orders for small amounts are received daily in the post office from those people, and those offices have been drawing largely from the sub-treasury for money-order payments. I think it would be well if the Postmaster-General were requested to issue orders to all postmasters in the districts to send us weekly abstracts of these figures. We should then be able to form an opinion of the amount of money coming into the district in this way. Similarly, numbers of people also come to this subdivision from abroad in search of employment in digging tanks for private individuals. The Subdivisional Officer of Bangaon reports a few bands of *Biharies* passed through his subdivision. They came there in quest of work, but failing to find any have left. The condition of cattle appears to be good. The Subdivisional Officer, Magura, however, reports that difficulties of fodder and scarcity of water will be felt later on if it does not rain soon.

2. No relief work has as yet been opened under the District Board or Municipal Committees, or under the Public Works Department. A test-work has been ordered to be opened towards the end of the month in Mahamedpur thana, and a site has been selected by the Subdivisional Officer for digging a tank. Arrangements are being made to start it. On this subject the Subdivisional Officer of Magura reports that he has made enquiries from very poor Musulmans who form the bulk of the population and who came to him for agricultural loans or gratuitous relief works. But they said they would die before digging earth and degrading themselves, as their fathers never did such work. I am afraid this contains some truth, and the relief work will not attract a very large number of local people though they may attract outsiders. However, the above test-work will be started by the end of February, when I will report the result. No necessity is at present felt for starting any such work in Bangaon, but the Subdivisional Officer has been directed to arrange for sites, etc., in advance.

3. The following statement shows the numbers of men, women and children under gratuitous relief under section 12 of the Famine Code in the different subdivisions and Sadar:—

Name of Subdivision.	Males.	Females.	Children.	Total.	Money expended.
1	2	3	4	5	6
					Rs. A. P.
Sadar	9	18	7	34	14 6 0
Magura	47	94	37	178	170 12 0
Narail	18	19	29	66	92 8 0

The statement for Magura includes some persons who were relieved in the previous fortnight, but the accounts of whom were not received by the Subdivisional Officer, Magura, during that fortnight. The statement for Narail includes all money spent up to the 30th January 1897 from various sources. The statement for Sadar refers to all money spent during the two weeks to which the report refers. Up to this time the ordinary maximum rate at Magura was annas 8 per head for adults and annas 4 for children. But as these rates were found inadequate, the rates have been raised to Re. 1 and annas 8 for adults and children respectively. Under section 45 of the Famine Code, some paddy-husking was done at Magura. The subjoined statement shows the number of persons and the amount spent on this kind of relief:—

	Male.	Female.	Children.	Total.	Quantity of paddy used for husking.	Quantity of rice allowed as remuneration.	Value of rice allowed.
1	2	3	4	5	6	7	8
					Mds.	Srs.	Rs. A. P.
Magura ...	.....	11	8	19	7	20	2 8 0

The number of children shown belong to the females who husked the paddy. Two seers of clean rice have been allowed as remuneration per maund of paddy husked. This sort of relief could not be given to a large extent, as the females refused to go themselves to the Sub-Registrars (to whom money has been advanced for this purpose) and carry the paddy to their homes and return the clean rice. It is now proposed to carry these to their homes. These works will rapidly increase in Mahamedpur, but the remuneration will have to be raised from two seers to four.

4. Loans under the Agriculturists' Loans and Land Improvement Loans Acts.—The number of applications under Agriculturists' Loans Act has risen from 324 for Rs. 54,567 to 422 for Rs. 61,820 in Magura. Ordinarily such applications are not received in other years. In Bangaon one application was made by a single man for Rs. 100, and it was rejected by the Subdivisional Officer. Under your demi-official orders I have announced that such reliefs cannot be given. The number of applications under the Land Improvement Loans Act has risen from two to ten in Magura. These applications were received at Sadar, of which one has been rejected, and the remaining two under enquiry. In Narail 1 and in Bangaon 3 have been received. They are all under enquiry.

5. A skeleton map is submitted herewith. The portion coloured brown shows the tracts at present considered affected. The portion coloured light blue shows the tracts which it is feared will be shortly affected. Another map will follow with the next report.

No. 2538 G., dated Khulna, the 1st February 1897.

Memo. by—The Collector of Khulna.

Copy forwarded to Commissioner. As I only joined on 28th January, I cannot offer any opinion of any value on the subject. I to-day proceed to Kaliganj to consult Mr. Bell. I have worked three days here in order to be sure my reports due on 1st were despatched to date.

Paragraph 2.—As you are aware, the number of circle officers has since been increased. As regards Charge Superintendents, I have already reported my views to Commissioner and will further report after visiting the area affected.

Paragraph 4.—As far as is ascertainable from the latest railway reports, more food is exported than imported into this district, but the quantities dealt with are insignificant. It is probable that more is done here in country boats than by any other means of transport.

Paragraph 7.—There is some cholera in Kaliganj. Civil Surgeon has submitted proposals on which action will be taken as soon as possible.

Paragraph 10.—I have been into this subject fully with District Engineer. The increase in the wages and of work done is satisfactory. I understand the soil is now getting harder and the rates will have to be increased. The rates here are slightly higher than Mr. Glass' rates. They were framed after calculation by the District Engineer.

Paragraph 11.—I agree mates should get one anna per day more than maximum wages in order to secure regular attendance and good work. The District Engineer is doing his best to get overseers. I have asked him to report about sarkars.

Paragraph 14.—I am not quite sure if this part of Mr. Bell's proposal will work well. I will defer judgment till I have seen him and the results.

Paragraph 21.—Orders have been issued. The death-rate in the Satkhira subdivision for last quarter of calendar year was not higher than in the corresponding quarter last year as Civil Surgeon has reported me. I have not yet seen the returns.

No. 84SC., dated Camp Kaliganj, the 30th January 1897.

From—C. A. Bell, Esq., Subdivisional Officer, Satkhira,
To—The Collector of Khulna.

I have the honour to submit my half-monthly report for the half-month ending 27th January 1897. The figures in this report relate to the fortnight ending on the 20th January 1897.

2. *Section 24 (1).*—The area affected is, as before, 442 square miles with a population of 262,000, and the number of circles, as before, eight. We are working, however, with four circle officers only, as of the six officers given me, one, a temporary man, deserted his post not liking the work, and another, a permanent man, got fever, left off work, and has applied for leave. I understand that four new circle officers are on their way. On their arrival they will be kept for a day or two to learn their work and then sent off to their respective circles. The work should then progress much more rapidly. Their chief work at present consists in enquiring into applications for loans, of which there are at present some 120 on hand, and in the preparation of the register of gratuitous relief (Form 13) after house-to-house enquiries in some 960 villages I have one Charge Superintendent, *viz.*, Babu Banku Behari Bakshi, Deputy Collector, who is engaged in learning the work for the present. An additional area of some sixty square miles at a guess will have to be included later on, probably from the middle of March.

3. *Section 24 (2). General state, etc.*—The general condition of the people remains about the same as before. Harvest work is, practically speaking, at an end. Some of the poorer classes are living on the wages earned thereby; others are working in the Gutiakhali khal near Asasuni, a work under the control of the Public Works Department.

4. Food-stocks are small and rare.

5. Food is imported both from west and the east, where the crops appear to have been comparatively good.

6. No rainfall.

7. Public health good on the whole. No signs of emaciation among the people are visible There is some cholera in the southern portion of Kaliganj thana. The Civil Surgeon appears to be of opinion that this is due not to want of food, but to the bad quality of the water drunk by the victims.

8. Emigration of famished people there is none, but a large number have been emigrated to avoid being famished. The Syamnagore Circle seems to have lost most, and I have myself seen many deserted houses in the Paickgacha Circle. This is a result of absentee ndlordism. The embankments for keeping out salt water are neglected, and the raiyats have not sufficient stake in the land to make embankments themselves. It is probable that the free granting of loans will tend to prevent emigration by increasing the chances of next season's crops as well as by providing them with work in the meanwhile.

9. The condition of the cattle is excellent.

10. *Section 24 (3). Relief works.*—Two relief works, the same as before, were open throughout this half-month. A third, being at road at Issoripur in the Syamnagore Circle, was opened from 26th instant. Statements D, E, A, and B, are submitted. It will be noticed that the average work done by each male unit has risen from 27 to 61·52 cubic feet, and the cost per 1,000 cubic feet has fallen from about Rs. 4 to Re. 1-14-7. The figures show a great improvement on those of the preceding half month. One cause of the high cost of the work was the large proportion of D class men; another that the minimum and penal wage were not used so freely as I have directed in the case of short tasks.

11. The high rate of daily wage of those employed by daily wages is to be accounted for by the fact that these men are chiefly mates, who have been paid at high rates to ensure their coming regularly and understanding their work properly. The main body of the workers are as yet irregular in their attendance; but the mates have to keep the muster-roll for their gangs and must be induced to come regularly. I have ordered that for the present they should be paid 3 annas per day. I still await the two overseers and the two road-sarkars who were to have been here on the 16th instant. When they come, one of the two at present employed is, I understand from the District Engineer, to be taken away from famine work. At present, as the number of overseers is less than the number of relief works, and as it is not considered safe to entrust payment to road-sarkars, payments are being made bi-weekly instead of daily as formerly.

12. There are no relief works under private agency.

13. *Section 24 (4). Poor-houses.*—Nil, not required at present.

14. *Section 24 (5). Organization for the employment, etc.*—I have stored paddy and jute to the total amount of 127 maunds of paddy and 20 maunds of jute in 6 out of 8 circles. To supplement as required, I have appointed a grain contractor for each circle under section 196 of the Code. The circle officers will indent on these contractors, and the contractors' bills will be passed and paid by the Charge Superintendent. The paddy and jute so purchased will be distributed to those who come for gratuitous relief, and endeavours will be made to make all able-bodied men, women and children entitled to gratuitous relief do one or the other. With the high castes, however, difficulty is anticipated. I made an experimental distribution on the 28th instant in the South Kaliganj Circle, giving each adult 1½ maunds paddy or 5 seers jute, and each child ¾th maund paddy or 2½ seers jute. The result will be known on the 4th February. My present intention is to return to the paddy huskers whatever they can get over and above 16 seers out of every ¾th maund of paddy. This mode

of payment is in accordance with the custom of the people and therefore understood by them; it will avoid confusion in our registers, and the amount earned by women and children will, after allowing a small percentage of about 3 per cent. for the inferiority of paddy and for wastage, and on the assumption that moderately good paddy gives ⅓rd of its weight in rice, just cover their weekly dole; that is, 5 seers 11 chitaks for women and 2 seers 13½ chitaks for big children. Men will receive 7 chitaks in addition, and small children will be paid without working, or for some small task. I am now fixing dates for distribution at the other six centres. Hât days are being chosen as most convenient in every way.

15. The register of gratuitous relief is being pushed on as fast as possible and progress is being made, but the time of the circle officers is very largely taken up with enquiries into loans, which are numerous. When the other four circle officers arrive, progress will be accelerated. Those already admitted to the register will be expected to attend the weekly distribution.

16. It has been reported that some weavers in South Kaliganj Circle require assistance. The matter is being enquired into.

17. *Section 26 (b).*—Grain doles will be distributed for gratuitous relief weekly on the appointed day at each circle head-quarters. Money doles will not be given; the paddy-husking should supply us with plenty of rice for distribution. Relief Committees are being appointed, and five to ten gentlemen in each circle have been asked to lend their services. On replies being received the Committees will be finally formed, and it is hoped that they will prove useful in taking charge of small quantities of paddy and jute, and distributing the work and the relief in small areas distant from the head-quarters, so that the people residing in those areas may not have to come to the head-quarters. Their local experience should also prove useful in distinguishing deserving from undeserving cases.

18. *Relief in kitchens.*—Nil.

19. A financial statement is appended (Statement VIII).

20. *Section 24 (10).*—Since information under this sub-section was not supplied in my last half-monthly report, the following facts may be noted here. The affected tract grows only one crop; the winter rice—the soil appears to be naturally fertile, and when conditions are favourable the crop is very good. The population is not dense, and the holdings of land are fairly large. The normal condition of the people must be taken as prosperous. The crop, however, last year was poor, and this year about two annas only on a general average. Since there is neither *rabi* nor *bhadoi* crop to any appreciable extent, the distress, which at first presses less than in other places owing to the greater resources of the people, may be expected to increase until the new winter rice crop begins to be harvested next November, though a fall in prices, consequent on good *bhadoi* crops elsewhere, will no doubt afford relief to some. As regards its means of importing food the tract is favourably placed, since it lies across the main water highway between Calcutta and Eastern Bengal. This, added to the natural bent of the people for trading, will, I think, ensure a sufficiency of good supply throughout the different *hats* in the tract, and all we need do is to see that the people have enough money to buy at current prices. But on this general subject I would solicit attention to the recent report of the Assistant Director of Agriculture, who has dealt with the matter more fully and with greater ability than I can hope to do.

21. *Section 27 (1).*—I am unable to comment on the present death-rate in the affected tract, as the Magura and Paikgacha police officers have not supplied me with figures on the subject, although asked twice for them. The latter officer has consistently disregarded my requests, although no doubt he has received the warning, which I asked you to give him, as to the importance of these matters. I would ask you again to make him understand that the fact that this thana lies outside my subdivision does not relieve him of the necessity of attending to me in famine matters.

22. Statements Nos. II and III annexed show the amount sanctioned during the half-month for loans.

The circle officers when enquiring at first were not sufficiently careful in testing the security offered; they are now more careful, and a large number of applications are being and will be sanctioned during the next month. I cannot give figures as to the number of persons employed on the works thereby set in motion; but it is small at present and will increase largely during the next month. The works for which advances are applied for are, firstly, embankments to keep out salt-water; and secondly, tanks. On the number and efficiency of the embankments next year's crop may largely depend. I have sent out for re-enquiry a large number (probably 50 to 60) of applications for loans which were received by my predecessor, but not accepted. I have altogether some 120 applications under enquiry, besides a large number, perhaps 100 more, which have been filed in the wrong form and have been sent to the circle officers for taking in proper form. Zamindars as a rule do not come forward to take loans: they leave it to the tenure-holders and raiyats. The Mukundapur-Panchberia bhil is an instance in point. It contains some 5,000 to 6,000 bighas, and requires embanking; yet the managers of the zamindars, the latter being absentees, would not move in the matter, though apparently empowered to act in such cases. Babu Aghor Nath Banerjee, the Manager of Babu Koilas Chandra Pal, would not even see me or write to me on the subject, though he lives only three miles from my head-quarters.

23. *General remarks.*—I have but little to add. The Superintendent of Stationery has not yet sent me all the forms indented for on the 31st December, but a portion of them arrived a few days ago. The required statements are appended with one or two others which seemed advisable. They are in better order than last half-month's, though not yet all perfect. Form 6 is the worst; the police have already been ordered to discontinue submitting it to me direct, and fresh instructions will be issued to the circle officers to make them understand it properly. The deficiency of circle officers accounts partly for the deficiency in the returns, since four men have to do the work of eight.

FORM No. 8.

CIVIL AGENCY RELIEF WORK.

[See Section 26 (ii) of the Code.]

District Khulna.

Statement of gratuitous relief for the half-month ending 27th January 1897.

Name of circle and heads of gratuitous relief.	Number of persons receiving gratuitous relief.				Money expended.
Period.	Men.	Women.	Children.	Total.	
1	2	3	4	5	6
					Rs. A. P.
Week ending 20th January 1897 ...	23	63	56	142	86 8 9
Week ending 27th January 1897 ...	5	19	9	33	33 9 6

Note.—The smallness of the figures in the second week is due partly to the returns for this week being incomplete, partly owing to the Police giving less than in the first week, when they relieved without sufficient discrimination.

The return cannot be accepted as quite accurate; persons who have received relief for one day only having been entered in the Police returns equally with those who have received for the whole week. I have taken the return wholly out of the hands of the Police, and this will ensure greater accuracy in future.

(a) The number of male units for 90 days.
(b) The figures have been converted into a dult male units.

SREENATH GUPTA,
Deputy Collector in charge.

H. D. CHATTERJEE,
District Engineer, Khulna.

No. 292R.Ct., dated Camp Bardalia, Araria subdivision, district Purnea, the 1st February 1897.

From—W. B. OLDHAM, ESQ., C.I.E., Commissioner of the Bhagalpur Division and Sonthal Parganas,

To—The Secretary to the Government of Bengal, Revenue Department.

IN continuation of my No. 278R., dated Kharagpur, in the Monghyr district, the 1st January 1897, I have the honour to report the state of affairs in this Division on the 31st January 1897.

2. *Monghyr, Purnea, Malda and Sonthal Parganas.*—In the Purnea district, from where I now write, there has been no change. In Malda, on the 18th January 1896, there was an alarm of distress in that tract on the border of the Rajshahi district which is under special observation, and a test relief work was opened, but no one would resort to it, and it was closed. It was ascertained that the people who had asked for it could still earn 2½ annas a day as wages in the vicinity. So there has been no change in Malda. From the Sonthal Parganas and from the Monghyr district no change is reported. The Collector of Monghyr, Mr. Marriott, has meanwhile given the report on stocks of food-grains required by Government order No. 7T.—R., dated 3rd November 1896, and has estimated that there will be a deficiency in round figures of over 4,00,000 maunds in his district. Mr. Marriott, however, does not say if he himself believes in the accuracy of this estimate, which has been prepared by taking the maximum formula for consumption, and a calculation of only * annas for the *rabi* crop. But he is confident that, making the fullest allowance for exportations, there was a full supply of food for two months in hands in all parts of his district on the 1st November last. As every populated part of the Monghyr district is supplied with good means of communication by either water, rail or road, there is no anxiety about the adequate supply of any deficit, which may actually occur there, not being made up from outside, while his calculations have not induced the Collector to make any change so far in his estimate of the extent of the distress that may be expected, or the adequacy of the local means for meeting it. In his absence on tour and in compliance with an urgent call from Government, I estimated for him on the 11th January that he would require an extra grant, before the 1st of April next, of Rs. 5,000 for agricultural loans, and of Rs. 20,000 for the same purpose for the period from April to November, and in this estimate he has since concurred.

* Apparently 6 annas. Will follow when ascertained.
W. B. O.

The report on stocks has not yet been received from the Sonthal Parganas. When given, it will doubtless carry matters up to date, and be less founded on guess work than those submitted for the other districts. I wait its submission before forwarding the reports for this Division with my remarks.

3. *Bhagalpur.*—I have been on tour with Mr. McIntosh, the Collector of Bhagalpur, from the 14th to 30th January, and have traversed all those tracts in the Madhipura and Supaul subdivisions, which we believe to be threatened with scarcity. The result is that I concur in Mr. McIntosh's forecast, and, in consultation with me, he has definitely framed his estimates of expenditure, and of the demands on it, and the time for which they will be made, and I now beg to submit copies of his successive reports No. 1874G., dated 21st December 1896, and No. 15G., dated 28th January 1897, under section 9, Chapter II of the Famine Code, with the following remarks.

4. Till I had visited them, I had not realized the social conditions of these tracts which affect largely their economic conditions, and the kind of relief which is best adapted for them. The soil is so poor that most of it is most suited for the production of indigo which used to be extensively cultivated, but has been given up, very much because of the social conditions which prevail. The population which, for the same reasons, is extraordinarily free from crime, and is wholly agricultural, falls into the following three classes :—

(1) Brahman and Rajput raiyats.
(2) Middle class raiyats, who are nearly all Goala.
(3) Low caste petty raiyats and farm-labourers, who are nearly all Jolaha and Musahar, with a very few Dosadhs.

I know no part of India where the multiplication or variety of castes is so small, and the clearly defined social divisions so few. The country belongs to Mithila or old Tirhut, and contains nearly all the numerous Brahmans and Rajputs of the Bhagalpur district. The former are the ordinary Maithili Brahmans, and though they may not work, they can receive alms when given with due regard to their susceptibilities. But the social pretensions of the Rajputs are far higher than those of the scattered families and individuals who are known by this name elsewhere in Bengal. The North Bhagalpur Rajputs are a single *Sa-gotra* tribe, all of the clan of the Maharaja of Sonbarsa, the Raja of Baruari, and other local zamindars, and acknowledged by these Chiefs as their kinsmen. The fact accounts for their being excessively bad tenants and also prone to extravagance, and bad men of business, but they are skilled farmers, and agriculture is their sole occupation, and they are good employers of labour. They will not work with their hands, and they will not receive alms, and it was they and the Brahman raiyats alone who complained of distress, and their commonest complaint was that their labourers had left them and gone to earn elsewhere the wages which they could no longer afford to give. They clamoured for advances; and though among these noisy applicants there were doubtless many whose needs arose from their own extravagance, or from ordinarily reduced circumstances, or who wanted loans from Government for other purposes than those connected with relief, it is certain that there are whole communities and many individuals, who will suffer severely unless relieved, in consequence of the losses of their crops, while the only means of relieving them can be by advances, either from Government for the tillage of their farms, or, under the name of loans, from charitable funds. It is obvious that the demand on our relief works will decrease in proportion to the extent to which these employers of labour will be able to afford it. In 1874 the loans in grain in the Bhagalpur district were threefold the amount of grain spent in wages of labour, and more than that expended in charitable relief, while the loans in cash exceeded the cash spent on charitable relief, and were about three-fourths of the sum spent in wages of labour. In 1889 Rs. 17,500 in round figures were advanced by Government as loans, while it spent only Rs. 1,400 on relief works and in gratuitous relief. In 1891 over Rs. 37,000 were advanced as loans, and in consequence the relief works, the attendance on which had risen to over 12,000, were finally closed in August. As far as I can learn, there has been no difficulty in recovering these advances. All these reasons will explain why the Collector and I look so much to loans to agriculturists for affording the relief which will have to be given in North Bhagalpur. In compliance with my request made from Supaul by telegram, the Board of Revenue have already placed at his disposal an additional allotment of Rs. 10,000 for the current year, which will suffice, with the sums already given, till the end of March.

5. Of the three classes who compose the population of North Bhagalpur, these Rajput and Brahman raiyats will be the first to feel the pinch and to need relief, though there are still no signs of distress among them beyond their own complaints. The middle class of raiyats have made no sign, and there need be no anxiety about them. They are as substantial as their Brahman and Rajput neighbours, without the extravagance and need for display of the latter, and are frugal and, as a rule, excellent business men. Individuals among them may be found to be fit recipients for loans, while there is nothing to deter any of them from relief works if need be. Many of them have largely profited by the famine prices, and this is also the case with several of the Brahman raiyats. The low caste people also express no fear. From frequent recent experience they know that work will be found for them, either by private employers or by Government, when the time comes, and they still regard that time as comparatively distant.

6. The general estimate is that there will be no need of real relief works till March. Much of course depends on any intermediate rain. Even without rain an 8-anna *rabi* crop is counted on, and these local estimates we know to be much under the mark. Comparing the past season with previous bad years, it is said that the failure of crops is much less than that of 1873, but considerably more than those of 1888 or of 1891. The general opinion of those best able to form one is that in extent the failure was about

halfway between that of 1873 and that of 1891. The rainfall figures for Madhipura, which I produce below, would lead to a different calculation; but all such data are upset by the poverty of the soil in the tracts reported on, which makes the crops on it precarious unless the rain falls exactly at the time and in the way best suited to them, and will keep them, except in the most favourable seasons, subject to failures and famine.

7. I have not yet been able to see the comparatively small threatened area in the southern half of the Bhagalpur district, but, after examining his reports for the rest of his charge, am confident that Mr. McIntosh's estimate of its position and prospects is as correct a one as could be framed. It has no such social economic peculiarity as the Rajput raiyats of North Bhagalpur, but the only point regarding it on which I have no information is as to the part which private charity will play in it. In North Bhagalpur this will be very important. I have separately reported from Madhipura the munificence of Maharaja Harballab Narain Singh Bahadur, of Sonbarsa, as well as his undertaking for his own tenantry. In the Maharaja of Darbhanga's and the Raja of Baneli's Estates in North Bhagalpur preparations are being made and inquiries instituted, and the tenantry will be similarly looked after. The Raja of Baruari and several of the Rajput zamindars have promised that they will do the same, while Rai Ganpat Singh Sahib, who owns the great Harawat pargana in the east of the Supaul subdivision, is prepared to undertake very considerable expenditure and the most systematic working. The areas so undertaken are being marked off, and, as matters progress, it can be ascertained exactly what is the kind of relief that is administered in them. Rai Ganpat Singh proposes to open relief kitchens of his own. Looking to the character of the population and our previous and frequent experience, it is not anticipated that this form of relief will have to be resorted to from any public funds. In this connection it may be mentioned that the residents of Madhipura subscribed to give a feast to the poor on the 20th January last in my honour, and the form in which the bounty was distributed was half a seer of uncooked rice to each person. Though this "feast" was publicly proclaimed for some days, it attracted only between 50 and 60 professional beggars, including mendicant priests, and only one-fourth of the grain brought for distribution was distributed.

8. In paragraph 7 of his report of the 28th January 1897, Mr. McIntosh mentions that he has referred to me the question of what the proper wages on test relief works should be ordinarily under section 103 of the Famine Code. Bhagalpur would be declared to be a second class district. In the special circumstances of this season, with its enormous exportations, there is some doubt if this decision will hold, and if rice will not be the only food easily procurable. There need be no haste in coming to a decision, as at present *kurthi* or vetch, which is a valuable adjunct to the food-supply, is being sold at 20 seers for the rupee in the affected tracts, and the district is still classed as second class, and the 5 pice wage for men is the proper one. Another matter in which I cannot yet state the exact requirements is that of additional establishment. In paragraph 12 of his report of the 21st December 1896, Mr. McIntosh said that a Sub-Deputy Collector and two more kanungos were wanted for the Supaul subdivision, and a Sub-Deputy Collector and four kanungos for the Madhipura subdivision, and a Sub-Deputy Collector and two kanungos for the head-quarters tract, or in all three additional Sub-Deputy Collectors and eight kanungos. Events have shown that these requisitions were premature. Meanwhile I have been able to find two Sub-Deputy Collectors, one each for the subdivision, to have charge of the sub-treasuries and current work while the Subdivisional Officers are on tour. The undertakings given by the zamindars will for some time limit the duties for a very large part of the area to

observation. The Bongong thana, which is the centre of the largest area threatened with distress, is the head-quarters of Mr. H. D. Christian, the Manager of the Lagma Ward's Estate, who is willing to undertake relief duties in that tract, and would be a far better agent than a kanungo or Sub-Deputy Collector. If he is to be employed, the terms of his appointment will be proposed to Government in imitation of the scheme sanctioned for Bihar. Meanwhile he is available as a referee and for more or less casual assistance. In reply to your telegram, which I received on the 30th ultimo at Forbesganj, I have reported that, with the existing staff of the Division retained, I should eventually require in addition the services of three Deputy Collectors and six Sub-Deputy Collectors (or officers of the same standing); but most of these officers, if given, will be wanted for the Sonthal Parganas, on the staff of which both Government and I have been drawing. Meanwhile I have explained to Mr. McIntosh how, for his first line, the services of subordinates under his control in the Wards' Estates, the khas mahals, and the Excise and Educational Departments can be utilized, as well as the establishments under his District Board, and that additional officers need not be asked for till he finds himself with areas for which he cannot otherwise provide.

No. 1874G., dated Bhagalpur, the 21st December 1896.

From—H. J. McIntosh, Esq., Collector of Bhagalpur,
To—The Commissioner of the Bhagalpur Division.

With reference to the correspondence ending with your No. 208R., dated the 6th December 1896, I have the honour to submit the following report under section 10 of the Famine Code.

2. On the 28th of October last, I intimated to you and to the Revenue Secretary to Government that the state and prospects of the crops in this district were such as to occasion anxiety, and since then I have visited all or almost all parts of the district. Up to the present time no signs of distress have manifested themselves among the mass of the population, but food-grains are, as you are aware, selling at abnormally high prices. The outturn of rice crop has been practically ascertained, and there is the almost certain probability of distress making itself apparent before very long. I therefore submit this report now in order that timely arrangements may be made, and that Government may be made aware of the exact state of affairs.

3. The Bhagalpur district covers an area of 4,268 square miles, and carries, according to the last census, a population of 2,032,696 souls. It may be said to consist of two tracts, viz., the South Gangetic and the North Gangetic tracts. The South Gangetic tract comprises the whole of the Banka subdivision and the greater part of the Sadar subdivision, viz., the Sadar and Sultanganj thanas, and the Colgong thana (with the exception of one outpost). The North Gangetic tract comprises the subdivisions of Supaul and Madhipura, and the Bihpur thana and the Gopalpur outpost of Colgong thana appertaining to the Sadar subdivision. The Banka subdivision, convering an area of 1,182 square miles with a population of 423,350 persons, is at present considered by the Subdivisional Officer to be safe. In this view I concur, with the reservation, however, that in the altered circumstances of the present day when local scarcity may be caused not only by local deficiency of crops, but also by circumstances existing in other parts of India, it may hereafter become necessary for me to modify this opinion if prices are forced up still higher and remain so for a continued length of time. But having regard to the facts that a very fair *bhadoi* crop was reaped throughout the subdivision, that the outturn of the rice crop is not of supreme importance, and considering the habits and customs of the people inhabiting the southern portion of the subdivision, who are accustomed to eke out their subsistence by the help of jungle produce, I believe the subdivision may be held to be fairly safe at present. The weakest parts are the Dharanja outpost of the Banka thana and the southern part of the Katoria thana. In that part of the Sadar subdivision lying south of the Ganges, the Sadar (181 square miles) and the Sultanganj (165 square miles) thanas are, for the time being, fairly safe. In the Sadar thana the rice crop was 7 or 8 annas after a fair *bhadoi*, and there are hopes of a fair *rabi*. In the Sultanganj thana the rice crop is at least 10 annas, while in the Shahkund outpost it is a full 16 annas. Then remains the Colgong thana (413 square miles), part of which is an affected area for the reasons to be stated hereafter.

4. To the north of the Ganges, the Bihpur thana (175 square miles) and the Gopalpur outpost of the Colgong thana are practically safe. They enjoyed a good *bhadoi* crop, rice is not grown to any appreciable extent, and they have a prospect of a fair *rabi* crop. Then remain the subdivisions of Madhipura (1,176 square miles) and Supaul (934 square miles) covering an area of 2,110 square miles. In Supaul, portions of both its thanas will be affected, while in Madhipura the whole of the Bongong thana (263 square miles) and part of the thana of Madhipura (547 square miles) will be affected. The thana of Kishenganj (366 quare miles) is considered to be safe at present.

5. *Reasons for apprehending scarcity.*—The past rains have been unseasonable, and in some parts deficient. The total rainfall recorded at each of the six registering stations in the district was as in the margin. But it is not so much the deficient quantity of rain as its unseasonable distribution following upon an unfavourable year that has done the damage. In 1895, there was an early cessation of the rains, the last recorded heavy fall (2·44 inches) being on the 20th September 1895. The *bhadoi* crop of 1895 approached to an average 16-anna crop, but owing to the absence of late rains the *aghani* or rice crop was only returned at 11¾ annas, while the *rabi* crop was estimated at 10 annas for the district as a whole. In 1896 there was seasonable, though in parts light, rain in May and June, and the *bhadoi* crops came up with great promise. In July, however, the rains fell off, and from the 19th July until the 20th of August a long sustained draught was experienced. The result was that the *bhadoi* crop was most seriously damaged and could only be finally returned at 9 annas for the whole district. The *aghani* or winter rice crop suffered with the *bhadoi* crop, and during the first part of September gave apprehensions were felt lest it should prove a complete or nearly complete failure. From the 14th to the 20th September, however, there was heavy and general rain which immensely improved prospects, and a good rice crop would have been ensured had there been subsequent rain, and specially a good *hathia*, as the early October rain is called. But unfortunately no rain fell after the 20th September, with the exception of a few drops in November which came too late for the rice and was in most parts of the district too light to materially benefit the coming *rabi* crop The result is that the rice crop for the district as a whole may be put down at 8 annas. The prospects of the coming *rabi* are also gloomy. The position therefore is that the good *bhadoi* crop of 1895 has been followed by four indifferent crops (*aghani* and *rabi* of 1895, and *bhadoi* and *aghani* of 1896), and that ahead them is the prospect of a bad *rabi* crop. How bad the *rabi* crop will be, it is yet too early to say. To accentuate these difficulties the price of food-grains has risen to almost famine rates owing to the enormous export trade that has been carried on as the outcome of a more general failure of crops in other parts of India.

	Inches.
Madhipura	30 78

Banka	43·58
Colgong	34·72

6. *Area and population likely to be affected.*—When the cause of trouble is not so much local failure of crops as high prices caused by circumstances existing in other parts of India, it is difficult to locate with exactness the precise areas in a district which will be affected. But some parts are worse than others, and these are the areas likely to be affected. They are :—

(*a*) The western part of the Colgong thana in the Sadar subdivision south of the Ganges.

(*b*) In the Supaul subdivision, the southern part of the Supaul thana, more particularly the part immediately round about Supaul and extending east towards Pipra, south to the Bongong thana of Madhipura, west to the Darbhanga border, and north to about 10 miles north of Supaul.

(*c*) The central portion of the Pertabganj thana in Supaul, bounded north by Nepal, south by the Tirhut State Railway, east by the Birbandh, and west by the Dimra nadi.

(*d*) The western half of the Madhipura subdivision comprising the whole of thana Bongong and part of thana Madhipura.

The first tract contains a good deal of high land of poor quality and with inadequate means of irrigation. The *bhadoi* crop was very poor, being not more than 4 or 5 annas, while the rice was an almost complete failure. There is some, but not much, *rabi* in this tract I put the area at about 150 square miles, and the density of population in the thana being 464 to the square mile, the population affected may be taken at (150 × 464) 69,600, or roughly 70,000. Assuming that 5 per cent. of the population will require relief, assistance in the shape of work or gratuitous relief may have to be afforded to some 3,500 persons.

Sadar	...	150	69,600
S.	...	300	175,500
S.	...	160	64,000
M.	...	500	300,000
		1,110	609,500

In Supaul, the larger area (*b*) is about 15 × 20 = 300 square miles. The land is high and sandy. The principal crops are the *bhadoi* paddy and *marua* and the winter rice. The Subdivisional Officer estimates the *bhadoi* paddy and *marua* in this area to have been not more than 7 annas, and puts the winter rice at 4 annas. I think this latter estimate rather low, and am inclined to raise it to 5 or 6 annas. But in any case the rice crop was bad. *Rabi* is not very extensively grown in the area, although I must say a considerable quantity of mustard has been grown this year, and gives good promise. The thana carries a population of 585 to the square mile, and the population of the affected area may therefore be put down at 175,500. Five per cent. of that number gives 8,775.

The smaller area (*c*) is about 20 × 8 = 160 square miles. The land here, too, is high and sandy, and the circumstances are the same as in the larger area (*b*). The Pertabganj thana carries a population of 395 to the square mile, and the population of the area in question may be taken at about 64,000. Five per cent. on this figure gives 3,200 persons to be provided for.

In Madhipura (*d*), the area most affected is about 500 square miles, made up thus: Bongong thana 263 square miles and the western half of Madhipura thana 240 square miles.

In this area, the rice crop of which is the principal crop was not more than 5 annas, while to the west of the Dimra river it was less, not more than 2 or 3 annas. The *rabi* crops, with the exception of the mustard, are not expected to yield much. The *bhadoi* paddy failed almost entirely, and the *marua* was estimated at a 7-anna crop. The population of the area is Bongong 163,000, Madhipura (240 × 525) 126,000, making a total of 289,000, or roughly 300,000. Of this, 5 per cent. gives 15,000 persons to be provided for. The total area therefore affected in the district is 1,110 square miles, with a population amounting to 6,09,500, of whom 30,475 may have to be provided for.

7. *Communications.*—In the Colgong thana of the Sadar subdivision communications are excellent. The East Indian Railway runs along the affected area, and there are good roads. So, too, in the Supual subdivision, where there is the Tirhut State Railway (Kunwa Ghat extension) and a capital road system. In the Madhipura subdivision there is no railway, but the roads are fair, and all villages are accessible.

8. *Grain stocks.*—This is a difficult question on which I am submitting a separate report. The general opinion, however, is that stocks are sufficient.

9. *Sources of food-supply.*—These will mostly be obtainable from local stocks. If the rice crop is not exported to an overwhelming extent, and if the *rabi* crop, about which it is still premature to hazard a definite opinion, is fair, the supplies thus obtained, added to what is believed to be already in hand, should enable the district to support itself without special importation. If importation has to be resorted to, the East Indian Railway and the Tirhut State Railway, and the existing system of roads, provide the means.

10. *Proposed measures of relief.*—The usual measures of relief will be resorted to. In all four tracts there are certain roads under the District and Local Boards which will be raised and improved. Old tanks will be deepened or enlarged, and new tanks will be excavated. The District Engineer is also examining a proposal to erect an embankment along the Dimra river in the Bongong thana. I have, as I write, lists of works in all four areas which can be opened at once. These are not exhaustive, and I am calling upon the Subdivisional Officers to prepare and submit more exhaustive programmes. My proposal is to commence with the roads, and then, as the distress deepens, and the lands become more dry and fit for tank operations, to start work on tanks at selected sites. After the rains break, resort will again, if necessary, be had to roads. I may also add that the proposed railway from Bhaptiahi to Manuri, which is now under survey, passes directly through the worst tract on the western side of the northern half of the district, and that if the work can be expedited, so as to admit of the embankment being commenced during the coming hot weather season, it will be of great assistance. In south Bhagalpur, the Bhagalpur-Baidyanath extension of the East Indian Railway can, if necessary, and if the area of distress widens, be commenced, and so, too, in north Bhagalpur can the Hajipur-Katihar extension of the Tirhut State Railway, running along the northern bank of the Ganges, and for which the land is now being acquired by a special Deputy Collector.

Advances will also have to be given under the Agriculturists' Loans Act and the Land Improvement Loans Act. Advances under the former Act should probably not be given until the next sowing season approaches, while advances under the latter Act should be given in the event of zamindars coming forward for loans in order to execute works in their zamindaries which will afford employment either to their raiyats or to the labouring classes.

Charitable relief will be given according to the provision of the Famine Code.

11. *Estimate of expenditure.*—This it is impossible to foretell with anything approaching to accuracy. So much depends upon the extent to which the distress develops, and this in large part depends upon the price of food-grains. The price of food-grains in this district is regulated, as I have pointed out, not so much by the local outturn of crops as by circumstances existing in other parts of India, which have exercised an unfavourable influence here.

The District Board has recast its budget for 1896-97, and by utilizing its closing balance will be able to divert Rs. 22,000 to famine relief during the current year. The budget for 1897-98 is in course of revision, and it is probable that about Rs. 50,000 will be available during that year. Writing as I do from camp, I am unable to give the exact figure.

12. *General.*—The area in the district, which I consider to be affected, is the western side of north Bhagalpur, corresponding more or less with the area affected in recent scarcities, with the addition of part of the Colgong thana in south Bhagalpur. The worst part and the part with the worst communications is that portion of the Bongong thana lying to the west of the Dimra river. Up to 1893* the Bongong thana was included in the Supaul subdivision, but since 1893† it forms part of the Madhipura subdivision. This year, therefore, the severest strain will be in the Madhipura subdivision, while in former scarcities it was in the Supaul subdivision.

*1895. W. B O. †1895.

13. It is not an easy matter to determine when the distress will develop to such an extent as to render necessary the opening of relief works. On the one hand the great rise in prices has to be borne in mind, while on the other hand, regard has to be given to the amount of agricultural work which will employ labour until the *rabi* is cut, and allowance has to be made for the large amount of money which has recently passed into the district and which will allow food even at the current high rates to be purchased. Test works will probably be opened towards the end of January, but it is scarcely probable that resort will be had to relief works in large numbers until the *rabi* crop is harvested.

14. The district staff will require to be strengthened. In Supaul, there is a Subdivisional Officer with one kanungo. The Subdivisional Officer, Babu Nagendra Nath Gupta, is unable to ride. His health will not permit him to ride. He travels in a tum-tum or an elephant. A Sub-Deputy Collector and two more kanungos should be appointed to the subdivision as soon as possible. This will allow three circles to be opened at once. The area of the circles will be contracted and their number increased as the distress deepens. In Madhipura, the Subdivisional Officer has no assistance whatever. A Sub-Deputy Collector and four kanungos should be appointed to the subdivision at once, the number to be increased hereafter. In the Colgong thana I propose to put Mr. Allen, Assistant Magistrate, in charge of the affected area, if he is not transferred, and to give him the assistance of two kanungos. As there is only one kanungo at head-quarters, two more should be given to me. This will allow two kanungos for the Colgong thana, and leave one man free for emergencies elsewhere. A Sub-Deputy Collector or an energetic Probationary Deputy Collector should also, if possible, be appointed to the head-quarters station. The District Board will appoint special supervisors and sub-overseers according as new works are started.

He has three horses and gets about very well.

W. B. O.

No. 15 $\frac{Ct.}{G.}$, dated Camp Pertabganj, the 28th January 1897.

From—H. J. McIntosh, Esq., Collector of Bhagalpur,
To—The Commissioner of the Bhagalpur Division.

In continuation of my letter No. 1874G., dated the 21st December 1896, submitting a report under section 10 of the Famine Code, I have the honour to submit the following report on the existing state of affairs and the prospects in this district. No reports have hitherto been submitted by me under section 13 of the Code, as during the present month I have been almost continuously with you in camp, and have had the advantage of discussing the situation freely with you.

2. Since my report of 21st December last, I have toured through part of south Bhagalpur, and again through the whole of north Bhagalpur. I believe I have made myself thoroughly acquainted, by personal investigation and inquiry, with the state of affairs in every part of the district. The result of these inquiries is generally to confirm the views which I expressed in my letter of 21st December.

3. Regarding south Bhagalpur I have little to add at present. In no part of the district south of the Ganges has distress manifested itself up to the present time. Nor have I now any reason to believe that in that area severe distress necessitating relief operations will develop, except in the tract of about 150 square miles referred to in paragraph 6 (*a*) of my letter of 21st December. That tract is being watched. I have only one correction to make, and that is to point out that part of this tract lies in the Sadar thana and part in the Colgong thana, instead of the whole being in the Colgong thana, as I stated before. The tract of country is the same, but I was in error in supposing that it was entirely comprised within the Colgong thana.

4. Regarding north Bhagalpur which I recently traversed with you, I still adhere to the views and estimates which I have already submitted. The only modification I am prepared to make at present is in the matter of defining more accurately the areas in which distress will most probably first show itself. I do not think I can state with greater precision the extent to which the distress will actually develop.

5. Dealing first with the Madhipura subdivision, I still think that the whole of Bongong thana and the western part of the Madhipura thana will be affected. But it is in the Bongong thana (263 square miles), comprising parganas Kabkhand and Uttarkhand, that the distress will be most severe, and it is there that distress will probably make its appearance first. The development of distress in the western part of the Madhipura thana will be more gradual, and it may be some time before relief operations are required there. In the Bongong thana no test work has been opened as yet, but the result of the inquiries made by me in your company is to confirm me in the view that it will be necessary to open a test work in a few days. Meanwhile my arrangements for commencing operations are, I believe, complete. I am having the thana carefully watched, there are works ready to be opened under the Agency of the District Board at a day's notice, and I have set the Subdivisional Officer more free to move about by deputing to the Madhipura subdivision (with your sanction) the Sub-Deputy Collector attached to the head-quarters subdivision.

6. In the Supaul subdivision I specified two tracts of country as likely to be affected. The larger area, comprising about 300 square miles of the southern part of the Supaul thana, will, I think, become affected at an early date. In the smaller area of about 160 square miles of the Pertabganj thana, the result of my further inquiries is to lead me to believe that the prospects are somewhat better there, that the distress will develope more slowly, and that it is not likely to be so acute as in the tract around Supaul. But nevertheless it still seems probable that relief will be required in that tract about the end of March or beginning of April Regarding the remaining parts of the Supaul subdivision, which I have not indicated as likely to become affected, I am still dubious. It is possible that distress may develope in the north of the Supaul thana and in the part of the Pertabganj thana lying west of the village of Pertabganj. But in any case I do not anticipate severe distress in either of these regions, and should distress develope, there will fortunately be valuable aid forthcoming in both tracts. In North Supaul I have reason to believe that assistance will be

rendered by the Maharaja of Darbhanga, and in the Pertabganj thana by Rai Ganpat Singh Saheb of Harawat.

7. Up to the present time no severe distress has appeared in the Supaul subdivision. The Subdivisional Officer thought that the time had come to open test works, and, at the instance of a number of labourers from some half-dozen villages, who said they would accept work at Famine Code wages, applied for my sanction to open a test work I gave sanction to an ordinary District Board work (making the approaches to a large new bridge) about two miles from Supaul, being constructed according to Famine Code rates. I fixed the full ration wage at 5 pice for a male, and insisted upon a full task being exacted. The following are the results:—

	Men.	Women.	Big children.	Small children.	Adult dependents.	Non-working children.	Total.
1	2	3	4	5	6	7	8
18th January	28	24	11	1	3	19	86
19th „	None worked, as wage was considered too low.						
20th „	4	7	4	.....	.....	6	21
21st „	11	12	6	2	.....	6	37
22nd „	10	17	6	6	.....	13	52
23rd „	13	19	7	7	.....	9	55
24th „	Details not available.						62
25th „	19	31	21	16	.....	19	106
26th „	14	31	9	15	.....	.....	69

These figures in my opinion indicate that the test work was opened somewhat prematurely. The falling off in numbers on the 26th is due to the fact that when I reached Supaul, I directed, with a view to making the test more sure, that non-workers should not be received on the work. Meanwhile the test work is being kept open, and I have submitted for your decision the question of what the proper wage should be.

8. My estimate of expenditure is as follows:—

		Rs.
A.	Advances in 1896-97	10,000
	Ditto in 1897-98	60,000

These advances should, I now think, be liberally given having, regard to the circumstances existing in North Bhagalpur. There are Brahman and Rajput villages, the inhabitants of which will not come on to relief works. For these advances on the joint and several security system are necessary. And the more liberally advances are given, the more money will there be for the employment of labourers who, if not employed, will come on to the Government works.

B.—*Relief works and gratuitous relief.*

		Rs.
1896-97	...	15,000
1897-98	...	1,89,375

This estimate is based upon the assumption that it will be necessary to give relief up to, and including the month of September. Estimating the expenditure at one anna per head per day, the calculation is this:—

	Persons.	Days.	Annas.	Rupees.
1	2	3	4	5
February ...	2,000	× 30	= 60,000	= 3,750
March ...	6,000	× 30	= 180,000	= 11,250
April ...	20,000	× 30	= 600,000	= 37,500
May ...	30,000	× 30	= 900,000	= 56,250
June	25,000	× 30	= 750,000	= 46,875
July ...	15,000	× 30	= 450,000	= 28,125
August ...	10,000	× 30	= 300,000	= 18,750
September ...	1,000	× 30	= 30,000	= 1,875
Total ...	1,09,000	× 30	= 3,270,000	= 2,04,375

Expressed briefly, the calculation comes to 3,270,000 persons for one day at one anna per day, amounting to 3,270,000 annas, or Rs. 2,04,375.

9. In conclusion, I adhere generally to the views already given by me for the reasons which I submitted to you in December I have already informed you of the amount of money which the District Board will be able to divert to relief operations. That amount will, I believe, be largely supplemented by private charity. Meanwhile, I have strengthened the District Board Agency in North Bhagalpur by sending up as many overseers and sub-overseers as are at my disposal. I have had prepared estimates for, and laid out the work on, a number of roads where operations can be commenced at once; and, speaking generally, I am at present fully prepared to commence relief operations when necessary. I have also, as you are aware, taken steps to have the whole district watched, and am disposing of such agency as I possess in such a manner as to enable me to administer charitable relief when and where required. When the situation developes more fully, it will be necessary for me to apply for an increase of establishment in the shape of Sub-Deputy Collectors and kanungoes; to contract the area, and increase the number of the circles which I have roughly sketched out, and, finally, to apply for funds sufficient to meet my requirements.

No. 234R., dated Cuttack, the 5th February 1897.

From—H. G. Cooke, Esq., Commissioner of the Orissa Division,
To—The Secretary to the Government of Bengal, Revenue Department.

I HAVE the honour to state that the last report reviewing the general position of this Division with regard to famine and scarcity was submitted by Mr. Dutt in his No. 5R. of the 5th January 1897; since then I have, in my No. 161R. of the 28th January 1897, reported in reply to your Circular No. 78 of the 31st December 1896. This report, however, only deals with one aspect of the question, namely, the estimates of expenditure on famine relief for the current and the next financial year.

In this report I interpolated some information recently received about the state of things in a small, and I should imagine thinly populated, portion of the district of Puri. I am aware that this course was irregular, and my adopting it was due to the apparent gravity of the case, and the circumstance that I was not at that time sufficiently well informed on the state of Orissa generally, or acquainted with the recent famine literature, to enable me to undertake a more elaborate report, and I sent what I sent by way of an instalment only.

Narrative of events subsequent to Mr. Dutt's report of January 5th.

2 I shall now endeavour, under obvious disadvantages, to take up the narrative of events from the time dealt with by Mr. Dutt till the third week in January.

Mr. Dutt's report of 5th January dealt with events to the 3rd week in December, except in one district. I shall deal with all information received since that contained in the district reports dealt with by Mr. Dutt.

Course of events in the Angul district.

3. To dispose of the lightest districts first, the Angul Deputy Commissioner on 26th December reported no change in the situation; coarse rice selling in Angul at 20 seers to the rupee, and Mr. Lloyd of the Khondmals estimated that the average outturn of rice in the *mals* amounted to a 12-anna crop. The district reports of 2nd, 9th, 16th and 23rd January show no change in the situation; his telegram to Government, however, of the 23rd January gives the price of rice as 11½ seers in Angul, as compared with 20 seers to the rupee reported on 26th December. Mr. Wylly signed no report later than the 2nd January; he was doubtless on tour. I do not think that such an extraordinary inconsistency as reporting simultaneously that there was no change and that there had been a rise in prices from 20 to 11½ seers per rupee, could have occurred had the Deputy Commissioner sent the two reports of 23rd January. I attach little importance to the alleged rise in the price of course rice; the later reports are perfunctory and stereotyped. Had any serious rise of the kind occurred, I do not doubt that Mr. Wylly himself would have reported it.

Conclusion, that the state of the Angul district is satisfactory.

4. I do not consider that there is any cause for uneasiness on account of the condition of the Angul district.

Course of events in the district of Balasore.

5. Next to Angul, Balasore district gives least cause for anxiety. Appendix II, "statement of rainfall, prices of food-grains, and outturn of food-crops in the years 1873-74, 1888-89, 1891-92, and 1896-97," shows that the outturn of the principal rice crop in 1896 was only 6 annas and that of the *bhadoi* 8 annas in the Balasore district; notwithstanding this, the Collector,

neither in his reports on scarcity, nor in his estimate of expenditure, shows any apprehension of serious or widespared scarcity, either in the current year or in 1897-98.

Mr. De's report in reply to Circular No. 7T.—R. is dated 23rd December; since then I have received four weekly reports from the Collector of Balasore, the last of these is dated 23rd January. They are brief, and the only point worth noticing is the variation in the price of rice showing an upward tendency.

	2nd January.	9th January.	16th January.	23rd January.
1	2	3	4	5
	Seers per rupee.	Seers per rupee.	Seers per rupee.	Seers per rupee.
Balasore	13	11	11⅓	11½
Bhadrak	14	14	14	13
Chandbali	12	.....	.....	.. ...
Elsewhere	16	.....	.. ...	.....

Contribution by Settlement Officers with regard to the progress of affairs in Balasore.

6. The Settlement office supplies prices-current to dates varying from 15th January to 20th January for each pargana, and also estimates of crops as follows:—

Name of Officer.	Pargana.	Outturn of paddy in annas.	Price of rice.
1	2	3	4
Babu S. G. Bhattacharjea ...	Banchas ...	8 to 9	16 seers per rupee (80 tolas).
„ Jogeswar Biswas ...	Balikhand...	8	14 „ „ „
„ H. K. Mahanti ...	Senaut ...	.....	14 to 16 „ „ „
„ Debendra Nath Bose ...	Ankura ...	8	13 „ „ „
„ Jogabandhu Ghosh ...	Bayang ...	12	14 „ „ „
„ K. B. Goswami ...	Soro ...	10	13 „ „ „
„ A. P. Das ...	Dhamnagar	6 to 9	13 to 14 „ „ „
„ R. C. Das ...	Randhia ... / Argora ...	6 to 9	16 to 18 „ „ „
„ Surendra Nath Sirkar ...	Nuakhand..	.....	13 „ „ „
„ Issan Chandra Das ...	Banchas ...	8	13 „ „ „

Of ten Assistant Settement Officers reporting on the Balasore district, eight either definitely report no alteration in the situation, or do not refer to any alteration on any important matter.

One, the officer of the Senaut Circle, mentions that "the *rabi* crop has turned out miserable."

The officer of the Bayang Circle mentions a report of "the gloomy prospects of the Talmal raiyats; many have already left their homes with family to seek employment elsewhere." Talmal is the tract bordering on the sea, at all times an area exposed to risks of loss of crops; there is nothing unusual in Uriyas leaving their homes in search of employment, but it is not usual for them to take their families with them; the information is avowedly based on a rumour.

Conclusion: with regard to the Balasore district that at present there is no cause for anxiety.

I am unable to see any ground for apprehension at present in the state of the Balasore district generally.

Narrative of events in the Cuttack district subsequent to Mr. Dutt's report.

7. The Cuttack Collector's report in connection with Circular No. 7T.—R. is dated $\frac{5th}{9th}$ December; since then I have received from the Collector letters dated 15th and 29th December and 24th January.

The first of these mentions that there is little to add to the previous reports; it expresses apprehension of scarcity in Banki Government estate, and mentions

that the Jajpur subdivision is likely to fare better than the rest of the district. In the report of 29th December again it is stated that there is little new to report; it is stated that the section of the Bengal-Nagpur Railway from Barung to Tanghy will employ all in want of employment throughout the hot weather, and the Collector thinks that relief works in a few localities only may be necessary in two months' time.

Mr. Growse's third letter, No. 224G. of the 24th January, deserves to be read *in extenso*, as the Collector very thoughtfully wrote in greater detail in order to put me, on my return from leave, in the possession of all information up to date. I enclose a copy of this letter.

The map referred to in his letter he has taken away to modify. I learn from Mr. Carey that the areas where scarcity is apprehended are not conterminous with thanas of which the population is known; they are portions of thanas, and having ascertained the area from the map, the population has been estimated at the average population per square mile of the thanas in which the affected areas lie; this may, I think, prove fallacious in the direction of an overestimate, as the affected areas in some, if not all, distressed localities are the same as are subject to frequent loss of crops by flood in ordinary years, and are presumably more thinly populated than the safer areas of the same thana.

It will be noted that the scarcity is not expected till March, and in some cases not till April; it is not stated clearly how long it is likely to last, and consequently the persons requiring relief have not been reduced to terms of one day, as has been done in Mr. Bourdillon's memorandum of 21st December 1896.

It appears to be doubtful how long relief works when opened will be required. In the Patna Division, I note that provision is made in some districts for extending these works as the year advances, whereas it seems probable, as the Collector says, that in Orissa many will leave the relief works as soon as agricultural operations are resumed at the breaking of the rains.

8. I have no desire to make the smallest reflection on the Collector's work, but I think that his information may be derived from sources that I can only describe as habitually unreliable. I called attention in my General Administration Report for 1892-93, No. 1218R., dated $\frac{4th}{5th}$ July 1893, to the extraordinary estimates of the outturn of crops in this Division for three years before Mr. Growse joined it. I then wrote as follows:—

"I am lacking in experience of the Division it is true, but so far as my observations go, I should be disposed to think that there is a tendency in the Division to take an unnecessarily pessimistic view of the outturn of crops. It is scarcely conceivable, I think, that for the last three years the *bali* crop has never reached an average crop in any district of the Division, and that the *saradh* only did so once in one district, viz Puri, in 1890-91. Similarly with all other crops, *laghu* in Puri in 1890-91 being the only other exception. I cannot but suspect that instruction has been disregarded, and that 16 annas is habitually treated as a bumper and not an average crop as it should be, otherwise one would reasonably infer that the Division has for the last three years been in a condition not far removed from severe scarcity, whereas in 1891-92 it exported rice and paddy in vast quantities to Madras, though the principal rice crop—*saradh*—is shown to have been somewhat below 10 annas of an average crop for the Division. If the figures are correct, the Divisional average was, in fact, considerably lower, as Cuttack, the area of which is 44·45 of the whole Division, had only an 8-anna crop, the lowest of the three districts."

A state of things was reported which would ordinarily have meant famine, or at least very severe scarcity, though neither famine or severe scarcity occurred. I therefore think that there is a tendency of some standing in this district, especially to take a desponding view of the situation by those from whom the Collector derives his information. I may mention that the District Engineer has made a prolonged tour in the affected areas, and he assures me that he saw no signs of general distress, and only one instance of emaciation, such as might be met with in any year.

9. I have more than once in past years referred to the *amars* of zamindars and others as a valuable resource in time of famine, and I have no doubt that they will prove so. These granaries do not depend on the harvests of one year, but on those of many years. I have not been informed that they have been depleted, nor do I see that there is much danger of the owners failing to make grain advances to their tenants, who, in their turn, will see to their farm

servants. It is the interest of the zamindar to preserve his tenantry, and he tenants their farm hands. It is also the custom for them both to do this.

10. I may also mention that in Keonjhar State in 1892-93, on the occasion of the punitive expedition, large quantities of rice were found buried on the premises of the poorest raiyats in a country far less fertile than the Cuttack district.

Conclusions with regard to Cuttack: uncertainty still prevails as to the future necessity for being watchful and prepared.

11. For the present there appears no cause for alarm in the district of Cuttack, but the necessity to be watchful and ready is clear. If, as he states, the Collector thinks that relief works will generally have to be opened in March, I should think that the time has come to attend to the mapping out of relief circles; no harm can come of doing this, and evil might arise from unduly deferring it. The Collector might also turn his attention to the preparation of schedules of work for the affected areas as he has already been desired to, and, if necessary, call for the assistance of the Public Works Department for large work. Gratuitous relief has still to be organized, and how far communications suffice for bringing grain to where it may be wanted should be considered, together with how far the system of advances to contractors is necessary and how it would work in this district.

Settlement Officers' contribution to the narrative of the course of events in Cuttack.

12. I have received 12 reports from Assistant Settlement Officers employed in Cuttack, together with a return similar to that supplied in the case of Balasore, the outturn of the harvest and of prices-current up to the middle of January, which I give *in extenso*:—

Name of Officer.	Pargana.	Outturn of paddy in annas.	Price of rice.	Remarks.
1	2	3	4	5
Babu H. C. Rai	Balubisi	...	13 to 12 seers per rupee (80 tolas).	
,, B. M. Gupta	Jajpur	12	15 seers 12 chittaks per rupee.	
,, S. C. Guha	Jodh	12	12 seers per rupee (105 tolas).	
,, S. C. Bose	Utikan	8	12 ,, ,, ,,	
,, Murari Misra	Kalamatia	12	12 ,, ,, ,,	
,, Phanindra Narain Mukerjee ...	Baruan	3 to 4	11 ,, ,, ,,	
,, G. C. Das Gupta	Olas	.	13 ,, ,, ,,	
,, J. M. Das	Jajpur	10	12 ,, ,, ,,	
,, D. P. Rai	Kantajhar	6	10 ,, ,, ,,	
,, Shyama Charan Dutt	Ahyas	2 (portion)	12 ,, ,, ,,	
,, K. C. Sirkar	Jhanker	4 to 12	14 ,, ,, ,,	
Maulvi Mahomed Chainnuddin ...	Kohanda Jaipur	...	40 seers	Cuttack or standard weight not mentioned

13. Of the 12 Assistant Settlement Officers, only four seem to have forebodings of evil.

The officer of the Kalamatia Circle reports that grain supply in that neighbourhood is well nigh exhausted; it may suffice for a month more "after which the condition of these people will become a subject of anxious solicitude." The report is dated 17th January.

The Ahyas officer reports "the people have already suffered a pinch of distress in this part of the country; some of the poorer classes had gone to work on the railway line; but as they got a very pitant (possibly derived from pittance) amount not sufficient to support themselves and their families, they have all returned home." The above statement is intended to convey the idea that famine or scarcity prevails; but railway workers are well paid and the conditions are more favourable than those on test works; and it appears tolerably certain that the distress cannot be great when men leave the railway works; a third officer foresees distress after June, which is just the time when I should expect an abatement of it by reason of the normal demand for agricultural labour. The circle officer of Jaipur reports that people are living on *kulthi* and *birhi* grains not generally used for human consumption, and some do not get a sufficiency of these.

Narrative of events in the district of Puri from the date of Mr. Dutt's report of 5th January 1897.

14. There remains the district of Puri, where distress is represented as having manifested itself in an unmistakable manner in certain tracts, happily of a limited area, and, I should suppose, very sparsely populated, but I have no definite information as to area or population at present. The

Collector's report in connection with Circular No. 7T.—R. is dated 31st December. There is very little said in this as to the affected area, beyond that Parikud, Manikpatan, Bajrakoto, Malood, and parts of Chhabiskud and Serai "are reported to be worst of all." The Collector's report of 2nd January 1897 contains nothing of importance; the same may be said of his reports of 9th and 18th January.

There remain the two letters I have referred to in my report on the estimate of expenditure required for this Division, Nos. 66 of 9th-11th January and 116 of 23rd January, which are somewhat alarming. I enclose copies of these letters. The area affected is described as the neighbourhood of the Chilka Lake, and includes the places named in the Collector's letter of 31st December quoted above.

Mr. Lee deals with his experience in a tour in these parts, and reports the almost total loss of the rice crop, an inadequate grain supply and, great difficulty in getting rice conveyed to the places where it is required. The danger is said not to be imminent, but it is apprehended that, if supplies cannot be procured on the spot, distress will be terribly severe in April and May. I understand that the Collector has secured contractors to supply this area, and has opened relief works, not task works, as might have been expected. The Collector talks of opening a godown for the sale of rice at Satpara where arrangements have been made for a weekly supply from Khurda; also at Arakuda, Manikpatua, Parikud, and Malood; these, I presume, are to be ultimately placed in the hands of contractors, if they are not so already, on which point the report is not clear. The people are reported to have money sufficient to purchase grain where it is available.

The Raja of Parikud is following his father's footsteps in devoting his means to the support of his tenantry; and he has asked a loan from Government of Rs. 15,000 to enable him to carry on the work: 1,000 men find employment on the Government salt works at Satpara.

The Collector states that there are no traders on the spot, and trade will not bring rice to where it is wanted. The second letter of 20th January is in the same strain. The people in Malood are described as living on roots; a water famine is anticipated in April and May; the people are unwilling to help themselves;—clearly relief works here should take the form of wells or tanks. The Collector has induced a merchant to open godowns at Malood and Parikud, has started gratuitous relief and ordered Taccavi advances to be made.

Conclusions arrived at from the reports of the Collector of Puri.

15. The Collector's letters Nos. 66 of 9th—11th January 1897 and 116 of 25th January 1897 are absolutely silent as to the area and population of the distressed tract in the neighbourhood of the Chilka lake. For the rest, he appears to have done all that can be done. I have since learnt from a communication dated subsequently to His Honour the Lieutenant-Governor's visit that two Circle officers have been appointed, and advances made to contractors. The above letters deal with only a small portion of the district of Puri; there are other portions of it said to be in danger, which include that part of the shores of the Chilka lying to the east of the lake and not dealt with above, a portion of the seaboard where this district borders Cuttack, and a small area in Khurda. There is an extensive area placed in the second and a smaller in the third degree as to the gravity of their condition. It appears to me that the Collector should map out his Circles for those, so as to be ready, if the necessity arises, for action; to have his schedules of works ready in each case; to ascertain how communications will serve the distressed areas, and to inquire for contractors for relief works should they be considered necessary: to organize gratuitous relief, and, if necessary, to call in the aid of the Public Works Department to undertake large works.

Contribution of the Settlement Officers to the narratives of events in Puri

16. I have received 11 reports from Assistant Settlement Officers in Puri, exclusive of Khurda, and two from Officers on the Khurda Settlement.

I give, as in the other two districts, the estimates of outturn of crops and price-current to the middle of January, as received from the Settlement Officers.

Of these 11 reports, six are favourable, reporting no change for the worse, and, in some instances, actual improvement in the prospect. Of the remaining five, one reports a rise in price from 12 seers for the rupee to 11 between December 30th and January 6th; another reports "general condition of the people is being worse. In some parts villagers have begun to sell there cattle, price of rice is ruling higher and higher, even then no adequate supply could be obtained;" a third mentions "reports of people living on short meal or inferior food obtained from the jungle;" a fourth reports prices rising "and a fifth says, the price of rice is again continuing to rise." Of the Khurda reports one is favourable, and the other is favourable except in the case of the landless classes who may, it is thought, require relief works to be opened; this class is not, I believe, a very large one in Khurda, the condition of which Subdivision is believed, by good judges, to be beyond question better than any other part of the district of Puri.

17. I append two Statements, one, A, compiled from figures supplied by District Officers comparing prices on 26th December 1896 with prices on the 23rd to 27th January 1897.

The other, B, showing the prices at dates varying from the 15th to 21st January 1897 at various head-quarters of Assistant Settlement Officers. Statement A shows no change in Cuttack, and rises in Balasore and Puri. The large rise reported in Angul I discredit.

Summary of condition of the Orissa Division.

18. I am of opinion that neither Angul nor Balasore show any reason to suppose that scarcity is imminent; indeed, so far as my information goes, very ordinary relief measures will suffice for both districts. Cuttack remains in a state of uncertainty, but what is known, shows the necessity for watchfulness and preparedness, and in Puri there can, I think, be no question that scarcity privails in a limited area of unknown extent and population. I have addressed the Collector on the subject of procuring the information required for a report under section 9 of the Famine Code.

H. G. Cooke,
Commissioner.

No. 224G., dated Cuttack, the 24th January 1897.

From—E. F. GROWSE, Esq., Collector of Cuttack,
To—The Commissioner of the Orissa Division.

I HAVE the honour to submit the following report showing, as far as it is possible with the means at my disposal, what I believe to be the position of this district at the present moment, with reference to the scarcity which is feared to be impending.

2. I enclose a map on the scale of eight inches to the mile, coloured brown for those parts of the district in which the scarcity is likely to be severe, and blue where it is likely to be less severe.

3. The accompanying statement shows the approximate area and population of the affected portions of the district, and the number of persons likely to require relief, and the time when relief is likely to be required.

4. THE SADAR SUB-DIVISION.

(1) Excluding the Banki Government estate, with which I will deal presently, there is an area of 278 square-miles in which scarcity may be apprehended. This area lies—

(*a*) to the south of the Machgaon Canal, in that portion of the district which lies open to the floods of the Katjuri river (called the Deb in its lower reaches) and its tributaries;

(*b*) in the tract lying between the Kendrapara and Taldanda Canals, which is exposed to the floods of the Mahanadi and its various branches;

(*c*) Pargana Kuhunda, Jaipur, at the north of the Sadar Subdivision and bordering on the Jajpur boundary, lying between the rivers Birupa and Genguti.

(*ii*) Distress is feared, owing to partial, and in places, almost complete failure of the rice crop, due to the unusually high floods of July and August 1896, followed by the abnormal drought, which has lasted uninterruptedly from the 30th September 1896. The outturn of paddy in these areas in no place exceeded six annas, and in many places did not exceed two to four annas, and in some places was absolutely and entirely destroyed. The *rabi* crop has also suffered much from want of moisture, and the area sown is believed to be less than the normal. I do not think the outturn will come to eight annas, and in many parts it will be less.

(*iii*) The approximate population of these affected tracts in the Sadar Subdivision is 208,000. It is extremely difficult to forecast what proportion of the population is likely to require relief, and I do not pretend to any accuracy in my forecast. Everything depends upon the degree of scarcity. Figures have been compiled in my office showing that over 60,000 persons will require relief! I do not think that this would be an over-estimate, if the degree of scarcity were likely to be very severe, but I have great hopes that it will not be so severe as it would if there were no protected and irrigated areas in the neighbourhood of these tracts where crops have failed. Moreover, the people in these tracts are habituated to distress in some form, and in some degree each year, and are not entirely dependent upon their rice crop. Although the *rabi* crop is not large, it will be of much assistance in staving off actual starvation. I therefore take a low percentage, and estimate that 10 per cent. of the population, or, in round figures, about 20,000 persons will require relief in the tracts referred to above.

IV—THE BANKI ESTATE IN THE SADAR SUB-DIVISION.

The area of this estate is 117 square-miles and the population at last Census was 57,451. A recent Census taken by the Sub-Deputy Collector, however, discloses that the population has now increased to 58,795. The Sub-Deputy Collector reports that the whole area is affected, and has therefore coloured his map all brown. I do not agree with him altogether, as the south-western end of the estate is better off this year than the other parts. I have, therefore, had this coloured blue. It is, however, a fact that the lower classes are more numerous in Banki than in most other parts of the district, as is shown by the facts that *pans* and *sahars* and other purely labouring classes number nearly 11,000.

In the flooded tract in this estate the rice crop was a total failure, and for the whole estate, the outturn is estimated at only five annas. The area sown with *rabi* is only half the normal area, and the outturn of this will only be about eight annas. This gives a four-anna crop for the normal area. On the other hand the Sub-Deputy Collector thinks that there are sufficient stocks to last till the end of March, but by that time relief will be necessary.

I prefer to adhere even in this case to a proportion of 10 per cent. of the population, as likely to be the most to require relief at first. These numbers will, of course, be seriously increased hereafter, if the scarcity developes in severity.

(V). That portion of the Kujang estate, which lies within the Sadar Subdivision, I will not now deal with, but will take up this and the Kanika estates separately at the end of this report.

5. THE JAJPUR SUB-DIVISION.

(i) In the first place I think I may safely say that this Subdivision is better off than any other part of the district. At the same time the Subdivisional Officer reports that an area of 224 square-miles, with an approximate population of 173,000, is more or less seriously affected. As in the Sadar Subdivision it is the unprotected tracts, which suffered so severely

from the abnormally high floods of the Brahmini, Kharsua, Baitarni and their various branches, and in which the re-planted rice withered from the continuous drought during October and November, in which scarcity is now feared.

(ii). The outturn of rice in the worst parganas is estimated at from 4 to 7 annas, and the outturn of *rabi* about 8 annas.

(iii). The approximate population of the affected area is estimated at about 173,000. The Subdivisional Officer has taken a percentage of 7 per cent. on the rural and 10 per cent. on the town population as likely to require relief, amounting, roughly, to about 12,000 persons. I think this is fair as the general conditions of the Subdivision are more favourable than elsewhere, and the stocks are believed to be larger here than elsewere. At least I hope that, at first, no larger number is likely to require relief. I am inclined to think that too large a portion of the affected area has been coloured "brown," but prefer not to alter it.

6. Kendrapara Sub-Division.

(i) Excluding the estates of Kujang and Kanika, large portions of which lie within this Subdivision, the Subdivisionnl Officer estimates that an area of 173 square-miles, with an approximate population of 88,000, is more or less seriously affected. This tract lies almost entirely to the south of the Kendrapara Canal, with two small parganas to the north thereof, and scattered portions of the parganas Tikan and Utikan. The reasons why scarcity is apprehended are the same as in the Sadar and Jajpur Subdivisions.

(ii) The outturn of paddy in the whole of the Kendrapara Subdivision is estimated at eight annas. But in the tract coloured brown, to the south of the Kendrapara Canal, and the two small parganas of Atkanta and Neulbisi, the Subdivisional Officer reports that there was complete destruction of the saradh and rabi crops, and certainly, if the destruction was not absolutely complete, it was nearly so.

(iii) The approximate population is estimated at about 88,000, but I cannot help fearing that the estimate may be too low, and am writing to the Subdivisional Officer to explain his method of calculation. Taking 10 per cent. of this population, we have 8,800 + 1,700 for the town, or, roughly, about 10,000 likely to require relief during the early months of distress.

7. I now come to the Kujang and Kanika wards' estates, which have not been taken into consideration in the foregoing remarks.

The Kujang Estate.

This estate lies partly in the Sadar and partly in the Kendrapara Subdivision along the seaboard. It is the property of the minor Maharaja of Burdwan, and under the Court of Wards. There is a Sub-Manager in charge. The area is 320 square-miles with a population of 69,877. The outturn of the rice crop is estimated at 4 annas within the estate, much of which is exposed to flood at all times. That portion, usually protected, on the north side of the canal from Marshaghai to Jambu, was also this year flooded out by the water rushing through the breaches made in the flood embankment of the canal. This has added to the area severely affected. The subsequent drought has done great damage.

The outturn of *rabi* is not stated by the Sub-Manager, but will not exceed 8 annas, and of this, the principal crop is mustard, which is not a food crop.

The Sub-Manager estimates that about 12,000 persons will require relief at first in the form of work or gratuitous relief.

8. Kanika Estate.

The area of this estate is 439·81 square-miles, with a population of 77,129, according to the Census of 1891, but, as ascertained by recent enumeration by the estate officials, at 85,563.

Of the total area 174·88 square-miles belong to the district of Balasore, but the whole estate is administered by the Collector of Cuttack, and therefore the burden of meeting any scarcity which may ensue, falls upon this office.

The estate grows only one crop, the Saradh, and this has failed to a very large extent, owing to the high floods, which were the highest on record, followed by the continuous drought from the end of September. It is estimated that, in ¾ths of the cultivated area the rice was completely destroyed by flood, and subseqnently about ¼ths were re-planted and were doing well till the drought came. Then the crops withered as they stood, except where they could be watered by artificial irrigation from jores and creeks and tanks. The total outturn of the rice crop is estimated at rather less than four annas!!

Of the population of 85,563 the Manager estimates that about 23,000 are independent of State aid altogether, and that about 58,000 are able-bodied and will have to be provided with work, and about 4,500 are infirm and aged, and children, &c, to whom gratuitous relief will have to be given for six months, from the middle of April to the middle of September.

Of the 58,000 able-bodied persons, the largest proportion must be women and children, and it is also unlikely that all will require relief. Many men will go to Calcutta to work, for emigration to Calcutta is common from this estate, and many will, I hope, get work in various forms. I hope, therefore, that we shall not have to provide work for more than 15,000 adults in this estate, in addition to the relief which must be given to the aged and infirm. Altogether we may say that about 20,000 will require relief during the early months of distress! in the shape of labour or gratuitous relief.

9. To sum up, we have an area of:—

	Square miles.
Sadar Subdivision	278
Banki Government Estate	117
Jajpur Subdivision	324
Kendrapara Subdivision	173
Kujang Wards Estate	320
Kanika „ „	439
	1,651

Deducting 174 miles of the Kanika estate, which belong to Balasore district, we have 1,477 miles, out of the total district area of 3,633 miles, in which we have reason to fear distress in a greater or less decree.

10. The population of the affected areas is approximately:—

Sadar Subdivision	2,08,000
Banki Government Estate	58,795
Jajpur Subdivision	1,73,000
Kendrapara Subdivision	88,400
Kujang Wards Estate	69,877
Kanika „ „	85,563
	6,83,635

And we anticipate that, at the beginning, or during the first month or two of distress, we may have to provide relief for:—

	Persons.
Sadar Subdivision	20,000
Banki Government Estate	5,000
Jajpur Subdivision	12,000
Kendrapara Subdivision	10,000
Kujang Ward Estates	12,000
Kanika „ „	20,000
	79,000

11. It is to be observed that the estimate, made by the Managers of the 2 last-named Estates are higher than those framed by the Subdivisional Officers, although I have somewhat, reduced the Managers' figures. But we must remember that these two Estates are situated in the worst part of the district, and were perhaps more severely affected by the floods than other part. Again the Managers may be expected to have a more intimate knowledge of their small charges than the Subdivisional Officers can possibly have of their Subdivisions. It is true that the present Manager of Kanika has but recently joined, but I know that the late Manager, Mr. Sakhawat Hossein, considered the situation very grave, before he left early in November last. As said at the beginning, I do not pretend to claim any accuracy for my figures for the other parts of the district, but provided that scarcity occurs, I do not think they can be held to err on the side of excess.

12. I submit this report with the view that you may learn what portions of the district, and approximately the area and population of these portions, which the local officers consider to be seriously affected by loss of crops on account of the recent floods and drought. It is possible that the area may be overstated, and I trust it may; but at the same time there are good reasons for thinking that there is no over-statement. On the other hand, towhat degree of severity this scarcity will reach, it is entirely impossible to say. The mitigating circumstances are—

(*a*) Previous good crops.
(*b*) Fairly good crops in protected areas.
(*c*) Railway work and work on the Marsaghai, Jumboo Canal and other ordinary works which will give some relief.
(*d*) Improved communications.

Against these—

(*a*) Exports have been larger than usual.
(*b*) Stocks neither believed to be large, nor easily mobilised.

There is little or no internal trade. The villagers buy nearly everything with paddy. Traders are not accustomed to import rice from outside the district to meet a demand, and are even unused to import from one part of the district to another. It is even now said that in parts here and there, there is very little rice available for sale in the markets, or at least, rice is brought in very small quantities for local sale. Considerable quantities are still exported. I notice that over 40,000 cwt. of rice went last week from False Point to

Mauritius. Exports from Chandbally have been very large, but are decreasing. This may mean that raiyats and mahajans both are beginning to try and hold up, but as long as our prices (relatively high to the normal though they be) are lower than elsewhere. Export must go on, and Government forbids interference! At the same time there is absolutely no machinery for imports. In this respect Orissa compares most unfavourably with other parts of the Province. We have a highly organised export trade and no import trade in grain at all.

(*c*) The Uriya is a bad workman and can earn less money on Railway and other earth-work than up-country coolies.

(*d*) The Uriya is exceedingly apathetic, and will do little to help himself. He will perhaps hold on to his seed-grain till the last gasp, but do little to help himself and expect to be helped by the sarkar.

13. To try and be ready in some degree for what I fear, I have several estimates for excavating new and clearing old tanks made for those parts of the district where I fear scarcity, and the District Engineer is at present making a tour through some of the parts believed to be worst, for the purpose of seeing what tank and other works can be taken up. If necessary, District Board money can be diverted from schemes which do not supply much earthwork—the best form of relief labour—to projects suitable for relief, and this will be done where necessary. In the Words' Estates I am doing my best to get estimates for works sanctioned, so as to be ready to begin at an early date. I do not go into greater details here, but can do so hereafter if you require them.

I have not yet started any relief works, nor do I think it necessary to do so, although from information received, I fear that I may have to make a start on an early date.

14. I cannot help here pointing out that if the situation does declare itself strongly during the next month or two, it will be absolutely necessary to strengthen the Subdivisional as well as the Sadar staff. Neither of my Subdivisions has a second Officer, and without one the Subdivisional Officers will be unable to cope with their work if scarcity occurs. This of course only refers to an Officer at the head-quarters of a Subdivision to relieve the Subdivisional Officer from some of his routine work, and not to the staff necessary to work a famine, which of course must be considered separately. At the same time at the Sadar I must beg at present that no Officer be taken from me, and that if found necessary hereafter, my requisitions for extra Assistants may be listened to.

Serial number.	Number of pargana.	Number of villages.	Area in square-miles.	Population.	Number of persons likely to require relief.	Month from which relief work will commence.	Remarks.

CUTTACK COLLECTORATE,
The 24th January 1897.

E. F. GROWSE,
Collector.

No. 66, dated Puri, the $\frac{9}{11}$th January 1897.

From—W. H. LEE, Esq., Officiating Collector, Puri,
To—The Commissioner of the Orissa Division.

I HAVE the honour to report that I have now visited some of the parts of Puri district lying between the sea and the Chilka lake. As I am now in camp at Salpara and intend to proceed shortly across the lake to Barkul and the matter is of great urgency, I think it best to report at once, to the extent of my knowledge, and send further reports as I see more.

2. Briefly, these isolated tracts are the worst portion of the district, The paddy crop has been almost totally destroyed (hardly one anna being saved) by the high floods of the Chilka, and the people have no paddy.

3. On the second of January I started from Puri and reached Narsingpatna. Between here and Puri is a vast sandy plain. Around Narsingpatna there has been a little paddy

saved, but 12 or 14 annas of it has been lost. The floods reached here and the drought did the rest.

4. On the 3rd I heard a good deal about the bad crops, but no one here has felt the pinch of distress yet, and the people all look well-fed. Near Burjanga, about 2 miles east of Narsingpatna, there is a large patch of *dalua* paddy (about 100 acres) on the side of the river Swarnamayi, which will, I think, yield well, especially if there is rain in March. The *khandait* of Narsingpatna says the people will have to pinch and save to pay their revenue. I think they will have to pay.

5. On the 4th I went on across another great stretch of sand to Arakhkuda, 9 miles to the west.

6. On the 5th I went to Manikpatna out-post and heard complaints of the bad crops here and in the neighbouring village of Bhagwanpur, but the general condition of the people seemed to be good. In the afternoon, however, I proceeded to Bhubwanpur, Raypur and Kuakuda, in Killa Rorang at the head of the Lake, and here I first came across real signs of distress. The high embankment, known as the Nuni bund, was breached by the high floods of salt water in August, and growing paddy was absolutely destroyed over huge tracts. The loss here (and I am told over great tracts in the other portions of Chabiskud pargana, north of this part) has been terrible. The floods were due to the filling of the Chilka from the Mahanadi and Katjori, and have not been known so high for very many years. All the tanks were filled up with salt water, and in several villages that I saw, the people can hardly get anything to drink. Of the crop nothing is left, but a brown smear on the ground, like dried water-weed. The people say they have no paddy. I do not think this is the case, but the store is at any rate very small. Those who have a little, are hoarding it carefully and do like to reveal the fact. The poorer people in the villages are suffering considerably, and are largely living on the roots of the tuber grass and on a wholesome *sâg* that they pick in the fields. I do not think there is a month's supply of paddy (for full rations) in the littoral portions of Chabiskud. The people profess their willingness to do earthwork, and the repairs of the bund would be at once the readiest and the most profitable form of such relief work to take. With all this I saw very little signs of physical distress among the people. I found one fatherless boy and one unemployed man in a state of hunger. The man was much emaciated. This I think was in Raypur, but I am sorry to say I am not sure. I gave them my provisions (which they ate) and some money, but they say money is no use to them. They say if they are to do earthwork, they must be paid in paddy. No paddy comes here, and there are no traders or shop-keepers.

7. On the 6th I went on to Satpara by the north Bank and saw much the same destruction of the crops in villages Anandpur and Siara, but no signs of real distress or emaciation. In fact the people I saw looked extremely well. I heard there were some widows who were living from hand to mouth. No crops are to be seen and they cannot be grown as there is no water for irrigation. There is a well here and there for drinking water. The people, if properly instructed, might dig wells for themselves in co-operation, but this would not grow crops, and whether it is practicable here, is very doubtful. At Makundpur is a patch of *dalua* on the shores of the lake, but I am afraid there will be little yield from it as the ground is drying up. The problem here is to get paddy in the country. If lives are to be saved paddy must be brought here and stored in *godowns*. If this is not done, there will be a terrible mortality here before September. I am afraid, as it is, we can hardly avoid dreadful scenes here next April and May. Relief works have been and will be ordered. A tank has just been dug at Manikpatna, for instance, at a cost of Rs. 472, and wells have been or are about to be cleaned and repaired at Gopalpur, Alanda, Ora, Deulpara, Sepia, Jenapur, Gamumundia, Nayapara and Kloatiakudi. A road is also sanctioned in Parikud, at a cost of Rs. 6,000. All this is done or to be done at once by the District Board under recent orders. But all this will not save life, unless paddy is brought here. On the other hand the people here can buy any quantity of paddy. It is only a few of the very poorest who are out of money. I have had long conversations with Mr. Parish the Salt Officer, here who has been quietly doing a great deal of good work for the people around. Paddy has been sent over by sarbarakars by the orders of the Sub-Divisional Officer of Khurda from Barkul and Tangi by boat to Satpara, to Mr. Parish, on two occasions. It was sold, the first lot in two days, and the second in one, in *eight-annas-worth*, each boat-load being about 100 maunds. I have written into Puri for ten cart-loads of paddy every week to Satpara, but *godowns* will also have to be established at Arakhkuda, Manikpatna, Parikud and Malud. The people will buy any quantity.

8. On the 8th I went with Mr. Parish to Parala, Gurbai, Janikud and Nayapara (where the salt works are) in Parikud. I saw no signs of emaciation, but the people looked depressed. There is no crop, except a little *mandia* in very bad condition. The great paddy fields are a scene of desolation. The cause is the salt floods. The tanks were all filled up with salt water, and the lands are broken. The people come across to Satpara to try to buy rice. I interviewed the Raja of Parikud. He is having some bunds made as relief works. He is in debt and wants a loan of Rs. 15,000 for relief works. This, I think, should be granted for reasons given in a separate report on the subject. I returned and interviewed the jagirdar of Malud. He says that the condition of things westwards in Malud is even worse than this, and the people are becoming emaciated and one or two deaths have occurred. I am going from Barkul to investigate this. Several people have come from Malud to get rice or work at Satpara. The salt work at Nayapara (near Satpara) has luckily been ordered to be continued, and this will give employment to about 1,000

men. The men already employed there want paddy for pay, and say that money at present is of no value to them.

9. I recapitulate them—

(1) That the rice crop in those tracts is almost wholly destroyed.
(2) That there is very little paddy in store.
(3) That rice must be brought here if the most terrible scenes are to be saved here next spring and summer.
(4) That relief works will do some good, but very little good unless paddy is brought here.
(5) That the sooner paddy is brought here in large quantities the better.

The repairs of the Nuni bund will probably cost Rs. 10,000. The District Engineer will be asked to make an estimate.

10. Paddy is dear in Puri town, 5,000 maunds are wanted, half for Satpara and half for Parikud for the present. It should be brought down by cart to Tangi or Barkul, and then taken across the lake in boats, the boats being previously arranged for by the Police. A certain quantity, possibly 1,000 maunds, might be got in Khurda. I would suggest that the rest should be brought in Cuttack and sent down to Tangi, by cart, in charge of a European Officer. The money spent on the purchased carriage would all be refunded. There are no traders here, and trade will not bring the rice.

11. Owing to my being in this isolated place, I am unable to put this report into correct form, and hope to be excused.

Further reports will follow.

No. 116, dated Puri, the 20th January 1897.

From—W. H. Lee, Esq., Offg. Collector of Puri,
To—The Commissioner of the Orissa Division, Cuttack.

In continuation of my report of the 17th instant, I beg to state that, on the 10th January I visited Parikud and went over most of the estate. There is evidence of the almost total loss of the rice crop over 10,000 acres in this estate, owing to salt floods, or a loss of paddy worth two lakhs of rupees to sell. It is to be noted, however, that in these isolated tracts there is practically no sale, and the figures quoted as the price of rice are totally fallacious and mean nothing. The Raja has already spent about Rs. 3,000 in bunds to safeguard these fields for next year, but much more is wanted. The tanks are few and are filled with salt water. In spite of these the people look well, and the cattle get good grazing and look plump.

2. On the 12th I visited Malud (again with Mr. Parish, the Salt Officer of Satpara) and walked over a large part of the estate. Things are worse here. The whole of the rice crop has been absolutely lost; it has here been more destroyed by drought than flood. All the women and children are out over the fields all day grubbing up grass-roots; the wonder is the people have survived till now. The whole of Malud is dry, hot and dusty. The water in the tanks is low and green. A terrible water-famine is now unhappily unavoidable here in April and May, when the tanks will be totally dry. The people might get water by digging poshats in the earth, but they will do nothing to help themselves. I had a long talk with the jagirdar. The estate has been under attachment of the Civil Court for 60 years and suffers all the disadvantages of absentee landlordism. The cattle here are terribly emaciated and most of them are dying. I saw some instances of terrible emaciation among the people and distributed money, but money is useless here as pointed out.

3. The police have been ordered to distribute rice *gratis*. I have arranged with a merchant to establish rice godowns at Malud and Parikud. I have opened public subscriptions in Puri town, ordered relief works in the shape of tanks, sent the District Engineer to report, and ordered *tuccavi* loans: a little rain in Malud would save many lives.

4. Malud is the worst part of the district: famine may be said to have begun there already. I will proceed according to the Famine Code. The relief works will mostly take the shape of tanks. But the people will have to be paid in rice, or they will do very little good.

5. The export from Puri town by sea to Bombay is drawing a large quantity of rice from the district. This I am afraid cannot be interfered with, but the export merchants have established such a boycott among the carters, that no carter will fetch paddy from Khurda, where rice is 23 seers, to relieve the town people who cannot get more than 13. If allowed, I will break through this.

Also cannot the exportation of rice by rail from the Government khas mahal be stopped? It will be the direct cause of famine in June round Banpur, if allowed to go on now.

C. W. BOLTON,
Chief Secy. to the Govt. of Bengal.

NOTIFICATION No. 803.

The 23rd February 1897.

SIR ALEXANDER MACKENZIE announces with regret the retirement of Sir Alfred Croft, K.C.I.E., M.A., D.L., from the public service. Sir Alfred Croft's connection with the Education Department of Bengal has extended over a period of more than thirty-one years, and for nearly twenty years he has been employed as Director of Public Instruction. The advance of education in Bengal during his tenure of office has been great, and has been largely due to his fostering care. His powers of organization have been continuously brought to bear upon every branch of this great Department, which will long bear the impress of his mind and will. By his retirement the Government of Bengal loses a most accomplished, able and devoted public servant, and the natives of Bengal a true and judicious friend.

M. FINUCANE,
Secretary to the Govt. of Bengal.

REVENUE DEPARTMENT,—(LAND REVENUE.)

NOTIFICATION—No. 771L.R.

The 20th February 1897.—Under the powers vested in him by section 3 of Regulation III of 1872 (Sonthal Parganas Settlement Regulation), as amended by Regulation III of 1886 the Lieutenant-Governor directs that section 84 of the Bengal Tenancy Act, VIII of 1885, shall have force and effect in the Sonthal Parganas from this date.

M. FINUCANE,
Secy. to the Govt. of Bengal.

NOTIFICATION—No. 795L.R.

The 22nd February 1897.—Under section 3 of Act V (B.C.) of 1875, the Lieutenant-Governor is pleased to order that a survey be made in respect of all lands lying within the external boundaries of the 14 villages detailed below, comprised in the temporarily-settled Estate Majnamutha, tauzi No. 2935:—

1. Manikpore.
2. Bamunia.
3. Durmut.
4. Chaiti.
5. Dakhin Maisagote.
6. Gopal Chak.
7. Bonomali chata.
8. Chirulia.
9. Hirakala.
10. Chak Gobindaberia.
11. Olua.
12. Janka.
13. Jabda.
15. Basdebberia.

M. FINUCANE,
Secy. to the Govt. of Bengal.

NOTIFICATION—No. 812L.R.

The 23rd February 1897.—The following clause is inserted at the beginning of clause 1 of the table of fees in Chapter II of the Rules, Executive Instructions and Forms under the Land Records Maintenance Act, III (B.C.) of 1895, published with Government Notification No. 5306L.R., dated the 9th December 1895, in Part I of the *Calcutta Gazette* of the 11th idem:—

No fees other than process fees should be levied on the registration of notices of mutations when the ordinary registration fee has already been charged under the Indian Registration Act for the registration of documents which form the basis of the proceedings.

M. FINUCANE,
Secy. to the Govt. of Bengal.

NOTIFICATION—No. 815L.R.

The 23rd February 1897.—Under the powers conferred upon him by section 101 (2) (*d*) of the Bengal Tenancy Act, VIII of 1885, His Honour the Lieutenant-Governor is pleased to order that a survey shall be made and a record of rights prepared in respect of all lands included within the boundaries of the Government Estate Char Kalupura, No. 5218, in the district of Backergunge.

The particulars to be recorded in the survey and record of rights shall be the following :—

(*a*) The name of each tenant.

(*b*) The class to which he belongs, that is to say, whether he is a tenure-holder, raiyat holding at fixed rates, settled raiyat, occupancy raiyat, non-occupancy raiyat or under-raiyat; and if he is a tenure-holder, whether he is a permanent tenure-holder or not, and whether his rent is liable to enhancement during the continuance of his tenure.

(*c*) The situation, quantity and boundaries of the land held by him.

(*d*) The name of his landlord.

(*e*) The money-rent payable, or if a produce rent, the fact that a produce rent is paid.

(*f*) The mode in which that rent has been fixed, whether by contract, by order of a Court, or otherwise.

(*g*) If the rent is a gradually increasing rent, the time at which and the steps by which it increases.

(*h*) The special conditions and incidents, if any, of the tenancy.

(*i*) The name of each proprietor, with the character and extent of his interest and the situation, quantity and boundaries of the proprietor's private lands, as defined in Chapter XI of the Act.

(*j*) The name of each rent-free occupant, if any; the situation, quantity and boundaries of the land held by him, and whether he holds rent-free by the permission of the proprietor of the land or of his predecessor in title, or independently of such permission.

M. FINUCANE,
Secy. to the Govt. of Bengal.

NOTIFICATION—No. 816L.R.

The 23rd February 1897.—Babu Pyari Mohan Basu, Deputy Collector, is authorised, under section 3 (17) of the Bengal Tenancy Act, VIII of 1885, to discharge the functions of a Revenue Officer, under the provisions of that Act, so far as they relate to Revenue Officers, and is vested with the powers of a Settlement Officer under Rule 1, Chapter VI of the rules under the said Act, for the purpose of making a survey and preparing a record of rights in respect of the lands included within the boundaries of Estate Char Kalupura, No. 5218, in the district of Backergunge.

M. FINUCANE,
Secy. to the Govt. of Bengal.

SERVICE DE SANTÉ HYGIENE PUBLIQUE ET VOIRIE COMMUNALE.

LEOPOLD II, Roi des Belges,

A tous présents et à venir, SALUT.

Vu le décret sanitaire du 18 juillet 1831, ainsi que les règlements pris pour son exécution;

Vu la convention du 15 avril 1893 adoptée per la Conférence sanitaire internationale de Dresde, relativement aux marchandises ou objets susceptibles envisagés au point de vue des défenses d'importation ou de transit, ainsi qu'aux mesures à prendre aux frontières de terre et de mer ;

Revu les arrêtés royaux des 30 juillet 1893, 17th juin 1894, 24 septembre 1894 et 22 février 1895, relatifs à l'importation et au transit de certaines marchandises et à des mesures à prendre en temps de choléra aux frontières de terre et de mer ;

Sur la rapport et la proposition de Notre Ministre de l'Agriculture et des Travaux publics,

Nous avons arrêté et arrêtons :

Article Premier.—Sont interdits à l'entrée et au transit par les frontières de terre et de mer : les chiffons et drilles, les linges de corps hardes et vêtements portés (effets à usage), les literies ayant servi, venant des pays ou des circonscriptions territoriales, déclarés contaminés, conformément à l'article 5 ci-aprés.

Article 2.—Sont exceptés de la disposition qui précède :

1° Les chiffons comprimés mécaniquement, qui sont transportés comme marchandises en gros, par ballots cerclés de fer ou solidement maintenus par des fils de métal, et portant des marques et des numéros d'origine, acceptés par l'administration des douanes ;

2° Les déchets neufs provenant directement d'ateliers de filature, de tissage, de confection ou de blanchiment, les laines artificielles (kunstwolle, shoddy) et les rognures de papier neuf, munis d'un certificat d'origine, légalisé par l'autorité locale ou par le consul de Belgique du lieu d'expédition ;

3° Les marchandises et les objets désignés à l'article 1er, expédiés en transit sous la surveillance de la douane, lorsqu'ils sont emballés de telle façon qu'ils ne puissent être manipulés en route ;

4° Les bagages des voyageurs et les objets transportés à la suite d'un changement de domicile

Article 3.—L'importation et le transit des merchandises et objects visés à l'article 1er et provenant de pays ou de circonscriptions territoriales non contaminés peuvent être soumis à des justifications de provenance, à la satisfaction de l'administration des douanes.

Ils seront admis à l'importation et au transit, même lorsqu'ils ont traversé une circonscription contaminée, s'il est démontré à la dite administration qu'ils n'ont pas été en contact avec des objets souillés, pendant leur transport à travers cette circonscription.

Article 4.—Les marchandises et objets visés à l'article 1er ne tomberont pas sous l'application des mesures de prohibition à l'entrée, s'il est démontré à l'administration des douanes qu'ils ont été expédiés d'une région contaminée cinq jours au moins avant le début de l'épidémie.

Article 5.—Notre Ministre de l'Agriculture et des Travaux publics designera les pays ou parties de pays á l'égard desquels le régime prévu par les dispositions qui précèdent sera rendu applicable et réglera la mise á exécution et la durée des mesures prescrites.

Article 6.—Les mesures à pendre aux frontières de mer seront réglées par Notre Ministre de l'Agriculture et des Travaux publics à l'ègard des navires considérès comme infectés, suspects ou indemnes, au point de vue de la visite médicale, de l'isolement et de la désinfection.

Il pourra appliquer les mesures jugées nécessaires aux frontières de terre et de mer en ce qui concerne les voyageurs, les bagages et les objets transportés à la suite d'un changement de domicile.

Toutes ces mesures seront prises dans les limites arrêtées par la convention prérappelée du 15 avril 1893.

Article 7.—Sont abrogés les arrêtés susvisés des 30 juillet 1893, 17 juin 1894, 24 septembre 1894 et 12 février 1895.

Article 8.—Notre Ministre de l'Agriculture et des Travaux publics est chargé de l'exécution du présent arrêté.

Donné à Ostende, le 15 juillet 1895.

LEOPOLD.

Peste bubonique.—Mesures aux frontières.

LEOPOLD II, Roi des Belges,

A tous présents et avenir, SALUT.

Vu le décret sanitaire du 28 juillet 1831, et les règlements pris pour son exécution ;

Considérant que la peste bubonique sévit à l'état épidémique dans plusieurs localités de l'Inde anglaise et qu'il y a lieu de prescrire, à l'égard des pays ou des circonscriptions territoriales contaminés, des précautions concernant l'importation et le transit de certaines marchandises, ainsi que des mesures aux frontières de terre et de mer ;

Sur la proposition de Notre Ministre de l'Agriculture et des Travaux publics,

Nous avons arrêtè et arrêtons :

Article premier.—Notre arrêtè du 15 juillet 1895, relatif au choléra, est rendu applicable à la peste bubonique.

Article 2.—Notre Ministre de l'Agriculture et der Travaux publics est chargé de l'exécution du présent arrêté.

Donné à Laeken, le 8 janvier 1897.

LEOPOLD.

DECLARATION.

No. 901M.—The 17th February 1897.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Sasaram Municipality for a public purpose, viz., for the construction of a Female Hospital and Lady Doctor's residence bungalow at Sasaram, pargana Sasaram, zilla Shahabad, it is hereby declared that for the above purpose a piece of land, measuring 1 bigha 4 cottahs 14 dhoors of standard measurement, is required. The land is bounded on the north by the High Class English School compound, on the east by the houses of Arshadali and Bishunkoeri, on the south by parti land, a pucca musjid and a pucca house of Shah Abdul Karim and Fateh Alum, and on the west by the hospital compound.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

DECLARATION.

No. 905M.—The 17th February 1897.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Nasirabad Municipality for a public purpose, viz., for clearing the river frontage with a view to improve the sanitation of the town of Nasirabad, in the village of Shehora, pargana Alapsingh, zilla Mymensingh, it is hereby declared that for the above purpose a plot of land, measuring more or less 8 cottahs and 4½ chitaks of standard measurement, is required. The land is bounded on the north by the river Brahmaputra, on the east by the Municipal land, on the south by the public drain of Kalibari road, and on the west by the pucca house of Babu Rohini Kumar Basak.

The plan and specification of the land are filed in the office of the Municipal Commissioners for public inspection.

This declaration is made, under the provisions of section 6 Act I of 1894, to all whom it may concern.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

DECLARATION.

No. 940M.—The 19th February 1897.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Calcutta Municipality for a public purpose, viz., for a new road connecting Mohan Lal Mitter's Lane with the new road (B), it is hereby declared that for the above purpose pieces of land Nos. 15, Mohan Lal Mitter's Lane, and 227-4 and 227-63, Upper Circular Road, in Sham Bazar, Dihi Punchannogram, district 24-Parganas, measuring more or less 1 cottah 7 chitaks and 42 square feet only, are required. The boundaries of the land are as follows:—On the north partly by Mohan Lal Mitter's Lane and partly by the remaining portions of Nos. 15, Mohan Lal Mitter's Lane, and 227-63, Upper Circular Road; on the south partly by Mohan Lal Mitter's Lane and partly by the remaining portion of premises No. 227-4, Upper Circular Road, and a public road; on the east by a public road; and on the west partly by the remaining portion of No. 227-63, Upper Circular Road, and partly by Mohan Lal Mitter's Lane.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

DECLARATION.

No. 996Medl.—The 22nd February 1897.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the District Board of Chittagong for a public purpose, viz., for a site for the District Board's Charitable Dispensary at Patia in the village of Patia, thana Patia, zilla Chittagong, it is hereby declared that for the above purpose a piece of land measuring more or less 1 bigha 4 cottahs 5 dhurs of standard measurement is required. The land is bounded on the north by the ditch of Aracan road, on the east by the footpath, on the west by the ditch of khas mahal office, and on the south by the lands of Abdul Ali.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

DECLARATION.

No. 1000M.—The 23rd February 1897.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of Tamluk Municipality for a public purpose, viz., as a site for one of Donaldson's patent privies in the village of Perbatipur, pargana Tamluk, zilla Midnapore, it is hereby declared that for the above purpose a piece of land measuring more or less ½ cottah of standard measurement is required. The land is bounded on the north, west and south by the land held by Rashmony Baistabi, and east by the river Rupnarain.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

Cuttack Collectorate, the 3rd February 1897. H. D. DEM. CAREY, Covd. Dy. Collector in charge.

Advertisement of Sale.

NOTICE is hereby given that the proprietary right of Government, as specified in the conditions of sale below, to the undermentioned estate situate in the district of Puri will be put up to sale at the Puri Collectorate, on the 28th of April 1897, corresponding with 17th Bysack 1304 Umli :—

Conditions of Sale.

1st.—The estate to be sold to the highest bidder above the upset price which will be fixed by Collector at the time of sale. The purchaser of this estate will be considered as the proprietor of the estate, and the entire proprietary right of Government in such estate will be transferred to him subject to the revenue fixed in perpetuity.

2nd.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force, and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the revenue authorities.

3rd.—If the amount of purchase-money do not exceed Rs 100, the whole amount to be paid down at once.

4th.—If the amount of purchase money exceed Rs. 100, one fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or, if that day be a close holiday, then by noon of the first succeeding office day, the sale is to be cancelled (the sum deposited being forfeited to Government), and the estate to be again put up to sale at the risk of the defaulting purchaser after issue of advertisement as in the case of original sale.

Number in statement of Government estates.	Number on the district roll.	Name of estate and pargana.	Approximate area in acres.	Government revenue assessed.	Upset price.	REMARKS.

Hooghly Collectorate, the 17th February 1897. D. B. ALLEN, Collector.

Advertisement of Sale.

NOTICE is hereby given that the proprietary right of Government, as specified in the conditions of sale below, to the undermentioned estates situate in the district of Burdwan, will be put up to sale at the Burdwan Collectorate on the 29th March 1897, corresponding with the 17th Chaitra 1303.

The purchasers will be subject to the following conditions of sale:—

Conditions of Sale.

1st.—The estates to be sold to the highest bidder above the upset price, which will be fixed by the Collector at the time of sale. The purchasers of the estates will be considered as the proprietors of the estates, and the entire proprietary right of Government in such estates will be transferred to them as revenue-free or subject to the revenue fixed in perpetuity.

2nd.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force, and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the authorities.

3rd.—If the amount of purchase-money do not exceed Rs. 100, the whole amount to be paid down at once.

4th.—If the amount of purchase-money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or, if that day be a close holiday, then by noon of the first succeeding office day, the sale is to be cancelled (the sum deposited being forfeited to Government), and the estate again to be put up to sale at the risk of the defaulting purchaser after issue of advertisement as in the case of original sale.

Number on the district roll.	Name of estate and pargana.	Approximate area in acres.	Government revenue assessed.	REMARKS.

The Indian Law Reports.

Published under Authority.

THE Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad, and comprise four series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of the previous advertisements, on and from the 1st January 1889 the terms of subscription and sale will be as follows for current issues as well as for back numbers of the Reports from 1876:—

Terms of subscription payable annually in advance.

For the complete series *including postage*, Rs. 22-8.

Remittances to be forwarded to the Accountant and Treasurer, Bengal Secretariat, Writers' Buildings, Calcutta.

All the wanting parts of the INDIAN LAW REPORTS (complete series) having now been reprinted, the complete Reports from 1876 to 1893 may be purchased for all the years, or for any particular year, on application to the Officer in charge of the Bengal Secretariat Book Depot.

The subscription, Rs. 22-8 per annum, should be remitted in advance to the Accountant and Treasurer, Bengal Secretariat.

Notice.

IT is hereby notified, for general information, that subscription to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions of the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

THE following Weather Reports of the Bengal Meteorological Department, issued by orders of the Government of Bengal, can be supplied to the public at the prices annexed:

1st.—Bay of Bengal Daily Weather Report, giving meteorological observations taken at 28 stations on or near the coast of the Bay, with a chart and summary. This is published in connection with the Bay of Bengal Storm Signal Service. The report giving 8 A.M. observations of the day is distributed by peon in Calcutta soon after 11 A.M. Price to subscribers in Calcutta Rs. 2 per mensem, payable in advance up to 30th April 1897.

This report will be issued every year from 1st November to 30th April. From 1st May again the Bay of Bengal and Bengal Report containing observations taken at 64 stations will be issued.

2nd.—A Monthly Statement of Meteorological Observations taken at 49 observing stations, and of rainfall recorded at 327 subdivisional and other stations, together with summaries of the more important features of the meteorology of the past month of the province, and of the distribution of the rainfall and its variation from the normal. Price of the Monthly Summary Rs. 2 per annum, payable in advance.

Subscriptions payable to the Meteorological Reporter to the Government of Bengal, 5, Russell Street, Calcutta, for the Bay of Bengal Daily Weather Report, and to the Accountant and Treasurer, Bengal Secretariat, for the Monthly Report.

C. LITTLE,

Meteorological Reporter to the Govt. of Bengal.

Notice.

NOTICE is hereby given that the terms for the purchase of publications from the Bengal Secretariat Book Depôt except *for* Government offices or offices under the control of Government Officers are strictly cash, and on no other terms will any publication be supplied, or advertisement, notice, &c., inserted in either of the Gazettes.

In the case of insolvency notices, cash must be sent with such notices when forwarded by Mofussil courts or offices and for those frowarded by the Official Assignee cash must be paid on presentation of memorandum of cost by the Accountant and Treasurer, Bengal Secretariat.

Remittances in postage stamps should be accompanied by an addition of one anna in the rupee on account of discount.

☞ Applications for Acts of the Bengal Legislative Council required on the public service should be addressed to the REGISTRAR, Office of the Legislative Department, Government of Bengal.

Copies are available for purchase at the Bengal Secretariat Book Depôt.

AUSTRALIA—VICTORIA.

Port Phillip entrance, West channel—Alterations in buoyage.

THE British Admiralty has given notice (No. 23 of 1897) that, owing to recent changes in the southern entrance to West channel, port Phillip, the undermentioned alterations would be made in the buoyage, on 30th November 1896:—

1. Swan spit *gas* buoy (*occulting red* light) would be moved S. 18° W., a distance of 4½ cables from its previous position.

   Approximate position, lat. 38° 15′ 50″ S., long. 144° 42′ 25″ E.

2. No. 4 buoy, red, would be moved eastward, a distance of 1½ cables from its previous position.
3. Swashway buoy, red, marking the eastern end of Royal George shoal, would be moved N. 70° W., a distance of one cable from its previous position.

CAUTION.—As the depths in this channel have altered since the survey of 1891, the Admiralty Charts should be used with caution until they have been corrected. A note "Depth altered since survey" has been placed on sheet No. 2747*a*.

JAPAN KIUSIU—WEST COAST.

(1) Sunken rock northward of Matsu sima.

THE British Admiralty has given notice (No. 33 of 1897) of the existence of a sunken rock, now named Tsuguno iso, with a depth of 3½ fathoms on it at low water, situated northward of Matsu (Mats') sima, in a position with Matsu sima summit (708) bearing S. 12° E., distant 1$\frac{5}{10}$ miles; and Ko sima N. 65° E.

Approximate position, lat. 32° 57′ 20″ N., long. 129° 35′ 55″ E.

The island situated about west, distant half a mile from the above position is named Binno and not Kooshe as marked on the chart; also, the island situated about S. W. by S., distant 6½ cables from that position, is named Kushi. The summit of Kushi is 195 feet above high water, and of Binno 72 feet.

(2) Yezo, west coast—Rock south-eastward of Yagisiri.

The Japanese Government has also given notice of the existence of a rock, 10 feet high and about 10 yards in extent, situated S.S.E. ½ E., distant 8 cables from the eastern point of Yagisiri.

Approximate position, lat. 44° 24½′ N., long. 141° 26′ E.

JAPAN—LIU KIU ISLANDS.

(1) Nafa Kiang roads.—Light on Sakihana (Sakibaru) saki.

THE British Admiralty has given notice (No. 3 of 1897) that, on 25th November 1896, a light was exhibited from a light-house recently erected on Sakihana (Sakibaru) saki, on the southern side of the entrance to Nafa K'ang roads (Naha harbour) :—

Sakihana (Sakibaru) saki light is a sixth order, *flashing* light *every fifteen seconds*, showing the following sectors :—*red* from N. 34° E., through east, to S. 27° E. (over Asashe and dangers southward of it); *white* from S. 27° E. to S. 10° E.; *green* from S. 10° E., through south, to S. 24° W. (over Shennoshe and other dangers on the north-east side of Oar channel); *white* from S. 24° W. to S. 48° W.; and *red* from S. 48° W., through west, to N. 80° W.

It is elevated 92 feet above the sea, and visible in clear weather from a distance of 14 miles.

The light-house, 40 feet high, is cylindrical in shape, constructed of brick, and painted white.

Approximate position, on Plan No. 990, lat. 26° 12′ 20″ N., long. 127° 40′ 50″ E.

(2) Mathews bay—Light on Tsuchi (Tsukin or Taking) shima.

Also, that, on the same date, a light would be exhibited from a light-house recently erected on the south point of Tsuchi (Tsukin or Taking) shima, east side of Okinawa shima :—

Tsuchi (Tsukin) light is a fourth order, *fixed white* light, showing the following sectors :—*white* from S. 52° W., through west, to N. 10° W.; *red* from N. 10° W., through north, to N. 60 E.; and *white* from N. 60° E., through east, to S. 88° E.

It is elevated 76 feet above the sea, and visible in clear weather from a distance of 14 miles.

The light-house, 41 feet high, is constructed of iron, hexagonal in section, and painted white.

Approximate position, on Chart No. 2416, lat. 26° 16′ 25″ N., long. 127° 59′ 20″ E.

(3) Amami o sima—Light on Sotsuko saki.

Also, on the same date, a light would be exhibited from a light-house recently erected on Sotsuko saki, southern side of entrance to Yakiuchi (Hankook) bay :—

Sotsuko saki light is a first order, *fixed white* light, elevated 436 feet above the sea, and visible from N. 34° W., through north and east, to S. 56° W., a distance of 20 miles in clear weather.

The light-house, 33 feet high, is constructed of iron, octagonal in section, and painted white.

Approximate position, on Plan No. 873, lat. 28° 15′ 10″ N., long. 129° 8′ 30″ E.

(*Variation* (1, 2) 2° (3) 3° *Westerly in 1897.*)

This Notice affects the following Admiralty Charts :—Amoy to Nagasaki, &c., No. 2412; Nafa Kiang roads, No. 990 (1); Liu Kiu islands, No. 2416 (1, 2); Amami o sima group, No. 873 (3) : Also, List of Lights, part VI., 1896, page 120; and China Sea Directory, vol. IV., 1894, pages 218, 222, 227.

[Third Publication.]

PACIFIC OCEAN—ROTUMAH ISLAND.

Amended position of shoal westward of the island.

THE British Admiralty has given notice (No. 6 of 1897) that information has been received from the Commander-in-Chief on the Australian Station that the shoal marked *P.D.*, 1¼ fathoms, westward of Chilinha point, Rotumah island, has been examined by H.M. Surveying Vessel *Penguin*, with the undermentioned result:—

This shoal, on which the sea breaks in bad weather, has a depth of 3 fathoms on it, with deep water all round, and is situated in a position with Emery island summit bearing N. 16° W., distant $3\frac{8}{10}$ miles.

Approximate position, lat. 12° 31′ 10″ S, long. 177° 0′ 15″ E.

(*Variation 9° Easterly in 1897.*)

This Notice affects the following Admiralty Plan:—Rotumah island, on sheet No. 987: Also, Sailing Directions for the Pacific Islands, vol. II., 1891, page 219; and Hydrographic Notice, No. 7 of 1895, relating to that work, page 7.

[Third Publication.]

PACIFIC OCEAN—SOLOMON ISLANDS.

Ysabel island—Reef south-westward of Ortega channel.

THE British Admiralty has given notice (No. 7 of 1897) that information has been received that the Austrian vessel-of-war *Pola* reports having touched on a coral reef, with a depth of 2 to 4 fathoms on it, situated south-westward of the western entrance to Ortega channel, in approximately lat. 8° 25′ S., long. 159° 25′ E.

No bottom was obtained at a depth of 25 fathoms between this reef and the entrance to Ortega channel. Several reefs were observed in the locality marked "discoloured water" westward of the western entrance to Ortega channel.

A sounding of 37 fathoms was obtained in approximately lat. 8° 22′ S., long. 159° 8½′ E.

A depth of 2 fathoms has been inserted on the Admiralty chart in the position where the *Pola* touched.

This Notice affects the following Admiralty Chart:—Solomon islands, No. 214: Also, Sailing Directions for the Pacific Islands, vol. I., 1890, page 395.

AUSTRALIA—St. Vincent gulf.

Port Adelaide river—Alterations in beacon lights.

With reference to Notice to Mariners, No. 225, dated 7th November 1896, issued by this Office, the British Admiralty has given further notice (No. 15 of 1897) that the new beacon, from which an *electric white* light is shown, has been erected on the edge of the deep-water channel, in a position about 600 feet, north-eastward, from No. 10 beacon.

Approximate position, lat. 34° 46′ 35″ S., long. 138° 29′ 40″ E.

Also, that the light, previously shown from No. 10 beacon, has been discontinued.

Also, that a new beacon is in course of erection between Nos. 10 and 11 beacons, near the position of the red perch buoy, and the red pile beacon surmounted by a diamond.

During the erection of this beacon a *white* riding light will be shown from a barge moored alongside the structure.

This Notice affects the following Admiralty Plan:—Port Adelaide, No. 1750: Also, List of Lights, part VI., 1896, page 152; Australia Directory, vol. I., 1884, page 228; Revised Supplement, 1889, relating to that work, page 55; and Australia Directory, vol. I., 1896 (*now in the Press*), page 332.

The Hon'ble SAHIBZADA MAHOMED BAKHTYAR SHAH.

FORCIBLE REMOVAL OF SMALL-POX PATIENTS TO HOSPITAL.

The Hon'ble BABU GURU PROSHAD SEN asked—

Has the attention of Government been drawn to an article in the *Statesman* newspaper, published in its issue of the 17th January, regarding certain cases of forcible removal of patients suffering from small-pox in the town of Howrah from their houses to the General Hospital, by order of the authorities, notwithstanding that the relatives offered to isolate them in their own houses and to arrange for their treatment?

Will it please Government to rule that in such cases, forcible removal, specially of females and children, is not necessary; and even if in any case the isolation being impracticable in their own houses, the removal of the patients to isolation hospitals comes to be necessary, the relations, if they are willing to attend on the patients, and to remain isolated, shall be allowed to do so?

The Hon'ble MR. RISLEY replied:—

"The facts referred to in the first part of the question are, it is believed, now under judicial enquiry. The Lieutenant-Governor is not prepared to lay down any general rules on the subject of the isolation of persons suffering from small-pox. It is for the responsible medical officer to decide in each case whether the removal of a patient to hospital is desirable in the interests of the public, and to use his influence to bring about such removal, while it is for the Superintendent of the hospital to determine whether relatives can be allowed to attend on such patients. Where the outbreak is severe and the hospital is crowded, such an arrangement would obviously be impossible."

SALE OF ESTATES FOR ARREARS OF REVENUE.

The Hon'ble BABU GURU PROSHAD SEN asked—

To ensure the sale of the estates for arrears of Government revenue at adequate prices, will the Government be pleased to order that all sales for arrears of Government revenue take place on certain fixed days in each quarter, say 15th March for all arrears unpaid on the 12th January, and all arrears of previous *kists*, the sales for which could not be arranged at an earlier quarter sale day; 30th May for all arrears unpaid on the 28th March and previous *kists* when necessary; 15th August for all arrears unpaid on the 7th June, and 30th November for arrears unpaid on the 28th September or on any other date which the Board of Revenue may fix either for all districts, or district by district, in consultation with the local authorities, instead of, as now, leaving the dates to be fixed by the Collector, or his ministerial officer, according to the convenience of the office? Is the Government aware that such a rule in the case of sales for execution of decrees of Civil Courts brings in Court a large number of intending purchasers on the fixed sale days, and results in the properties being sold at their adequate prices?

The Hon'ble MR. FINUCANE replied:—

"A proposal similar to that now made by the Hon'ble Member was submitted to the Board of Revenue by the Bihar Landholders' Association, and was fully considered by them. The Board, for the reasons stated in their letter No. 703A, dated the 14th March, 1896, a copy of which is laid upon the table, were unable to accept the proposal. The Government agree with the Board."

No. 703A, dated Calcutta, the 14th May, 1896.

From—F. A. SLACK, Esq., Offg. Secretary to the Board of Revenue, L. P.,
To—The Secretary, Bihar Landholders' Association.

THE HON'BLE C. C. STEVENS, C.S.I.

IN continuation of the Board's letter No. 1244A, dated the 6th of September, 1895, regarding the dates for holding sales under the Revenue Sale Law and the Certificate Procedure, I am now directed to communicate the following observations with reference to your letter of the 23rd of August, 1895, in which it is suggested (1) that the rule of having sales on a certain day in a month may be advantageously adopted with regard to sales under the Certificate Act, and that the 15th of each month be fixed as the date, the hour being one later or earlier than that fixed for the Civil Court sales, where such happen on the 15th; and (2) that revenue sales should take place on a certain date in each quarter to be known by the people beforehand, and that certain dates proposed by the Association may be fixed for such sales.

2. With regard to the first point, I am to say—

(*a*) that the matter had already attracted the notice of the Board by whom was issued clause VI of rule 1, Section IV, page 26, of the Certificate Procedure Manual of 1895, a copy of which is herewith enclosed;

(*b*) that the Board have reason to believe that these instructions are followed in most districts, and that the attention of the Divisional Commissioners will again be drawn to the subject with a view of introducing the procedure where such has not already been done; and

(*c*) that, bearing in mind the variations in the requirements of the different districts, the date or dates on which such sales should be held monthly is a matter which must be left to the discretion of the Collector concerned to settle.

3. Referring to the second point, concerning the dates of sales for arrears of revenue, I am to state that, in order to go through the whole of the necessary procedure, much more time is requisite than the Association appear to think, and that, in order to provide for all chances of illness among, and delay on the part of, the establishment, a long term would have to be fixed, which would be inconvenient. If this were not done, there would be great risk of occasional, possibly frequent, failures on the part of the Collector's establishment to have the requisite arrangements completed by the day appointed for the sale. This would render postponements of three months necessary, and the public interests would thereby suffer. Further, it would not be convenient that sales of estates under section 14 of Act XI of 1859, for the defaults of shares, should be put off for so long as three months, as they would probably have to be if certain days were fixed, on which alone sales could take place. I am also to add that experience shows both that the attendance at revenue sales is good, and that the dates are well known beforehand. The Board therefore do not find themselves in a position to concur with the Association's proposal.

No. 704A.

COPY forwarded to all Commissioners for information, and for communication to the District Officers under them, for their information and guidance.

By order of the Board of Revenue, L.P.,

F. A. SLACK,
Offg. Secretary.

CALCUTTA;
The 14th May, 1896.

ROAD-CESS PAPERS.

The Hon'ble BABU GURU PROSHAD SEN asked—

With the same object in view, will the Government be pleased, by an executive order, to rule that road-cess papers, showing the annual value of estates advertised for sale, form a part of the sale Records, and a return from Registration office, showing the incumbrances on the shares of estates to be sold, in cases of sales of shares under section 13 of the Revenue Sale Law, it being made one of the conditions of sales that they are nowise to be affected by the incorrectness of these returns?

The Hon'ble MR. FINUCANE replied:—

"In the opinion of Government it is not desirable to make the rule suggested. Any person intending to buy has ample time beforehand to make his own enquiries, and if the validity of the sale is not to be affected by the incorrectness of the returns alluded to, then such returns would be of no practical value."

REDEMPTION OF ESTATES.

The Hon'ble BABU GURU PROSHAD SEN asked—

Will the Government be pleased to state what is the number of estates that had to be redeemed under section 10 of the Estates Partition Act [Act VIII (B.C.) of 1876]? What amount has been received by Government on account of these redemptions? Whether this amount has not been kept separate from the ordinary revenue; whether it has been invested; and whether the yearly income from the investment is not more than the annual land revenue which Government has lost?

The Hon'ble MR. FINUCANE replied:—

"It would seem that the section referred to by the Hon'ble Member is 11 and not 10. In the Annual Land Revenue Administration Report of the Board of Revenue, a publication that can be bought by the public, the number of estates redeemed up to date, the Government revenue on the same, and the price realized, are given. The figures up to the end of 1895-96 are given on page 13 of the Land Revenue Administration Report for that year, and are as follows:—

Number of estates	... ...	... 2,620
		Rs.
Government revenue	... ...	... 1,312
Price realized ...	.. ...	... 37,329

"The amount realised is not kept separate from the ordinary revenue and is not invested."

MOTI LAL'S CASE.

The Hon'ble BABU GURU PROSHAD SEN asked—

Has the attention of Government been drawn to an article in the *Amrita Bazar Patrika* newspaper, headed "The case of Moti Lal," published in the issue of that newspaper dated the 9th January, 1897? Will the Government be pleased to order an enquiry into the truth or otherwise of the statements contained in a memorial of Moti Lal, said to have been submitted by him to Government, about the conduct and proceedings of Mr. Lyall, the Subdivisional Officer of Siwan, in connection with this case?

The Hon'ble MR. BOLTON replied:—

"The attention of the Government has been drawn to the article referred to, and an enquiry has been made. The allegations made against the Subdivisional Officer in the Memorial submitted to Government by Moti Lal appear to be for the most part without foundation, but as charges are still pending against the Memorialist for fraud in connection with stamps, the Lieutenant-Governor will not for the present pass orders on his petition."

ALLEGATIONS AGAINST THE COMMISSIONER OF BURDWAN.

The Hon'ble BABU SURENDRANATH BANERJEE asked—

(*a*) Whether the attention of the Government has been called to the letter quoted in the margin which has been reproduced in several newspapers, and whether having regard to the allegations made therein, the Government will be pleased to make an enquiry and state the facts of the case? If the Government has already enquired into the case and passed orders, will the Government be pleased to communicate to the Council the result of the enquiry and the orders passed?

To—His Honour the Lieutenant-Governor of Bengal.

May it please Your Honour,—I beg most respectfully to tender resignation, under section 27A (1) of the Municipal Act, of my post of Chairman of the Kalna Municipality on account of the unnecessarily harsh and insulting manner with which the Commissioner of the Burdwan Division, Mr. C. E. Buckland, C.I.E., was pleased to treat me during his inspection of the Municipality on the 6th January, 1897.

I have the honour to be, Your Honour's most obedient servant, Suriya Narayan Sarbadhikari, Chairman of the Kalna Municipality.

(*b*) Is it the case that the Municipal Commissioners of Kalna, at a meeting held on the 12th January last, recorded a Resolution expressing their deep regret at the resignation of their Chairman, Babu Suriya Narayan Sarbadhikari, "especially," to quote the words of the Resolution, "as the resignation is due only to the harsh and insulting treatment received at the hands of the Divisional Commissioner during his inspection of the Municipal Office," and that at that meeting they further recorded a Resolution that the "Commissioners as a body felt it a deep humiliation at the improper treatment of their Chairman by the Divisional Commissioner"? Has the Government received a copy of this Resolution which by the terms of the Resolution of the Commissioners was to have been forwarded to the Local Government through the proper channel? If so, will the Government be pleased to state what action has been taken upon it?

The Hon'ble MR. RISLEY replied:—

"The papers of the case are laid upon the table. The Commissioner of Burdwan absolutely denies having treated the Chairman of the Kalna Municipality in an 'unnecessarily harsh and insulting manner,' and the Magistrate of Burdwan, who was present during the inspection, did not observe anything which could be so construed. In his letter of the 2nd February, Mr. Buckland expresses his regret that his criticisms on the municipal administration should have been regarded by the Chairman as unduly severe, and gives an assurance that nothing personal was intended. It was clearly the Commissioner's duty to point out any shortcomings in the municipal administration. This being so, the Lieutenant-Governor will await a further communication from the Chairman before accepting his resignation."

No. 105M, dated Chinsura, the 2nd February, 1897.

From—C. E. BUCKLAND, ESQ., C.I.E., Offg. Commissioner of the Burdwan Division,
To—The Secretary to the Government of Bengal, Municipal Department.

I HAVE the honour to forward, for the orders of Government, a copy of a letter, No. 449M, dated 25th—26th January, 1897, from the Magistrate of Burdwan, enclosing a communication from the Chairman of the Kalna Municipality, resigning his appointment as Chairman.

2. I absolutely deny that I treated the Chairman in an "unnecessarily harsh and insulting manner." It was my duty, in the course of my inspection, to point out plainly that the collections were bad and that the arrear balances were high; also that the arrangements made by the Municipality for preserving the purity of the water-supply of the town were altogether insufficient. A copy of my inspection note, dated the 6th January, 1897, is enclosed. I regret that my criticisms on the municipal administration in these matters should have been regarded as they have been by the Chairman, and I am willing to assure him that nothing personal was intended. He gave me at the time no reason whatever to suppose that his feelings were wounded, either at the office or in our walk through the town.

3. It will be observed that the Magistrate of Burdwan, who was with me on the occasion, saw nothing in my remarks to justify the construction put upon them by the Chairman.

4. I beg to recommend that the Chairman's resignation be accepted.

No. 449M, dated Burdwan, the 25th—26th January, 1897.

From—W. DUNBAR BLYTH, Esq., Magistrate of Burdwan,

To—The Commissioner of the Burdwan Division.

I HAVE the honour to forward a copy of letter No. 186 of the 13th instant, from the Chairman of the Kalna Municipality, together with a copy of the minutes of a meeting of the Commissioners held on the 12th idem, together with the resignation (in original) submitted by Babu Surya Narayan Sarvadhikari of his appointment as Chairman of that Municipality.

2. I heard you finding faults with the arrears in collections, and also with the absence of arrangements for preserving from pollution those tanks which had been nominally set aside for the supply of drinking water for the town, but I did not observe anything which could be construed into treating the Chairman "in a harsh and insulting manner."

Inspection Report on the Kalna Municipality.

VISITED the Kalna Municipality. Babu Surya Narayan Sarvadhikari Chairman. He is also a medical practitioner. The drainage scheme of part of the town has been once submitted to the Sanitary Engineer, and returned by him for an opinion as to the area to be drained: it will now be resubmitted very shortly: no estimate has yet been prepared. I am afraid that the Municipality is bent on too ambitious a scheme. The municipal income is about Rs. 8,000 (excluding latrine fees), so that it seems out of the question to go in for a drainage scheme costing a large sum. A much simpler scheme for letting off by culverts under roads all the water that collects on the higher land is all that is required. As to the burning ghâts, I am glad to say that the matter has been settled, as both the burning ghats (1) for the fair-weather, (2) for the monsoon, are now to be regulated under section 259. The other points noticed by Mr. Bourdillon in June, 1895, have been receiving attention.

I looked into the collections under the head "Tax on persons and for latrine fees." A statement of the collections, demands and arrears is attached. It is evident that the collections are not good and that the arrears are too high. Much greater attention must be paid to collecting properly. As to water-supply, I am told that there are five tanks set apart for drinking water, named:—

Baruipara	...	...	...	(Municipal.)
Kassaripara	...	...	...	(Ditto)
Samajdighi	...	...	...	(Burdwan Raj.)
Laldighi	...	...	...	(Ditto.)
Mandopakhur	...	...	...	(Benode Lal Sen's.)

These five tanks are not watched by chaukidars. No prosecutions are ever instituted for soiling these tanks. It seems to me that the administration of the water-supply is very lax, and the Municipality should do much more to preserve the purity of the water. It is all nonsense to tell me that the order of the Municipality that certain tanks are to be preserved for drinking water is never disobeyed. I saw some of these tanks. The Laldighi looked fairly good. The Baruipara tank is very bad. The Samajdighi is very large. There was much dirt of animals on the bank In fact there is no real attempt made to keep the water clear. A chaukidar should be appointed for each tank to enforce the notice prohibiting bathing, washing, &c., and to keep animals off the bank. The tanks should also be fenced.

There are 248 tanks in all, of which 46 are classed as wholesome and 202 as unwholesome. I see nothing to prevent anybody in the municipality from drinking from any of these sources of supply if they choose to do so.

There are two sets of public latrines, and a third has been sanctioned. They are cleared by sweepers, and the night-soil removed in carts. The trenching ground is 1½ mile off. There are 16 sweepers in the town altogether. The town was as clean as any I have seen. I spoke also to the Chairman of the importance of preventing the pucka drains from being built over by encroachments. *No permanent structure* over the drains should be allowed, and all in existence should be removed by due process. If such little "bridges" are allowed, it becomes impossible to clear the drains properly.

KALNA;
The 6th January, 1897.

C. E. BUCKLAND,
Officiating Commissioner.

Abstract statement showing demand, collection, remission, and outstanding balance of tax upon persons and latrine fees levied within the Kalna Municipality during the first three quarters of 1896-97.

PARTICULARS.	DEMAND.				Total collections during first three quarters of 1896-97, as per quarterly statement.	Total remissions granted during first three quarters of 1896-97.	Outstanding balance on close of 31st December, 1896.	REMARKS.
	1st quarter of 1896-97.	2nd quarter of 1896-97.	3rd quarter of 1896-97.	Total of 1st three quarters of 1896-97.				
1	2	3	4	5	6	7	8	9
Tax upon persons.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	(a) This amount shows total collection as remitted to treasury, besides Rs. 116-13 on account of collection on 31st December, 1896 remained in hand of tax-daroga and credited on 2nd January, 1897, hence reducing the actual outstanding on close of 31st December, 1896 to Rs. 891-1-9.

S. N. SARVADHIKARI,
Chairman.

KALNA MUNICIPAL OFFICE;
The 6th January, 1897.

No. 114M, dated Chinsura, the 6th February, 1897.

From—C. E. BUCKLAND, ESQ., C.I.E., Offg. Commissioner of the Burdwan Division,
To—The Secretary to the Government of Bengal, Municipal Department.

WITH reference to your letter No. 615M, dated 5th February, 1897, calling for certain papers connected with the resignation tendered by Babu Surjya Narain Sarbadhikari of his office as Chairman of the Kalna Municipality, I have the honour to submit herewith the papers in question, and to express my regret that, contrary to my express orders, my office should have omitted to forward them with my letter No. 105M of the 2nd instant.

No. 186, dated Kalna, the 13th January, 1897.

From—BABU SURJYA NARAIN SARBADHIKARI, Chairman of the Kalna Municipality,
To—The Magistrate of Burdwan.

IN pursuance of the provisions of section 27A (1) of the amended Bengal Municipal Act, I have the honour to forward herewith an application of my resignation from the office of Chairman of the Kalna Municipality, and to request that you will be kind enough to forward the same to the Local Government for acceptance. A copy of the minutes of the proceedings of the Municipal Commissioners, passed at a special meeting held on the 12th instant, is herewith enclosed. As the Municipal Commissioners have expressed their willingness in that meeting that a copy of their proceedings recorded therein should accompany my application of resignation to Government, I beg to solicit, on behalf of the Municipal Commissioners, that you will be so kind as to forward the enclosed copy of the minutes of the proceedings of the said meeting, along with my application of resignation, to the Local Government.

A special meeting of the Commissioners of the Kalna Municipality was held on 12th January, 1897.

PRESENT:

Babu Mohendra Nath Singh	...	*Vice-Chairman.*
„ Aghore Nath Chatterjee	...	*Members.*
„ Ram Lal Mukerjee	...	
„ Madhab Chand Mehera	...	
„ Bidhu Bhusan Mukerjea	...	
„ Bunwari Lal Biswas	...	
„ Nilmoni Mukerjea	...	
„ Taradhone Bhattacharjee	...	
„ Durga Churn Ganguly	...	
Sheik Babulla	...	

1. The Vice-Chairman presided in the absence of the Chairman.

2. This meeting has been convened at the request of the Chairman, Babu Surjya Narain Sarbadhikari, to forward his letter of resignation of his office of Chairman of the Kalna Municipality.

3. Read his resignation letter addressed to His Honour the Lieutenant-Governor of Bengal.

4. The Commissioners deeply regret at the resignation of Babu Surjya Narain Sarbadhikari who has been serving this Municipality as its worthy Chairman for a good many years with ability, honesty, efficiency, and devotedness to the satisfaction of the public as well as of the superior authorities, especially as the resignation is due only to the harsh and insulting treatment received at the hands of the Divisional Commissioner, Mr. C. E. Buckland, C.S., C.I.E., during his inspection of the Municipal Office on the 6th January last.

5. The Commissioners as a body feel it a deep humiliation at the improper treatment to their Chairman by the Divisional Commissioner.

6. Resolved that a copy of the proceedings of this meeting be annexed to the Chairman's letter of resignation, and that they be sent to the District Magistrate for forwarding them to the Local Government through proper channel.

MOHENDRA NATH SINGH,
Vice-Chairman, Presiding.
RAM LAL MUKERJEA.
BUNWARI LAL BISWAS.
BIDHU BHUSAN MUKERJEA.
TARADHONE BHATTACHARJEE.
DURGA CHURN GANGULY.
AGHORE NATH CHATTERJEE.
SHEIK BABULLA (in Bengali).
NILMONI MUKERJEA.
MADHAB CHAND MEHERA (in Bengali).

Dated Kalna, the 10th January, 1897.

From—SURJYA NARAIN SARBADHIKARI, Chairman of the Kalna Municipality,
To—His Honour the Lieutenant-Governor of Bengal.

MAY IT PLEASE YOUR HONOUR—

I beg most respectfully to tender resignation of my post of Chairman of the Kalna Municipality on account of the unnecessarily harsh and insulting manner with which the Commissioner of the Burdwan Division, Mr. C. E. Buckland, C.S., C.I.E., was pleased to treat me during his inspection of the Municipality on the 6th January, 1897.

MURRAY TRUST BILL.

The Hon'ble MR. FINUCANE presented the Report of the Select Committee on the Bill to enlarge the scope of the Charitable Trust created by the Will of the late Mrs. Sally Murray, and moved that the Report be taken into consideration. He said:—

"The Select Committee met and their report was in circulation and had been in the hands of Hon'ble Members for some time. The Committee had no changes to propose in the Bill, and, as I believe there can be no objection to its provisions, I now move that the Report be taken into consideration."

The Motion was put and agreed to.

The Hon'ble MR. FINUCANE also moved that the Bill be passed.

The Motion was put and agreed to.

PUBLIC DEMANDS RECOVERY ACT, 1895, AMENDMENT BILL.

The Hon'ble MR. FINUCANE also presented the Report of the Select Committee on the Bill to amend the Public Demands Recovery Act, 1895. He said :—

"The Select Committee met on numerous occasions and carefully considered the provisions of the Bill. Their Report has only just been circulated, and it is proposed at the next meeting to take the clauses of the Bill into consideration, and I hope that on that occasion the Bill will also be passed."

CHUTIA NAGPUR TENANCY BILL.

The Hon'ble Mr. Grimley moved that the Bill to regulate the enhancement of rents, the commutation of predial conditions or services, and the registration and resumption of intermediate tenures, in parts of Chutia Nagpur be referred to a Select Committee consisting of the Hon'ble Sir Charles Paul, the Hon'ble Mr. Risley, the Hon'ble Mr. Finucane, the Hon'ble Mr. Wilkins, the Hon'ble Mr. A. M. Bose, the Hon'ble Rai Eshan Chundra Mittra Bahadur, the Hon'ble Mr. M. S. Das and the Mover. He said:—

"I have already given a brief sketch of the land-question in Chota Nagpur from the earliest time when the Kols cleared the jungle and became the first cultivators of the soil down to the year 1887, and with your permission, Sir, I will now resume the story. In that year the Mundas and Uraons, who had been most persistent in memorialising Government, began to withhold payment of rents, asserting the existence of a decree which had been granted by the Home Government, but suppressed by the authorities in India, to the effect that they were the maliks of the soil and in no way bound to pay rent through any intervenor, but direct to Government. This movement seems to have been made by members of the German Lutheran Church, who at the same time presented a petition to the heads of that Mission requesting their assistance in support of their claims. When the Missionaries declared their inability to support them, they took umbrage and threatened to sever their connection with the Mission, and began to abuse the Missionaries, and went so far as to accuse them of having, in collusion with the authorities, stolen and secreted the decree. The ringleaders of the movement then proceeded to call meetings in order to induce the people to secede from the Church, to collect subscriptions, and to excite them to take possession of the majhihas land.

"The agitation gave much anxiety to the local authorities, but was eventually checked and kept under until the beginning of the cold season of 1889, when the unsettled relations between the Kols and their landlords again began to attract attention. This time, however, the excitement arose out of the action of Roman Catholic converts, who were reported to be moving about the district in large bands and compelling people to become Christians by cutting off their *chundi* or topknot of hair, as well as by threats of damage to their crops. The rapidity with which the so-called conversion of vast multitudes was effected caused much alarm in the minds of the zamindars, who began to fear for their crops as the harvest season was at hand, and some disturbances took place, and the aid of the Military Police had to be called in and various other repressive measures were resorted to. An enquiry was made into the cause of the agitation, and the conclusion arrived at by Government was that the spirit of antagonism between the landlords and raiyats was so strong and deep-rooted, and so generally diffused throughout the district, that there was no prospect of the parties arriving by themselves at any amicable settlement. The fault of the zamindars was that of the Dutch—in giving too little and asking too much—while the raiyats in some parts were even worse, ignoring the zamindars, refusing to pay rent, declining to cultivate the majhihas lands or to render any kind of service, and seeking to go back several centuries and revert to a time when Rajas and rents were unknown. In order to bring about a *modus vivendi* between the parties, it became necessary to notify to zamindars that they would not be permitted to exact labour from their tenants without any limits whatever, and to warn the latter of their unreasonable conduct in refusing to render service really due; to

this end, in my capacity as Commissioner, I issued a Proclamation drawing general attention to the custom of the country as recognised by Government and the Courts, and warning zamindars of the penal consequence of forcibly exacting labour in excess of the amount prescribed by custom, and urging the raiyats to perform their customary tasks willingly and ungrudgingly. An officer was also deputed to make enquiries in certain of the villages in the disaffected parts, as to the character and extent of these disputes, but these measures, though effectual in restoring order and in showing both parties that their claims were receiving attention, could not be expected to have a lasting result. In the meanwhile, I was in correspondence with Government as to the best means of bringing about a better understanding between landlord and tenant. I will not weary the Council by reciting the details of that correspondence, but the conclusion arrived at, with the concurrence of the Government of India, was that the object in view might be attained by extending the Bengal Tenancy Act to Chota Nagpur and giving Government the power of ordering commutation of services whenever it considered that the adoption of such a course would be calculated to avert serious dispute.

"The existing disputes chiefly fall under three heads—

(1) The assessment of rent on excess lands, that is, certain lands which the holders have somehow managed to retain possession of without payment of rent after failing to prove a bhuinhari title;

(2) the enhancement of rents paid by the tenants; and

(3) the exaction of excessive service and rakumats by the zamindar. The settlement of the first two classes of disputes will be much facilitated by the introduction of the Bengal Tenancy Act into Chota Nagpur, while, as regards the last, the main object of the present Bill is the preparation of a record of the predial services and conditions rendered by the tenants and their commutation into money rents when found necessary for the preservation of the peace of the country. The landlords mostly favour the system of services and cesses, and the raiyats are not opposed to it when they are on good terms with their zamindars. There is therefore no need for interference when the parties can arrange their differences amicably among themselves. It is not proposed, then, to make commutation absolutely obligatory, but only where the parties have recourse to the authorities to settle their disputes, or where the disputes are likely to induce a breach of the peace. This is provided for in Chapter III of the Bill. It may at first sight appear that the provisions of this Chapter trench on those of Chapter X of the Tenancy Act, and that two concurrent procedures will, if this Bill be adopted, be provided for the same object; but this is not strictly correct: for whereas Chapter X of the Tenancy Act requires a survey to precede the record of rights, a survey is not indispensable under Chapter III. Where there has already been a regular survey, as in the Khalsa villages of the Chota Nagpur estate in the Lohardaga district, in the Barkagarh estate in the same district, and in the Dhanwar estate in Hazaribagh, a fresh measurement will be unnecessary. It will equally not be required where there is no difference of opinion between the zamindar and the raiyats as to the quantity of land held, whether such quantity is expressed in bighas or acres, or in the local standard of annas, powas, khuris, or kats. As to the rates, conditions, and predial services, the Revenue Officer can certainly ascertain and enter these in the record without measuring the land. It would undoubtedly be an advantage to have a survey before a record is made, but the survey would often entail a heavy cost, and it must be borne in mind that in Chota Nagpur the zamindars and tenants are comparatively very poor, and that few of them would be able to afford the expenditure. The record of existing rents is indispensable, because it is provided in the Bill that in commuting predial conditions and services, the Revenue Officer shall limit the money value of them to one-fourth the existing rent paid by each tenant concerned, a limit of this kind being necessary in order to prevent the incidence of commutation falling heavily on raiyats with small rentals. Where there are chronic disputes as to the existing rents, while it will be the duty of the Revenue Officer to do his best to ascertain and record what those rents are, it is not necessary to make any

provision in the Bill for the determination of new, fair and equitable rents. Where such a course is found necessary, the provisions of the Tenancy Act should be followed. In the present Act a distinction is maintained between executive proceedings and suits, appeals in the former being dealt with by Revenue Officers, and in the latter by Judicial Officers, and it has been thought necessary to preserve a like distinction as regards the proceedings under this Chapter. While ordinarily an appeal will lie to the Commissioner, and both the Commissioner and the Board have powers of revision, the Bill provides that, where any question of title or status or right of possession to land is at issue, an appeal shall lie from the order of the Commissioner to the High Court. Section 16 of the Bill provides for the defraying of the costs of commutation proceedings and follows section 114 of the Tenancy Act, with the difference that it authorises the Revenue Officer to require a deposit in advance from the person applying for commutation.

"Chapter II of the Bill is a reproduction with a slight modification of sections 19 and 20 of the present Act, which prescribe the incidents as regards liability to enhancement of certain tenures peculiar to Chota Nagpur. The holders of *khuntkati* tenures are men whose ancestors by their own exertions cleared the forest by cutting away the *khunt* or stumps of trees, and brought the land into cultivation. Korkar, which is also known by the other terms mentioned in section 5, is low rice land which has been prepared from high land by the expenditure of much labour. All these lands have special privileges as regards liability to enhancement of rent. Take Korkar for instance. The rent cannot be enhanced except under the terms of a written contract, or in accordance with the custom of the village. But in practice it is difficult to prove what the general custom of a village is, and therefore it is proposed to alter the law by providing that, where the custom cannot be ascertained in a particular village, the custom in the neighbouring village may be considered.

"Chapter IV relates to the registration and resumption of intermediate tenures, which are defined in Chapter I to mean a dependent taluk, and any other permanent or heritable interest in land intermediate between the zamindar and the cultivator and to include a resumable tenure. A definition is given of a 'resumable tenure' so as to include a large class of tenures peculiar to Chota Nagpur, which owe their origin to grants made by the Rajas, and which are held conditionally on the survival of a male heir of the original grantee. The Chapter has been added to the Bill with a view to remove difficulties under which zamindars and tenure-holders in Chota Nagpur both labour. The matter is somewhat complicated, but it may serve to elucidate it if I quote from a description of this Chapter which I gave as Commissioner in a letter addressed to Government.

"The zamindar requires that all transfers of under-tenures within his zamindari should be registered in his sarishta, so that he may have no difficulty in finding out the person who is responsible to him for the rent of the under-tenure. Section 34 of Act I (B.C.) of 1879 arms him with a very efficacious method of enforcing registration of transfers by succession or inheritance. This section can be taken advantage of by any one obtaining possession of a taluk or tenure by succession or inheritance only, be the taluk or tenure one saleable under section 123 or one in which the right and interests only of the tenure-holder are saleable under section 124. Section 35 would seem to indicate that the transfer by private sale of a transferable tenure or taluk, saleable absolutely under section 123, can also be registered under section 34; but in the case of tenures held conditionally on the survival of male heirs of the original grantees, transfer by private sale cannot be registered under sections 34 and 35, even if the transferees be willing to have their names registered, unless the zamindar chooses to do so on receipt of a large bonus in the shape of a *salami*. Again, while mukarrari and other permanent tenures, which are saleable under section 123, when sold for arrears of rent, are sold free of all encumbrances created by the tenure-holder, the effect of the existing law is that jagirs and other tenures which are held conditionally on the survival of male heirs of the original grantees, and which are admittedly of an inferior status when they fall into arrears, cannot be sold free of all encumbrances by the grantees or their

male heirs. In such tenures only the rights and interests of the grantees or their male heirs are saleable. The result of this anomaly is that, while a zamindar can, under the existing law in Chota Nagpur, very easily recover arrears of rent due by a permanent transferable tenure, by putting it up to sale in execution of a decree for arrears of rent, and selling it free of all encumbrances created by the tenure-holder, he has no such means of recovering his arrears from the holders of tenures held conditionally on the survival of male heirs, for it very often happens that, knowing the defect in the existing law, the grantees or their male heirs let out their tenures in sub-lease or mortgage, reserving only a nominal rent, which is often less than the rent they have to pay to the superior landlord. For instance, A, the jagirdar of a tenure, has to pay an annual rent of Rs. 100 to his superior zamindar, but he lets out his whole tenure either in mukarari or zaripeshgi for a nominal rent of Rs. 5 to B. B enjoys the rents and profits derived from the tenure and pays only Rs. 5 per annum to A. But A defaults in paying the Rs. 100 payable to his superior landlord. The superior landlord sues A and obtains a decree against him and puts up his tenure to sale under section 124 of Act I (B.C.) of 1879. No one comes forward to purchase the tenure, for it is only the rights and interests of A which can be sold under that section, and the purchase of these means the acquisition of the right of receiving Rs. 5 per annum from B, with a liability of paying Rs. 100 per annum to the superior landlord. To remove this anomaly in the rules framed for carrying on the sale of the rights and interests of an under-tenure-holder of the class referred to in section 124 of Act I (B.C.) of 1879, under instructions of the Board of Revenue, provision was made for making B, or any other sub-tenure-holder under him, a party to the suit to be instituted by the zamindar for the recovery of the rents due to him from A. It was held that when section 124 authorised the sale of the right and title of any person in the tenure, the rights and interests of any subordinate tenure-holder under A can be sold under that section, but that, in order to enable the zamindar to effect such sale, it is essential that he should make all such sub-tenure-holders parties to the suit to be instituted by him against A. The High Court of Calcutta, however, has held that such a procedure is perfectly illegal and is not authorized by law.

* * * * * * *

"A purchaser can be easily ousted from his holding in the event of a collusion between the zamindar and the original jagirdar or his male heirs. The purchaser has no right to apply for the registration of his name in the zamindar's sarishta, neither does the zamindar consider it safe on his part to admit him to registration, for, by doing so, he endangers his right of resumption in the event of a failure of the male heirs of the original grantees. After having once parted with their interests, the original grantees or their heirs cease to have any interest in having their names registered in the event of succession or inheritance in their families, and if the zamindar can induce the heirs of the original grantees to sit idle and keep themselves away, the zamindar can very easily obtain khas possession of the tenure. The power given by section 34 of Act I (B.C.) of 1879 is a tremendous lever in the hands of the zamindar, and can be exercised in a way which can cause ruin to the purchaser of a tenure. The object of Chapter IV of the proposed Bill is to remove the difficulty which the zamindar now labours under in the matter of the recovery of his rents, and at the same time to save purchasers from the inevitable ruin which awaits them whenever there is a succession in the families of the original grantees and the heirs of the latter are bought off by the zamindar. It will make all tenures held conditionally on the survival of male heirs of the original grantees freely transferable, as any other permanent under-tenure saleable under section 123 of Act I (B.C.) of 1879, and will give the purchasers the privilege of having their names registered in the zamindar's sarishta and of enjoying their tenures so long as there are male heirs of the original grantees, and so long as they pay the rents due to the zamindar with regularity, and at the same time of preserving the zamindar's right of resumption on failure of male heirs of the original grantees intact.

"With this explanation of the provisions of the Bill, I beg to move that it be referred to a Select Committee."

The Hon'ble BABU GURU PROSHAD SEN said:—"I do not understand why it should be necessary for the Government to take more powers under this Bill. Ordinarily parties have got the right to move for commutation of services under section 7. It is not the case that the raiyats in Chutia Nagpur are very weak and unable to defend their rights. From the Hon'ble Member's own statement it appears that the Missionaries have taken the raiyats by the hand and are fostering a spirit of independence among them and reviving the traditions of olden times when each person was in a manner the proprietor of the soil which he cultivated, and have encouraged aspirations which are not likely to be realised, and, further, it appears that all the Missions in Chutia Nagpur—the Anglican, the German Lutheran, and the Roman Catholic—are supporting the cause of these Kols. If therefore they thought that commutations would be advantageous to them, they would move for it of themselves. I do not therefore understand why it is necessary to take further powers under section 8 of this Bill."

The Hon'ble MR. M. S. DAS said:—"As the Bill is going before a Select Committee, they will consider the point which has been raised by the Hon'ble Member. I understand that there may be cases in which it may be necessary to exercise such a power in the interests both of zamindars and tenants. But as the learned Advocate-General is here, I would ask whether the provisions of section 14 can legally find a place in this Bill: whether this Legislature has the power to take away the jurisdiction of the Civil Courts?"

The Hon'ble SIR CHARLES PAUL said:—"As this Bill is to be referred to a Select Committee of which I am to be a member, the question can be considered there. I am not prepared to give an opinion at once."

The Hon'ble MR. RISLEY said:—"The Hon'ble Member who spoke last but one has challenged the right of the Government to intervene between zamindars and raiyats in respect of the commutation of predial conditions or services. Having some personal experience in the Chutia Nagpur Division, I can say with confidence that if there is one place in the world where it is necessary to resort to legislation to give a right of intervention in such cases, it is in Chutia Nagpur, where you have a class of raiyats who possess a power of combination and are well able to take care of themselves; and they have been in the past, though I hope not in the future, to some extent supported by the missionaries. If the parties would by combined action come to a settlement, there may be no reason for the Government to exercise the power here proposed to be given. A further reason is that in all the districts of that division the arrangements relating to land are in a state which can only be described as closely approaching to chaos. I know of estates in which there is absolutely no system of land registration, and the unit upon which rent is ascertained is not the bigha or the acre, but by the maund of seed: the people paid their rents in maunds of paddy or other produce. In my memory in certain groups of villages the area of land represented by this arbitrary seed unit varied from 7 to 35 bighas, and the mere fact of the existence of such a state of things is conclusive proof of the necessity for a power of interference to settle disputes whic hin that part of the country often end in actual bloodshed."

The Hon'ble MR. GRIMLEY said:—"I have only one word to add. I pointed out on the very first occasion on which I explained the objects and reasons of this Bill, that section 25 of the existing Act I (B.C.) of 1879, which provides for the voluntary commutation of predial conditions or services, is not found sufficient where there are serious disputes between the parties, and that it was decided after due consideration to allow the Government to intervene whenever they find it necessary to do so in order to preserve the peace of the country. That is the only reason why it is proposed to give this power."

The Hon'ble THE PRESIDENT said:—"It is only necessary for me to say, with reference to the observation which fell from the Hon'ble Mr. Das as to the power of this Council to touch the jurisdiction of the Civil Courts, that this Bill has been introduced with the sanction of the Government of India, and is therefore quite within the powers of this Council."

The Motion was put and agreed to.

The Council adjourned to Saturday, the 27th instant.

F. G. WIGLEY,
Offg. Asst. Secy. to the Govt. of Bengal,
Legislative Department.

CALCUTTA;
The 23rd February, 1897.

WATER-SUPPLY.

No. 974L.S.-G.—The 20th February 1897.—The following report of the progress made in the several districts of the Chota Nagpur Division in collecting and placing on record the chief facts regarding water-supply is published for general information.

H. H. RISLEY,
Secretary to the Government of Bengal.

No. 471T.—R.C., dated Camp Hazaribagh, the 12th February 1897.

From—A. FORBES, Esq., C.S.I., Officiating Commissioner of the Chota Nagpur Division,

To—The Secretary to the Government of Bengal, Municipal Department.

IN reference to your Circular No. 58L.S.-G., dated the 12th December 1896, requesting submission of quarterly reports of the progress made in each district of this division in collecting and placing on record the chief facts regarding water-supply and the steps, if any, that have been taken by Municipalities and District Road Committees to improve existing sources of water-supply and to open new ones, I have the honour to submit the following report.

2. In Hazaribagh the registers prescribed by the Government Circular Nos. 7 and 8T.M., dated the 15th May 1896, have been opened by the District Road-Cess Committee and the two Municipalities of Hazaribagh and Chatra. The registers opened by the Road-Cess Committee are being tested by the Deputy Commissioner in his cold-weather tours. In the two municipalities mentioned above the sources of water-supply are reported to be sufficient for the requirements of each ward within them. Since the submission of Mr. Marinden's report No. 77R.C., dated the 12th May 1896, a public meeting of zamindars, mukarraridars, thikadars and other influential persons of the district was held at Mr. Herald's invitation, and no fewer than eighty-five of them have promised in writing to increase the available supply of drinking water in their respective zamindaries and *elakas* either by digging new tanks and wells or by deepening and cleansing old ones, and the aggregate sum which they proposed to spend for the purpose amounts to Rs. 35,785. The Deputy Commissioner is now addressing these persons on the subject of taking advances without delay on the terms offered under the rules prescribed in Government notification No. 69, published at pages 26 to 29 of the *Calcutta Gazette* of 13th ultimo.

3. In Lohardaga the District Road-Cess Committee have prepared registers of all sources of water-supply for domestic use in rural villages containing more than 100 houses, and the registers have been forwarded to the District Superintendent of Police for verification and necessary correction. The Committee have further spent Rs. 944 in constructing four pucca wells at Lohardaga, Opa, Lodhma and Jeria, in the compounds of road-side bungalows, and these will be available to the public and to passengers frequenting the roads on the sides of which the bungalows have been constructed. Of the two municipalities in the district, Ranchi and Lohardaga, the former have simply prepared registers of the sources of water-supply existing within it, while the latter, besides preparing such registers, have improved one tank by clearing it of weeds, and have taken steps for clearing another which, though belonging to a private individual, is available to the public for use.

4. In the Palamau district the Road-Cess Committee have not yet been able to prepare the registers prescribed by the Government for want of the necessary particulars which the police were required to furnish. They have, however, undertaken the construction of three road-side wells at Latdag, Kurso and Manatu. Mr. Renny, the present Deputy Commissioner, is taking the necessary steps to give due effect to the Government orders, and expects to show satisfactory progress in the next quarter's report. In the Daltonganj Municipality the general register has been written up and the detailed register is under preparation.

5. In Manbhum the task of compiling the registers for rural villages was made over to the police in conjunction with the District Engineer, but the information collected is, in the opinion of the Deputy Commissioner, Mr. Luson, far from complete, though considerable progress is said to have been made in collecting it. Of the three municipalities in the district, Purulia, Raghunathpur and

Jhalda, the registers have been excellently prepared in the case of the two first, but insufficiently in that of the last, which has not yet completed the detailed register in Form No. II. Steps are being taken to have the information brought up to the required standard in the case of the Jhalda Municipality and of all villages of more than 100 houses outside municipal limits.

No special steps appear to have been taken in this district, in consequence of the opening of these registers, to improve existing sources of water-supply or to open new ones. Mr. Luson writes that he joined the district on return from furlough only two months ago, and his attention had not been drawn to the subject until the 18th ultimo. He promises to do his best now to see that the information tabulated is used to advantage, and that some real work is done to improve the existing sources of water-supply and to provide new ones.

6. In Singhbhum the registers prescribed by the Government have been prepared; but the District Road-Cess Committee, which is unable to maintain the District Roads properly, can ill afford to spend any sum on the improvement of water-supply in rural tracts. In the Government Kolhan Rs. 1,012 have been spent on the improvement of tanks and wells. In the Chaibassa Municipality a sum of Rs. 32 has been spent by the Municipal Commissioners in clearing wells and tanks, and another sum of Rs. 220 has been subscribed by the Thakur of Kharsawan for clearing and improving the Ranibandh, within the same Municipality.

7. It appears to me from the above *précis* that, beyond preparing the prescribed registers, the measures so far taken in the direction of improving the water-supply in the different districts do not as yet hold out much promise of sufficient practical results, except in the district of Hazaribagh, where Mr. Herald has been giving much personal attention to the matter. I am forwarding extracts of his proceedings, noticed in paragraph 2 above, to the other District Officers for their information and guidance.

LIBERALITY OF RAO JOGENDRA NARAYAN ROY.

No. 1001F., dated Calcutta, the 8th February 1897.

From—H. H. RISLEY, Esq., C.I.E., Secy. to the Govt. of Bengal, Financial Dept.,
To—The Commissioner of the Presidency Division.

WITH reference to the correspondence ending with your letter No. $\frac{C}{139}$ Mis., dated the 29th January 1897, I am directed to forward, for your information and for communication to Rao Jogendra Narayan Roy of Lalgola, the enclosed copy of a Notification of to-day's date regarding the establishment of the Rao Mohesh Narayan Roy Serai at Raghunathganj in the Jangipur subdivision of the district of Murshidabad.

2. I am to request that you will be so good as to convey to the donor an expression of His Honour's acknowledgment of his liberality and public spirit. This letter will be published in the *Calcutta Gazette*.

LIBERALITY OF RAI SETAB CHAND NAHAR, BAHADUR, OF AZIMGANJ.

No. 932Medl., dated Calcutta, the 19th February 1897.

From—H. H. RISLEY, Esq., C.I.E., Secretary to the Government of Bengal, Municipal Department,
To—The Commissioner of the Rajshahi Division.

WITH reference to your Memorandum No. 396J., dated the 23rd December 1896, and previous correspondence, relating to the establishment by Rai Setab Chand Nahar, Bahadur, of Azimganj, of a charitable dispensary, within his estate at Setabganj, in the district of Dinajpur, to be maintained from the proceeds, amounting to Rs. 624 per annum, of an endowment of landed property created by him, I am directed to request that the Lieutenant-Governor's thanks may be conveyed to the donor for his liberality and public spirit. Sir Alexander Mackenzie is glad to recognise this evidence of of the Zamindar's wish to provide medical aid for his tenantry. I am to add that there is no objection to the name of the dispensary being changed to the "Lady Mackenzie Setabganj Charitable Dispensary," as proposed by the donor.

2. This letter will be published in the *Calcutta Gazette*.

REPORT ON THE STATE OF THE SALT MARKET FOR THE THIRD QUARTER OF 1896-97.

No. 146B., dated Calcutta, the 13th February 1897.

From—E. H. WALSH, Esq., Secretary to the Board of Revenue, L.P.,

To—The Secretary to the Government of Bengal, Financial Department.

SALT.

THE HON'BLE MR. W. H. GRIMLEY.

I AM directed to submit the following report on the state of the salt market for the third quarter of 1896-97, comprising the months of October, November, and December 1896.

2. The quantity of salt of every description cleared during the quarter under review, amounted to 24,40,628 maunds, against 26,77,294 maunds in the previous quarter, and 27,75,261 maunds in the corresponding quarter of the previous year; and the net amount of duty levied thereon was Rs. 57,12,378, against Rs. 61,68,873 in the previous quarter, and Rs. 65,18,246 in the corresponding quarter of the previous year. In all cases fractions are omitted.

3. The quantity of locally-made salt removed from the golas in Orissa during the quarter under review, and the quantity which remained in store at the close of the quarter, are shown in Table I below:—

TABLE I.

1	2
	Puri.
	Mds.
Balance at the close of the previous quarter ...	4,25,549
Manufactured and added during the quarter ...	.....
Total ...	4,25,549
Sold during the quarter	9,272
Wastage	.....
Total ...	9,272
Balance at the close of the quarter	4,16,277

The total sales of locally-made salt during the quarter under review amounted to 9,272 maunds, against 16,134 maunds in the previous quarter, and 15,248 maunds in the corresponding quarter of the previous year. Duty was levied during the quarter on the full quantity sold.

4. The subjoined Table II shows in detail the importations into the port of Calcutta and the total clearances of sea-imported salt during the quarter under

review, as compared with the figures of the corresponding quarters of the previous two years:—

Total ...	38,73,452	34,09,349	17,11,973	18,63,025	13,63,428

The stock in bond at the close of the quarter was reduced to about one-third of that at the close of the corresponding quarter of the previous year, but there was a marked advance in the shipments of salt for the port of Calcutta, as noted in paragraph 9, being 53,560 tons, against 40,430 tons in the previous quarter and 30,200 tons in the corresponding quarter of the previous year.

6. The despatches of salt from Calcutta by water and the three railways passing the several pass-stations into the interior of the country, both east and west of the river Hooghly, as well as the despatches by steamers and flats during the quarter under review and the corresponding quarters of the previous two years, are shown in table IV below:—

Total ...	11,991 10

8. The quantity of saltpetre removed from the refineries during the quarter on payment of duty, amounted to 6,982 maunds, against 5,315 maunds in the previous quarter and 4,240 maunds in the corresponding quarter of the previous year.

9. The shipments of Liverpool salt for the port of Calcutta, according to published market reports, were as follows :—

	Tons.
October	14,050
November	12,200
December	27,310
Total ...	53,560

It is reported that four sailing ships were *en route* for Calcutta at the close of the quarter, with 13,700 tons of salt from Hamburg.

10. Table V shows the average wholesale price per 100 maunds of Liverpool and other descriptions of salt during each fortnight of the quarter under review :—

Other food-grains, such as jowar, barley, oats, &c.	... ..	.....	10	14
Total ...	33,582	45,709	170,518	2,32,094

As in previous weeks, the chief feature of the import trade of the period under report is the considerable quantity of rice, amounting to 1,40,727 cwts., that was received in Calcutta from Burma. The only ports outside Burma which contributed to the rice trade were Balasore and Chandbali, although the shipments from those places showed a heavy falling off in comparison with that of 1896. The bulk of the imports of gram and pulses was derived from Coconada and Chandbali.

Exports.—In the following statement the total quantity of each kind of food-grains exported by sea during the 2nd week of February 1897 is compared with the figures for 1896 :—

	8TH TO 14TH FEBRUARY			
	1896.		1897.	
1	2	3	4	5
Food-grains.	Cwts.	Mds.	Cwts.	Mds.
Rice	285,200	3,88,189	31,633	43,056
Paddy	594	809	29	39
Wheat	4,024	5,477	113	154
Gram and pulses	24,392	33,200	3,420	4,655
Other food-grains, such as jowar, barley, oats, &c.	9,740	13,257	41	56
Total ...	323,950	4,40,932	35,236	47,960

Foreign Ports.

The export trade in rice with foreign ports fell off from 229,477 cwts. in the corresponding period of last year to 29,462 cwts. during the week under report. The exports by sea in the preceding week were 3,07,464 cwts. With the exception of Ceylon, to which a trifling quantity, namely 1,361 cwts., was shipped against 60,571 cwts. in the preceding year, the only port to which Bengal rice was consigned is Barbadoes in the West Indies, which received 28,072 cwts. against 1,049 cwts. in 1896. To the United Kingdom, Mauritius, Aden, Arabia and Persia, which received largely during the corresponding period of 1896, there were no exports at all.

Indian Ports.

In the case of the coasting trade, the exports of rice decreased from 55,723 cwts. to 2,171 cwts., those of wheat from 4,024 cwts. to 3 cwts., those of gram and pulses from 16,543 cwts. to 2,912 cwts., and those of miscellaneous food-grains from 2,028 cwts. to 11 cwts. The only items worthy of notice in the statement are an export of 1,697 cwts. of rice and 2,664 cwts. of gram and pulses carried to Rangoon, against 1,516 cwts. and 7,735 cwts., respectively, in the corresponding period last year.

Detailed statements showing the sources of supply and the places of destination, both as regards Foreign and Indian ports, are given below.

Statement No. I, showing the Imports of Food-grains into Calcutta from Foreign and Indian Ports during the week ending 14th February 1896 and 1897.

STATISTICS OF THE SEA-BORNE TRAFFIC OF THE MINOR PORTS IN BENGAL IN FOOD-GRAINS.

No. 484Statistics.—The following memorandum and statements are published for general information.

M. FINUCANE,
Secy. to the Govt. of Bengal.

STATISTICAL DEPT.,
The 23rd February 1897.

MEMORANDUM.

THE comparative statements below give statistics of the import and export trade of the minor ports of Chittagong, Narayanganj, Balasore (including both Balasore and Chandbali), Cuttack and Puri during the ten days ending 31st January 1897, as compared with the trade of the corresponding period of 1896 :—

	1897 ...	13,080	30,893	43,973	59,852

Imports.

The import trade of Chittagong showed a rise of 4,332 cwts., which was mainly due to the supply of rice and paddy from Burma Ports. Narayanganj and Balasore also showed an improvement of 147 cwts and 195 cwts. respectively.

Exports.

The falling off in the export trade of Chittagong is chiefly attributable to the cessation of exports of rice and paddy to both Foreign and Indian Ports, which together received, in the corresponding period of 1896, 74,775 cwts. in excess of the shipments during the period now under review. Narayanganj showed a rise of 694 cwts. owing to larger despatches of rice and gram and pulse to Chittagong. The decline of 80,926 cwts. in the case of Balasore was due to smaller shipments of rice, paddy and gram and pulse to both Foreign and Indian Ports. The falling off in the Cuttack trade amounted to 17,826 cwts., no rice was sent thence to Indian Ports, which received 25,675 cwts. in the corresponding period of last year, while the trade of Puri was confined to Colombo, which was supplied with 3,161 cwts. of rice against *nil* in 1896.

Detailed statements showing the sources of supply and the places of destination, both as regards Foreign and Indian ports, are given below:—

MEMORANDUM ON THE IMPORTS AND EXPORTS OF FOOD-GRAINS TO AND FROM CALCUTTA DURING NOVEMBER 1896.

No. 486 Statistics.—THE following memorandum and statements are published for general information.

STATISTICAL DEPARTMENT,
The 23rd February 1897.

M. FINUCANE,
Secy. to the Govt. of Bengal

The total quantity of food-grains imported into and exported from Calcutta during the month of November 1896, as compared with the corresponding month of the previous year, is shown below:—

Specification of routes.	Imports.		Exports.	
	1895. Mds.	1896. Mds.	1895. Mds.	1896. Mds.
By internal routes, *i.e.*, by rail, road, river (country boat and steamer) and canals	13,97,004	11,83,043	1,72,798	5,07,255
By sea (in both foreign and coasting vessels)	1,02,822	3,09,165	9,80,684	5,24,390
Total ...	14,99,826	14,92,213	11,53,482	10,31,645

There was very little fluctuation in the total import trade, though in the trade carried by internal routes there was a decrease of 15·3 per cent. as compared with November 1895. The falling off in the internal trade was principally in rice and wheat, and this decline is counterbalanced by increased importation of rice and gram and pulses by sea. In the total export trade the decline was 10·5 per cent., while the quantity exported by internal routes showed the marked increase of 193·5 per cent. In the exports by sea there was a decrease of 46·5 per cent.

Imports.—The table below shows the total trade in each kind of food-grains imported during the month by all routes:—

	November 1895. Mds.	November 1896. Mds.
Rice	7,93,273	7,93,392
Paddy	59,760	1,55,103
Wheat	2,34,580	1,00,685
Gram and pulses	3,66,931	3,83,364
All other kinds of food-grains ...	45,282	59,669
Total ...	14,99,826	14,92,213

Of these imports, 13,97,004 maunds were received by internal routes during November 1895, and 11,83,048 maunds during same month in 1896, the sea-borne imports during those two months being 1,02,822 maunds and 3,09,165 maunds respectively. The increase in the paddy trade was due to larger imports, principally from Midnapore (67,678 maunds against 12,650 maunds) and from Burdwan (29,298 maunds against 4,309). The falling off in the inland trade was due to short despatches of rice mainly from Backergunge, (16,434, maunds against 2,31,440 maunds), and also to short consignments of wheat from the North-Western Provinces and Oudh, which exported only 12,840 maunds, against 1,54,241 maunds in November 1895.

Exports.—The export trade in each staple of food-grains is shown in the following table:—

	November 1895. Mds.	November 1896. Mds.
Rice	8,28,025	6,25,112
Paddy	35,410	1,10,421
Wheat	15,772	15,969
Gram and pulses	2,53,519	2,36,776
All other kinds of food-grains	20,756	43,367
Total ...	11,53,482	10,31,645

There was a decline of 10·5 per cent. in the total exports owing chiefly to smaller exports by sea, which aggregated only 5,24,390 maunds against 9,80,684 maunds, while there was a marked increase in the inland export trade of 3,34,457 maunds, and this increase was general in all grains, and was not limited to any part of the Lower Provinces of Bengal. The despatches to Nadia were 44,554 maunds against 9,404 maunds, and to Jessore 22,228 maunds against 1,177 maunds. The exportation to Assam was 1,20,705 maunds against 36,355 maunds, and to the North-Western Provinces and Oudh 1,07,641 maunds against only 25 maunds during the month of November 1895.

Statement I showing the several routes followed by the trade in food-grains imported into and exported from Calcutta during the month of November 1895 and 1896.

EXPORTS OF FOOD-GRAINS BY RAIL FROM HOWRAH.

No. 487-Statistics.—The following statement, showing the quantities of rice and other food-grains exported by rail from Howrah during the period 1st January to 13th February 1897 inclusive, is published for general information.

It is observed that the whole quantity of food-grains carried from Howrah to stations in these provinces was only 1,35,690 maunds; whereas more than four times that quantity—5,96,809 maunds—were exported to the North-West Provinces and Oudh. The exports to other provinces aggregated 1,98,376 maunds.

It has not as yet been found possible to compile returns of the shipments of food-grains from Kidderpore, Chitpore, and the Port Trust Railway; but it is expected that such returns will shortly be ready for publication.

M. FINUCANE,
Secy. to the Govt. of Bengal.

STATISTICAL DEPT.,
The 23rd February 1897.

Statement showing the quantities of rice and other food-grains exported from Howrah by rail from 1st January to 13th February 1897.

COMPARATIVE STATEMENT OF THE PRICES OF FOOD-GRAINS.

RETAIL prices of common rice and other food-grains in the several districts of Bengal and in the neighbouring districts of the North-Western Provinces during the first and second fortnights of January and the first fortnight of February 1897, as compared with the corresponding fortnights of January and February in 1896, are published for general information. The latest available prices of common rice in Cachar and Sylhet are also published.

M. FINUCANE,
Secy. to the Govt. of Bengal.

REVENUE DEPARTMENT, *the 23rd February 1897.*

WEATHER AND CROP REPORT.

For the week ending the 22nd February 1897.

Burdwan.—Rainfall at Sadar 0·84, Kalna 1·40, Katwa 0·73, Raniganj 0·41. Weather seasonable. The recent rain has done much good to the standing *rabi* crops, and ploughing is now going on briskly in many parts. Sugarcane is being pressed. Condition of cattle good. Fodder and water sufficient. Common rice selling as follows:—

	Srs. c.	Srs. c.	
Sadar	10 0	to 12 0	per rupee.
Kalna	10 8	to 11 0	
Katwa	10 10	to 10 15	
Raniganj		10 4	

Birbhum.—Rainfall at Sadar ·15, Rampur Hât ·06. Weather seasonable. Crushing of sugarcane going on. Price of rice at Sadar 9¾ seers, and Rampur Hât 11¼ seers per rupee.

Bankura.—Rainfall at Bankura ·83, Indus ·85, Khatra ·44, Maliara ·57, Gangajalghati ·67, Kotalpur ·5, Raipur ·48, Vishnupur ·82. Weather cloudy at the beginning of the week. The recent rain has started ploughing. Pressing of sugarcane going on. Fodder and water sufficient except in a few places. Cow-pox reported. Common rice selling at Bankura and Vishnupur at 11 seers per rupee.

Midnapore.—Rainfall at Sadar 0·77, Contai 1·19, Tamluk 0·42, Ghatal 0·27. Weather seasonable. Prospect of indigo better Sugarcane is still being pressed. *Rabi* crops are being collected. Threshing of *aman* still continues. Transplantation of *boro* finished. Cattle-disease reported from Salbani, Binpur, and Naraingarh. Fodder and water sufficient. Common rice selling as follows:—

	Srs.	
Sadar	11	per rupee.
Contai	12 to 13	
Tamluk	10 to 12	
Ghatal	10 to 11	

Hooghly.—Rainfall at Sadar ·37, Serampore ·10, Jahanabad ·33. Rain too late to do much good to *rabi*. Rice sells from 8½ to 10 seers per rupee.

Howrah.—Rainfall at Sadar ·11, Uluberia ·16. Weather seasonable. Prospects of *rabi* crops not good. Pressing of sugarcane still going on. Fodder and water sufficient. Common rice sells at 9 to 10½ seers per rupee.

24-Parganas.—Rainfall at Sadar ·16, Barasat ·20, Basirhat ·05, Diamond Harbour ·30. Weather warmer with cloud. Prospects of standing crops poor. Ploughing going on for the next crops. Fodder and water sufficient. Common rice sells as follows:—

	Srs. c.		
Sadar	9 to 11	0	per rupee.
Barasat	9	0	
Basirhat	10	0	
Diamond Harbour	10	10	

Nadia.—Rainfall at Sadar ·46 Kushtea ·45, Meherpur ·26, Chuadanga ·33, Ranaghat ·65. Weather fair and seasonable. Prospects of standings crops poor. Rain has facilitated the ploughing of *aus* and jute lands. Water-supply generally deficient. Fodder not sufficient in some places. No cattle-disease. Common rice sells from 8 to 10 seers per rupee. Latest price of rice where test-works are open is 9 seers per rupee. Numbers attending test-works are as follows:—

14th February		1,001
15th „		920
16th „		590
17th „		623
18th „		618
19th „		610
20th „		654

Number of persons who received relief at police-stations during the week—men 70, women 231, children 126—total 427. Numbers on relief-works on Saturday, 20th February—Sadar subdivision—men 2,356, women 843, children 2,043—total 5,242; Meherpur subdivision—men 493, women 83, children 108—total 684; Kushtia subdivision—men 403, women 110, children 60—total 573. Gratuitous relief—men 279, women 891, children 286—total 1,456.

Murshidabad.—Rainfall at Sadar 0·18, Kandi 0·23, Jangipur 0·12. Weather seasonable. Prospects of *rabi* crops not favourable. Gram is likely to be a good crop in Jangipur subdivision. Indigo and mulberry doing well. Pressing of sugarcane still continues. Fodder sufficient. Common rice sells as follows:—

				Srs.	
Sadar	...	...	...	10½	per rupee.
Kandi	...	...	...	11	
Jangipur	...	...	...	11	

Three test-works opened.

Jessore.—Weather cloudy with drizzling rain at beginning of week. Rainfall at Jessore 0·58, Jhenida 0·33, Magura 0·34, Narail 0·40, Bangaon 0·57. Harvesting of *rabi* crops is almost over. The recent rain has done good to the sowing of *til* and to *boro* seedlings. More rain wanted. Fodder and water available. Sporadic cases of cattle-disease reported from Bangaon. Common rice sells as follows:—

				Srs.	
Jessore	...	...	...	9 to 10½	per rupee.
Jhenida	...	...	...	9½	
Magura	...	...	...	9½ to 10	
Narail	...	...	...	10½	
Bangaon	...	...	...	9 to 10	

Khulna.—Rainfall at Khulna 0·21, Bagerhat 0·11, Satkhira nil. Weather getting hot. *Boro* doing well. Sowing of *til* going on. Common rice sells as follows:—

				Srs.	
Khulna	...	...	...	10 to 11	per rupee.
Bagerhat	...	...	...	12	
Satkhira	...	...	...	10	

Numbers employed on four relief works—men 274, children 77—total 351. Gratuitous relief— men 107, women 374, children 246—total 727. Wages calculated at 10 seers per rupee. No cattle-disease. Fodder available. Water getting scarce.

Rajshahi.—Rainfall at Sadar 0·15, Nator 0·07, Naugaon 0·16. No change in the prospects of the *rabi* crops. Transplantation of *boro* continues. Lands are being prepared for *bhadoi* rice and jute. Fodder available everywhere. Scarcity of drinking-water reported from some places in Rajapur outpost. Price of rice ranges between 8¾ to 12 seers per rupee. Two of five test-relief-works closed on Saturday, the 20th. Report from one not received. Numbers employed on two relief-works—men 509, women nil, children 71—total 580. No gratuitous relief. Price of rice at relief-works, 10 seers per rupee.

Dinajpur.—No rain. Weather seasonable. Condition of standing crops fairly good. No report of any cattle-disease, nor any complaint for fodder and water. Common rice sells from 9 to 12 seers per rupee.

Jalpaiguri.—No rain. Days warm, nights cool. Preparation of land for *betri* rice commenced. Prospects of standing crops favourable. No complaint of fodder and water. Average price of common rice, 8½ seers per rupee.

Darjeeling.—No rain at Sadar and Kurseong, ·03 at Siliguri. Weather seasonable. Hills—Wheat and barley progressing; *tori* and potatoes being harvested. Terai.—*Haimanti* paddy being threshed; ploughing for jute, *bhadoi* rice, and sugarcane going on. Price of coarse rice:—

				Srs.	
Hills	...	...	...	7 to 8	per rupee.
Terai	...	...	...	9 to 11	

Bhutta, 13 seers per rupee.

Rangpur.—No rain. Lands being prepared for *aus* and jute. Early *aus* being sown in places. Harvesting of mustard nearly finished. Prospects fair. Common rice selling at 8 to 10 seers per rupee. Fodder and water sufficient.

Bogra.—Slight rain in the district. Average ·20 inch. More rain urgently wanted for *aus* and jute sowing. Fodder and water sufficient. Common rice selling at head-quarters 10½ seers, and in the interior from 8½ to 12 seers per rupee.

Pabna.—Rainfall at Sadar 0·50, Sirajganj 0·92. Weather seasonable. Condition of crops partly improved by fall of rain. Price of common rice varies from 8 to 10 seers per rupee. Fodder sufficient.

Dacca.—Rainfall at Sadar ·25, Manikganj ·46, Narainganj ·21, Munshiganj nil. Weather seasonable. Prospects of standing crops not very favourable, but recent rain has done some good. Fodder available. No cattle-disease. Common rice sells at 10 to 11 seers per rupee.

Mymensingh.—Rainfall at Sadar 1·32, Jamalpur 0·13, Kishorganj 0·75, Netrokona 0·33, Tangail nil. Weather getting warmer. The rainfall will facilitate preparation of lands. Common rice sells from 9 to 12 seers per rupee. Drinking-water at present sufficient.

Faridpur.—Rainfall at Sadar ·03, Goalundo ·30, Madaripur ·18. Weather seasonable. Prospects in Madaripur good, elsewhere as before. More rain wanted. Common rice selling at 9¾ to 11 seers per rupee. Fodder and water available.

Backergunge.—Rainfall at Sadar and Patuakhali nil, at Pirojpur and Bhola ·51. Weather seasonable. Prospects of standing crops fair. No cattle-disease. Common *aman* rice selling at 9 to 12 seers per rupee.

Tippera.—Rainfall at Sadar ·09, Chandpur ·16, Brahmanbaria nil. Weather bright and cool for the season. Prospects of *rabi* crops not improved. Fodder and water available. Prices of rice:—

		Srs.	
Sadar	10 to 11½	}	per rupee.
Brahmanbaria	10 to 12		
Chandpur	10½ to 11¼		

Noakhali.—Rainfall at Sadar nil, Feni ·05. Prospects of crops fair. No cattle-disease. Fodder and water available. Price of rice 9 to 11 seers per rupee.

Chittagong.—No rain. Weather hot with occasional clouds. *Rabi* crops suffering from want of rain. Water and fodder sufficient. Rice selling at 8 to 10 seers per rupee.

Patna.—Rain at Bihar 0·05 only. Recent rain has improved prospects of late *rabi* sowings and of millets and sugarcane now being planted, and has destroyed insect-blight in Barh. Slight damage done to crops, ripe or harvested. Prices rising slightly in Barh. Fodder and water for cattle sufficient except green fodder in Bihar. Price of common rice at Patna, 11 seers per rupee. Numbers on gratuitous relief on Saturday, 20th February—men 17, women 19, children 4—total 40.

Gaya.—Rainfall at Aurangabad ·49; other stations nil. Harvesting of *rabi* commenced Prospects very good. Price of common rice at Sadar, 10½ seers per rupee.

Shahabad.—No rain. *Rabi* harvest commenced. Poppy prospects continue favourable; lancing and leaf-making in progress. Prices almost stationary. Numbers on relief-works in Bhabhua on Saturday, 20th February—men 456, women 414, children 305—total 1,175; gratuitous relief—men 1,303, women 2,550, children 1,929—total 5,782.

Saran.—No rain. *Rabi* doing well. Mustard, rahar and peas ripening. Average price of *makai* 9 seers 14 chitaks per rupee. Numbers on relief-works on Saturday, 20th February—Sadar subdivision—men 738, women 949, children 1,273—total 2,960; Gopalganj subdivision—men 2,110, women 2,212, children 3,534—total 7,856; Siwan subdivision—men 9,250, women 15,470, children 6,705—total 31,425. Gratuitous relief—Sadar subdivision—men 1,200, women 4,495, children 1,125—total 6,820; Gopalganj subdivision—men 1,272, women 3,636, children 1,318—total 6,226; Siwan subdivision—men 548, women 1,707, children 471—total 2,726. Chapra Town—Gratuitous relief—men 121, women 547, children 60—total 728; Revilganj Town—Gratuitous relief—men 19, women 62, children 6—total 87; Chapra poor-house 101. Hatwa relief-works 5,984, poor-houses 488, doles 302. Manjha poor-houses 49, doles 156. Siwan poor-house 56 (men 10, women 21, children 25).

Champaran.—No rain. *Rabi* crops good. Poppy improving. Opium gathering commenced. Outturn good. Slight rise in prices: Common rice 9 seers, maize 10 seers. Numbers on relief-works on Saturday, 20th February—men 47,073, women 37,035, children 23,394—total 107,502; gratuitous relief—men 5,244, women 10,354, children 12,282—total 27,880. Bagaha figures, about 15,000 workers and 5,000 gratuitous, not received, excluded.

Muzaffarpur.—No rain. Prospects fair. Prices are—Burma rice 9½ seers, common rice 8½ seers, wheat 7 seers, *makai* 10 seers, barley 11 seers, gram 10½ seers, *rahar* 12 seers. *Makai* and *rahar* fix the relief prices. Numbers on relief-works on Saturday, 20th February—Sadar subdivision—men 8,927, women 2,800, children 1,674—total 13,401; Sitamarhi subdivision—men 1,189, women 468, children 275—total 1,932; Hajipur subdivision—men 1,801, women 2,040, children 2,181—total 6,022. Gratuitous relief—Sadar subdivision—men 231, women 561, children 331—total 1,123; Sitamarhi subdivision—men 836, women 1,232, children 1,286—total 3,348; Hajipur subdivision—men 26, women 88, children 16—total 140. Gratuitous relief figures for Majorganj, Bokraha, and Raipura Circle not received—estimated figures are—men 65, women 78, and children 25. Muzaffarpur poor-house—men 31, women 6, children 7—total 44.

Darbhanga.—No rain. Prospects of standing *rabi* crops continue to be fair. Peas are ripening, and in places are being harvested. *Rahar* attaining maturity. Common rice selling at 9 seers and *makai* 10 seers per rupee. Numbers on relief-works on Saturday, the 20th February—Sadar subdivision—men 20,542, women 29,817, children 8,993—total 59,352; Madhubani subdivision—men 31,577, women 28,399, children 13,498—total 73,474; Samastipur subdivision—men 2,210, women 3,053, children 975—total 6,238. Gratuitous relief—Sadar subdivision—men 5,141, women 13,420, children 7,376—total 25,937; Madhubani subdivision—men 4,453, women 12,929, children 7,511—total 24,893; Samastipur subdivision—men 123, women 199, children 121—total 443. Darbhanga Raj—relief works—men 14,525, women 4,795, children 1,867—total 21,097; gratuitous relief—men 2,525, women 5,800, children 3,896—total 12,221.

Monghyr.—Rainfall at Sadar nil. Weather cold with high west wind. Standing crops very promising. Mustard and rape-seed are being gathered. Outturn good. Opium slightly affected by strong west wind. Common rice selling as follows:—

	Srs. c.	
Monghyr	9 to 11 0	per rupee.
Begusarai	9 8	
Jamui	8 to 10 0	

Bhagalpur.—Rainfall at Sadar nil. Weather seasonable and healthy. The recent rain is said to have done some harm to mango blossoms. Westerly wind is beneficial to the *rabi* crops. Deficiency of water reported from one part of Supaual subdivision. Price of common rice has risen from 11 seers to 10 seers 10 chittaks per rupee in Banka; 11 to 10 seers in Supaul; 10 seers 12 chittaks to 10 seers 2 chittaks in Sadar. It remains stationary at 10 seers in Madhipura. Price of *marua* in Supaul has risen from 15 to 14 seers per rupee. No cattle-disease. Fodder sufficient. Numbers on relief-works on Saturday (20th)—Madhipura subdivision—men 2,929, women 1,753, children 632—total 5,314; Supaul subdivision—men 274, women 367, children 253—total 894. Gratuitous relief—Madhipura subdivision—children 251, Supaul subdivision—man 1, and children 34.

Purnea.—Rainfall at Sadar nil. Harvesting of mustard and tobacco nearly finished. Outturn fair. Standing *rabi* crops doing fairly well. Lands are being ploughed for next *bhadoi* crops. Fodder and water sufficient. No cattle-disease. Prices of common rice:—

	Srs.	
Sadar	9½	per rupee.
Kishanganj	10	
Araria	11	

Malda.—Rainfall at Shibganj ·14. Weather getting hot. Wheat and barley ripening. No cattle-disease. Common rice selling at 8½ to 11 seers per rupee. Fodder sufficient. Want of drinking-water in some places reported from Gomastapur and Shibganj thanas.

Sonthal Parganas.—Rainfall at Sadar ·16. Weather clear with strong west wind. *Rabi* fair in Godda and Pakour; otherwise prospects unchanged. Prices of food-grains stationary. Fodder getting scanty. Water-supply sufficient.

Cuttack.—Rainfall 0·64 Rain has benefited the *dalua* and *jhaimung*. Cattle-disease in places. Fodder sufficient. Rice only available in some places in small quantities. Common rice sells at:—

	Srs. c.	
Cuttack	11 13	per rupee.
Jajpur	14 7	
Kendrapara	14 7	
Banki	15 12	

Balasore.—Rainfall at Sadar 1·87. Anxiety of loss of standing *rabi* crops with fear of scarcity of water and fodder removed by rain. *Sarad* rice being threshed; *dalua* rice flourishing well, and is in ear in places; sugarcane being pressed. Price of rice varies from 12 to 16 seers per rupee in the interior. Rice sells at 12 and 13 seers per rupee at Balasore and Bhadrak respectively. Fodder and water sufficient.

Angul.—Rain on 16th and 17th No crop on the ground except garden vegetables. *Kulthi* and *china* harvested Cultivators engaged in ploughing. Condition of people good. Cattle-disease continues. Fodder sufficient. Price of rice stationary.

Puri.—Rainfall at Sadar 4·25, Khurda ·62, Satpura 5·12, Banpur 3·70, Pipli ·30. *Dalua* and *mug* growing fairly well. *Mandia* ripening. Land being ploughed for next *sarad* and sugarcane crops. Fodder and grains scarce in tracts adjoining the Chilka, and relief-works have been started. Price of common rice stationary.

Hazaribagh.—Rainfall at Sadar 1·02, Giridih ·32. Weather hot. Pressing of sugarcane almost completed. Prospect of poppy good. *Rabi* fair. Rice sells at 8 to 9 seers per rupee.

Lohardaga.—Rainfall 1·37. State of standing crops good. Ploughing continues. Rice sells at Ranchi 9 seers, and in the interior from 8 to 12 seers per rupee. Fodder and water sufficient. Cattle-disease reported from some police-stations. Grain stocks sufficient for the present.

Palamau.—No rain. Weather bright and becoming hot. Rain of previous week did some damage (not much) to *rabi* in eastern part of district. *Rabi* doing well; if no more rain. *Rabi* and *mahua* should yield well. The price of common rice under 9 seers prevailed in 57 markets, against 37 in previous week; at 9 seers in 21 against 41; and over 9 seers and under 10 seers in 12 against 13. Burma rice is on the way here from Gaya. Number on relief-works—2,602 and on gratuitous relief 409. Cattle-disease reported from Balumath thana.

Manbhum.—Rainfall at Sadar 1·22, Gobindpur ·52. Weather seasonable. Sugarcane being planted in places. Cattle-disease reported from thanas Raghunathpur and Burrar bazar. Fodder and drinking-water both reported to be insufficient in thana Raghunathpur, and the latter in thana Gourangdih. Average price of common rice 10 seers per rupee at Sadar; 9 and 9½ at Gobindpur. Stocks of food-grains sufficient at present. Nine test-works in operation. 2,403 persons on regular gratuitous relief, and about 1,000 more on casual gratuitous relief. Recent rains have softened the soil, and ploughing is in progress throughout the district.

Singhbhum.—Rainfall at Chaibassa 1·70, Chaokradharpur 1·53, Ghatsilla 1·47. Prices stationary. Rice plentiful.

General Summary.—There was general rain in South-West and East Bengal, Orissa and Chota Nagpur during the week. The rain has to some extent benefited the *rabi* crops, and has facilitated ploughing for the autumn crops. Spring rice is doing well. In Bihar the harvesting of *rabi* crops and the gathering of opium have begun. The pressing of sugarcane is still going on. The fodder-supply is generally sufficient. The want of drinking-water is beginning to be felt in some districts. In the distressed districts the prices of the food-grains on which the relief wages are based are—Nadia (common rice) 9 seers, Khulna (common rice) 10 seers, Rajshahi (common rice) 10 seers, Patna (common rice) 11 seers, Shahabad 10½ seers, Saran (Indian-corn) 9 seers 14 chitaks, Champaran (Indian-corn) 10 seers, Muzaffarpur (Indian-corn) 10 seers, Darbhanga (Indian-corn) 10 seers, Bhagalpur (common rice) 10 seers. These figures show a slight fall in Rajshahi and Patna, and a slight rise in Champaran; elsewhere prices were stationary.

The numbers on relief-works and in receipt of gratuitous relief on Saturday, the 20th February, were—

The total fall from 1st January to 20th February 1897 ...		1·63
The average fall of the corresponding period for 24 years, Surveyor-General's Office		1·29

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed, open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

≃ dew; ≡ fog; o, overcast; g, gloomy; d, drizzling rain.

DISTRESS IN THE PATNA DIVISION.

No. 582(Fam.).—The 26th February 1897.—The following are published for general information.

M. FINUCANE,
Secretary to the Govt. of Bengal.

No. 581(Fam.), dated Calcutta, the 26th February 1897.

From—M. FINUCANE, Esq., Secretary to the Govt. of Bengal,
To—The Commissioner of the Patna Division.

IN acknowledging the receipt of your report No. 491F.G., dated the 21st February 1897, with its enclosures, on relief operations in the Patna Division, for the half-month ending the 13th February, I am directed to say that the Lieutenant-Governor has perused it with much pleasure. It shows that every care and attention is being given by yourself and the Collectors to famine relief administration in every detail, with eminently satisfactory results.

2. *Paragraph 45 of your report.*—The Lieutenant-Governor agrees with you in thinking that Mr. Hare's observations on the necessity of having a reserve of both Charge Superintendents and Circle Officers are judicious, and the Lieutenant-Governor hopes that the Collector has already made the arrangements suggested.

3. *Paragraph 51 of your report.*—With regard to Famine Statements D and E (Forms 5 and 7) for the district of Darbhanga, you observe that they probably do not include figures relating to the relief works under the Public Works Department. I am to draw your attention to Government order No. 434-Fam., dated the 13th February 1897, and to request that steps may be taken in future to give figures for works under the Public Works Department, as well as those under the civil officers, in the statements and accounts. The Lieutenant-Governor agrees with you that from the figures abstracted in paragraph 51 of your letter it is clear that more and more control is being gained over the relief-workers, and that the rates per thousand cubic feet of earthwork now arrived at, viz. Rs. 3-1-11 and Rs. 2-12-10, are, if correct, moderate considering that many of the works are tanks.

No. 491F.G., dated Bankipore, the 21st February 1897.

From—J. A. BOURDILLON, Esq., Offg. Commissioner of the Patna Division,
To—The Secretary to the Government of Bengal, Revenue Department.

I HAVE the honour to forward herewith my famine report under sections 13 and 24 of the Famine Code for the two weeks ending 6th and 13th February 1897.

PART I.—INTRODUCTION.

2. As usual, I employed part of the interval between the dates for submission of my fortnightly reports in making a rapid tour, which on this occasion took me into the Muzaffarpur district, which I had not hitherto visited except for a few hours at a time.

3. Leaving Bankipore on the night of the 11th February, I reached Muzaffarpur in heavy rain at midnight. After discussing several matters of importance with Mr. Hare, I left again at midday and proceeded to Sitamarhi *viâ* Samastipur and Darbhanga; at Lahiria Sarai Mr. Carlyle met me, and at Darbhanga Mr. Mills joined us, and I received reports from both those officers.

On Saturday, the 13th, Mr. Russell, the Subdivisional Officer, drove me to Belsand and back (14 miles south). We stopped in several villages on the road, and visited the relief works going on on the road: at Belsand I met Mr. H. Crowdy, the Manager, and Mr. Bradley (Assistant District Superintendent), the Charge Superintendent, and inspected the poor-house there, and the books and returns of the charge. On the 14th we drove to Shiuhar and back (15 miles south-west). As it was Sunday there were no relief workers visible, but we stopped and made enquiries in several villages, and I checked the gratuitous lists in one village on the road. At Shiuhar I met Mr. Reily (Assistant District Superintendent) who is temporarily Charge Superintendent there, and went through his books with him besides inspecting the poor-house. After returning to Sitamarhi, I visited the local relief works and the poor-house; at night Mr. Russell and I went by train to Pupri. On the 15th I inspected the relief works and poor-house at that place with the Charge Superintendent, Mr. Clair, and the Subdivisional Officer, and drove on to Rajkhand Factory (14 miles), where we were met by Mr. Hare. In the afternoon Mr. Hare and I proceeded to Muzaffarpur (17 miles) passing along the Rajkhand road, which has been and is being raised and broadened by famine labour. Leaving Muzaffarpur again at midnight of the same day I reached Motihari in the morning, and spent the whole of the 16th with the Collector over famine matters. We visited the poor-house and the chaukidari parade at the Sadar thana, and I discussed many matters with the Joint-Magistrate, the District Superintendent of Police, and the Civil Surgeon. In the evening I left again for Bankipore, arriving there at 6-30 on the morning of the 17th.

4. A memorandum of my observations and conclusions with the necessary instructions has been forwarded to the Collector of Muzaffarpur.

PART II.—DISTRICT REPORTS.

5. *Patna.*—The state of this district remains excellent: the crops are good, and though some little damage from caterpillars is reported, Mr. Inglis states that if ordinary weather continues, the *rabi* will be a better crop than has been reaped for years. The harvesting of the earlier crops, such as peas, mustard and *rahar*, has begun, and gives employment to the labouring classes which will continue till the middle of March. Rain fell on the 11th and 12th, averaging half an inch all over the district, and reaching an inch at Bihar and nearly an inch and-a-half at Hilsa: as it was succeeded by fine clear weather, its effect was wholly beneficial, the crops on the threshing floors sustaining no material damage.

6. Prices are rising slightly, but private charity still supplies the wants of the pauper population, and gratuitous relief appears not to be required. A poor-house, however, is almost completed at Patna, and the District Board are building rest-houses at suitable spots along frequented routes, where sheler and a cooked meal is given to all wayfarers who choose to ask for them. The cost of the dole, as shown in Form No. 7, is very high, and the Collector has been asked to explain the figures. All relief works have been closed as such.

7. It was stated in my last report that for the first time imports had exceeded exports, the difference being 9,269 maunds: it now appears from the complete figures since received that a net addition of 16,848 maunds should have been made to the exports, turning the excess of imports to an excess of exports amounting to 7,579 maunds. During the fortnight under report the exports again exceeded the imports by 12,358 maunds, the figures being 60,678 maunds and 48,320 maunds. Two-thirds of the imports were rice, and nearly half the exports "other food-grains." The exports reported up to date from the time that reports began are more than double the imports, the figures being 4,70,796 maunds and 2,10,458 maunds. No better proof could be adduced of the general prosperity of the district.

8. *Gaya.*—Not less satisfactory is the report from this district also. An average of 1·13 inches of rain fell throughout the district; and as the dull weather was quickly succeeded by sunshine, little or no damage was done to the grain on the threshing floors, while the standing crops were greatly benefited: it is not too much to expect a full average *rabi*, or 16-anna crop. The harvesting of the earlier crops has commenced, and will give employment till the

middle of March. Prices generally are steady, but there is a rise in that of wheat.

9. The import and export traffic has been slack during the fortnight under report, the imports amounting only to 5,504 maunds and the exports to 1,695 maunds. It remains to be seen what effect the late orders sanctioning a bounty on grain exported to Palamau will have on the export trade. About 600 maunds of rice have already been exported thither. I am writing to the Collector of Gaya to ascertain from the Deputy Commissioner of Palamau what amount goes into his district from Gaya, in order that it may be noted in the Gaya reports.

10. The only kind of relief that is going on is the distribution of cooked food to travellers and others along the Grand Trunk Road at Kusa, Madanpur and Aurangabad: Madanpur is a little over 20 miles from Kusa, and Aurangabad is about 14 miles further on. About 112 persons were fed daily at Kusa and 107 at Aurangabad; the Madanpur kitchen is only just opened. All are maintained at private expense. The District Engineer has informed me in conversation that most of those relieved are people returning from Bengal, many of them in bad condition; Mr. Grierson in a private letter confirms this information, and adds that there is also a large number of people still going east from the North-Western Province, of both sexes and all ages.

11. Labour is now coming to the South Bihar Railway, and this work should provide employment throughout the summer. The Collector has not stated what has wrought this change, and he will be asked whether there has been any advance in the rates offered.

12. A large sum (Rs. 80,800) has been advanced during the current financial year under the Land Improvement Loans Act, of which Rs. 9,000 have been advanced during the fortnight under review.

13. *Shahabad.*—In my last report I stated that the Collector had found that distress was becoming acute in the Bhabhua subdivision, and was making arrangements to meet it. These arrangements have now been completed, and have been specially reported by him in his letter No 3282G. of the 14th instant, which is forwarded with the present district narrative.

14. The area affected is unaltered, save that a fresh tract is under observation, *i.e.*, the strip of low land between the Rhotas hills and the Sone from Akbarpur to the south-western boundary of the district. Enquiries are being made here, and no definite opinion can yet be formed as to the condition of the people. The remainder of the affected area has been arranged in charges and circles as shown in the marginal statement. In charges Nos. 2 and 3 the circles have been fully manned Mr. E. C. B. Birch has been placed in charge of No 3, and Mr. D. Percy Smith, who reported himself to me here yesterday, will take charge of No. 2, which is at present under the Inspector of Police. For the Adhaura and Ramgarh charges, which are so far partially manned by Circle Officers, and where distress is not imminent, no Charge Superintendent will be appointed for the present, the Circle Officers reporting direct to the Subdivisional Officer. These arrangements have my approval. As Circle Officers began work from the 6th instant only, the returns are not yet quite complete.

Number.	Name of charge.	Area.	Population.	Number of circles.
1	2	3	4	5
1	Ramgarh	316	93,804	5
2	Chand and Chainpur	272	1,23,123	6
3	Bhabhua and Chenari ...	224	1,02,118	6
4	Adhaura plateau	500	14,111	4
	Total ...	1,313	3,33,156	21

15. Mr. Marindin's estimate of expenditure, received with the separate letter above quoted, is Rs. 79,727 for 1896-97 and Rs. 3,07,834 for 1897-98, or Rs. 3,87,561 in all. These figures are composed of the following items:—

	1896-97. Rs.	1897-98. Rs.	Total. Rs.
Relief works and gratuitous relief, Bhabhua subdivision and Chenari	75,727	2,99,834	3,75,561
Gratuitous relief through police elsewhere, poor-houses, &c.	4,000	8,000	12,000
Total ...	79,727	3,07,834	3,87,561

I hope that the expenditure will not reach this amount, and at any rate no grant from Provincial Revenues is yet required, as the District Board have sufficient funds to meet the present needs of the district. In 1873-74, when the effect of the Sone Canals was only a fraction of what it now is, and when the rice crop was 2 annas only in place of 6 annas, the total expenditure on relief works and gratuitous relief (so far as I can make out from the figures supplied by Government) was Rs. 3,82,683, of which Rs. 2,22,939 represent cash payments and Rs. 1,59,744 the value of grain at Rs. 4 a maund. These figures are exclusive of loans and of grain advances.

16. Except in the affected tract, where comparatively little *rabi* is grown, the promise of the winter crops is excellent. Rain fell on the 11th and 12th instant, from about three-fourths to an inch, and a quarter all over the district, which has done little damage and much good: caterpillars are reported in some places. The price of common rice is stationary, but there has been a marked fall in the price of those food-grains which are earliest harvested, viz., wheat, grain, peas and *masur dal*.

17. There has been a shrinkage of both imports and exports, the figures being 24,895 maunds and 7,999 maunds, respectively, against 46,806 maunds and 23,647 maunds during the three weeks covered by my last report: the balance in favour of the district is, therefore, 16,896 maunds as against 23,159 maunds last reported and 15,994 maunds in the fortnight ending 9th January. The imports were nearly all rice (24,428 maunds), which came from the districts of the Burdwan Division: most of the exports were "other food grains." Buxar shows by far the heaviest traffic in imports.

18. The Collector reports that in the affected area grain stocks are said to be very low: he has appointed grain contractors in the Chainpur Chand charge under section 35 of the Famine Code. I have called his attention to the recent orders of Government sanctioning a bounty for grain imported into Palamau, and consider that it may be necessary to apply for similar orders for the Adhaura charge later on, in order to supply the people with grain before the rains render the passes into the hills impracticable.

19. Here, as in Gaya, there are a number of poor travellers along the Grand Trunk Road, and for the relief of them a poor-house has been constructed at Sasaram, and kitchens and shelters have been opened at four places situated at convenient distances along the road. The number of persons relieved appears to have averaged 564 per diem, though this is not quite clearly stated. It is also reported that a good number of persons have left their homes in search of work; the Collector will be asked whether this is a usual incident or a novelty.

20. Four relief works were opened during the period under review. One of these, viz., the Hata-Durgaoti road, which has been opened for a long time, is now drawing to a conclusion, which accounts for the falling off in the number employed. The number of male units employed was 2,810 in the second week and 3,879 in the first, while those on daily wage irrespective of task was 2,099 to 2,267. When the Circle Officers have completed their enquiries, I hope that many of these will be relieved at their homes, and I have instructed the Collector to this effect. The outturn of work per male unit is fair, ranging from 30 to 52 cubic feet, which is doubtless due to the fact that about half the workers are of the A class. The cost per 1,000 cubic feet is also low. The average daily wage irrespective of task is higher than that of the male unit, which should not be the case unless there is a large number of special gangmen in the former. The new programme of relief works has not yet been received by me.

21. The number of persons on gratuitous relief, including those fed at the kitchens and poor-houses, appears from Form No. 6 to have been 8,229, as against 599 in the previous report; but in the body of the report the Collector states that, so far as returns have been received, they show that those on charitable relief proper were 6,972. Mr. Marindin thinks that the opening of relief circles will lead the public generally to suspend their charity all over the district. I have pointed out that it is quite impossible for Government to take over the support of the paupers all over Shahabad, and that in parts of the district where the crops have been good the well-to-do must, as in ordinary years, be left to support the pauper population.

22. *Saran.*—No material change is reported in the condition of affairs in this district, but the Collector has been on tour through the eastern portion of Gopalganj, a part of the district which he had not previously visited, and the result is that he has somewhat modified the opinions enunciated in his last report. He considers the Siwan subdivision pretty safe, but the Gopalganj subdivision will require careful attention, and later on relief will be wanted in parts of the Sadar subdivision. I consider this forecast very near the truth.

23. Crop prospects continue good; the rain of the 11th and 12th instant averaged from $\frac{1}{3}$ to $\frac{1}{2}$ an inch, running up to $\frac{3}{4}$th of an inch in places: it has done, as elsewhere, no damage to the crops, and great benefit to the backward *rabi*. The latter is estimated at 16 annas in the Siwan subdivision, about 10 to 12 annas in the Sadar and the same in Gopalganj taken as a whole. Bearing in mind the energy of the cultivators and the extra area sown in *rabi* this year, I feel pretty sure that the winter crops of 1896-97 will be quite up to the full average of ordinary years.

24. No apprehension is felt as to food-stocks, and the shrinkage in the amount of imports may mean either that money is tight or that the baniya's golahs are full: Burma rice is said to be available everywhere. The figures for road, river and rail show imports 92,675 maunds against 2,00,205 maunds, and exports 10,193 maunds against 26,500 maunds in the three weeks of the previous report: the balance in favour of the district is thus 82,482 maunds, against 1,73,705 maunds in the preceding three weeks.

25. There were 27 Government relief works open during the fortnight as against 23 in the previous period. The following abstract statement gives the most important information on this head and that of gratuitous relief:—

Week ending.	Number of works open.	Daily outturn per male unit.	Average daily number of male units on—			
			Task work.	Daily wage irrespective of task.	Gratuitous relief including dependents.	Total.
1	2	3	4	5	6	7
			A.—Under Government.			
23rd January	24	25	8,158	731	5,835	14,724
30th „	23	23	9,185	917	4,486	14,618
6th February	27	27	10,464	781	13,560	24,805
13th „	27	30	6,917	1,029	13,068	21,014
			B.—Under the Hutwa Raj.			
21st January	6	28·8	1,858	169	931	2,958
28th „	6	33	1,734	186	558	2,478
6th February	.....	31	1,503	304	604	2,711
13th „	.....	33	1,777	356	646	2,779

The figures show some falling off in the number on task work, due to the cutting of the *rabi* having commenced: the outturn per male unit reported in Form No. 7 is a little better than in the previous report, having been 27 and 30 cubic feet against 28, 25 and 29 cubic feet: the average earned by each male unit has been 1 anna 3 pies and 1 anna 4 pies, against 1 anna 2 pies, 1 anna 2 pies and 1 anna 3 pies. The cost per 1,000 cubic feet is Rs. 2-13, which is about the same as before. The average of the daily wage irrespective of task is still somewhat high, being 1 anna 8 pies and 1 anna 5 pies. This is, no doubt, due here, as in other places where the number of task workers is not very large, to the influence of the higher wages paid to the mates, special gangs and odd men of various kinds.

26. The total number on task work during the last week of the fortnight were men 15,842, women 22,983, big children 14,202, small children

5,300; total 58,327. The unusual proportions in this crowd of workers have been noticed and explained in previous reports. It is to be expected that the numbers will decrease still further for a time as work in the harvest field increases, but Mr. Earle is about to start new works in the Gopalganj subdivision under Public Works Department agency. One of the most important and largest of these is the excavation of more channels in connection with the Saran Canals. Mr. Buckley has lately gone up to Chapra in connection with this scheme. The above figures do not include any for works under Public Works Department agency.

27. The daily average number of persons in receipt of gratuitous relief was 14,352, and the average daily dole was about 9 pies. Seven poor-houses were open during the period under review, which fed an average of 709 persons a day.

28. *Champaran.*—The situation in this district remains unaltered, except in three particulars, *i.e.*, a better task has been obtained, larger numbers are now on gratuitous relief instead of being on the relief works, and the Public Works Department have commenced to take over the larger works. These will be dealt with in turn.

29. The prospects of the crops continue good: the rainfall of the 11th and 12th was lighter here than in other districts, but was sufficient to freshen up the *rabi* without doing any damage whatever: the result is that the Collector is now able to forecast an average crop of *rabi* (16 annas) over the area sown. It is feared that this area is a good deal below the normal, but even so it seems safe to predict a crop equal to three fourths of that of an ordinary year.

30. Prices are either stationary or show a tendency to fall owing partly to the importation of Burma rice. Prices are a good deal higher at out-of-the-way places. The Collector's remarks in his 8th paragraph deserve careful perusal; it would indeed be an aggravation of the present crisis if it were found that the present tightness of money prevented importation. The matter will be further considered, and, if necessary, separate proposals submitted.

31. The food-grain traffic of the fortnight has been comparatively insignificant, the imports by rail aggregating 14,351 maunds, and the exports 1,678 maunds, as against 14,745 maunds and 4,573 maunds in the previous three weeks: the result is a balance of 12,673 maunds in favour of the district, against 10,472 maunds at the end of the previous period. The imports were mostly rice and paddy from Calcutta and the Burdwan Divisions, and the exports chiefly comprised the same grains to Saran. These figures take no account of the road traffic which is still considerable, for rice is still coming in from Nepal all long the frontier, and the Saran statistics show that during the period under review 1,139 maunds passed from Champaran into Saran through Gobindganj Ghât.

32. There is no general deterioration of health. In consequence of statements made to me, I proceeded to Motihari on the 16th instant, and in company with the Collector and other officers visited the poor-house and attended the chaukidari parade. I saw a large number of persons brought in by the chaukidars, many of whom were in bad condition: a sensible proportion of these were professional beggars and cripples, and many of the others were already in receipt of gratuitous relief. They had been hitherto relieved through the police under sections 12 and 166 of the Famine Code, and it was reported that their numbers had risen very rapidly during the past fortnight. The explanation is that many of the voluntary Circle Officers have been unable to complete their lists for the reasons cited in paragraphs 5 and 25 of Mr. Macpherson's report, so that instead of the destitute and dependents being relieved in their villages, they either received aid from the police or were relieved as dependents on the works. Mr. Macpherson has been busy for some time in appointing paid Circle Officers to assist the voluntary officers where this aid seemed necessary, and the result is already apparent, as will be noticed below. Meanwhile these necessitous persons have not failed to get relief, though they may not have received it in the most suitable manner. The matter is referred to in paragraph 35 of my last report.

33. As regards relief works, the process of taking over by the Public Works Department, mentioned in my last report, has been continued in the period under review; but, for reasons mostly beyond their control, this transfer has not been carried out so rapidly as had been anticipated by too sanguine persons: by the end of the period under report only 7 works, according to the Collector, had been taken over out of 23. As matters are still in a state of transition, it is hardly fair at present to compare the results of Civil and Public Works agency.

34. Taking the works as a whole then, whether under Civil or Public Works agency, it appears that on the 13th February there were 75 works open, against 61 on that day fortnight. The following statement compares the principal figures in respect of relief works and gratuitous relief during the last and the preceding fortnight:—

Week ending.	Number of works open.	Daily outturn per male unit.	Average daily number of male units on—			
			Task work.	Daily wage irrespective of task.	Gratuitous relief including dependents.	Total.
1	2	3	4	5	6	7
23rd January	... .	14	71,977	1,216	4,004	80,197
30th ,, ...	61	15	74,264	1,746	4,730	80,740
6th February	.....	30½	62,8.0	2,057	7,515	72,392
13th ,, ...	75	19	67,175	2,742	15,222	85,139

These figures show a sensible improvement. The fact that most of the works are tanks, and the other considerations stated in Mr. Macpherson's 18th paragraph, fully explain, in my judgment, the apparently small outturn in the last week, and the small outturn which has been apparent throughout: they also justify the apparently high cost per 1,000 cubic feet, which for the last four weeks has been as follows: Rs. 5-14-8, Rs. 4-14-4, Rs. 2-10-6 and Rs. 4-6-1. These rates would not have been so low as they are, had not the penal wage been rigorously enforced in the attempt to restore and enforce order. According to the Collector the total number of persons on Government relief works on the 13th February was 117,539, as against 97,349 on the 30th January; but in addition to this there was a considerable, though undetermined, number on private relief works, some figures for which are given in the Collector's 20th paragraph. So far as these statistics can be relied on, the average daily number of persons on private relief works during the fortnight was 1,767. The Bettiah Raj has not yet decided on what course to pursue in order to benefit its raiyats, as the Maharani is unwell and unable to attend to business, but it is hoped that substantial aid will be given in the execution of the Triveni Canal scheme; in the meantime a poor-house has been opened and some small works have been undertaken.

35. During the week ending 13th February as many as 19,146 persons were gratuitously relieved, against 9,925 in the previous week. These figures, and those in the statement above, show that the circle organization is being rapidly completed, and that gratuitous relief is being more largely given in villages. The Collector fully appreciates the advantages of this system which I have repeatedly brought to his notice, and I look forward to seeing the works cleared within the current fortnight of a large number of dependents and D class labourers, and the police relieved of the functions which they have been discharging as a temporary measure.

36. A poor-house has been constructed so far at Motihari only. I visited it on the 16th instant, when it contained about 70 inmates. The average for the week ending 13th February was 35. I have desired the Collector to construct a poor-house at the head quarters of each charge without delay.

37. *Muzaffarpur.*—The chief feature in the history of this district for the first fortnight of February is a large increase in the numbers on relief works and in the receipt of gratuitous relief.

38. Crop prospects continue good, and the *rabi* ought to yield nearly three-fourths of the average outturn of the district. Mr. Hare reports that in Hajipur the area sown is 25 per cent. in excess of the normal; and though this is not the case throughout the district, especially in the north, yet I am confident that there is a general excess which will compensate to some extent for some failures. I noticed during my trip through Sitamarhi that the crop, though healthy, is backward; but towards the north of the Division the *rabi* is always later than it is to the south. The rainfall ranged from 1·42 of an inch at Shiuhar in the Sitamarhi subdivision to ·32 in Sitamarhi itself. On the average, half an inch fell all over the district, and did no damage and much good to the backward crops.

39. Prices are practically stationary; and as Mr. Hare points out, the hardness of prices indicates a sufficiency of food-stocks.

40. The imports are 52,939 maunds and the exports 5,308 maunds, as against 55,935 maunds and 11,111 maunds for the previous three weeks: this shows a distinct advance, and the balance in favour of the district for the fortnight is 47,631 maunds, as against 44,824 maunds for the previous three weeks. Rice and paddy provide just half the total imports, and 20,082 maunds, or almost all the remainder, were "other food-grains." Rather less than half of the exports come under the same head.

41. The number of relief works has increased from 23 to 36, but the figures for 33 only are given in Form No. 5. The following abstract taken from Form No. 7 gives the principal figures for the past and previous fortnight:—

Week ending.	Number of works open.	Average daily outturn in cubic feet.	Average daily number of male units on—			
			Task work.	Daily wage irrespective of task.	Gratuitous relief, including dependents.	Total.
1	2	3	4	5	6	7
23rd January	23	80	4,723	184	4,291	9,198
30th „	22	76	7,981	217	1,938	10,126
6th February	29	82·13	16,982	474	12,376	29,832
13th „	33	80·58	16,727	630	14,189	31,546

It will be observed that the numbers on relief works have increased cent. per cent., while those in the receipt of gratuitous relief have increased in a much larger proportion. This is as it should be, for, so long as the helpless and dependents are assisted, the general population can afford to wait a little longer before they seek the relief works. The outturn per male unit is extraordinarily high, but I have satisfied myself in my tour through Sitamarhi that the measurements are correct, and that the recorded task is really done. I found several instances where particular gangs had done more than 100 cubic feet per male unit. One explanation is that the proportion of adult males to others is very large, and another that all the work that I saw, and most of the work in the district, is road work, with short lead and lift and very light soil. The Collector and his subordinates have from the first insisted on a fair task being done, and the result shows that the task can be done and a fair wage obtained, if the labourers only try: a good many have been deterred, I think, by the fact that little or no concession was made (in Sitamarhi at any rate) when labourers first came to the works. I am of opinion that more relief through the medium of works is needed, and I have asked the Collector to open several large works under Public Works Department agency: a letter, later than his report, informs me that 9 works, each capable of employing 6,000

persons, will be opened by the 1st proximo. These works will be conducted strictly on the principles of the Public Works Department Resolution No. 420M.P.I.; and as they have been started after sufficient notice, they should afford most important evidence as to the popularity and efficiency of that system.

42. From what I saw on my tour, I considered that gratuitous relief should be somewhat more liberally granted, and I am glad to see from the present returns that my instructions to that effect have already been anticipated.

43. The list appended to Mr. Hare's tables shows that the Darbhanga Raj relief works in the Parihar Circle employed an average of 758 persons, or 693 male units, during the fortnight: about three-fourths of these were men.

44. On behalf of Government five poor houses are now open, all in Sitamarhi, except that at Muzaffarpur; one will shortly be opened at Hajipur. I visited all the four in the Sitamarhi subdivision, and found the arrangements good, except that Medical Officers are badly wanted: they have been applied for. The average daily number of inmates has not been stated, but it is about 50. The Darbhanga Raj poor-house at Parihar had a daily average number of 211.

45. Mr. Hare reports that he requires assistance in some of his larger charges; the matter will be separately dealt with. His observations on the necessity of having a reserve of both Charge Superintendents and Circle Officers are most judicious.

46. As regards agricultural loans, I have authorized all officers to make them freely up to the limit of their existing allotments, and to report whether they wish for additional funds. The matter is further referred to below.

47. *Darbhanga.*—In this district the note of the fortnight is an apparent increase in the numbers on gratuitous relief, a more rigid control over the relief workers, and a continuation of the operation of making over large works to the Public Works Department.

48. Gentle rain fell throughout the district on the 11th and 12th instant, giving an average all round of a quarter of an inch; this was wholly beneficial, and the prospects of the *rabi* crop continue excellent. The area sown, however, is reported to be a good deal less than usual, especially in Madhubani.

49. Prices show little fluctuation. Common rice is a little cheaper in Samastipur and a little dearer in Darbhanga; Indian-corn, which is being eaten up everywhere, is a little dearer in consequence; and *rahar*, which is being harvested in the south of the district, has not yet had any effect on the market.

50. The traffic in food-grains has been brisker than in the previous three weeks, as the imports aggregate 50,591 maunds against 50,058 maunds, and the exports were 20,229 maunds against 13,266 maunds: the balance in favour of the district is, therefore, 30,362 maunds for the fortnight, as against 36,792 maunds for the previous three weeks. As usual, the majority of the imports consists of rice and paddy (15,049 and 13,107 maunds), but "other food-grains" give a total of 21,954 maunds, most of which came to Darbhanga itself, and nearly half the exports were "other food-grains."

51. There are now 98 relief works open in Darbhanga, as against 83 at the end of the previous fortnight. The following abstract gives some of the most important figures in this connection :—

Week ending.	Number of works open.	Average daily outturn of work.	AVERAGE DAILY NUMBER OF MALE UNITS ON—			
			Task work.	Daily wage irrespective of task.	Gratuitous relief, including dependents.	TOTAL.
1	2	3	4	5	6	7
23rd January	77	34·4	67,582	873	43,316	111,770
30th „	83	29·9	89,232	2,988	53,228	145,448
6th February	.....	26·8	92,345	1,365	64,841	158,551
13th „	98	32·2	77,945	2,115	70,428*	150,488

* *N.B.*—The Collector has since written to say that by an error in compilation, there is an excess of about 30,000 in the figures from Madhubani.

These figures, which are taken for the most part from Forms Nos. 5 and 7, do not altogether tally with those given in the body of Mr. Carlyle's report.

The explanation probably is that while the statements do not include Public Works Department figures, the statistics quoted by Mr Carlyle in his paragraph III (*a*) probably do so. As the number of works taken over is now considerable, the omission is unfortunate, and it makes a criticism of the above figures hardly worthwhile. However, they may be taken as those of civil agency works only, and in that sense they afford ground for satisfaction: it is clear that more and more control is being regained over the workers, as is indeed definitely stated by Mr. Carlyle, and the rates per 1,000 cubic feet given in Form No. 7, viz., Rs. 3-1-11 and Rs. 2-12-10, are very low, considering that many of the works are tanks: they have of course been reduced by the vigorous enforcement of the penal wage which has, very properly, been freely used in order to coerce contumacious gangs

52. Subject to whatever may be reported later about the mistake of 30,000 in the Madhubani figures, gratuitous relief appears to have again increased, and the daily number of persons in receipt thereof now nearly equals that of the male units on relief works: the reasons for this unusual proportion have been explained in previous reports. The increase in the past fortnight, if real, is due to the increasing pressure of high prices, and is in some respects a complement of the better figures for outturn of work on relief works. In several of the thanas of the district relief works have not been started up to the full needs of the population, and it is in these that gratuitous relief plays the chief rôle: as the full programme of relief works is worked up to, I confidently expect that not only will the absolute numbers on gratuitous relief be somewhat reduced, but their proportion to that of persons on relief works will be diminished. The Collector has, during the past fortnight, paid a visit to the head-quarters of each Charge Superintendent, and he writes that the supervision which the Charge Superintendents have found time to exercise over Circle Officers exceeded his expectations.

53 Poor houses are open at four places, but I have authorised the Collector to open one at the head-quarters of each charge for the purposes of sections III (2) and 71 of the Code.

PART III—CONCLUSION.

54. No material change in the situation has occurred during the fortnight under review, but such changes as have taken place give cause for satisfaction.

55. Prices are practically stationary. The harvesting of the early crops has fairly begun in South Bihar, and this has led to the employment of a good deal of labour in the fields which will increase in volume as the month progresses: the harvest in North Bihar is always later than in the south, so that the effect in the most affected districts is not yet so apparent; but, on the other hand, it will last later, and carry the people well on into March. It is to be observed that, on the whole, the harvest is earlier this year than usual.

56. Rain fell all over the Division on the 10th, 11th and 12th, and appears to have been heaviest in South Bihar: Darbhanga received but little. As the fall was gentle and steady, and was not accompanied by wind or hail, while it was rapidly followed by sunshine and a west wind, the effect has been most beneficial, and has still further improved the already excellent prospects of the *rabi*. The promise of the poppy continues good, especially in South Bihar. Caterpillars are reported from one or two places south of the Ganges, but no great harm has been done.

57. Another effect of the frequent light showers which we have had since Christmas is to enable the raiyats to cultivate their fields, and the extent to which this has been done everywhere is quite unusual. A very large proportion of the rice lands have already been ploughed or dug up, many of them more than once, and I am assured on all hands that this process will be repeated, so that the lands may be ready for early sowings of *bhadoi* as soon as the monsoon arrives.

58. The food-grain traffic continues to be brisk, as the subjoined statement will show. The figures for Patna for the three weeks ending the 30th

January, published in my previous report, have been corrected in accordance with the Collector's present report.

District.	Imports.		Exports.		Excess—I. or E.	
	Three weeks ending 30th January.	Fortnight ending 13th February.	Three weeks ending 30th January.	Fortnight ending 13th February.	Three weeks ending 30th January.	Fortnight ending 13th February.
1	2	3	4	5	6	7
	Mds.	Mds.	Mds.	Mds.	Mds.	Mds.
Patna	1,06,544	48,470	1,16,123	60,462	E. 7,579	E. 11,992
Gaya	4 507	5,504	5,628	1,695	E. 1,101	I. 3,809
Shahabad	46,806	24,895	23,647	7,699	I. 23,159	I. 16,896
Saran	1,87,633	81,316	22,229	8,485	I. 1,65,404	I. 72,831
Champaran	14,745	14,351	4,573	1,678	I. 10,172	I. 12,673
Muzaffarpur	55,935	52,930	11,111	5,308	I. 44,824	I. 47,631
Darbhanga	50,058	50,591	13,266	20,229	I. 36,792	I. 30,362
Total ...	4,68,288	2,78,066	1,96,617	1,05,856	.....	.....

It will be seen that while in Patna the exports still exceed the imports, the balance in all the other districts is the other way, Gaya for the first time appearing as an importing district, no doubt owing to the needs of Palamau. Saran is again the largest importer, but both its total imports and net excess are less than half what they were in the previous three weeks. Remembering the difference in the duration of the period under report, the excess of imports is greater than it was for the period of my previous report in Champaran and Muzaffarpur, and about the same in Darbhanga. The total volume of trade comes to 2,78,066 maunds of imports and 1,05,856 maunds of exports, against 4,68,288 munds and 1,96,617 maunds in the previous period of three weeks. The amount of rice in maunds imported from Howrah, presumably either Burma or Orissa rice, is as follows:—Patna 9,291, Shahabad 1,544, Saran 14,314, Champaran 3,682, Muzaffarpur 4,851, Gaya and Darbhanga nil; total 33,682. Paddy was also imported from the same place in the following quantities: to Patna 794 maunds, Saran 1,764 maunds, Champaran 1,951 maunds, total 4,509 maunds.

59. Before passing on to consider the details of the administration of relief works and gratuitous relief during the past fortnight, it will be interesting to note what proportion of the population in the affected tracts is now in the receipt of relief of all kinds. The figures are given in the statement in the margin. Those in column 2 are taken from the *Gazette of India* of the 20th instant, but they have been subjected to some modifications. The Collector of Darbhanga has reported that by an error in compilation the reported figures under gratuitous relief were 50,000 too high; the reduction has now been made. I have included the Hutwah and private relief figures in Saran, and the Darbhanga Raj figures in Darbhanga, less 1,100 allowed to Muzaffarpur to represent the operations of the Raj in the Parihar Circle. Even after these corrections, however, the figures are still incomplete, as it is believed that returns from some of the Public Works Department works are not included, both in Champaran and Darbhanga. The figures in column 3 are taken from the published fortnightly reports of the District Officers.

District.	Numbers in receipt of relief on February 13th.	Estimated population of affected area.	Percentage receiving relief.
1	2	3	4
Shahabad	3,227	371,824	·86
Saran	33,709	1,341,598	2·51
Champaran	147,712	972,000	15·19
Muzaffarpur	26,691	1,660,000	1·6
Darbhanga	200,078	2,270,000	8·81
Total ...	411,417	6,615,422	6·21

60. It seems unlikely that the Champaran figures will rise much higher, and I trust that neither in Shahabad nor in Saran will they ever reach 5 per cent.; but it is clear that in Darbhanga, as relief works are opened out to the full in some of the thanas where gratuitous relief is now the mainstay of relief administration, the number will rise. In Muzaffarpur the numbers will certainly increase with the opening of large relief works by the Public Works Department, and it is to be observed that the figures for the affected population (taken from Mr. Hare's report of the 2nd December last) include all areas likely to be distressed up to the end of March.

61. I next give below as before an abstract statement comparing the principal items of relief administration, district by district, for the past and previous periods of report. Many of the items have already been noticed in dealing with the district reports.

District.	THREE WEEKS ENDING 30TH JANUARY 1897.								FORTNIGHT ENDING 13TH FEBRUARY 1897.							
	TASK WORK.				DAILY WAGES, IRRESPECTIVE OF TASK.		GRATUITOUS RELIEF.		TASK WORK.				DAILY WAGES, IRRESPECTIVE OF TASK.		GRATUITOUS RELIEF.	
	Average daily number of male units.	Work done by each per diem.	Wages earned by each per diem.	Cost per 1,000 cubic feet.	Average daily number of male units.	Daily wages earned by each.	Number of adult units in receipt of gratuitous relief.	Average dole.	Average daily number of male units.	Work done by each per diem.	Wages earned by each per diem.	Cost per 1,000 cubic feet.	Average daily number of male units.	Daily wages earned by each.	Number of adult units in receipt of gratuitous relief.	Average dole.

Total ...	1,66,037	.....	.....	.....	4,347	.....	54,656	.....	176,243	.....	.....	.....	5,950	.....	1,12,661	.....

62. Turning first to task work, it will be seen that there has been a general increase in the daily number of male units employed, which is caused by the advance in Saran, Muzaffarpur and Darbhanga: in Patna and Gaya there are no relief works, and in Shahabad and Champaran the numbers have fallen off. There is an improvement in the outturn of work in every district except Darbhanga, and there the decrease is very slight. The improvement is greatest in Champaran. I have already remarked on the large outturn in Muzaffarpur, and pointed out that it is due to the small numbers employed and the large proportion of adult males among them. As regards average daily wage in the five districts where work has been going on, the mean is 1 anna $4\frac{1}{10}$ pies this fortnight, as against 1 anna $4\frac{1}{2}$ pies in the previous three weeks, and it will be seen that the district variations from the general mean are smaller than they were. The cost per 1,000 cubic feet is nowhere excessive; it is highest in Champaran, but there it has been reduced by nearly 38 per cent. in the fortnight, and the Collector has clearly explained that there are good reasons for the present high rate in this district: the cost is again lowest in Muzaffarpur.

63. The numbers on daily wage irrespective of task have increased everywhere, except in Shahabad. For the whole Division the ratio these bear to the task workers is 3·38 per cent., but it is much less than that in Champaran, Muzaffarpur and Darbhanga, and higher in the other two districts.

64. In the matter of gratuitous relief, it will be seen that the numbers have very largely increased everywhere,—a result due partly to the completion of circle organization, partly to my admonitions, and partly, especially in Muzaffarpur and Shahabad, to some increase of distress. The percentage of numbers on gratuitous relief to the whole number relieved is as follows:—Shahabad 88·34, Saran 58·11, Champaran 14·43, Muzaffarpur 45·28, Darbhanga 43·77; whole Division 38·2. In Shahabad, Muzaffarpur and Darbhanga the ratio will probably fall as relief works are more fully opened out, while in Champaran it will probably increase as the circle organization is improved and dependents are sent off the works to their villages. In Saran, for reasons previously stated, it will probably remain high throughout the operations.

65. The average dole appears to have been everywhere reduced, which is perhaps due to a majority of the new recipients of gratuitous relief being women and children. The instructions for calculating the average dole in the footnote to Form No. 7 leave something to be desired, and the matter will be looked into at once.

66. Appendix A gives the expenditure to date, so far as it can be ascertained from the financial statements supplied with each fortnightly report. It is obviously incomplete, for among other things it shows nothing spent as bounties for *kutcha* wells, whereas it has been ascertained from the reports themselves that the following sums have been spent: Champaran Rs. 522, Darbhanga Rs. 920. However, taking the figures as they stand, it appears that up to date nearly seven lakhs of rupees have been expended, of which Rs. 2,63,870 have been spent during the past fortnight.

67. As noticed in my remarks on the Muzaffarpur report, I have authorized all Collectors to grant advances under the Agriculturists' Loans Act freely. My reasons for this order, and the limitations which I have imposed, are set forth in my Divisional Circular No. 9 of 1897, a copy of which I append. I have no doubt that the money is urgently wanted, and that it will be used to advantage, while nothing approaching the wholesale operations of 1873-74 will be allowed, either now or later in the season.

68. The process of taking over large works by the Public Works Department has been going steadily on. I learn from demi-official letters just received from Messrs. Mills and Toogood that the following progress has been made.

69. In Champaran, five Public Works Department subdivisions have been arranged and works opened as stated in the margin. New works are to be started as fast as the establishment is available in the Ramnagar subdivision. In view of the contraction of works now expected in Saran, I am arranging with Mr. Toogood and the Collector to transfer some of the Public Works Department establishment of that district to Champaran where they are badly required. From Darbhanga Mr. Mills reports that 11 large works have been taken over in Banipati thana, 3 in Khajauli, 1 in Tadhubani and 1 in Phulparas. He states that practically all the needed works in North Darbhanga have now been taken over, though others will be required shortly. Mr. Mills will now take up the works in the Sadar subdivision. In Muzaffarpur, as already stated, 9 major works under Public Works Department agency will be opened on different dates during the current week.

Subdivision.	Name of subdivisional officer.	Number of works taken over.	New works.
1	2	3	4
Ramnagar ...	Mr. Chester ...	.....	.....
Bettiah ...	,, Sedgeley ...	1	2
Motihari ...	,, Rooke ...	.....	2
Dhaka ...	Babu N. N. Mookerji	2	1
Bara ...	,, R. K. Mookerji	.....	2

70. It has been arranged everywhere that as the Public Works Department take over works, or open new ones, the neighbouring works under civil agency shall be closed as soon as possible. I have forwarded to the two Superintending Engineers a form of weekly progress report, showing the number of old works taken over, and new works started, in each district, and it will be submitted with effect from the current week. It is too soon yet to judge of the effect of the system laid down in Public Works Department Resolution No. 420M.P.I.: in Champaran the outturn at the outset was not altogether satisfactory, but that was certainly due, in great part, to the novelty of the experiment; from Darbhanga Mr. Mills reports that the results vary a good deal; here also a reasonable time must be allowed to elapse before a fair judgment can be formed.

71. Officers of the Public Works Department complain as bitterly as Civil officers have done of the inefficiency of many of their subordinates; this is inevitable at a season of distress such as this, and it is not till a great deal of weeding-out has been done that perfect order and efficient control will be secured.

72. The usual statements are appended.

APPENDIX A.

District.	Relief Work.				Gratuitous Relief.							Miscellaneous.					Grand Total.
	Paid for task work.	Daily wage irrespective of task.	Dependents under sections 83 and 84.	Total of columns 2, 3 and 4.	Poor-houses, &c.	Relief of artisans.	Relief by grain doles.	Relief by money doles.	Kitchens.	Miscellaneous charitable relief.	Total of columns 6 to 11.	Establishment and contingencies.	Tools and plant.	Cash and stores.	Bounties for digging wells.	Total of columns 13 to 16.

PATNA COMMR.'S OFFICE, BANKIPORE,
The 21st February 1897.

J. A. BOURDILLON,
Offg. Commissioner.

APPENDIX B.

Famine Circular No. 9 of 1897.

Dated Bankipore, the 16th February 1897.

From—J. A. Bourdillon, Esq., Offg. Commissioner of the Patna Division,
To—The Collector of

Hitherto it has been the policy of most Collectors in the distressed districts in the Division to abstain from granting advances under the Agriculturists' Loans Act for the present in the belief that any money advanced now would not be applied to the purpose for which it was ostensibly granted, but merely to maintenance.

2. From enquiries made in several districts, however, I am satisfied that during the present year a great deal of land has been cultivated much earlier than usual, and that after the showers which have fallen, and in anticipation of an early monsoon, a good deal of cultivation would be done if the raiyats and small farmers could afford to pay for it.

3. In these circumstances, I consider that it would be better to make some advances now than to withhold them altogether till April and May, and therefore authorize you, if you think proper, to make advances freely under the Act subject to the following conditions:—

(*a*) The agreements for repayment to be joint and several.
(*b*) Not more than Rs. 4 a bigha to be advanced up to a maximum of Rs. 50 to any one person.
(*c*) Not more than half to be advanced now.
(*d*) A definite date to be fixed when the remainder is to be advanced.

4. The allotment at present made to your district is stated in the margin. You may advance up to that amount. Please state what further amount, if any, you will require to advance before the 31st March next and how much during 1897-98.

	Rs.
Shahabad ...	29,000
Saran ...	34,000
Champaran ...	11,000
Muzaffarpur ...	28,000
Darbhanga ...	10,000

5. It is understood of course that these advances are made under the Act, and that they are entirely separate from the special advances for the purchase of grain alluded to in paragraph 13 of Government Resolution No. 5133 of the 10th December 1896, as well as from those for village improvements dealt with in paragraph 19 of the same Resolution.

No. 243F, dated Camp Ratna, the 16th—18th February 1897.

From—W. B. Oldham, Esq., Commissioner of the Bhagalpur Division and Sonthal Parganas,
To—The Secretary to the Government of Bengal, Revenue Department.

In continuation of my No. 292R.Ct., dated Bardaha, the 1st—2nd February 1897, I have the honour to forward, under section 9 of the Famine Code, the accompanying copy of extracts from a report submitted under section 10 by the Deputy Commissioner of the Sonthal Parganas with his No. 4549R., dated the 26th January 1897. Though so dated, it was not received in my office till the 13th February, or by me till yesterday, and appears to have been despatched on the 12th February. The chief object in forwarding the extracts to Government is to confirm the estimates for the Sonthal Parganas submitted under my No. 3395R., dated the 11th January 1897, and to prepare for the grants being appropriated. The omitted portions refer either to information already reported by me to Government, or to contentious matter, and this editing is necessary, if only for the reason that copying has become a very heavy item in my office. I do not forward the map referred to in the Deputy Commissioner's 12th paragraph, because it does not give the information which it is intended to convey. I have reproduced the reference to turnpikes in paragraph 17, but do not at this juncture endorse the views expressed. The passage indicates the character of some of the matter omitted. The final sentence about establishment refers to the restoration of the district staff, which has lately been drawn on, to its former strength, and not to any more definite proposals. The staff at present is ample.

No. 4549R., dated Camp Hiranpur, the 26th January 1897.

From—R. Carstairs, Esq., Deputy Commissioner of the Sonthal Parganas,
To—The Commissioner of the Sonthal Parganas, Bhagalpur.

I have the honour to report, under the provisions of section 10 (Chapter II) of the Famine Code, that scarcity prevails in this district, and that distress is imminent in certain

parts of it. The parts in which there is more immediate fear are Godda and Jamtara, of which the former is nearest famine. In this report I propose to declare a part of the Godda subdivision to be an affected tract.

2. * * * * * * * * *

3. * * * * * * * * *

Crops, such as mustard, *kurthi*, and the like, have been in most places a failure * *

* * * * * * * * * *

* * * * * * * * *

5. (*b*) *Area and population likely to be affected.*—The total area of Godda subdivision is likely to be affected, that is, 957 square miles with a population of 385,000. Out of this the area more immediately affected is the southern part of the subdivision, having an area of 331 square miles and a population of 102,800. This last area, comprising tappas Passye and Belbathan, and the southern end of the part of the Damin-i-koh estate, which lies in Godda, I propose to declare an affected tract.

(2) *Character of communications in the affected area.*—No part of the area is touched by the railway, and it has no navigable waterway.

There are no metalled or fully bridged roads within its area. It communicates by means of roads, passable in the dry season, but nearly all more or less impassable by reason of hill streams and bad surface in the rains, with the railway stations of Bhagalpur, Ghaga, Pirpointi, Tinpahar, Kotalpakur, and Pakaur on the loop line, and with Deoghur on the chord line, and towards the south with Dumka and Suri. Internally it is provided with unmetalled and unbridged roads (a few small bridges and culverts have been built) giving access to almost every part of it, but little used in the rainy season.

(*c*) *Condition of grain stocks.*—The enquiry ordered by Government into the condition of grain stocks was made, but gave no trustworthy results. If we are to accept its results—no one has any stock at all. Traders will not reveal the state of their resources, nor will producers, and we are obliged, therefore, to fall back on our knowledge of the general conditions of local business.

In making his estimate Mr. Piffard has excluded the Paharia population, numbering some 23,000, on the ground that their crops of *bajra* and *bhadoi*, on which they depend, have been abundant. They may need help, being in the habit of coming down for employment to the valleys and of selling firewood, but their case is not urgent.

6. At a recent conference held at Dumka with my Subdivisional Officers, we determined that a reasonable estimate for average outturn of crops was—

	Per acre. Mds.	
Winter rice	... 12	cleaned rice.
Second crop on this land (1st and 2nd class only)	... 4	grain.
Bhadoi	... 10	grain of all sorts.
Second crop	... 5	
,, class *bari* land (chiefly *kurthi* and *rahar*)	... 4½	

Mr. Piffard accepted these figures, which are in some cases higher than those he gave originally. I give in a table below a calculation of the outturn in a normal and in the year of all crops. They include oilseeds and other non-edible crops, which can be sold for rent and other purposes They do not include mohwa and fruit.

I have calculated the value of an acre of first class, second class, and third class winter rice land for the purpose of determining average outturn at 3½, 2, and 1, respectively, since it would not be right to take an acre of the latter as of equal importance with an acre of the first in producing food. The proportion takes into account short cultivation

7. The figures are as follows:—

Winter rice.

Circle.	Normal area.	Outturn.	Proportion saved.	Outturn.
1	2	3	4	5
	Acres.	Mds.		Mds.
Godda	44,500	5,14,000	9 annas	2,89,000
Mahagama	32,100	3,91,700	9 ,,	2,20,000
Porayá	24,200	2,90,400	5½ ,,	1,00,000
Damin-i-koh, excluding hills ...	21,600	2,49,700	9 ,,	1,40,000
Total ...	1,22,900	14,45,800	8½ annas	7,49,000

Second crop, Winter rice land.

Circle.	Area.	Outturn.	Proportion saved.	This year's outturn.
1	2	3	4	5
	Acres.	Mds.		
Godda	25,300	1,01,200	8 annas	50,600
Mahagama	23,600	94,400	8 „	47,200
Poraya	12,700	50,800	6 „	19,000
Damin-i-koh	13,000	52,000	8 „	26 000
Total ...	74,600	3,08,400	7½ annas	1,42,800

Bhadoi.

Godda	10,200	1,02,000	10 annas	63,800
Mahagama	8,000	80,000	10 „	50,000
Poraya	6,200	62,000	8 „	31,000
Damin-i-koh	13,000	1,30,000	10 „	81,000
Total ...	37,400	3,74,000	9½ annas	2,26,800

Second crop on Bhadoi land.

Circle.	Area.	Outturn.	Proportion saved.	This year's outturn.
1	2	3	4	5
	Acres.	Mds.		
Godda	10,200	51,000	6 annas	19,000
Mahagama	8,000	40,000	6 „	15,000
Poraya	6,200	31,000	4 „	7,750
Damin-i-koh	13,000	65,000	6 „	24,000
Total ...	37,400	1,87,000	5½ annas	65,750

Rahar, Kurthi, &c.

Godda	20,000	90,000	4 annas	22,500
Mahagama	14, 0 0	64,300	4 „	16,000
Poraya	26,400	1,18,800	4 „	29,700
Damin-i-koh	29 000	1,30,500	4 „	32,400
Total ...	89,700	4,03 600	4 annas	1,00,600

These figures condensed give the following result:—

Circle.	Normal outturn.	Outturn this year.
	Mds.	Mds.
Godda	8,58,200	4,44,900
Mahagama	6,70,400	3,48,200
Poraya	5,53,000	1,87,450
Damin-i-koh	6,27,200	3,03,400
Total ...	27,08,800	12,83,950

The Poraya circle is thus singled out as the worst, having an outturn of about 34 per cent. of the normal, as against about 47 for the subdivision. The cold-weather crops were merely estimated. The facts about *bhadoi* and winter rice are known.

8. The grain calculated by Mr. Piffard to be necessary to feed the population is 10 chitaks per head This would make the supply necessary for a whole year about 20,00,000 maunds, so that the normal outturn estimated agrees with probabilities. If these figures are correct, there is a deficiency of food-supply for the subdivision of rather over 7,00,000 maunds, without reckoning rent and other expenses to be met and exports. We know that large exports have been and are going on. This calculation does not take account of mohwa, which is reckoned to give, if the crop succeeds, a full month's supply of food for the Sonthals, nor of such produce as lac and tusser, whose export help to bring something into the district, nor of the annual temporary emigration in search of work which reduces the number of mouths to be filled, and brings a little something, *i.e.*, from without. Where there is so much that must be little more than guess work, it would be rash to build too much either way on figures. Mr. Piffard's estimates of the proportion of crops saved are, however, the best he can make after very careful enquiry, and I so far accept them as to say the prospects disclosed are very serious and warn us to be fully on our guard.

9. Coming to the area of scarcity, I find that the population is 102,000, and the supply needed to support them for eight months, that is, up to the beginning of the *bhadoi* harvest, at 10 chitaks per head daily, is 3,84,000 maunds of grain.

The outturn for this area is—

Crop.	Area.	Normal outturn.	Proportion.	Outturn this year.
1	2	3	4	5
	Acres.	Mds.		Mds.
Winter rice	39,100	4,68,200	5 annas	1,46,300
Second crop	21,800	87,200	5 „	27,000
Bhadoi	13,050	1,30,500	8 „	65,200
Second crop	13,050	65,250	4 „	16,300
Kurthi, &c.	41,200	1,85,400	4 „	46,300
Total ...	.....	9,36,550	.....	3,01,100

The population of this area is (excluding Paharias about 10,000 souls) about 114,000,* and the grain necessary to support them for a day is 1,781 maunds, or for a year 6,50,000 maunds. Supposing the above calculation to be right, the following is the time the produce of this season's crops would last:—

Bhadoi crops ...	about 36 days.
Winter rice	„ 82 „
Second crop of bhadoi	„ 9 „
Kurthi, &c.	„ 26 „
Second crop, winter rice	„ 15 „
Total	168 „

* This is inconsistent with the figures given above (Mr. Piffard's), but as he did not give separate statistics for the tract under report in detail, I have made this calculation for myself. I think his was wrong.

R. C.—26-1-97.

There is in addition the stock of grain over from last harvest, amounting, according to Mr. Piffard's estimate in November, to about 60,000 maunds, or a supply for about 33 days. Of the above supplies, no part but the *bhadoi* crop was available before the end of December, and thus we may calculate that at that time there was a supply available locally, supposing none was exported, for 132 days at least, or, since it is quite certain this year's maize was not all consumed by the end of December, we can put it at not less than 150 days. The old stock was probably understated at 60,000 maunds, but taking it at that, we had at the end of December probable supplies for 183 days, or up to the end of June. Besides this, we may calculate that the Santhals, who form about half the population of the distressed area, would get a month's food from mohwa, and a fair amount of miscellaneous supplies from the forest, especially in the rains. There is likely to be a certain amount of emigration also in search of work, of which the ordinary emigrant for a few months only is not likely to meet with so much success as usual.

10. I should be inclined to let the stock mohwa and savings from emigration go to balance the loss by export. They are all uncertain items; in fact everything in the calculation is uncertain, being the best guess we can make, and this gives us a local supply for 150 days, or 5 months, up to about the end of May, leaving three months, June, July, and August, to be provided for. The stock of grain will not be equally divided, some raiyats having enough and something over, the traders having some, and many raiyats having none at all. We have calculated that there may be a beginning of pinching at any time, and that it will probably become serious from the 1st of April onward.

11. (*d*) *Sources of supply.*—As we cannot in any way check the coming and going of supplies, I propose to leave this question to be dealt with solely by trade. In order to attract prompt supplies in out of the way places, where necessary, we should be prepared to make small preliminary advances to enable traders to move their stocks, but, as I understand, the question of where supplies are to come from is not to be our concern at all.

12. (*e*) *Proposed measures of relief.*—In my No. 4192 R.* of the 16th January 1897, I have explained what system of relief measures we propose to adopt.

W. OLDHAM.

* My No. 283R., dated the 22nd January 1897.

* * * * * * * *

It is not proposed to open within the circles kitchens or poor-houses, or to form lines for workers, but we should have a hospital and dispensary at a central point, Poraya, where the outpost is, and a hospital assistant in charge. All cases of sickness should at once be conveyed there or to Godda. If the distress is severe, we shall need a second hospital and dispensary on the east side of the tract. Chandna in the Damin-i-koh is a suitable point. The buildings need only be temporary, and need not be erected until they are wanted. It may be preferable to hire quarters. The Chandna bungalow has good out-houses.

The Subdivisional Officer, Mr. Piffard, has got his plans and estimates for relief works in working order. The people likely to come to the work have their own tools, but we have ordered, in addition to the reserve stock of tools which we already have, such reserve of hoes, picks, and stone-hammers as we think necessary. Mr. Piffard has been of great help both in working out a system of relief better suited to our needs than the more elaborate and costly Bihar system, and in making all the practical arrangements. His set of maps which he has prepared gives us a much more accurate and detailed knowledge of facts regarding villages and populations as they are than we should otherwise have obtained. I think all is ready to begin when necessary in the area indicated. The enclosed map shows where it is and what are leading roads outside and within it.

13. (*f*) *Estimate of expenditure likely to be incurred and the local sources from which it can be met.*—I see in your report to Government No. 278Rct., of 1st January, you have correctly stated that we have in this district very small public resources from which to meet the expense of any extra work such as relief. There is no road or Public Works cess, and Government has not made over to us for local expenditure the pound and ferry receipts. The Government grant for roads, which is for the whole district, is spent mainly on repairs and establishment charges, and it is impossible, in view of the anticipated development of distress in almost every part of the district, to propose to concentrate it on this one spot. Within the Godda subdivision itself expenditure will have to be incurred after the 1st April, and I am receiving claims from nearly every other part of the district for more expenditure to give employment to those in distress.

14. There are sources from which I have hopes, although I cannot reckon on them as I could on funds actually under my control.

In the first place there is the liberality of the local landlords, on whom the moral obligation of spending money for the relief of their people is all the greater on account of the absence of local taxation, and of local well-to-do tenants for the same reason. The greater part of the affected area now under report is tuppa Passyo in the Lachmipur estate, and the manager, Mr. Braidwood, has already arranged for the opening of works wherever needed. I am not sure what he proposes to spend, but he will spend liberally. The greater part of the remainder is in the Government estate Domin-i-koh, and I hope that Government will not be backward in setting a good example to other landlords, and will, if necessary, increase its grants for estate improvement. The balance of the area is Belbathan, a long narrow strip between these two, whose people will be able to do a little, but not much, for themselves, but will be benefited by any work done in the neighbourhood. The proposed opening of the works for the projected Bousi Railway would be a help to the western

(Passye) side, but not to so great an extent as it would have been had the original line by Nonihat been adhered to. The line, as I understand, will now run direct from Bousi to Deoghur, leaving Passye some distance to the west.

I have also hopes that there will be some relief by means of emigration to a distance. The temporary crop-cutting expeditions have not been so productive as usual, many having come back empty-handed.

Where all is so uncertain, I can make no useful estimate, and can only repeat that which I have already submitted in answer to Government's order, in its No. 79Agri. of the 31st December 1896, and your No. 3328R. of the 6th January 1897.

This for Godda subdivision is Rs. 1,50,000, and for the whole district Rs. 3,11,200, of which Rs. 6,200 is to be spent in 1896-97 and Rs. 3,05,000 in 1897-98.

15. (*g*) *Any other matter necessary for the information of Government.*—As has been already reported to you, and by you to Government, the area most likely to be affected next to Godda is Jamtara. There will be distress in all parts of the district, more or less, owing to the high prices, but it has not manifested itself as yet. I observe considerable activity among the agriculturists in their usual engineering works of improving levels and making small reservoirs and reclaiming hollows, and I have already received promises from a number of local proprietors, among whom may be mentioned Raja Ram Ranjan Chakrabarti Bahadur, of Hetampore; Rai Kamaleswari Prasad Bahadur, proprietor of Belpatta; Mr. Braidwood Manager of Hendwai and of Lachmipur estate, parts of which lie in the subdivisions of Godda, Dumka and Deoghur; Mr. Maling Grant, who owns land in Dumka and Deoghur; the zamindars of Patsanda in Godda; Babu Darnao Lal, Ghatwal of Suruth; Babu Ram Charan Sing, Ghatwal of Bamongaon; the Manager of the Baneili estate, part of which is in Godda; the Ghatwal of Marraro in Jamtara, that they will spend money in giving employment. The Sankara, Rohini, Punasi and Narainpur estates are under the Court of Wards, and we are arranging for expenditure when needed. The zamindar of Pahia proposes to give help mainly by allowing facilities to private persons for making improvements in the shape of tanks and bunds. The largest proprietor in the district is Government, to whom I am addressing a separate report on the subject of improvements in Government estates.

Kamaleswari (of Monghyr).

16. In the Pakaur subdivision the situation is peculiar, owing to trouble in connection with the recent settlement of Ambar and Sultanabad. The Sonthal raiyats in those estates are, partly from the evil advice and threats of agitators, and partly from legitimate grievances, in an uneasy frame of mind, which has partially spread to the adjoining part of the Damin-i-koh estate of Government. The community system is strongly developed among them, and they consequently object to the interference of the kanungo, even when that is to take measurements and make plans for relief works. They look on it as an invasion on their privacy, and having just had a course of settlement again, they decline any further interference, saying they do not want bunds. In this subdivision there is no great likelihood that relief works on a large scale will be needed, the only parts reported as distressed being a few villages on the east side. I am therefore instructing the Subdivisional Officer to make up his precautionary relief programme, which is not likely to be needed this year, by projects for raising the local roads a foot or two. Pakaur is sore at present, and needs delicate handling.

17. As will be seen from the above report, I am in hopes that while the unexpected may always happen, and has been prepared for as far as possible, the district will probably get on without formal relief measures, except perhaps in the south of Godda and in the north-west of Jamtara. The extension of section 84 of the Tenancy Act proposed in my No. 697R., of the 2nd June 1891, would in my opinion be of the utmost use to us this year, as being likely to stimulate works of local improvement, which have been considerably impeded by the want of such a provision. Our resources would also be materially strengthened if the permission asked for in my No. 411P.-W., of the 5th September 1896, to establish turnpikes on the Dumka-Rampur Hat road were granted, and the same permission extended to our other expensive roads, namely, the Suri-Bhagalpur and the Dumka-Deoghur roads.

It may be said that this is a bad year to place impediments in the way of traffic. On the contrary, I think that to make the road self-supporting would be rather to withdraw a bounty than to impose a tax. While it is our duty not to put needless obstacles in the way of traffic, it is as little our duty to stimulate by maintaining free roads the exports of grain from the district, which, in the opinion of many, is going on to an excessive extent.

As executive orders only are needed to give effect to those proposals, and their effect would be almost immediate, I hope that even in this busy year time will be found to pass orders.

* * * * * * * *

19. I began this report meaning to keep it ready until the result of Mr Piffard's test works should be known. I think, however, that I ought to submit it to you at once, that you may be in possession of the views and information it contains. I have endeavoured to work out the information of Godda subdivision first, that being most urgent. I shall try to complete the information for the rest of the district by degrees, and submit it as it is ready. I do not expect any extensive operations in any case before the beginning of April, and think that with loans and useful private and public works, it may be possible in almost all parts to stave off the necessity for declaring famine at all. I submit my report chiefly on account of establishment.

BELVEDERE,
The 20th February 1897.

A. H. GAYER,
Private Secretary.

No. 1672A.

GENERAL.—*No. 1542A.—The 26th February 1897.*—Babu Nagendra Nath Dutt, Officiating Deputy Magistrate and Deputy Collector, Brahmanbaria, Tippera, is allowed leave for three months, under article 273 (*a*) of the Civil Service Regulations.

No. 1544A.—The 26th February 1897.—Babu Jyotish Chunder Sen, Officiating Deputy Magistrate and Deputy Collector, Tippera, is transferred temporarily to the Brahmanbaria subdivision of that district.

No. 1619A.—The 1st March 1897.—Mr. F. A. Slack, Secretary, Board of Revenue, is allowed furlough on medical certificate for twelve months, under article 340 (*a*) of the Civil Service Regulations, with effect from the 3rd March 1897.

No. 1623A.—The 1st March 1897.—Mr. E. W. Collin, Magistrate and Collector, 24-Parganas, is appointed to act as Secretary, Board of Revenue, during the absence, on furlough, of Mr. F. A. Slack, or until further orders.

No. 1627A.—The 1st March 1897.—Mr. E. H. C. Walsh, Junior Secretary, Board of Revenue, is appointed to act as Magistrate and Collector of the 24-Parganas district, during the absence, on deputation, of Mr. E. W. Collin, or until further orders.

Mr. Walsh is also appointed to act, until further orders, in the second grade of Magistrates and Collectors.

Mr. Walsh is appointed to act temporarily as Secretary, Board of Revenue, in addition to his own duties as Junior Secretary until relieved by Mr. H. Luson.

No. 1630A.—The 1st March 1897.—Mr. H. Luson, Deputy Commissioner, Manbhum, is appointed to act as Junior Secretary, Board of Revenue, during the absence, on deputation, of Mr. E. H. C. Walsh, or until further orders.

No. 1657A.—The 2nd March 1897.—Babu Chunder Narain Singh, Deputy Magistrate and Deputy Collector, who has, under the order of the 12th February 1897, been posted to the head-quarters station of the district of the 24-Parganas, is allowed furlough for twelve days, under article 371 of the Civil Service Regulations, in extension of the furlough granted to him under the order of the 10th November 1896.

No. 1667A.—The 2nd March 1897.—Mr. W. E. Gordon Leith, Officiating Deputy Superintendent and Remembrancer of Legal Affairs, is confirmed in that appointment, with effect from the 1st September 1896, *vice* Mr. G. C. Kilby, retired.

POLICE.—*No. 1568A.—The 1st March 1897.*—Mr. W. B. Maxwell, District Superintendent of Police, Pabna, is allowed furlough for eleven months, under article 340 (*b*) of the Civil Service Regulations, with effect from the 17th March 1897.

No. 1569A.—The 1st March 1897.—Mr. A. A. Campbell, Assistant Superintendent of Police, Pabna, is appointed to act as District Superintendent of Police of that district, during the absence, on furlough, of Mr. W. B. Maxwell, or until further orders.

ECCLESIASTICAL.—*No. 1665A.—The 2nd March 1897.*—The Rev. W. A. G. Luckman is appointed to be Junior Chaplain of St. Paul's Cathedral, Calcutta, and Chaplain of the Presidency General Hospital, with effect from the date on which he received charge.

The following notification is republished from the *Assam Gazette*:—

No. 611R.—The 17th February 1897.—Under the provisions of section 8 of Act I of 1882 (the Assam Labour and Emigration Act, 1882), the Chief Commissioner appoints Mr. R. C. Hamilton, I.C.S., Assistant Commissioner, to be an Assistant Inspector of Labourers in the district of Kamrup.

C. W. BOLTON,
Chief Secy. to the Govt. of Bengal.

REVENUE DEPARTMENT,—(LAND REVENUE.)

Rules for the Zamindari Dâk under Act VIII (B.C.) of 1862.

NOTIFICATION No. 881L.R.

The 26th February 1897.—In supersession of previous orders, the Lieutenant-Governor is pleased to sanction the following revised rules for the Zamindari Dâk under Act VIII (B.C.) of 1862:—

Preamble.—Where zamindari dâk establishments exist, there can be no objection to making further use of them for the conveyance and delivery of private correspondence, so long as no extra charge is thrown thereby upon the zamindars or Government farmers. Throughout Bengal, moreover, it has been found convenient to entrust to the Postal authorities the general control and direction of the district dâk lines, to ensure their proper working in connection with the lines of the Imperial post. The Lieutenant-Governor, under the discretionary power vested in him by the Act, having appointed the Collector in the place of the Magistrate to carry out the provisions of the Act, the following Rules have been framed with his sanction under section 11, Act VIII (B.C.) of 1862, for the purpose of

defining the duties and relations of the Collectors and the Postal authorities, and for giving proper effect to the provisions of the Act:—

1. *Object of the Zamindari Dâk.*—The primary object of the zamindari dâk is the conveyance of letters between Police officers and police-stations and the Magisterial officers of the district. Only Magistrates and Police officers (including chaukidari panchayats) are permitted to use the zamindari dâk, free of charge, for the transmission of official correspondence, and all other officers when using it, shall stamp their correspondence, according to the rules in force under the Post Office Act, XIV of 1866.

2. *Mode of sending important official documents.*—Important official documents sent by zamindari dâk by officers entitled to use this dâk free of charge, should be sent by registered letter-post, and paid for according to the prescribed fee of 2 annas out of the contract contingent allowance of the officer concerned.

3. *Duty of Collector.*—It is the duty of the Collector of the district to determine the stations between which communication is required for police purposes.

4. *Duty of Postmaster-General.*—The Postmaster-General will then, in communication with the Collector, arrange all questions connected with routes, stages, timing, strength and cost of establishment, and the like; any difference of opinion between them being referred for the orders of the Commissioner, which shall be final.

5. *Charges against Zamindari Dâk Fund.*—No charges on account of delivery peons or rural messengers can be included in the zamindari dâk budget; but the cost of all establishments necessary for the collection and proper keeping of the accounts of the zamindari dâk cess, as well as for the punctual conveyance of the district mails and all reasonable charges for the pay of the zamindari dâk postmasters, contingencies, including boats, huts, common post-office furniture, stationery, and the like, must be defrayed from the funds raised under the provisions of the Act.

A zamindari dâk postmaster, with no other means of income, should not ordinarily be allowed less pay than Rs. 10 per mensem. Nor should he ordinarily be allowed more than Rs. 15 per mensem from the zamindari dâk cess. He may, however, receive additional pay from the Imperial post, with reference to his pecuniary responsiblility or duties not connected with official correspondence.

NOTE.—The cost of construction and repairs of zamindari dâk buildings and of the furniture required therein, is debitable to the zamindari dâk cess. All other articles of postal equipment are debitable to Imperial Funds.

6. *Budget.*—The Superintendent of Post-offices will annually, on or before the 1st October, prepare, under the instructions of the Collector, an estimate of the total cost of the establishments and contingencies required for the year commencing on the 1st April following. The Collector, after including in this the cost of his own office establishment, and any extra provision necessary for keeping up communications between the Police and the District Magistrate's camp while the latter is on tour, will forward the budget to the Postmaster-General, who will, after passing or modifying it (in communication with the Collector), return it to the Collector for insertion in the budget of the estimated balance at the close of the current year, and the total sum necessary to be levied with reference to the provisions of section 10 of the Act, with a note of the rate at which he proposes to levy the cess, or where the rate has been fixed for a term of years, the rate, and a reference to the order sanctioning it. Having thus completed the budget estimate, the Collector will forward it to the Commissioner, who, if no reasons for revising it appear, will, after passing it, forward it to the Accountant-General not later than the 15th November of each year. If the Commissioner, however, sees reasons for revising the budget, he will return it to the Collector for resubmission after reconsideration in communication with the Postmaster-General.

7. *Pay and contingent bills.*—The monthly pay bills of the zamindari dâk establishments will be drawn by the postmaster disbursing the amounts, and be paid at the treasury on the countersignature of the Collector. The pay bills of the Collector's own office will be paid on his own signature. The monthly contingent bills will be passed on the countersignature of the Postmaster-General, and after such countersignature, they must be presented to the Collector before being cashed at the treasury, in order to enable the Collector's office to prepare the monthly accounts of zamindari dâk expenditure. The Treasury Officer will not cash any such bill, unless it is noted as having been "seen" by the Collector's office. Charges for boats in the rains, though provided in the budget, will not be incurred without the previous sanction of the Postmaster-General. The Collector shall be at liberty to draw against the special provision for dâks to the Magistrate's camp on tour, without any reference to the Postmaster-General. A careful watch should be kept by the Collectors over the balance to credit of the Zamindari Dâk Fund, and timely application should be made to Government for special sanction to meet the establishment charges out of Provincial funds if the balance, in hand will not suffice to meet the establishment bills.

8. *Appointment and dismissal of officers.*—The Collector will appoint and may dismiss his own office and tour establishments. An appeal from the Collector's orders lies to the Commissioner. The powers of appointing, removing, punishing, and granting leave to postmasters, dâk-runners, and any other persons employed under section 2 of the Act, are vested in the Postmaster-General and the several officers of the Imperial Post Office, in whom the powers of appointing, removing, punishing and granting leave to persons of the same grades in the Imperial Post are vested. In order to enable the Collector's office to check the monthly pay bills of the zamindari dâk establishments, the Superintendent will, on the first day of

each month, submit to the Collector a list of all appointments, removals, punishments and leave affecting the pay bill of the preceding month.

9. *Realization of arrears.*—As soon as an arrear of zamindari dâk cess, with the penalty imposed by section 9 of Act VIII (B.C.) of 1862, becomes due, the Collector of the district, or the Deputy Collector in charge of the Arrear Collection Department, will take the necessary steps under Act I (B.C.) of 1895 to realize the sum due from the defaulter.

10. *Payment of process fee.*—The fees of processes issued under Act I (B.C.) of 1895 against defaulters are not to be prepaid by the Collector, but all other expenses incurred, such as boat hire, ferry tolls, railway fares, &c., are to be prepaid from the Zamindari Dâk Fund.

11. *Permanent advance.*—For this purpose the Collector of each district will keep the sum of Rs. 50 as a permanent advance from the Zamindari Dâk Fund, and may allot a portion of this sum to the Postmaster at the district head-quarters, who incurs contingent expenditure on account of the fund. All sums disbursed by the Collector in payment, for purposes mentioned in Rule 10, or for other specified purposes, will be recouped by him from the fund by bills.

12. *Process costs, how to be credited.*—All sums realized from defaulters on account of the sums expended under Rule 10 shall be credited in cash to the Zamindari Dâk Fund as costs realized.

13. *Cost of execution of certificates.*—When a certificate for the realization of the zamindari dâk cess is transmitted for execution to another district under section 22 (*1*) of Act I (B.C.) of 1895, all costs on account of boat hire, ferry tolls, railway fare, &c., will be incurred from the permament advance in the hands of the Collector of the latter district made under Rule 11, and, when realized, such costs shall be credited to the Zamindari Dâk Fund of the district. The arrear realized shall be sent to the requiring district by means of a remittance transfer receipt.

14. *Jurisdiction.*—Under the Act, the revenue and criminal jurisdictions of a district are treated as identical.

15. *Police officers allowed the use of dâk boats.*—Police officers, together with any persons or property in their custody, are to be allowed, when on duty, to travel free by postal dâk boats, provided these boats are paid for from the Zamindari Dâk Fund.

NOTE.—This concession is subject to the following conditions:—

1st.—That the boats afford sufficient accommodation without risk to the mails.

2nd.—That the time of starting, the speed and the halting, be regulated solely with reference to the Postal Service.

3rd.—That no deviation be made from the prescribed postal route.

4th.—This concession does not extend to the wives, families, servants or coolies of police officers. These must, on no account, be allowed to travel with the mail.

M. FINUCANE,
Secy. to the Govt. of Bengal.

NOTIFICATION—No. 906L.R.

The 26th February 1897.—Under the powers conferred upon him by section 101 (2) (*b*) of the Bengal Tenancy Act, VIII of 1885, the Lieutenant-Governor is pleased to order that a survey shall be made and a record of rights prepared in respect of all lands included in holka No. 3441, comprising within its boundaries (1) the mauza Sutabaria, in kharija taluks Nos. 1725, 1726, 1727, 3567, and 1636, in parganas Chandradwip, Sultanabad, and Buzrugumedpur; holka No. 3440, comprising within its boundaries (2) the mauza Chandpura, in kharija taluks Nos. 1725, 1726, 1727, and 3567 in parganas Chandradwip and Sultanabad; holka No. 3342, comprising within its boundaries (3) the mauza Rone Gopaldi, in kharija taluks Nos. 1725, 1726, and 1727 in pargana Chandradwip; holka No. 3389, comprising within its boundaries (4) the mauza Gozalia, in kharija taluks Nos. 1725, 1726, 1727, 3567, and 1636 in parganas Chandradwip, Sultanabad, and Buzrugumedpur; holka No. 3390, comprising within its boundaries (5) mauza Bahir Gozalia in kharija taluks Nos. 1725, 1726, 1727, 3567, and 1636 in parganas Chandradwip, Sultanabad, and Buzrugumedpur; and in holka No. 3414, comprising within its boundaries mauzas (6) Par Dakna, (7) Chatra, and (8) Talbaria in kharija taluks Nos. 1725, 1726, 1727, and 3567 in parganas Chandradwip and Sultanabad, in the district of Backergunge.

The particulars to be recorded in the survey and record of rights shall be the following:—

(*a*) The name of each tenant.

(*b*) The class to which he belongs, that is to say, whether he is a tenure-holder, raiyat holding at fixed rates, settled raiyat, occupancy raiyat, non-occupancy raiyat or under-raiyat, and if he is a tenure-holder, whether he is a permanent tenure-holder or not, and whether his rent is liable to enhancement during the continuance of his tenure.

(*c*) The situation, quantity, and boundaries of the land held by him.

(*d*) The name of his landlord.

(*e*) The money rent payable, or if a produce rent, the fact that a produce rent is paid.

(*f*) The mode in which that rent has been fixed; whether by contract, by order of a Court, or otherwise.

(*g*) If the rent is a gradually increasing rent, the time at which and the steps by which it increases.

(*h*) The special conditions and incidents, if any, of the tenancy.

(*i*) The name of each proprietor (including rent-free owner) with the character and extent of his interest, and the situation, quantity, and boundaries of the private lands held by the proprietors as defined in Chapter XI of the Act.

(*j*) The name of each rent-free occupant, if any; the situation, quantity and boundaries of the land held by him, and whether he holds rent-free by the permission of the proprietor of the land or of his predecessor in title, or independently of such permission.

M. FINUCANE,
Secy. to the Govt. of Bengal.

NOTIFICATION—No. 907L.R.

The 26th February 1897.—With reference to the above notification, Babu Pyari Mohan Basu, Deputy Collector, is authorised, under section 3 (17) of the Bengal Tenancy Act VIII of 1885, to discharge the functions of a Revenue Officer under the provisions of the said Act, so far as they relate to Revenue Officers. He is also vested with the powers of a Settlement Officer under Rule 1, Chapter VI of the Rules framed by Government under the Act.

M. FINUCANE,
Secy. to the Govt. of Bengal.

NOTIFICATION—No. 908L.R.

The 28th February 1897.—Under section 3 of Act XIX of 1883, the Lieutenant-Governor is pleased to empower Babu Banka Behari Baksi, Deputy Collector, and Charge Superintendent of the distressed area in the Satkhira subdivision, and Babu Gati Krishna Neogi, Deputy Collector in charge of the said subdivision in Khulna, to discharge the functions of a Collector under that Act.

M. FINUCANE,
Secy. to the Govt. of Bengal.

NOTIFICATION—No. 940L.R.

The 2nd March 1897.—Under the powers conferred upon him by section 101 (2) (*d*) of the Bengal Tenancy Act VIII of 1885, the Lieutenant-Governor is pleased to direct that a survey be made and a record of rights prepared in respect of all lands included within the boundaries of the Government estate Char Nakchira, pargana Gumgar, tauzi No. 131, in the district of Midnapur.

The particulars to be recorded in the survey and record of rights shall be the following:—

(*a*) The name of each tenant.

(*b*) The class to which he belongs, that is to say, whether he is a tenure-holder, raiyat holding at fixed rates, settled raiyat, occupancy raiyat, non-occupancy raiyat or under-raiyat; and if he is a tenure-holder, whether he is a permanent tenure-holder or not, and whether his rent is liable to enhancement during the continuance of his tenure.

(*c*) The situation, quantity and boundaries of the land held by him.

(*d*) The name of his landlord.

(*e*) The money-rent payable or, if a produce-rent, the fact that a produce-rent is paid.

(*f*) The mode in which that rent has been fixed, whether by contract, by order of a Court, or otherwise.

(*g*) If the rent is a gradually increasing rent, the time at which, and the steps by which, it increases.

(*h*) The special conditions and incidents, if any, of the tenancy.

(*i*) The name of each proprietor with the character and extent of his interest, and the situation, quantity and boundaries of the proprietor's private lands as defined in chapter XI of the Act.

(*j*) The name of each rent-free occupant, if any, the situation, quantity and boundaries of the land held by him, and whether he holds rent-free by the permission of the proprietor of the land or of his predecessor in title or independently of such permission.

M. FINUCANE,
Secy. to the Govt. of Bengal.

REVENUE DEPARTMENT—(AGRICULTURE—FAM).

NOTIFICATION—No. 614(Fam.).

The 2nd March 1897.—In continuation of Government Notification No. 199 (Fam.), dated the 26th January 1897, published at page 112, Part I of the *Calcutta Gazette* of the 27th idem, and with reference to the Government of India's Notification No. 342—S.R., dated the 20th January 1897, published at page 49, Part I of the *Gazette of India* of the 23rd idem, the Lieutenant-Governor is pleased to declare that the orders of the Government of India as to the exemption from stamp duty of instruments executed to secure the repayment of loans made by landlords to their tenants, or persons holding under their tenants, for any of the objects specified in section 4 of the Land Improvement Loans Act, XIX of 1883, or in section 4 (1) of the Agriculturists' Loans Act (XII of 1884), shall also apply to the following distressed thanas of the Rajshahi district of the Rajshahi Division:—

(1) Thana Boalia.
(2) Thana Puthia.
(3) Thana Charghat.
(4) Thana Bagmara.
(5) Thana Lalpur.
(6) Thana Nator.

M. FINUCANE,
Secy. to the Govt. of Bengal.

NOTIFICATION.

UNDER the provisions of section 2 of Act VI of 1876, as amended by Act V of 1884, Babu Tripura Charan Roy, Manager of the Wards, and Encumbered Estates in the district of Lohardaga, is appointed to be the Manager, and the management is vested in him, of the undermentioned immoveable property of Lal Chakradhar Nath Sahi Deo of Palkot, in the district of Lohardaga, and of any other immoveable property to which the said holder is entitled in his own right or which he is entitled to redeem or which may be acquired by or devolve on him or his heirs during the continuance of such management:—

Name of estate.	*Name of holder.*
Jema, consisting of two mauzas, Jema and Shero, *asli mai dakhli*, in the district of Lohardaga.	Lal Chakradhar Nath Shahi Deo.

FINANCIAL DEPARTMENT.

NOTIFICATION.—No. 1678R.P.

The 25th February 1897.—Under section 116 of the Bengal Cess Act, IX of 1880, the following officers have been appointed to be *ex-officio* members of the Manbhum District Road Cess Committee:—

1. The Deputy Collector in charge of the Road Cess Department, *vice* Babu Upendra Chandra Mukerji, Deputy Magistrate, deceased.
2. The Subdivisional Officer of Govindpur, *vice* Babu Nobin Krishna Banerji, Deputy Magistrate, transferred.
3. The District Superintendent of Police, *vice* Surgeon-Captain E. A. W. Hall, Civil Surgeon, transferred.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

NOTIFICATION No. 1440S.R.

The 1st March 1897.—In exercise of the powers conferred by section 7 of the Inland Bonded Warehouses Act (VIII of 1896), and with the previous sanction of the Governor-General in Council, the Lieutenant-Governor is pleased to make the following rules to carry out the provisions of the said Act:—

1. Application for a license for a warehouse for the storage of salt under time-bonds shall be made to the Chief Customs Authority in Form No. 1, and the license, if granted by the Chief Customs Authority, shall be in Form No. 2 appended to these rules.

2. At the time of granting an application for such a license, the Chief Customs Authority shall declare what Government officer shall ordinarily inspect the warehouse for the purposes of these rules, and no license shall be issued for a warehouse, unless it can, in the opinion of the Chief Customs Authority, be conveniently inspected by such Government officer.

3. The holder of a license for a warehouse under rule 1 may apply to the Chief Customs Officer for sanction to remove salt, upon which duty has not been paid, under time-bond to such warehouse under section 5 of the said Act. The application shall be in Form No. 3 appended to these rules.

4. The obligor of a bond executed under section 6 of the said Act shall give security in Government promissory notes to the extent of the duty covered by the bond. In the event of payment of part of the duty being made under the last proviso to section 6 of the said Act, or as prescribed in rule 6, a proportionate amount of the security, as nearly as may be convenient, shall be returned.

5. On the execution of a bond and deposit of security, the Chief Customs Officer shall issue a pass in Form No. 4 appended to these rules. This pass shall be returned by the obligor when applying for the return of his security.

6. The Chief Customs Officer shall require one-quarter of the duty to be paid as soon as one-quarter of the salt shall have passed out of the warehouse; a further quarter to be paid as soon as half the salt shall have so passed out, and a further quarter as soon as three-quarters of the salt shall have so passed out. Full duty shall be payable when the whole of the salt has been removed, even if the removal be effected before the date of the expiry of the bond. And in all other cases the duty shall be payable on the date of the expiry of the bond. The duty shall ordinarily be payable at the office of the Chief Customs Officer of the place where the warehouse is situated, but the Chief Customs Officer at the time of the execution of the bond may grant permission to the obligor to pay, from time to time, the duty into any specified Government treasury, in which case the Collector of the district, in which such treasury is situate, shall advise the Customs Collector who issued the bond of every such payment.

7. When salt is issued under a time-bond for conveyance from shipboard or a warehouse appointed or licensed under the Sea Customs Act, 1878, to a warehouse licensed under these rules, such salt shall, during transit, be at the sole risk and charge of the obligor under the bond, who shall be bound to convey the salt by the method and route specified in the pass in Form No. 4, and shall be responsible for its production before the inspecting officer.

8. When salt issued under a time-bond is conveyed to a warehouse licensed under these rules by boat, flat or steamer, or by rail, either in bulk or in bags, the hatches of the flat or steamer, and the doors of the wagon, shall be securely fastened and sealed in the presence of a preventive officer, and in the case of salt in bulk conveyed either by boat, flat or steamer, the salt shall be stamped all over with the Government adul.

9. On arrival, the inspecting officer shall view the salt and satisfy himself that the seals or adul, as the case may be, are intact, and shall furnish the license-holder with a certificate of its arrival. Should the inspecting officer have reason to believe that the salt has been tampered with on its way, he shall make a report to the Chief Customs Authority, stating the reason for the conclusion at which he has arrived, and the Chief Customs Authority may, on receipt of his report, order the bond to be cancelled and the duty on the full amount to be paid at once.

10. The inspecting officer shall inspect the warehouse at least twice in each month, and at each inspection shall note approximately the proportion of salt disposed of and transmit his report to the Chief Customs Officer.

11. The inspecting officer shall see that the salt covered by each bond is stowed separately. Any license-holder mixing the salt covered by two bonds will be liable to forfeiture of his license, and the cancellation of the bond relating to such salt, when the full amount of duty on such salt shall be payable at once.

12. The Chief Customs Authority may immediately withdraw a license for a warehouse, without compensation, when the licensee has infringed any provisions of the Salt or Customs laws for the time being in force, or any rules made under any such laws.

13. The Chief Customs Authority may withdraw a warehouse license without compensation, but on such notice as it may deem reasonable or sufficient, when the continued existence of such warehouse appears to the Customs Authority to be dangerous or inexpedient on public grounds.

14. The licensee shall be responsible (on pain of forfeiture of his license) to carry out at his own expense any alterations or improvements in the warehouse buildings or arrangements which may be deemed necessary by the Chief Customs Authority in the interests of the revenue.

NOTE.—The rules issued under Notification No. 2565S.R., dated the 23rd April 1894, apply to warehouses licensed under section 4 of the Inland Bonded Warehouses Act (VIII of 1896).

H. H. RISLEY,
Secy. to the Govt. of Bengal.

COMMUNICATIONS.

The 2nd March 1897.

Declaration.—No. 64.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for a masonry bridge on the 44th mile of the Ranchi-Purulia road, 1st section, in the village of Harwady, pargana Silli, zilla Lohardaga, it is hereby declared that for the above purpose a piece of land measuring, more or less, 4 bighas 15 cottahs and 4 chitaks of standard measurement, bounded on the north, south, east and west by village lands, is required within the aforesaid village of Harwady.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

No. 68.—Declaration.—Whereas it appears to the Lieutenant-Governor of Bengal that the land occupied by the staging bungalow at Cuttack is required to be taken up by Government at the public expense for a public purpose, viz., for the bungalow compound, it is hereby declared that for the above purpose the land, measuring 2 mans and 13 gunths of standard measurement and bounded as follows:—

On the north.—By the embankment of the river Mahanadi,
On the south.—By the cantonment road,
On the west.—By a bungalow,
On the east.—By the road to the river Mahanadi,

is required.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

A plan of the land may be seen in the office of the Magistrate of Cuttack.

J. G. H. GLASS,
Secy. to the Govt. of Bengal.

LOCAL COMMUNICATIONS.

The 1st March 1897.

No. 63.—Declaration.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the expense of the Dacca District Board for a public purpose, viz., for the construction of the unfinished portions of the road from Pachdona to Bhatpara in the villages of Dighirpar, Shankhola, Daudpur, station Rupgunge, zilla Dacca, it is hereby declared that for the above purpose a piece of land measuring, more or less, 1 bigha 3 cottahs and 4 dhurs of standard measurement, bounded as follows:—

Plot No. I.—On the north and south by the existing Pachdona Bhatpara road, and on the east and west by the land belonging to Babu Girish Chandra Chakrabarti.

Plot No. II.—On the north and east by the lands of Babu Purna Chandra Sen, Girish Chandra Chakrabarti and others, on the south by the existing Pachdona-Bhatpara road, and on the west by the existing Pachdona-Bhatpara road and by the lands belonging to Purna Chandra Sen and others, is required within the aforesaid villages of Dighirpar, Shankhola, and Daudpur.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

J. G. H. GLASS,
Secy. to the Govt. of Bengal.

IRRIGATION DEPARTMENT

The 2nd March 1897.

No. 67.—Declaration.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for a retired line of embankment on the left bank of the Diamond Harbour Creek in mile 59-60, in the village of Ramchandrapur, pargana Mooragacha, zilla 24-Parganas, it is hereby declared that for the above purpose a piece of land measuring, more or less, 12 bighas 10 cottahs 2 chitaks of standard measurement, bounded on the north and south by the village land of Ramchandrapur, on the east and west by the Government embankment, is required within the aforesaid village of Ramchandrapur.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

A. D. McARTHUR, *Col.*, R.E.,
Secy. to the Govt. of Bengal.

RAILWAY DEPARTMENT.

The 1st March 1897.

No. 43.—Notification.—Babu Ramesh Chandra Das, Officiating Deputy Magistrate and Deputy Collector, is employed in acquiring lands required for the Hajipur-Katihar Extension of the Tirhut State Railway in the district of Purnea.

The 2nd March 1897.

No. 45.—Declaration.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for borrowpits for the Howrah-Amta Tramway, in the village of Dangashampur, pargana Balia, zilla Howrah, it is hereby declared that for the above purpose a piece of land, measuring, more or less, 13 cottahs and 2 chitaks of standard measurement, bounded on the north by nickings on the ground, on the east by the Howrah-Amta Road, and on the south and west by nickings on the ground, is required within the aforesaid village of Dangashampur.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

A plan of the land may be inspected in the office of the Land Acquisition Deputy Collector of the Howrah-Amta Tramway at Howrah.

No. 46.—Declaration.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for borrowpits for the Howrah-Amta Tramway, in the village of Dipa, pargana Balia, zilla Howrah, it is hereby declared that for the above purpose a piece of land, measuring, more or less, 7 cottahs and 6 chitaks of standard measurement, bounded on the north, east and south by nickings on the ground, and on the west by the Howrah-Amta Road, is required within the aforesaid village of Dipa.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

A plan of the land may be inspected in the office of the Land Acquisition Deputy Collector of the Howrah-Amta Tramway at Howrah.

No. 47.—Declaration.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for borrowpits for the Howrah-Amta Tramway, in the village of Brahmanpara, pargana Balia, zilla Howrah, it is hereby declared that for the above purpose a piece of land, measuring, more or less, 14 cottahs and 11 chittaks of standard measurement, bounded on the north, east and south by nickings on the ground, and on the west by the Howrah-Amta Road, is required within the aforesaid village of Brahmanpara.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

A plan of the land may be inspected in the office of the Land Acquisition Deputy Collector of the Howrah-Amta Tramway at Howrah.

No. 48.—Declaration.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for borrowpits for the Howrah-Amta Tramway, in the village of Jadabbati, pargana Balia, zilla Howrah, it is hereby declared that for the above purpose a piece of land,

measuring, more or less, 6 chittaks of standard measurement, bounded on the north by nickings on the ground, on the east by the Howrah-Amta Road, and on the south and west by nickings on the ground, is required within the aforesaid village of Jadabbati.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

A plan of the land may be inspected in the office of the Land Acquisition Deputy Collector of the Howrah-Amta Tramway at Howrah.

No. 49.—Declaration.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for borrowpits for the Howrah-Amta Tramway, in the village of Jalalsi, pargana Balia, zilla Howrah, it is hereby declared that for the above purpose a piece of land, measuring more or less, 1 cottah and 6 chittaks of standard measurement, bounded on the north by nickings on the ground, on the east by the Howrah-Amta Road, and on the south and west by nickings on the ground, is required within the aforesaid village of Jalalsi.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

A plan of the land may be inspected in the office of the Land Acquisition Deputy Collector of the Howrah-Amta Tramway at Howrah.

No. 50.—Declaration.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz, for borrowpits for the Howrah-Amta Tramway, in the village of Maju, pargana Balia, zilla Howrah, it is hereby declared that for the above purpose two plots of land, measuring, more or less, 1 cottah of standard measurement—

Plot No. 1—Being bounded on the north by nickings on the ground, on the east by the Howrah-Amta Road, and on the south and west by nickings on the ground;

Plot No. 2—Being bounded on the north, east and south by nickings on the ground, and on the west by the Howrah-Amta Road.

are required within the aforesaid village of Maju.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

A plan of the land may be inspected in the office of the Land Acquisition Deputy Collector of the Howrah-Amta Tramway at Howrah.

No. 51.—Declaration.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for borrowpits for the Howrah-Amta Tramway, in the village of Gouripur, pargana Balia, zilla Howrah, it is hereby declared that for the above purpose a piece of land, measuring, more or less, 4 cottahs and 8 chittaks of standard measurement, bounded on the north by nickings on the ground, on the east by the Howrah-Amta Road, and on the south and west by nickings on the ground, is required within the aforesaid village of Gouripur.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

A plan of the land may be inspected in the office of the Land Acquisition Deputy Collector of the Howrah-Amta Tramway at Howrah.

No. 52.—Declaration.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up at the public expense for a public purpose, viz., for staff quarters for the South Bihar Railway in the district of Gaya, it is hereby declared that for the above purpose a plot of land of an approximate area of 9·24 acres is required in the town of Manpur.

Mines of coal, iron-stone, slate or other minerals lying under the land, or any particular portion of the land, except only such parts of the mines and minerals as it may be necessary to dig or carry away or use in the construction of the work for the purpose of which the land is being acquired, are not needed.

This declaration is made, under the provisions of section 6 of Act I of 1894, and section 3, clause (1) of Act XVIII of 1885, to all whom it may concern.

No. 44.—Corrigendum.—In the third line of this Department Declaration No. 39, dated the 23rd February 1897, published at page 288, Part I of the *Calcutta Gazette* of the 24th idem, *for* "ereotion" *read* "construction."

Secy. to the Govt. of Bengal.

MARINE DEPARTMENT.

The 15th February 1897.

No. 36Marine.—The following orders in Council, and the Regulations for preventing collisions at sea appended thereto, are published for general information. The revised Regulations, dated the 27th November 1896, will come into force on the 1st of July 1897.

A. D. McARTHUR, *Col.*, R.E.,
Secy. to the Govt. of Bengal.

At the Court at Osborne House, Isle of Wight, the 11th day of August 1884.

PRESENT:

The Queen's Most Excellent Majesty in Council.

Whereas by Order in Council made in pursuance of the Merchant Shipping Act Amendment Act, 1862, and dated the fourteenth day of August, one thousand eight hundred and seventy-nine, Her Majesty, on the joint recommendation of the Admiralty and the Board of Trade, was pleased to direct that on and after the first day of September, one thousand eight hundred and eighty, the Regulations for preventing Collisions at Sea contained in an Order in Council dated the ninth day of January, one thousand eight hundred and sixty-three, and the additions by an Order in Council dated the thirteenth day of June, one thousand eight hundred and sixty-eight, made thereto, should be annulled, and that there should be substituted therefor the new Regulations contained in the first schedule to the said first-named Order in Council, and that the same should from and after the first day of September, one thousand eight hundred and eighty, apply to ships of the countries mentioned in the said second schedule thereto, whether within British jurisdiction or not.

And whereas by the Orders in Council dated respectively the twenty-fourth day of March, one thousand eight hundred and eighty, the twenty-sixth day of August, one thousand eight hundred and eighty-one, the eighteenth day of August, one thousand eight hundred and eighty-two, the twenty-third day of August, one thousand eight hundred and eighty-three, and the second day of February, one thousand eight hundred and eighty-four, Her Majesty was pleased to direct that the operation of the Article numbered 10 of the New Regulations contained in the first schedule of the said Order in Council of the fourteenth day of August, one thousand eight hundred and seventy-nine, should be suspended from time to time.

And whereas the Admiralty and the Board of Trade have jointly recommended to Her Majesty that, so far as regards British ships and Boats, the regulations hereinafter set forth shall be substituted for the regulations contained in the first schedule to the said Order in Council of the fourteenth day of August, one thousand eight hundred and seventy-nine.

Now, therefore, Her Majesty, by virtue of the powers vested in Her by the said recited Act, and by and with the advice of Her Privy Council is pleased to direct that, on and after the first day of September, one thousand eight hundred and eighty-four the regulations contained in the schedule, hereto shall, so far as regards British ships and boats, be substituted for the regulations contained in the first schedule to the said Order in Council of the fourteenth day of August one thousand eight hundred and seventy-nine.

SCHEDULE REFERRED TO IN THIS ORDER.

Regulations for preventing Collisions at Sea.

Article 1.—In the following rules every steam ship which is under sail and not under steam is to be considered a sailing ship; and every steam ship which is under steam, whetner under sail or not, is to be considered a ship under steam.

Rules concerning Lights.

Article 2.—The lights mentioned in the following Articles numbered 3, 4, 5, 6, 7, 8, 9, 10 and 11, and no others, shall be carried in all weathers, from sunset to sunrise.

Article 3.—A seagoing steam ship when under way shall carry :—

(*a*) On or in front of the foremast, at a height above the hull of not less than 20 feet, and if the breadth of the ship exceeds 20 feet, then at a height above the hull not less than such broadth, a bright white light, so constructed as to show an uniform and unbroken light over an arc of the horizon of 20 points of the compass, so fixed as to throw the light 10 points on each side of the ship, viz., from right ahead to two points abaft the beam on either side, and of such a character as to be visible on a dark night, with a clear atmosphere, at a distance of at least five miles.

(*b*) On the starboard side a green light, so constructed as to show an uniform and unbroken light over an arc of the horizon of 10 points of the compass, so fixed as to throw the light from right ahead to two points abaft the beam on the starboard side, and of such a character as to be visible on a dark night with a clear atmosphere, at a distance of at least two miles.

(*c*) On the port side a red light, so constructed as to show an uniform and unbroken light over an arc of the horizon of 10 points of the compass, so fixed as to throw the light from right ahead to two points abaft the beam on the port side, and of such a character as to be visible on a dark night, with a clear atmosphere, at a distance of at least two miles.

(*d*) The said green and red side lights shall be fitted with inboard screens projecting at least 3 feet forward from the light, so as to prevent these lights from being seen across the bow.

Article 4.—A steam ship, when towing another ship shall, in addition to her side lights, carry two bright white lights in a vertical line one over the other, not less than 3 feet apart, so as to distinguish her from other steam ships. Each of these lights shall be of the same construction and character, and shall be carried in the same position, as the white light which other steam ships are required to carry.

Article 5 (*a*).—A ship, whether a steam ship or a sailing ship, which from any accident is not under command, shall at night carry in the same position as the white light which steam ships are required to carry, and, if a steam ship, in place of that light, three red lights in globular lanterns, each not less than 10 inches in diameter, in a vertical line one over the other not less than three feet apart, and of such a character as to be visible on a dark night with a clear atmosphere at a distance of at least two miles; and shall by day carry in a vertical line one over the other, not less than three feet apart, in front of but not lower than her foremast head, three black balls or shapes, each two feet in diameter.

(*b*) A ship, whether a steam ship or sailing ship employed in laying or in picking up a telegraph cable, shall at night carry in the same position as the white light which steam ships are required to carry, and if a steam ship, in place of that light, three lights in globular lanterns each not less than 10 inches in diameter, in vertical line over one another, not less than 6 feet apart; the highest and lowest of these lights shall be red, and the middle light shall be white, and they shall be of such a character that the red lights shall be visible at the same distance as the white light. By day she shall carry in a vertical line one over the other not less than six feet apart, in front of but not lower than her foremast head, three shapes not less than two feet in diameter, of which the top and bottom shall be globular in shape and red in colour, and the middle one diamond in shape and white.

(*c*) The ships referred to in this Article, when not making any way through the water, shall not carry the side lights, but when making way shall carry them.

(*d*) The lights and shapes required to be shown by this Article are to be taken by other ships as signals that the ship showing them is not under command, and cannot therefore get out of the way. The signals to be made by ships in distress and requiring assistance are contained in Article 27.

Article 6.—A sailing ship under way or being towed shall carry the same lights as are provided by Article 3 for a steam ship under way, with the exception of the white light, which she shall never carry.

Article 7.—Whenever, as in the case of small vessels during bad weather, the green and red side lights cannot be fixed, these lights shall be kept on deck, on their respective sides of the vessel, ready for use; and shall, on the approach of or to other vessels, be exhibited on their respective sides in sufficient time to prevent collision, in such manner as to make them most visible, and so that the green light shall not be seen on the port side nor the red light on the starboard side.

To make the use of these portable lights more certain and easy, the lanterns containing them shall each be painted outside with the colour of the light they respectively contain, and shall be provided with proper screens.

Article 8.—A ship, whether a steam ship or a sailing ship, when at anchor, shall carry, where it can best be seen, but at a height not exceeding 20 feet above the hull, a white light, in a globular lantern of not less than 8 inches in diameter, and so constructed as to show a clear uniform and unbroken light visible all round the horizon, at a distance of at least one mile.

Article 9.—A pilot vessel, when engaged on her station on pilotage duty, shall not carry the light required for other vessels, but shall carry a white light at the masthead, visible all round the horizon, and shall also exhibit a flare-up light or flare-up lights at short intervals, which shall never exceed fifteen minutes.

A pilot vessel, when not engaged on her station on pilotage duty, shall carry lights similar to those of other ships.

Article 10.—Open boats and fishing vessels of less than 20 tons net registered tonnage, when under way and when not having their nets, trawls, dredges, or lines in the water, shall not be obliged to carry the coloured side lights; but every such boat and vessel shall in lieu thereof have ready at hand a lantern with a green glass on the one side, and a red glass on the other side, and on approaching to or being approached by another vessel such lantern shall be exhibited in sufficient time to prevent collision, so that the green light shall not be seen on the port side nor the red light on the starboard side.

The following portion of this Article applies only to fishing vessels and boats when in the sea off the coast of Europe lying north of Cape Finisterre :—

(*a*) All fishing vessels and fishing boats of 20 tons net registered tonnage, or upwards, when under way and when not required by the following regulations in this Article to carry and show the lights therein named shall carry and show the same lights as other vessels under way.

(*b*) All vessels when engaged in fishing with drift nets shall exibit two white lights from any part of the vessel where they can be best seen. Such lights shall be placed so that the vertical distance between them shall be not less than 6 feet and not more than 10 feet; and so that the horizontal distance between them measured in a line with the keel of the vessel shall be not less than 5 feet and not more than 10 feet. The lower of these two lights shall be the more forward, and both of them shall be of such a character, and contained in lanterns of such construction as to show all round the horizon, on a dark night with a clear atmosphere, for a distance of not less than three miles.

(*c*) A vessel employed in line fishing with her lines out shall carry the same lights as a vessel when engaged in fishing with drift nets.

(*d*) If a vessel when fishing becomes stationary in consequence of her gear getting fast to a rock or other obstruction, she shall show the light and make the fog signal for a vessel at anchor.

(*e*) Fishing vessels and open boats may at any time use a flare-up in addition to the lights which they are by this Article required, to carry and show. All flare-up lights exhibited by a vessel when trawling dredging, or fishing with any kind of drag net shall be shown at the after part of the vessel, expecting that if the vessel is hanging by the stern to her trawl, dredge, or drag net, they shall be exhibited from the bow.

(*f*) Every fishing vessel and every open boat when at anchor between sunset and sunrise shall exhibit a white light visible all round the horizon at a distance of at least one mile.

(*g*) In fog, mist, or falling snow, a drift net vessel attached to her nets and a vessel when trawling, dredging or fishing with any kind of drag net, and a vessel employed in line fishing with her lines out, shall at intervals of not more than two minutes make a blast with her fog horn and ring her bell alternately.

Article 11. A ship which is being overtaken by another shall show from her stern to such last-mentioned ship a white light or a flare-up light.

Sound signals for fog, &c.

Article 12. A steam ship shall be provided with a steam whistle or other efficient steam sound signal, so placed that the sound may not be intercepted by any obstructions, and with an efficient fog horn to be sounded by a bellows or other mechanical means, and also with an efficient bell.* A sailing ship shall be provided with a similar fog horn and bell.

In fog, mist, or falling snow, whether by day or night, the signals described in this Article shall be used as follows; that is to say,—

(*a*) A steam ship under way shall make with her steam whistle, or other steam sound signal, at intervals of not more than two minutes, a prolonged blast.

(*b*) A sailing ship under way shall make with her fog horn, at intervals of not more than two minutes, when on the starboard tack one blast, when on the port tack two blasts in succession, and when with the wind abaft the beam three blasts in succession.

(*c*) A steam ship and a sailing ship, when not under way, shall at intervals of not more than two minutes ring the bell.

Speed of ships to be moderate in fog, &c.

Article 13. Every ship, whether a sailing ship or steam ship, shall, in a fog, mist, or falling snow, go at a moderate speed.

Steering and Sailing Rules.

Article 14. When two sailing ships are approaching one another, so as to involve risk of collision, one of them shall keep out of the way of the other, as follows, viz.:—

(*a*) A ship which is running free shall keep out of the way of a ship which is close-hauled.

(*b*) A ship which is close-hauled on the port tack shall keep out of the way of a ship which is close-hauled on the starboard tack.

(*c*) When both are running free with the wind on different sides, the ship which has the wind on the port side shall keep out of the way of the other.

(*d*) When both are running free with the wind on the same side, the ship which is to windward shall keep out of the way of the ship which is to leeward.

(*e*) A ship which has the wind aft shall keep out of the way of the other ship.

Article 15. If two ships under steam are meeting end on, or nearly end on, so as to involve risk of collision, each shall alter her course to starboard, so that each may pass on the port side of the other.

This Article only applies to cases where ships are meeting end on, or nearly end on, in such a manner as to involve risk of collision, and does not apply to two ships which must, if both keep on their respective courses, pass clear of each other.

* In all cases where the Regulations require a bell to be used, a drum will be substituted on board Turkish vessels.

The only cases to which it does apply are, when each of the two ships is end on, or nearly end on, to the other; in other words, to cases in which, by day, each ship sees the masts of the other in a line, or nearly in a line with her own; and by night, to cases in which each ship is in such a position as to see both the side lights of the other.

It does not apply by day to cases in which a ship sees another ahead crossing her own course or by night to cases where the red light of one ship is opposed to the red light of the other or where the green light of one ship is opposed to the green light of the other, or where a red light without a green light, or a green light without a red light, is seen ahead, or where both green and red lights are seen anywhere but ahead.

Article 16. If two ships under steam are crossing so as to involve risk of collision, the ship which has the other on her own starboard side shall keep out of the way of the other.

Article 17. If two ships, one of which is a sailing ship and the other a steam ship, are proceeding in such directions as to involve risk of collision, the steam ship shall keep out of the way of the sailing ship.

Article 18. Every steam ship, when approaching another ship, so as to involve risk of collision, shall slacken her speed or stop and reverse, if necessary.

Article 19. In taking any course authorised or required by these regulations, a steam ship under way may indicate that course to any other ship which she has in sight by the following signals on her steam whistle, viz.—

One short blast to mean "I am directing my course to starboard."
Two short blasts to mean "I am directing my course to port."
Three short blasts to mean "I am going full speed astern."

The use of these signals is optional, but if they are used the course of the ship must be in accordance with the signal made.

Article 20. Notwithstanding anything contained in any preceding Article, every ship, whether a sailing ship or a steam ship, overtaking any other, shall keep out of the way of the overtaken ship.

Article 21. In narrow channels every steam ship shall, when it is safe and practicable, keep to that side of the fairway or mid-channel which lies on the starboard side of such ship.

Article 22.—Where by the above rules one of two ships is to keep out of the way, the other shall keep her course.

Article 23. In obeying and construing these rules due regard shall be had to all dangers of navigation, and to any special circumstances which may render a departure from the above rules necessary in order to avoid immediate danger.

No ship under any circumstances to neglect proper precautions.

Article 24. Nothing in these rules shall exonerate any ship, or the owner, or master, or crew thereof, from the consequences of any neglect to carry lights or signals, or of any neglect to keep a proper look out, or of the neglect of any precaution which may be required by the ordinary practice of seamen, or by the special circumstances of the case.

Reservation of Rules for Harbours and Inland Navigation.

Article 25. Nothing in these rules shall interfere with the operation of a special rule, duly made by local authority, relative to the navigation of any harbour, river, or inland navigation.

Special lights for Squadrons and Convoys.

Article 26. Nothing in these rules shall interfere with the operation of any special rules made by the Government of any nation with respect to additional station and signal lights for two or more ships of war or for ships sailing under convoy.

Article 27. When a ship is in distress and requires assistance from other ships or from the shore, the following shall be the signals to be used or displayed by her, either together or separately, that is to say:

In the day time—

1. A gun fired at intervals of about a minute;
2. The International Code signal of distress indicated by N C;
3. The distant signal, consisting of a square flag, having either above or below it a ball, or anything resembling a ball.

At night—

1. A gun fired at intervals of about a minute;
2. Flames on the ship (as from a burning tar barrel, oil barrel, &c.);
3. Rockets or shells, throwing stars of any colour or description, fired one at a time, at short intervals.

C. L. PEEL.

AT THE COURT AT WINDSOR.

The 27th day of November 1896.

PRESENT:

The Queen's Most Excellent Majesty in Council.

WHEREAS by Section 418 of the Merchant Shipping Act, 1894, Her Majesty is empowered from time to time, on the joint recommendation of the Admiralty and the Board of Trade by Order in Council, to make regulations for preventing collisions at sea:

And whereas by Section 434 of the said Act Her Majesty is empowered from time to time by Order in Council to make rules as to signals of distress:

And whereas by an Order in Council dated the 11th day of August 1884, and expressed to be made in pursuance of the Merchant Shipping Act Amendment Act, 1862, and on the joint recommendation of the Admiralty and the Board of Trade, Her Majesty was pleased to direct that, on and after the first day of September 1884, the regulations contained in the Schedule thereto (being regulations for preventing collisions at sea and as to signals of distress) should be substituted for the regulations contained in the First Schedule to an Order in Council made under the same Act and on such joint recommendations as aforesaid and dated the 14th day of August 1879:

And whereas the Admiralty and the Board of Trade have jointly recommended to Her Majesty that the Regulations for preventing collisions at sea contained in the Schedule to the said Order in Council, dated the 11th day of August 1884, except the Article numbered 10 in such Regulations, should, on and after the 1st day of July 1897, be annulled, and that the Regulations for Preventing Collisions at Sea contained in Schedule I hereto annexed should, on and after the last-mentioned date, be substituted therefor, with the exception aforesaid and come into operation as regards British ships and boats:

And whereas it has been made to appear to Her Majesty that it is expedient that the Regulations or Rules as to signals of distress contained in the Schedule to the said Order in Council, dated the 11th day of August 1884, should, on and after the said first day of July 1897, be annulled, and that the rules as to signals of distress contained in Schedule II hereto annexed should, on and after the last-mentioned date, be substituted therefor and come into operation as regards British ships and boats:

And whereas the provisions of section one of the Rules Publication Act, 1893, have been complied with:

Now, therefore, Her Majesty, by virtue of the power vested in Her by section 418 of the Merchant Shipping Act, 1894, and on the joint recommendation of the Admiralty and the Board of Trade, and by and with the advice of Her Privy Council, is pleased to direct that, on and after the 1st day of July 1897, the Regulations for Preventing Collisions at Sea contained in the Schedule to the said Order in Council, dated the 11th day of August 1884, except the Article numbered 10 in such Regulations, shall be annulled, and the Regulations for Preventing Collisions at Sea contained in Schedule I hereto annexed shall be substituted therefor (with the exception aforesaid) and come into operation as regards British ships and boats:

And Her Majesty is further pleased, by virtue of the power vested in Her by section 434 of the Merchant Shipping Act, 1894, and by and with the advice of Her Privy Council, to direct that, on and after the 1st day of July 1897, the Regulations or Rules as to signals of distress contained in the Schedule to the said Order in Council dated the 11th day of August 1884, shall be annulled and the rules as to signals of distress contained in Schedule II hereto annexed shall be substituted therefor and come into operation as regards British ships and boats.

C. L. PEEL.

SCHEDULE I.

Preliminary.

These Rules shall be followed by all vessels upon the high seas and in all waters connected therewith, navigable by sea-going vessels.

In the following rules every steam vessel which is under sail and not under steam is to be considered a sailing vessel, and every vessel under steam, whether under sail or not, is to be considered a steam vessel.

The word "steam vessel" shall include any vessel propelled by machinery.

A vessel is "under way" within the meaning of these Rules, when she is not at anchor, or made fast to the shore or aground.

Rules concerning Lights, &c.

The word "visible" in these Rules, when applied to lights, shall mean visible on a dark night with clear atmosphere.

Article 1.—The Rules concerning lights shall be complied with in all weathers from sunset to sunrise and during such time no other lights which may be mistaken for the prescribed lights shall be exhibited.

Article 2.—A steam vessel when under way shall carry—

(*a*) On or in front of the foremast, or if a vessel without a foremast, then in the fore part of the vessel, at a height above the hull of not less than 20 feet, and if the breadth of the vessel exceeds 20 feet, then at a height above the hull not less than such breadth, so, however, that the light need not be carried at a greater height above the hull than 40 feet, a bright white light, so constructed as to show an unbroken light over an arc of the horizon of 20 points of the compass, so fixed as to throw the light 10 points on each side of the vessel, viz., from right ahead to 2 points abaft the beam on either side, and of such a character as to be visible at a distance of at least 5 miles.

(*b*) On the starboard side a green light so constructed as to show an unbroken light over an arc of the horizon of 10 points of the compass, so fixed as to throw the light from right ahead to two points abaft the beam on the starboard side, and of such a character as to be visible at a distance of at least 2 miles.

(*c*) On the port side a red light so constructed as to show an unbroken light over an arc of the horizon of 10 points of the compass, so fixed as to throw the light from right ahead to 2 points abaft the beam on the port side, and of such a character as to be visible at a distance of at least 2 miles.

(*d*) The said green and red side-lights shall be fitted with inboard screens projecting at least 3 feet forward from the light, so as to prevent these lights from being seen across the bow.

(*e*) A steam vessel when under way may carry an additional white light similar in construction to the light mentioned in subdivision (*a*). These two lights shall be so placed in line with the keel that one shall be at least 15 feet higher than the other, and in such a position with reference to each other that the lower light shall be forward of the upper one. The vertical distance between these lights shall be less than the horizontal distance.

Article 3.—A steam vessel when towing another vessel shall, in addition to her side-lights, carry two bright white lights in a vertical line one over the other, not less than 6 feet apart, and when towing more than one vessel shall carry an additional bright white light 6 feet above or below such lights, if the length of the tow, measuring from the stern of the towing vessel to the stern of the last vessel towed exceeds 600 feet. Each of these lights shall be of the same construction and character, and shall be carried in the same position as the white light mentioned in Article 2 (*a*), except the additional light, which may be carried at a height of not less than 14 feet above the hull.

Such steam vessel may carry a small white light abaft the funnel or aftermast for the vessel towed to steer by, but such light shall not be visible forward of the beam.

Article 4 (*a*).—A vessel which from any accident is not under command shall carry at the same height as the white light mentioned in Article 2 (*a*), where they can best be seen, and, if a steam vessel, in lieu of that light two red lights, in a vertical line one over the other, not less than 6 feet apart, and of such a character as to be visible all round the horizon at a distance of at least 2 miles, and shall by day carry in a vertical line one over the other not less than 6 feet apart, where they can best be seen, two black balls or shapes each 2 feet in diameter.

(*b*) A vessel employed in laying or in picking up a telegraph cable shall carry in the same position as the white light mentioned in Article 2 (*a*), and if a steam vessel, in lieu of that light, three lights in a vertical line one over the other, not less than 6 feet apart. The highest and lowest of these lights shall be red, and the middle light shall be white, and they shall be of such a character as to be visible all round the horizon, at a distance of at least 2 miles. By day she shall carry in a vertical line one over the other, not less than 6 feet apart, where they can best be seen, three shapes not less than 2 feet in diameter, of which the highest and lowest shall be globular in shape and red in colour, and the middle one diamond in shape and white.

(*c*) The vessels referred to in this Article, when not making way through the water, shall not carry the side lights, but when making way shall carry them.

(*d*) The lights and shapes required to be shown by this Article are to be taken by other vessels as signal that the vessel showing them is not under command and cannot therefore get out of the way.

These signals are not signals of vessels in distress and requiring assistance. Such signals are contained in Article 31.

Article 5.—A sailing vessel under way, and any vessel being towed, shall carry the same lights as are prescribed by Article 2 for a steam vessel under way, with the exception of the white lights mentioned therein which they shall never carry.

Article 6.—Whenever, as in the case of small vessels under way during bad weather, the green and red side-lights cannot be fixed, these lights shall be kept at hand lighted and ready for use; and shall, on the approach of or to other vessels, be exhibited on their respective sides in sufficient time to prevent collision, in such manner as to make them most visible, and so that the green light shall not be seen on the port side nor the red light on the starboard side, nor, if practicable, more than 2 points abaft the beam on their respective sides.

To make the use of these portable lights more certain and easy, the lanterns containing them shall each be painted outside with the colour of the light they respectively contain, and shall be provided with proper screens.

Article 7.—Steam vessels of less than 40, and vessels under oars or sails of less than 20, tons gross tonnage, respectively, and rowing boats, when under way, shall not be obliged to carry the lights mentioned in Article 2 (*a*) (*b*) and (*c*), but if they do not carry them, they shall be provided with the following lights:—

1. Steam vessels of less than 40 tons shall carry:

(*a*) In the fore part of the vessel, or on or in front of the funnel where it can best be seen, and at a height above the gunwale of not less than 9 feet, a bright white light constructed and fixed as prescribed in Article 2 (*a*), and of such a character as to be visible at a distance of at least 2 miles.

(*b*) Green and red side-lights constructed and fixed as prescribed in Article 2 (*b*) and (*c*), and of such a character as to be visible at a distance of at least 1 mile, or a combined lantern showing a green light and a red light from right ahead to 2 points abaft the beam on their respective sides. Such lantern shall be carried not less than 3 feet below the white light.

2. Small steamboats, such as are carried by sea-going vessels, may carry the white light at a less height than 9 feet above the gunwale, but it shall be carried above the combined lantern, mentioned in subdivision 1 (*b*).

3. Vessels under oars or sails, of less than 20 tons, shall have ready at hand a lantern with a green glass on one side and a red glass on the other, which, on the approach of or two other vessels, shall be exhibited in sufficient time to prevent collision, so that the green light shall not be seen on the port side nor the red light on the starboard side.

4. Rowing boats, whether under oars, or sail, shall have ready at hand a lantern showing a white light, which shall be temporarily exhibited in sufficient time to prevent collision.

The vessels referred to in this Article shall not be obliged to carry the lights prescribed by Article 4 (*a*) and Article 11, last paragraph.

Article 8.—Pilot vessels, when engaged on their station on pilotage duty shall not show the lights required for other vessels, but shall carry a white light at the masthead, vissible all round the horizon, and shall also exhibit a flare-up light or flare-up lights at short intervals, which shall never exceed 15 minutes.

On the near approach of or to other vessels they shall have their side-lights lighted, ready for use, and shall flash or show them at short intervals, to indicate the direction in which they are heading, but the green light shall not be shown on the port side, nor the red light on the starboard side.

A pilot-vessel of such a class as to be obliged to go alongside of a vessel to put a pilot on board, may show the white light instead of carrying it at the masthead, and may, instead of the coloured lights above mentioned, have at hand ready for use a lantern with a green glass on the one side and a red glass on the other, to be used as prescribed above.

Pilot vessels, when not engaged on their station on pilotage duty, shall carry lights similar to those of other vessels of their tonnage.

*Article 9.**

Article 10.—A vessel which is being overtaken by another shall show from her stern to such last-mentioned vessel a white light or a flare-up light.

The white light required to be shown by this Article may be fixed and carried in a lantern, but in such case the lantern shall be so constructed, fitted, and screened that it shall throw an unbroken light over an arc of the horizon of 12 points of the compass, viz., for 6 points from right aft on each side of the vessel, so as to be visible at a distance of at least 1 mile. Such light shall be carried as nearly as practicable on the same level as the side-lights.

Article 11.—A vessel under 150 feet in lenght, when at anchor, shall carry forward, where it can best be seen, but at a height not exceeding 20 feet above the hull, a white light in a lantern as constructed as to show a clear uniform and unbroken light visible all round the horizon at a distance of at least 1 mile.

A vessel of 150 feet or upwards in length, when at anchor, shall carry in the forward part of the vessel, at a height of not less than 20, and not exceeding 40 feet above the hull, one such light and at or near the stern of the vessel, and at such a height that it shall be not less than 15 feet lower than the forward light, another such light.

The length of a vessel shall be deemed to be the length appearing in her certificate of registry.

A vessel aground in or near a fairway shall carry the above light or lights and the two red lights prescribed by Article 4 (*a*).

Article 12.—Every vessel may, if necessary in order to attract attention, in addition to the lights which she is by these Rules required to carry, show a flare-up light or use any detonating signal that cannot be mistaken for a distress signal.

Article 13.—Nothing in these Rules shall interfere with the operation of any special rules made by the Government of any nation with respect to additional station and signal lights for two or more ships of war or for vessels sailing under convoy, or with the exhibition of recognition signals adopted by shipowners, which have been authorized by their respective Governments and duly registered and published.

* *This Article will deal with regulations affecting fishing boats, and will be the subject of another Order, which will be submitted to Her Majesty for approval at a later date.*

Article 14.—A steam vessel proceeding under sail only, but having her funnel up, shall carry in daytime, forward, where it can best be seen, one black ball or shape 2 feet in diameter.

Sound-Signals for Fog, etc.

Article 15.—All signals prescribed by this Article for vessels under way shall be given :

1. By "steam vessels" on the whistle or siren.
2. By "sailing vessels and vessels towed" on the fog-horn.

The words "prolonged blast" used in this Article, shall mean a blast of from 4 to 6 seconds' duration.

A steam vessel shall be provided with an efficient whistle or siren, sounded by steam or some substitute for steam, so placed that the sound may not be intercepted by any obstruction, and with an efficient fog-horn,to be sounded by mechanical means, and also with an efficient bell.* A sailing vessel of 20 tons gross tonnage or upwards shall be provided with a similar fog-horn and bell.

In fog, mist, falling snow, or heavy rain storms, whether by day or night, the signals described in this Article shall be used as follows, *viz.* :—

(*a*) A steam vessel having way upon her, shall sound, at intervals of not more than 2 minutes, a prolonged blast.

(*b*) A steam vessel under way, but stopped and having no way upon her, shall sound at intervals of not more than 2 minutes, 2 prolonged blasts, with an interval of about 1 second between them.

(*c*) A sailing vessel under way shall sound, at intervals of not more than 1 minute, when on the starboard tack one blast, when on the port tack two blasts in succession, and when with the wind abaft the beam three blasts in succession.

(*d*) A vessel, when at anchor, shall, at intervals of not more than 1 minute, ring the bell rapidly for about 5 seconds.

(*e*) A vessel, when towing a vessel employed in laying or in picking up a telegraph cable, and a vessel under way, which is unable to get out of the way of an approaching vessel through being not under command, or unable to manœuvre as required by these Rules, shall, instead of the signals prescribed in sub-divisions (*a*) and (*c*) of the Article, at intervals of not more than 2 minutes, sound three blasts in succession, *viz.*, one prolonged blast followed by two short blasts. A vessel towed may give this signal and she shall not give any other.

Sailing-vessels and boats of less than 20 tons gross tonnage shall not be obliged to give the above-mentioned signals, but if they do not, they shall make some other efficient sound-signal at intervals of not more than 1 minute.

Speed of Ships to be Moderate in Fog, etc.

Article 16.—Every vessel shall, in a fog, mist, falling snow, or heavy rain-storms, go at a moderate speed having careful regard to the existing circumstances and conditions.

A steam vessel hearing, apparently forward of her beam, the fog-signal of a vessel the position of which is not ascertained, shall, so far as the circumstances of the case admit, stop her engines, and then navigate with caution until danger of collision is over.

Steering and Sailing Rules.

Preliminary—Risk of Collision.

Risk of collision can, when circumstances permit, be ascertained by carefully watching the compass bearing of an approaching vessel. If the bearing does not appreciably change, such risk should be deemed to exist.

Article 17.—When two sailing vessels are approching one another, so as to involve risk of collision, one of them shall keep out of the way of the other, as follows, viz :—

(*a*) A vessel which is running free shall keep out of the way of a vessel which is close-hauled.

(*b*) A vessel which is close hauled on the port tack shall keep out of the way of a vessel which is close-hauled on the starboard tack.

(*c*) When both are running free, with the wind on different sides, the vessel which has the wind on the port side shall keep out of the way of the other.

(*d*) When both are running free, with the wind on the same side, the vessel which is to windward shall keep out of the way of the vessel which is to leeward.

(*e*) A vessel which has the wind aft shall keep out of the way of the other vessel.

Article 18.—When two steam vessels are meeting end on, or nearly end on, so as to involve risk of collision, each shall alter her course to starboard, so that each may pass on the port side of the other.

This Article only applies to cases where vessels are meeting end on, or nearly end on, in such a manner as to involve risk of collision, and does not apply to two vessels which must, if both keep on their respective courses, pass clear of each other.

* In all cases where the Rules require a bell to be used, a drum may be substituted on board Turkish vessels, or a gong where such articles are used on board shall sea-going vessels.

The only cases to which it does apply are when each of the two vessels is end on, or nearly end on, to the other; in other words to cases in which, by day, each vessel sees the masts of the other in a line, or nearly in a line, with her own; and, by night, to cases in which each vessel is in such a position as to see both the side-lights of the other.

It does not apply, by day, to cases in which a vessel sees another ahead crossing her own course; or by night to cases where the red light of one vessel is opposed to the red light of the other, or where the green light of one vessel is opposed to the green light of the other, or where a red light without a green light, or a green light without a red light, is seen ahead, or where both green and red lights are seen any where but ahead.

Article 19.—When two steam vessels are crossing, so as to involve risk of collision, the vessel which has the other on her own starboard side shall keep out of the way of the other.

Article 20.—When a steam vessel and a sailing vessel are proceeding in such directions as to involve risk of collision, the steam vessel shall keep out of the way of the sailing vessel.

Article 21.—Where by any of the Rules one of two vessels is to keep out of the way, the other shall keep her course and speed.

Note.—When, in consequence of thick weather or other causes, such vessel finds herself so close that collision cannot be avoided by the action of the giving-way vessel alone, she also shall take such action as will best aid to avert collision. (See articles 27 and 29.)

Article 22.—Every vessel which is directed by these Rules to keep out of the way of another vessel shall, if the circumstances of the case admit, avoid crossing ahead of the other.

Article 23.—Every steam vessel, which is directed by these Rules to keep out of the way of another vessel shall on approaching her, if necessary, slacken her speed or stop or reverse.

Article 24.—Notwithstanding anything contained in these Rules, every vessel, overtaking any other, shall keep out of the way of the overtaken vessel.

Every vessel coming up with another vessel from any direction more than two points abaft, her beam, *i.e.*, in such a position, with reference to the vessel which she is overtaking, that at night she would be unable to see either of that vessel's side-lights, shall be deemed to be an overtaking vessel; and no subsequent alteration of the bearing between the two vessels shall make the overtaking vessel a crossing vessel within the meaning of these Rules, or relieve her of the duty of keeping clear of the overtaken vessel until she is finally past and clear.

As by day the overtaking vessel cannot always know with certainty whether she is forwarded of or abaft this direction from the other vessel, she should, if in doubt, assume that she is an overtaking vessel and keep out of the way.

Article 25.—In narrow channels every steam vessel shall, when it is safe and practicable, keep to that side of fair-way or mid channel which lies on the starboard side of such vessel.

Article 26.—Sailing vessels under way shall keep out of the way of sailing vessels or boats fishing with nets or lines, or trawls. This Rule shall not give to any vessel or boat engaged in fishing the right of obstructing a fairway used by vessels other than fishing-vessels or boats.

Article 27.—In obeying and construing these Rules, due regard shall be had to all dangers of navigation and collision, and to any special circumstances which may render a departure from the above rules necessary in order to avoid immediate danger.

Sound Signals for Vessels in Sight of one another.

Article 28.—The words "short blast" used in this Article shall mean a blast of about one seconds duration

When vessels are in sight of one another, a steam vessel under way, in taking any course authorized or required by these Rules, shall indicate that course by the following signals on her whistle or siren, viz.:—

One short blast to mean, "I am directing my course to starboard."
Two short blasts to mean, "I am directing my course to port."
Three short blasts to mean, "My engines are going full speed astern."

No Vessel under any Circumstances to neglect proper Precautions.

Article 29.—Nothing in these Rules shall exonerate any vessel, or the owner, or master, or crew, thereof, from the consequences of any neglect to carry lights or signals, or of any neglect to keep a proper look-out, or of the neglect of any precaution which may be required by the ordinary practice of seamen, or by the special circumstances of the case.

Reservation of Rules for Harbours and Inland Navigation.

Article 30.—Nothing in these Rules shall interfere with the operation of a special rule, duly made by local authority, relative to the navigation of any harbour, river, or inland waters.

SCHEDULE II.

Distress Signals.

Article 31.—When a vessel is in distress and requires assistance from other vessels or from the shore, the following shall be the signals to be used or displayed by her, either together or separately, viz.:—

In the day time—

1. A gun or other explosive signal fired at intervals of about a minute;
2. The International Code signal of distress indicated by N C;
3. The distance signal, consisting of a square flag, having either above or below it a ball or anything resembling a ball;
4. A continuous sounding with any fog-signal apparatus.

At night—

1. A gun or other explosive signal fired at intervals of about a minute;
2. Flames on the vessel (as from a burning tar-barrel, oil-barrel, etc.);
3. Rockets or shells, throwing stars of any colour or description, fired one at a time, at short intervals;
4. A continuous sounding with any fog-signal apparatus.

The 24th February 1897.

No. 45 Marine.—The following telegrams, dated the 19th and 20th February 1897, from Her Majesty's Secretary of State for India, relative to the enforcement of quarantine restrictions in Russia, Germany, Antwerp, Dunkirk and Portugal, on account of the plague, are published for general information.

A. D. MCARTHUR, *Colonel*, R.E.,
Secretary to the Govt. of Bengal.

Telegram, dated the 19th February 1897.

From—The Secretary of State, London,
To—The Viceroy, India.

Russia. All Indian ports declared contaminated. Basrah and Camaran report suspected cases of plague. Germany. Prohibition to import from Indian ports and Persia rags, hides, old clothes, carpets, human hair, bristles, hair, wool, claws, hoops, personal baggage exempt, but disinfection possible. Antwerp. Sanitary officials examine crew and passengers, but arrivals from healthy ports exempt. Hides, unless cured with arsenic, hoofs, animal refuse, &c., prohibited; wool, &c., admitted in transit not for sale in Belgium, but liable to disinfection. Dunkirk. Four days' quarantine arrivals from infected ports if there has been no sickness on board, otherwise nine after sick person removed, goods and passengers disinfected.

Telegram, dated the 20th February 1897.

From—The Secretary of State, London,
To—The Viceroy, Calcutta.

Russia. Bokhara. Afghan frontier closed against Indian trade. Saktazabar only open Trans-Caspian town for passengers and goods. Hedjaz pilgrimage forbidden. Portugal. Lisbon only open port for landing mails and passengers' luggage; all will be subject to quarantine and disinfection, patterns and postal parcels excluded; this applies arrivals from Indian ports, Sea Oman and Persian Gulf.

The 26th February 1897.

No. 46 Marine.—The following telegram, dated the 22nd February 1897, from the Secretary of State, London, regarding the imposition of certain restrictions by the authorities in Antwerp and Spain on account of the plague, is published for general information.

A. D. MCARTHUR, *Colonel*, R.E.,
Secy. to the Govt. of Bengal.

Telegram, dated the 22nd February 1897.

From—The Secretary of State, London,
To—The Viceroy, Calcutta.

ANTWERP. My telegram of 19th February. Revised rules enjoin prohibition to import textile or similar products, animal or vegetable, as wool, cotton, jute fibres; of these products, cocoanut fibres, &c., unless packed, compressed bales bound with hoops.

Spain. Vessels arriving from Egypt, Arabia, India, the Persian Gulf ports, three days under observation. Prohibition to import rags, old clothes, tissues, mattresses, peltry, feathers, animal hair, horns, hoofs, wool, silk, linen, hemp, jute, &c., from India.

The 1st March 1897.

No. 47 Marine.—In exercise of the powers conferred by section 5 of the Indian Ports Act (X of 1889), and with the previous sanction of the Governor-General in Council, the Lieutenant-Governor is pleased, in supersession of all previous orders on the subject, to declare that the limits of the port of False Point, in the district of Cuttack, shall be as follow:—

On the north.—A line drawn from Temple tree to the Fairway buoy.

On the south.—A line from Prince Arthur Beacon (on the south side of Dowdeswell Island) to Black Point Beacon (extended to the Jambu river).

On the east.—A line drawn from Prince Arthur Beacon to the Fairway buoy.

On the west.—The right bank of the Jambu river as far northward as the Canal Lock, and thence in a line to Temple tree, including the river and creek banks, to within 50 yards above high water mark.

A. D. McARTHUR, *Colonel*, R.E.,
Secy. to the Govt. of Bengal.

The 1st March 1897.

No. 48 Marine.—Mr. G. F. Thorpe, Junior Master Pilot, is granted, under Article 746 (*a*) of the Civil Service Regulations, privilege leave for one month and ten days from the 1st April 1897, or such subsequent date as he may avail himself of it.

A. D. McARTHUR, *Colonel*, R.E.,
Secy. to the Govt. of Bengal.

The 1st March 1897.

No. 49 Marine.—Mr. C. G. Stock, Senior Master Pilot, is granted, under Article 746 (*a*) of the Civil Service Regulations, privilege leave for two months and 15 days from the 10th March 1897, or such subsequent date as he may avail himself of it.

A. D. McARTHUR, *Colonel*, R.E.,
Secy. to the Govt. of Bengal.

The 1st March 1897.

No. 50 Marine.—In exercise of the powers conferred upon him by section 22 of Act VI of 1884 (the Inland Steam Vessels Act), the Lieutenant-Governor is pleased to appoint the gentlemen named below for the purpose of examining the qualifications of persons desirous of obtaining certificates of competency as second class Masters and Serangs of Inland Steam Vessels. The examination will be held on Monday, the 1st March 1897.

Examiners of candidates for Certificates of Competency as second class Masters and Serangs.

B. P. Creagh, Commander, R.I.M., Port Officer of Calcutta ... *President.*
Mr. H. Huntly, Licensed Branch Pilot ... ... } *Members.*
Mr. W. M. Reaks, Certificated Master under the Inland Steam Vessels Act ... ... }

A. D. McARTHUR, *Colonel*, R.E.,
Secy. to the Govt. of Bengal.

The 2nd March 1897.

No. 51 Marine.—Mr. E. W. J. Bartlett, Junior Master Pilot, is promoted to the grade of Senior Master Pilot, with effect from the 6th March 1897.

A. D. McARTHUR, *Col.*, R.E.,
Secy. to the Govt. of Bengal.

The 2nd March 1897.

No. 52 Marine.—Under the provisions of section 15 of Act III (B.C.) of 1890, Mr. D. F. Mackenzie, of the firm of Messrs. Macneill and Company, is appointed to act as a Commissioner of the Port of Calcutta, *vice* Mr. A. Simson, who has been permitted to be absent from the meetings of the Commissioners from the 17th February to the 15th December 1897.

A. D. McARTHUR, *Colonel*, R.E.,
Secy. to the Govt. of Bengal.

The 2nd March 1897.

No. 53 Marine.—With the previous sanction of the Governor-General in Council, the following rules for quarantine against plague have been made by the Lieutenant-Governor of Bengal in exercise of the power conferred by section 1, Act I of 1870.

These rules have effect as a temporary measure from 3rd March 1897 in the Port of Calcutta :—

I. The Commander of every vessel, including buggalows or other native craft arriving from Goa, shall on arrival at the Sandheads hoist a yellow flag, and indicate by signal the port form which she has come, and shall keep such flag and signal flying until permitted to take it down as hereinafter provided. The Pilot on going alongside a vessel from Goa shall direct the flag prescribed above to be hoisted if it has not already been done.

II. The Commander shall not without first having obtained permission as hereinafter provided, allow any communication except orally with the shore or any other vessel or boat, excepting only with the boat supplying the Pilots* from the Pilot Brig, and in that case communication shall be limited to receiving on board the Pilot, his Leadsman, servant and baggage.

*N. B.—Pilotage is compulsory for all vessels over 100 tons in the port of Calcutta.

III. If there is any case of sickness on board, and the Pilot has reason to believe that it is plague, he shall telegraph to the Port Officer from Saugor, and not proceed beyond Diamond Harbour without the permission of the Port Officer.

IV. If the Pilot has no reason to believe that there is any one suffering from plague on board, he shall bring the vessel up the river to Mateeabrooj, and shall anchor it there till the Health Officer has visited it.

V. The Health Officer, as soon as he has received information of the arrival of the vessel at Mateeabrooj, shall visit it, and ascertain by enquiry from the Commander or the Medical Officer on board, or other sources of information, whether any person on board is suffering or has suffered from plague.

VI. If the Health Officer is satisfied that no one is suffering from plague, or has suffered from plague, since the vessel left Goa, and if the vessel has been allowed pratique at any intermediate port including Columbo, he shall allow the passengers to land, but shall detain the vessel at Mateeabrooj till such measures have been taken for the disinfection of the mails and cargo and hold as he may consider necessary.

VII. When he is satisfied that the necessary measures have been taken for the disinfection of the mails, cargo and hold, he shall allow the mails and cargo to be landed, and shall, by writing under his hand, to be delivered to the Commander, permit such vessel to haul down the yellow flag, and to proceed upwards in the Port, and to hold free communication with the shore and with vessels and boats in Port.

VIII. If the vessel has not been allowed pratique at Columbo or other intermediate ports, or if through her not carrying a qualified Medical Officer, or for other reasons, the Health Officer is not satisfied that no one on board has suffered during the voyage from plague, he shall direct the Commander to take the vessel to the quarantine anchorage at Mateeabrooj or elsewhere duly appointed by the Port Officer, there to remain for a period of eight days from the date of arrival in harbour. The Health Officer shall also direct the Commander to prohibit, during the period for which the vessel remains at the quarantine anchorage as aforesaid, all communication, except such as is hereinafter provided for, between such vessel and the shore or other vessels or boats in the harbour.

IX. If the Health Officer, as the result of the enquiry made under paragraph V above, shall have reason to believe, at the time when the vessel arrives in the harbour, that any person on board is suffering from plague, or if during the time the ship is in quarantine at Mateeabrooj under Rule VIII, any case of the disease breaks out, he shall direct the Commander to take the vessel to the quarantine anchorange at Diamond Harbour or elsewhere duly appointed by the Port Officer, there to remain for a period of fifteen days from the day of arrival in the harbour; and shall further direct that during such fifteen days, intercourse between the vessel detained under this Rule, or Rule III, and the share or other vessels or boats in the harbour, shall be prohibited as provided in Rule II.

X. If during the period a vessel is at the quarantine anchorage aforesaid, any case or cases of plague should occur on board, the said vessel shall remain in quarantine for a period of fifteen days from the date of the last case occurring, and be subject to all the prohibitions provided for in Rule IX.

XI. When any vessel has been placed in quarantine as aforesaid, the Health Officer may direct the removal of so many of the passengers and crew as may not be suffering from illness, and whose services may not be required on board the vessel, to such particular spots as may from time to time be selected by the Port Officer as places of quarantine, there to remain for a period of eight days if under Rule VIII, or if the vessel has been placed in quarantine for fifteen days, for a period of fifteen days. If a case of plague occurs among such passengers and crew during any such period, they shall remain in a place of quarantine for a period of fifteen days from the date of the occurrence of the last case of such illness.

XII. It will be the duty of the Port Officer to facilitate the conveyance to all vessels in quarantine of such supplies of provisions, stores and other articles as may be required by those on board. Such supplies will be placed on the boats of the vessels in quarantine, to be subsequently removed by members of their crews.

A. D. MCARTHUR, *Col.*, R.E.,
Secy. to the Govt. of Bengal.

The 2nd March 1897.

No. 54Marine.—In exercise of the powers conferred by section 5 of the Indian Ports Act (X of 1889), and with the previous sanction of the Governor-General in Council, the Lieutenant-Governor of Bengal is pleased to alter the limits of the Port of Calcutta, and in supersession of notification No. 27Marine, dated the 4th April 1893, to declare that the precise extent of the limits of the said port, and of the navigable river and channels leading to the said port, in which the said Act is in force, shall be as follows:—

The Port of Calcutta.

On the North.—A line drawn from the boundary pillar at the Cossipore Gun Foundry Ghát to a point on the opposite side at Ghoosery.

On the South.—A line drawn from a masonry pillar placed at the mouth of the Budge-Budge khal to a pillar on the Howrah side of the river Hooghly, bearing north-west of the first-named pillar.

The limits of the port include to the east and west (*a*) so much of the river Hooghly and the shores thereof as are 50 yards above high water mark at spring tides; (*b*) all lands comprised in the area occupied by the Kidderpore Docks and the adjoining works constructed for the purposes of such docks; (*c*) that portion of Tolly's Nala which lies between Hastings Bridge and the entrance to the Kidderpore Dock Canal; (*d*) so much of Tolly's Nala as lies to the west of a line drawn across the nala 25 feet to the west of Hastings Bridge, and (*e*) the Petroleum depôt at Budge-Budge, including all lands, sheds, railway sidings and other works appertaining to it.

The navigable river and channels leading to the Port of Calcutta.

On the North.—The port of Calcutta as above defined.

On the South.—A line drawn east and west from the Eastern Channel Floating Light-vessel.

The limits of the said river and channels include all parts of the navigable channels called the Eastern and Western Channels, and of the river Hooghly between the northern and southern limits and below high water mark at spring tides.

N.B.—Within the above limits the port and the navigable river and channels leading to the port are subject to the jurisdiction of the Commissioners for the Port of Calcutta, under the powers conferred upon them by the Lieutenant-Governor of Bengal by an order published in the *Calcutta Gazette* of the 5th April 1875, which vested them with the powers of Conservators of the Port, and by an order dated the 29th November 1881, which vested them with the powers of Conservators of the navigable river and channels leading to the Port.

A. D. McARTHUR, *Colonel*, R.E.,
Secy. to the Govt. of Bengal.

The 2nd March 1897.

No. 55Marine.—In exercise of the powers conferred on him by Section 11 of the Petroleum Act, 1886, and in supersession of rule 15, clause (4) of the Rules for regulating the grant of licenses to possess and transport petroleum in the Lower Provinces of Bengal, which were sanctioned under Notification No. 62Marine, dated the 21st May 1895, which was published in part I, page 504 of the *Calcutta Gazette* of the 22nd idem, the Lieutenant-Governor sanctions the following revised rule:—

(4) (*a*) Licenses for the transport of petroleum other than dangerous petroleum in bulk by steamer or barge may be granted if the vessel is certified to be fit for the service by an officer appointed by the Local Government in this behalf.

(*b*) The vessel, if a steamer, must possess a certificate of survey granted under the provisions of the Inland Steam-vessels Act, 1884.

(*c*) The vessel, if a barge, should be towed by a steamer.

(*d*) Vessels carrying petroleum in bulk shall not be allowed to carry other inflammable cargo at the same time, such as jute, cotton, straw, &c., nor passengers; and such vessels shall not be allowed to load any cargo after having discharged the petroleum, until the oil compartments have been thoroughly cleaned and certified by an officer of the Government to be quite free from petroleum.

(*e*) A steamer towing a barge carrying petroleum in bulk shall not be allowed to carry any such inflammable cargo, nor shall such steamer be allowed to have in tow at the same time any other vessel carrying such inflammable cargo.

(*f*) No naked lights shall be allowed on board any vessel carrying petroleum in bulk.

A. D. McARTHUR, *Colonel*, R.E.,
Secy. to the Govt. of Bengal.

The following rules for regulating the transport of explosives in the Port of Calcutta, which have been made under paragraph 22 of the Notification of the Government of Bengal in the Marine Department, No. 227Marine, dated the 3rd September 1890, are published for general information.

In these rules the term "explosives" is intended to apply only to the classes of explosives noted below, as laid down in the rules prescribed in the Notification of the Government of India, Home Department, No. 1417, dated the 24th June 1887 :—

Class 2.—Nitrate mixture.
„ 3.—Nitro compound.
„ 4.—Chlorate mixture.
„ 5.—Fulminate.

1. No explosives shall be transported through the Port of Calcutta unless covered by a special pass from the Commissioner of Police in addition to the import license.

2. Applications for special passes must be made in writing. They must specify the nature of the explosive, number of cases, the total weight of the explosive, the number of boats required in the transport, and the exact day and hour at which the boats will arrive at Garden House.

3. Every application for a special pass must be accompanied by a copy of a certificate from an officer of the Port Commissioners, certifying that the boat in which the explosives are conveyed through the port complies with the requirements of clauses VI and VII of Rule 4 of the rules to regulate the transport and importation of explosives published in Government of India's Notification No. 1417, dated 24th June 1887.

4. Every boat conveying explosives through the port shall display a red flag 4 feet by 3 feet, hoisted 5 feet above the deck.

5. No boat conveying explosives shall proceed above Garden House unless accompanied by a police boat.

6. All boats containing explosives for transport through the port shall be taken in tow by a steam vessel at Moyapore, and be towed from thence to the northern limits of the port or at Cossipore and be towed to Budge-Budge.

7. No steam-vessel shall have in tow more than two boats containing explosives.

8. Steam-vessels towing boats containing explosives shall pass through the Howrah Bridge only at slack water or against the current.

9. Steam-vessels towing boats containing explosives shall not approach within 400 yards of each other.

10. Boats containing explosives shall not anchor or make fast to any boat or buoy or for any time remain stationery in the port.

11. No fires or lights of any description shall be used on board boats containing explosives.

12. Each consignment of explosives passing through the port will be accompanied by by a police boat.

J. LAMBERT,
Commissioner of Police, Calcutta.

Judges, Court of Small Causes of Calcutta.

COURT OF SMALL CAUSES, CALCUTTA,
The 25th February 1897.

EDUCATION DEPARTMENT, BENGAL.

Subordinate Educational Service.

The 27th February 1897.—Babu Hari Charan Mukerji, L.E., Teacher of Surveying in the Civil Engineering College, Sibpur (class V), is allowed leave of absence for three months, under Article 369 of the Civil Service Regulations, in extension of that granted to him under the orders of the 29th December 1896.

Babu Harabans Sahai, Deputy Inspector of Schools, Bhagalpur (substantively *pro tempore* in class V), is allowed leave of absence for three months, under Article 291 of the Civil Service Regulations, with effect from the 1st March 1897, or such subsequent date as he may avail himself of it.

Babu Thakur Prasad, B.A., Fourth and now Officiating Third Master of the Bhagalpur Zilla School (class VII), is appointed to act as Deputy Inspector of Schools, Bhagalpur, and also to officiate in class V, *vice* Babu Harabans Sahai, on leave, or until further orders.

Babu Srinath Banerjea, Second Clerk in the office of the Inspector or Schools, Presidency Circle (class VII), is appointed to act as Deputy Inspector of Schools, Calcutta, during the absence, on deputation, of Babu Ishan Chandra Ghosh, or until further orders.

C. A. MARTIN,
Director of Public Instruction, Bengal.

ORDERS BY THE VICE-CHANCELLOR AND SYNDICATE OF THE CALCUTTA UNIVERSITY.

THE Propositions omitted from Dr. Asutosh Mukhopadhyay's "Geometry of Conics" for the F. A. Examination in 1899 are excluded from the course prescribed for the F. A. Examination in 1898 also.

J. H. GILLILAND, *Offg. Registrar.*

SENATE HOUSE, *the 1st March 1897.*

NOTIFICATION.

IN accordance with the Government of Bengal notification of the 22nd January and 14th June 1895, notice is hereby given that the next Half-yearly Examination of Compounders will be held at 7 A.M., on Monday, the 26th April 1897, at the Temple Medical School, Patna.

2. Every candidate must produce one of the following certificates:—

(*a*) From the Superintendent of a Vernacular Medical School, or of the Dublin, University Mission, Hazaribagh, or of the Church of Scotland Mission, Kalimpong, Darjeeling, that he has attended regularly for one year the Compounder Class of the School, or any of the two Missions above mentioned.

(*b*) From the legally qualified Medical Manager of a Chemist's or Druggist's establishment, recognized by the Inspector-General of Civil Hospitals, Bengal, that he has been apprenticed for a period of three years in his establishment; or

(*c*) From a Civil Surgeon, that he has assisted in the dispensing of drugs at the Sadar dispensary of a Civil Station for a period of five years.

Exception:—Any person who at the time of the extension of Section 252 of Act III (B.C.) of 1884 to any municipality shall have acted as Compounder for the seven years preceding in any shop or place of the kind referred to in the above section, shall, on producing a satisfactory certificate to this effect, be exempted from producing a certificate of the kind referred to in this rule.

3. Applicants must register their names and submit their certificates, together with a fee of Rs. 3, at least one week before the 26th April 1897, at the office of the undersigned.

Exception:—The students belonging to the Compounder Class of a Vernacular Medical School will be exempted from paying this fee on producing a certificate from the Superintendent that they have already paid the School entrance fee.

4. Should any candidate fail to pass the required examination, he will forfeit his fee.

5. Candidates will be examined in Materia Medica, Pharmacy, the reading of prescriptions and the writing in English of the directions contained in prescriptions.

N.B.—The attention of candidates is drawn to Rule 5, Section (*b*) of the Government notification of the 23rd July 1887, or paragraph 2 (*b*) of this notification, from which they will observe that the Chemist's and Druggist's establishments, from the legally qualified Managers of which they obtain their certificates, will have to be recognized by the Inspector-General of Civil Hospitals, Bengal, prior to the candidates applying to the Superintendent to register their names to appear at the examination.

R. H. WHITWELL, M.B.B.SC, *Surgeon-Major,*
Superintendent, Temple Medical School, Patna.

TEMPLE MEDICAL SCHOOL, *Bankipore, the 22nd February 1897.*

Secretary to the Government of India.

The Calcutta Gazette.

WEDNESDAY, MARCH 3, 1897.

PART IB.

ORDERS BY THE LIEUT.-GOVERNOR OF BENGAL.

MUNICIPAL AND LOCAL.

NOTIFICATION.

No. 1101L.S.-G.—The 25th February 1897.—It is hereby notified that, under section 19 of the Bengal Local Self-Government Act, III of 1885, the Lieutenant-Governor is pleased to appoint Mr. F. O. Sanderson to be a member of the Chapra Local Board, in the district of Saran, *vice* Mr. H. Macnamara, resigned.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

NOTIFICATION.

No. 1103L.S.-G.—The 25th February 1897.—It is hereby notified for general information that, under rule 32 of the Rules framed under section 138 (*a*) of the Bengal Local Self-Government Act, III of 1885, the Lieutenant-Governor is pleased to fix Saturday, the 24th April 1897, as the date for holding an election under section 19 of the Act in thana Fulta, in the district of the 24-Parganas, for the purpose of filling the vacancy in the representation of that thana on the Local Board of Diamond Harbour, caused by the death of Babu Trailokhya Nath Chakrabarti.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

NOTIFICATION.

No. 1105M.—The 25th February 1897.—Whereas a notification, No. 593T.M., dated the 19th September 1896, was published at page 192, Part IB of the *Calcutta Gazette* of the 23rd idem, declaring the intention of the Lieutenant-Governor to extend the provisions of sections 254 to 260A and 274 of the Bengal Municipal Act, III of 1884, as amended by Bengal Act IV of 1894, to the Taki Municipality, in the district of the 24-Parganas, and whereas no objection has been raised to the proposal within one month from the date of the publication of the above notification within the Municipality, it is hereby notified for general information that, in the exercise of the power vested in the Local Government by section 221 of the Act, and in accordance with the recommendation of the Commissioners of the Taki Municipality, made at a meeting, the Lieutenant-Governor sanctions the extension of the above provisions of the Municipal Act to the said Municipality.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

NOTIFICATION.

No. 1108M.—The 25th February 1897.—It is notified for general information that the Declaration No. 497M., dated the 6th February 1896, published at page 31, Part IB of the *Calcutta Gazette* of the 12th idem, for the acquisition of a plot of land required by the Kotrung Municipality for a latrine in the village of Bhadrakalli, pargana Boro, zilla Hooghly, is hereby cancelled.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

NOTIFICATION.

No. 1110M.—The 1st March 1897.—Whereas a notification, No. 2931M., dated the 16th July 1896, was published at page 142, Part IB of the *Calcutta Gazette* of the 22nd idem, declaring the intention of the Lieutenant-Governor to extend the provisions of sections 254 to 260A and 274 of Part VI of the Bengal Municipal Act, III of 1884, as amended by Bengal Acts IV of 1894 and II of 1896, to the Sitamarhi Municipality, in the district of Muzaffarpur, and whereas no objection has been raised to the proposal within one month from the date of the publication of the above notification within the Municipality it is hereby notified for general information that, in the exercise of the power vested in the Local Government by section 221 of the Act, and in accordance with the recommendation of the Commissioners of the Sitamarhi Municipality, made at a meeting, the Lieutenant-Governor sanctions the extension of the above provisions of the Municipal Act to the said Municipality.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

NOTIFICATION.

No. 1113M.—The 1st March 1897.—Whereas a notification, No. 4624M., dated the 5th December 1896, was published at page 254, Part IB of the *Calcutta Gazette* of the 9th idem, declaring the intention of the Lieutenant-Governor to extend the provisions of Part VI of the Bengal Municipal Act, III of 1884, as amended by Bengal Acts IV of 1894 and II of 1896 to the Barisal Municipality, in the district of Backergunge, and whereas no objection has been raised to the proposal within one month from the date of the publication of the above notification within the Municipality, it is hereby notified for general information that, in the exercise of the power vested in the Local Government by section 221 of the Act, and in accordance with the recommendation of the Commissioners of the Barisal Municipality, made at a meeting, the Lieutenant-Governor sanctions the extension of the above provisions of the Municipal Act to the said Municipality.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

NOTIFICATION.

No 1114M.—The 1st March 1897.—Whereas a notification No. 4709M., dated the 8th December 1896, was published at page 256, Part IB of the *Calcutta Gazette* of the 9th idem, declaring the intention of the Lieutenant-Governor to extend the provisions of sections 256A, 256B and 260A of the Bengal Municipal Act III of 1884, as amended by Bengal Acts IV of 1894 and II of 1896, to the Katwa Municipality in the district of Burdwan, and whereas no objection has been raised to the proposal within one month from the date of the publication of the above notification within the Municipality, it is hereby notified for general information that, in the exercise of the power vested in the Local Government by section 221 of the Act, and in accordance with the recommendation of the Commissioners of the Katwa Municipality, made at a meeting, the Lieutenant-Governor sanctions the extension of the above provisions of the Municipal Act to the said Municipality.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

DECLARATION.

No. 1141M.—The 2nd March 1897.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Darjeeling Municipality for a public purpose, viz., for the construction of tanks, the erection of a turbine, &c., to work the electric light about to be introduced into the Darjeeling Municipality in that portion of the freehold grant "Sidaerpong" which is held on lease by the Arya Tea Company, Limited, from the Burdwan Raj, zillah Darjeeling, it is hereby declared that for the above purpose a piece of land measuring, more or less, 6 acres 1 rood and 24 poles of standard measurement, is required. The land is bounded on all sides by the land of the Arya Tea Company, Limited.

A plan and specification of the land are filed in the office of the Darjeeling Municipality for public inspection.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

DECLARATION.

No. 1148L.S-G.—The 1st March 1897.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the tvernor Board of Monghyr for a public purpose, viz, for a Pound shed at Bodi Dih in the village of Bodi Dih, pargana Balia, zillah Monghyr, it is hereby declared that for the above purpose a piece of land measuring, more or less, 6 cottahs and 16 dhurs of standard measurement, is required. The land is bounded on the North by the land and house of Tara Singh; on the South by the land of Ayodhya Prosad; on the East by the parti (waste) land pertaining to estate Bodi Dih, Tauzi No. 656; and on the West by the land of Jagdebnarain Singh.

A plan of the land may be inspected in the office of the Collector of Monghyr.

This declaration is made, under the provisions of sections 6 of Act I of 1894, to all whom it may concern.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

Hooghly Collectorate, the 17th February 1897. D. B. ALLEN, Collector.

Advertisement of Sale.

NOTICE is hereby given that the proprietary right of Government, as specified in the conditions of sale below, to the undermentioned estates situate in the district of Burdwan, will be put up to sale at the Burdwan Collectorate on the 29th March 1897, corresponding with the 17th Chaitra 1303.

The purchasers will be subject to the following conditions of sale:—

Conditions of Sale.

1st.—The estates to be sold to the highest bidder above the upset price, which will be fixed by the Collector at the time of sale. The purchasers of the estates will be considered as the proprietors of the estates, and the entire proprietary right of Government in such estates will be transferred to them as revenue-free or subject to the revenue fixed in perpetuity.

2nd.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force, and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the authorities.

3rd.—If the amount of purchase-money do not exceed Rs. 100, the whole amount to be paid down at once.

4th.—If the amount of purchase-money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or, if that day be a close holiday, then by noon of the first succeeding office day, the sale is to be cancelled (the sum deposited being forfeited to Government), and the estate again to be put up to sale at the risk of the defaulting purchaser after issue of advertisement as in the case of original sale.

Cuttack Collectorate, the 3rd February 1897. H. D. DEM. CAREY, Covd. Dy. Collector in charge.

Advertisement of Sale.

NOTICE is hereby given that the proprietary right of Government, as specified in the conditions of sale below, to the undermentioned estate situate in the district of Puri will be put up to sale at the Puri Collectorate on the 28th of April 1897, corresponding with 17th Bysack 1304 Umli :—

Conditions of Sale.

1st.—The estate to be sold to the highest bidder above the upset price which will be fixed by Collector at the time of sale. The purchaser of this estate will be considered as the proprietor of the estate, and the entire proprietary right of Government in such estate will be transferred to him subject to the revenue fixed in perpetuity.

2nd.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force, and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the revenue authorities.

3rd.—If the amount of purchase-money do not exceed Rs. 100, the whole amount to be paid down at once.

4th.—If the amount of purchase-money exceed Rs. 100, one fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or, if that day be a close holiday, then by noon of the first succeeding office day, the sale is to be cancelled (the sum deposited being forfeited to Government), and the estate to be again put up to sale at the risk of the defaulting purchaser after issue of advertisement as in the case of original sale.

Shahabad Collectorate, Arrah, the 24th February 1897.

SHEO NANDAN MISSER, for Collector.

Notice of Sale.

NOTICE is hereby given under section 6 of Act XI of 1859 that the undermentioned estates and shares of estates in the district of the 24-Parganas will be put up for sale at the Collector's office of that district on the 26th March 1897 for arrears of revenue which fell due on the 12th January last 1897.

When in columns 5, 7, and 9 of the appended statement it is stated that only a share is to be sold, it is to be understood that a separate account is kept for that share, and that the other share or shares in the estate are excluded from the sale.

A. B. Miller, Official Assignee. (1196—1)

In the matter of CHARLES WILFRED DUNNER, an insolvent.

On Saturday, the 13th day of February last, it was ordered that the Assignee do pay and divide the sum of Rs. 457-9-11 to and amongst all the creditors upon the estate of the said insolvent as a divided at the rate of Rs. 5 per cent. upon such of the debts as are admitted in the schedule of the said insolvent and such claims as shall be proved or substantiated to the satisfaction of the said Assignee in proportion to their several debts with leave to the Official Assignee to apply to this Court from time to time for directions respecting any debts or any other matter or thing relating thereto.

A. B. Miller, Official Assignee. (1197—1)

In the matter of RUNCHOD DASS DHUNJEE, an insolvent.

On Saturday, the 13th day of February last, it was ordered that the Assignee do pay and divide the sum of Rs. 14,306-10-7 to and amongst all the creditors upon the estate of the said insolvent as a dividend at the rate of Rs. 9 per cent. upon such of the debts as are admitted in the schedule of the said insolvent, and such claims as shall be proved or substantiated to the satisfaction of the said Assignee in proportion to their several debts with leave to the Official Assignee to apply to this Court from time to time for directions respecting any debts or any other matter or thing relating thereto.

A. B. Miller, Official Assignee. (1198—1)

In the matter of JOHURY LALL PAUL and another, insolvents.

On Wednesday, the 17th day of February last, an account of the receipts and disbursements of the Official Assignee from the 29th day of May 1894 to the 15th day of February last was filed in the Office of the Chief Clerk, and it was ordered that Saturday, the 1st Court day in March next, be appointed for the further hearing of this matter for the purpose of making a dividend.

☞ Any creditor or other person interested who may intend to establish or oppose any claim upon the estate of the said insolvents may attend and be heard, having given notice to the Chief Clerk three clear days before the day of hearing.

A. B. Miller, Official Assignee. (1199—1)

In the matter of ABINASH CHANDER GHOSE, an insolvent.

On Saturday, the 13th day of February last, an account of the receipts and disbursements of the Official Assignee from the 4th day of March 1895 to the 31st day of January last was filed in the Office of the Chief Clerk, and it was ordered that Saturday, the 1st Court day in March next, be appointed for the further hearing of his matter for the purpose of making a dividend.

☞ Any creditor or other person interested who may intend to establish or oppose any claim upon the estate of the said insolvent may attend and be heard, having given notice to the Chief Clerk three clear days before the day of hearing.

A. B. Miller, Official Assignee. (1200—1)

In the matter of AMBROSE SUMMERS, an insolvent.

On Saturday, the 13th day of February last, an account of the receipts and disbursements of the Official Assignee from the 5th day of September 1895 to the 31st day of January last was filed in the office of the Chief Clerk, and it was ordered that Saturday, the 1st Court day in March next, be appointed for the further hearing of this matter for the purpose of making a dividend.

☞ Any creditor or other person interested who may intend to establish or oppose any claim upon the estate of the said insolvent may attend and be heard, having given notice to the Chief Clerk three clear days before the day of hearing.

A. B. Miller, Official Assignee. (1201—1)

In the matter of BERRNURSING DUTT, an insolvent.

On Saturday, the 13th day of February last, an account of the receipts and disbursements of the Officia Assignee from the 16th day of December 1895 to the 31st day of January last was filed in the Office of the Chief Clerk, and it was ordered that Saturday, the 1st Court day in March next, be appointed for the further hearing of this matter for the purpose of making a dividend.

☞ Any creditor or other person interested who may intend to establish or oppose any claim upon the estates of the said insolvent may attend and be heard, having given notice to the Chief Clerk three clear days before the day of hearing.

A. B. Miller, Official Assignee. (1202—1)

In the matter of EDWARD BLOEMINK, an insolvent.

On Saturday, the 13th day of February last, an account of the receipts and disbursements of the Official Assignee from the 8th day of May 1893 to the 31st day of January last, was filed in the Office of the Chief Clerk, and it was ordered that Saturday, the first Court day in March next be appointed for the further hearing of this matter for the purpose of making a dividend.

☞ And creditor or other person interested, who may intend to establish or oppose any claim upon the estate of the said insolvent, may attend and be heard, having given notice to the Chief Clerk three clear days before the day of hearing.

A. B. Miller, Official Assignee. (1203—1)

In the matter of RUSSICK LALL PAUL, residing at No. 16, Ram Kristo Bagchee's Lane, in the town of Calcutta, a clerk in the service of Sir Gregory Charles Paul, K.C.I.E., Advocate-General of Bengal, an insolvent.

Notice that the petition of the said insolvent seeking the benefit of the Act XI Vic., Chap. XXI, was filed in the Office of the Chief Clerk on Thursday, the 25th day of February last, and by an order of the same date the estate and effects of the said insolvent were vested in the Official Assignee.

M. Dover, Attorney. (1204—1)

In the matter of CAROLINE HILL, of No. 133, Dhurrumtollah Street, in the town of Calcutta, carrying on business there as a dress-maker and lately carrying on a dairy business at 3, Onraet's 2nd Lane in Entally, in the Suburbs of Calcutta, an insolvent.

Notice that the petition of the said insolvent seeking the benefit of the Act XI Vic., Chap. XXI, was filed in the Office of the Chief Clerk on Wednesday, the 24th day of February last, and by an order of the same date the estate and effects of the said insolvent were vested in the Official Assignee.

E. J. Fink, Attorney. (1205—1)

In the matter of FREDERICK WILLIAM PERRY, of 49, Bow Bazar Street, in the town of Calcutta, at present in the employ of Messrs. Thacker, Spink and Company of 5 and 6, Government Place, Calcutta, Printers-Publishers, etc., an insolvent.

Price Rs. 20 for 1895-96. Published at the Calcutta Custom House. Previous years' volumes can also be obtained at the same price.

The Indian Law Reports.

Published under Authority.

THE Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad, and comprise four series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of the previous advertisements, on and from the 1st January 1889 the terms of subscription and sale will be as follows for current issues as well as for back numbers of the Reports from 1876:—

Terms of subscription payable annually in advance.

Ditto. Urdu version. Royal 8vo., stiff boards. 6*a.*

A Dictionary of the Economic Products of India
BY DR. GEO. WATT, C.I.E.,
Reporter on Economic Products.

The first five volumes and Vol. VI, Parts I, II, III & IV of the Dictionary are now ready at the Office of Superintendent of Government Printing, No. 8, Hastings Street, Calcutta, and will be supplied to non-subscribers on receipt of the price for the complete set, which is Rs. 45 in India, and 3 guineas in England (exclusive of the Index, for which a separate charge will be made): packing and postage, in India, 8 annas per volume; for England, Rs. 2-6 per volume. For copies bound in half calf or half morocco, Rs. 6 and 8 shillings, respectively, will be charged extra for the whole set.

The Dictionary is intended to deal with the products of India—animal, vegetable, and mineral; each product being treated after a uniform plan, the paragraphs of which give the scientific, vernacular, and European names; habitat or source; history; properties and uses (both chemical and industrial); trade statistics; markets, &c. The work is arranged alphabetically according to scientific nomenclature, but commercial and important vernacular names are also given as cross-references, so that little difficulty need be experienced in finding the account of a product, even when its scientific name is unknown to the reader.

An important feature of the Dictionary consists in the fact that derived information is in every instance given under quotation marks, and with a reference to the original publication. Numerous contributors have, however, furnished the results of new discoveries and confirmed the vernacular names, so that the Dictionary is not only a complete compilation of published information, but has been brought abreast of the most recent inventions and discoveries.

Volume I contains the letters A and B, and consists of 559 royal 8vo. pages; Vol. II embraces the letter C in 689 pages; Vol. III contains the letters D, E, F and half of G.; Vol. IV latter half of G to middle of L; and Vol. V contains the latter half of L to end of O; Vol. VI (which consist of four parts), Part I, contains letters P to R. The whole work completed in nine volumes (including Parts II to IV of Vol. VI); but a tenth volume may also be issued, consisting of an Index to all the vernacular and other names contained in the Dictionary. The Index will practically be a Glossary of the Vernacular and European names of the plants, animals and minerals of India, and, as such, will be a work of reference, which, it is hoped, may prove of considerable value.

Technical Art Series published up to 1894, together with their explanatory Text—

1886-87, 6 plates with text. Re. 1-8 a set (4*a.*)
1888-89, 18 plates with text. Rs. 4-8 a set (8*a.*)

PART V.

Acts of the Governor General's Council assented to by the Governor General.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 25th February, 1897, and is hereby promulgated for general information :—

ACT No. V OF 1897.

An Act to repeal certain Obsolete Enactments and to amend and facilitate the citation of certain other enactments.

WHEREAS it is expedient that certain enactments specified in the first schedule to this Act which are spent, or have ceased to be in force otherwise than by express specific repeal, or have by lapse of time or otherwise become unnecessary, should be expressly and specifically repealed;

And whereas it is also expedient that certain formal amendments should be made in the enactments specified in the second schedule to this Act,

And whereas it is also expedient to facilitate the citation of the enactments specified in the third schedule to this Act;

It is hereby enacted as follows :—

1. (*1*) This Act may be called the Repealing and Amending Act, 1897; and

Title and commencement.

(*2*) It shall come into force at once.

2. (*1*) The enactments specified in the first schedule are hereby repealed to the extent mentioned in the fourth column thereof.

Enactments in schedules repealed and amended respectively.

(*2*) The enactments specified in the second schedule shall be modified to the extent and in the manner mentioned in the fourth column thereof.

3. The repeal by this Act of any enactment shall not affect any Act or Regulation in which such enactment has been applied, incorporated or referred to;

Savings.

and this Act shall not affect the validity, invalidity, effect or consequences of anything already done or suffered, or any right, title, obligation or liability already acquired, accrued or incurred, or any remedy or proceeding in respect thereof, or any release or discharge of or from any debt, penalty, obligation, liability, claim or demand, or any indemnity already granted, or the proof of any past act or thing;

nor shall this Act affect any principle or rule of law, or established jurisdiction, form or course of pleading, practice or procedure, or existing usage, custom, privilege, restriction, exemption, office or appointment, notwithstanding that the same respectively may have been in any manner affirmed, recognized or derived by, in or from any enactment hereby repealed;

nor shall the repeal by this Act of any enactment provide or restore any jurisdiction, office, custom, liability, right, title, privilege, restriction, exemption, usage, practice, procedure or other matter or thing not now existing or in force.

4. Each of the enactments described in the first three columns of the third schedule may, without prejudice to any other mode of citation, be cited for all purposes by the short title mentioned in that behalf in the fourth column thereof.

Citation of certain enactments.

THE FIRST SCHEDULE.

A description or citation of a portion of an enactment includes the words, section or other part mentioned or referred to as forming the beginning or as forming the end of the portion comprised in the description or citation.

PART VI.

Bills introduced into the Council of the Governor General for making Laws and Regulations, or published under Rule 22.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Bill was introduced in the Council of the Governor General of India for the purpose of making Laws and Regulations on the 25th February, 1897 :—

NO. 4 OF 1897.

A Bill to amend the Indian Emigration Act, 1883.

WHEREAS it is expedient to amend the Indian Emigration Act, 1883; It is hereby enacted as follows :— XXI of 1883.

Short title and commencement.

1. (*1*) This Act may be called the Indian Emigration Act Amendment Act, 1897; and

(*2*) It shall come into force at once.

Amendment of section 102, Act XXI, 1883.

2. In section 102 of the Indian Emigration Act, 1883, as amended by Act No. XVIII of 1890, section 7, for the words "British colony or possession", wherever they occur, the word "country", and for the words "State, colony or possession", wherever they occur, the words "State or country", shall be substituted. XXI of 1883.

STATEMENT OF OBJECTS AND REASONS.

A Native of India who departs by sea out of British India under an agreement to labour for hire in the Straits Settlements, does not "emigrate" within the meaning of the Indian Emigration Act, 1883, and, under section 102 of that Act, the system of comparative freedom under which emigration (in the ordinary sense of the term) from British India to the Straits Settlements is conducted, can be extended only to a protected Native State adjoining the Straits Settlements or to a British Colony or possession. This limitation makes it impossible to extend the same system, which has many advantages, to certain other countries, such as Sarawak, which obtain their supply of labour from British India through the agency and under the general control of the Straits Immigration Department, and regarding which the Government of India may from time to time be satisfied that their administration is such that the freedom from legislative restrictions enjoyed by the Straits may be safely extended. It is, therefore, proposed to amend section 102 of Act XXI of 1883, so as to make it possible for the Governor General in Council, by notification in the Gazette of India, to declare that the departure of a Native of India under an agreement to labour for hire in any country for labour in which such persons are recruited exclusively through the agency of the Government of the Straits Settlements, is not "emigration" within the meaning of that enactment.

J. WOODBURN.

The 9th February, 1897.

J. M. MACPHERSON,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Bill was introduced in the Council of the Governor General of India for the purpose of making Laws and Regulations on the 25th February, 1897 :—

No. 5 OF 1897.

A Bill to enable local authorities to borrow money for temporary emergencies.

WHEREAS it is expedient to enable local authorities to borrow money for temporary emergencies; It is hereby enacted as follows :—

Short title, extent and commencement.

1. (*1*) This Act may be called the Local Authorities (Emergency) Loans Act, 1897.

(*2*) It extends to the whole of British India; and

(*3*) It shall come into force at once.

Power to local authorities to borrow in cases of famine or epidemic disease.

XI of 1879.

2. Notwithstanding anything contained in the Local Authorities Loan Act, 1879, or in any other law for the time being in force, a local authority as defined in that Act may, with the previous sanction of the Governor General in Council, borrow money on the security of its funds for any of the following purposes, namely :—

(*1*) the giving of relief and the establishment and maintenance of relief-works in time of famine or scarcity;

(*2*) the prevention of the outbreak or spread of any dangerous epidemic disease; and

(*3*) any measures which may be connected with, or ancillary to, any of the purposes aforesaid.

Power to Governor General in Council to impose conditions.

3. (*1*) Every loan under the last foregoing section shall be made subject to such terms and conditions as the Governor General in Council may think fit to impose.

(*2*) In particular and without prejudice to the generality of the provisions of sub-section (*1*), the Governor General in Council may, by general or special order, prescribe—

(*a*) the terms on which the Governor General in Council or the Local Government may lend money under this Act;

(*b*) the manner of recording and enforcing the conditions on which such loans are to be made ;

(*c*) the inspection of any works carried out or expenditure incurred by means of such loans ;

(*d*) the instalments by which such loans are to be repaid, the interest to be charged thereon and the manner and time of repaying such loans and of paying the interest thereon ; and

(*e*) the accounts to be kept in respect of such loans.

Application of section 6, Act XI, 1879.

XI of 1879.

4. The provisions of sections 6 and 7 of the Local Authorities Loan Act, 1879, shall apply to the borrowing of money under this Act.

Application to loans made before commencement of Act.

5. The provisions of this Act shall apply to any loan made after the first day of January, 1897, and before the commencement of this Act by, or with the sanction of, the Governor General in Council to any local authority for any of the purposes hereinbefore mentioned, and every such loan shall be deemed to have been made under this Act.

STATEMENT OF OBJECTS AND REASONS.

The Local Authorities Loan Act (XI of 1879) enables a local authority to raise a loan "for the carrying out of any works which it is legally authorized to carry out," and section 8 of that Act declares that, except as provided by or under it, no local authority shall for any purpose borrow money upon or otherwise charge its funds, any contract made in defiance of that prohibition being expressly barred as void. Under these provisions, read with those of the special Acts regulating Local Boards and Municipal Committees, it is doubtful whether a loan could lawfully be raised by such a Board or Committee which is temporarily in want of funds, and requires to meet urgent expenditure for the purpose of affording relief in time of famine or scarcity or coping with a visitation of epidemic disease such as that of the bubonic plague. The object of this Bill is to remove all doubt in this connection. Clause 5 has been added in order to validate one loan in particular which the Government of India have recently felt themselves justified by grave emergency in making to a certain municipality.

J. WESTLAND.

NOTICE TO MARINERS—No. 32.

[First Publication.]

PACIFIC OCEAN—PHILLIPPINE ISLANDS.

Babuyan islands—shoal south-westward of Dalupiri.

THE British Admiralty has given notice (No. 52 of 1897) of the existence of a coral shoal, situated south-westward of Dalupiri in a position with Bijutan islet(Irao), bearing S. 53° E., distant 4 miles.

Approximate position, lat. 19° 1½′ N., long. 121° 9′ E.

The symbol for a rock with less than 6 feet water on it, with the words *Hermina, 1896*, against it, has been placed in the above position on the Admiralty chart.

NOTICE TO MARINERS—No. 35.

[First Publication.]

SOUTH PACIFIC OCEAN—ROTUMAH ISLAND.

Search for dangers reported near that island.

THE British Admiralty has given notice (No. 63 of 1897), that information has been received from Captain A. M. Field, H. M. Surveying Vessel *Penguin*, that he has recently searched unsuccessfully for the undermentioned reported dangers:—

1. Shoal reported west of Rotumah island in lat. 12° 31′ S., long. 176° 41′ E.:—

This shoal, on which the natives of Rotumah were said to fish, was searched for in vain, depths of 1,700 to 1,800 fathoms being found in the locality.

From enquiries made of the natives on Rotumah it is believed no such shoal exists as they knew nothing of it, and moreover would be most unlikely to fish on a bank so far to leeward of the island.

It was probably an exaggerated account of the shallow water stretching off the south-west part of the island, and has therefore been expunged from the Admiralty charts.

2. Eagleston reef, reported as being in lat. 12° 20′ S., long. 177° 50′ E., was searched for without any indication being found of the existence of a shoal in the locality, the depths near its supposed position being from 1,850 to 1,900 fathoms.

If a shoal exists it must be eastward of the meridian of 178° 10′ E.

The position of this shoal on the Admiralty chart has consequently been transferred to lat. 12° 20′ S., long. 178° 15′ E., with P.D. placed against it.

CALCUTTA, *the 26th February 1897.*

GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

NOTICE TO MARINERS—No. 36.

[First Publication.]

NEW ZEALAND, NORTH ISLAND.

Unsuccessful search for Vision rock.

THE British Admiralty has given notice (No. 64 of 1897) that information has been received from Captain A. M. Field, H.M. Surveying Vessel *Penguin*, dated 4th December 1896, of an unsuccessful search for Vision rock, reported in 1885, as situated about 15 miles, E. by S., from the northern of the Tawhiti Rahi (Poor Knights), or approximately in lat. 35° 35½′ S., long. 175° 1½′ E.

The rock has already been searched for unsuccessfully on several occasions by the New Zealand Government steam-vessel *Stella*.

Captain Field reports that the *Penguin* sounded over an area of 120 square miles in the reported locality of Vision rock, and found no indication of a danger, the least depth obtained being 160 fathoms, amongst general depths of 180 fathoms.

The weather was very favourable for the search, and the light so good that it is most probable any danger would have been seen had it existed.

During the search, with the wind against the current, a strong tide ripple was observed from a distance that would have led anyone to believe that a shoal existed, but on sounding over the spot no irregularity whatever was found in the depth.

Vision rock has consequently been expunged from the Admiralty charts.

NOTICE TO MARINERS—No. 39.

[First Publication.]

SOUTH PACIFIC OCEAN—FIJI ISLANDS.

Reported reefs to the north-west.

NOTICE to Mariners No. 71 of 1897 issued by the British Admiralty is republished:—

The following information respecting certain dangers reported to exist in the vicinity of the Fiji islands has been received from Commander J. W. Combe, H.M. Surveying Vessel *Waterwitch*:—

1. Balmoral reef, $2\frac{1}{2}$ miles in length in a north-west and south-east direction and $1\frac{1}{4}$ miles in breadth, has a least depth of four fathoms near its eastern edge, with general depths of 5 to 7 fathoms.

   Approximate position, 4 fathoms, lat. 15° 40′ 15″ S., long. 175° 52′ 15″ E.

2. Hamond reef, reported as being in lat. 15° 32′ S., long. 175° 20′ E., was searched for without success, the depths in the neighbourhood being 1,600 to 1,700 fathoms.

   As this danger is believed to be identical with Balmoral reef it has been expunged from the Admiralty Charts.

3. Carter reef, reported as being in lat. 15° 42′ S., long. 176° 28′ E., was also searched for without success, the depths being 1,600 to 1,800 fathoms around its position. This danger has also been expunged from the Admiralty Charts as it is believed to be merely another position given of the Balmoral reef.

4. The reef reported to lie 2½ miles S.W. from Navula passage in approximately lat. 17° 57½′ S., long. 177° 10½′ E., was also searched for unsuccessfully, and this danger has been expunged from the Admiralty Charts.

NOTICE TO MARINERS—No. 40.

[First Publication.]

SOUTH PACIFIC OCEAN.

Particulars of certain banks between Ellice and New Hebrides islands.

THE British Admiralty has given notice (No. 72 of 1897) that the Turpie, Alexa, and Hazelholm banks have been recently surveyed by Captain A. M. Field, H.M. Surveying Vessel *Penguin*; also that a new bank, now named Penguin, has been discovered and the position of the Louisa bank ascertained.

The particulars of these banks are as follows:—

1. Turpie bank is 22 miles in length in a north-west and south-east direction, and 10 miles in breadth, with a general depth of 24 to 27 fathoms; but with a narrow ridge running the whole length of its north-eastern edge, the least depth on which is 15 fathoms.

   Approximate position, S.E. extreme, lat. 11° 31′ 30″ S., long. 175° 54′ 0″ E.
   Approximate position, N.W. extreme, lat. 11° 19′ 0″ S., long. 175° 34′ 30″ E.

2. Penguin bank, nearly circular in form, with a diameter of about 8 miles, has a narrow ridge round its edge, on which the depths are from 15 to 20 fathoms, and inside the ridge soundings of from 23 to 26 fathoms.

   Approximate position of its centre, lat. 11° 27′ S., long. 175° 29′ E.

3. Alexa bank is in the form of a triangle, the apex being its west extremity and the base to the eastward, and is 18 miles in length east and west with a base of about 10 miles. Round its edge is a ridge, the depths on which are from 13 to 17 fathoms, whilst in the centre they are from 24 to 27 fathoms. Close search having failed to detect less water, the 8 fathoms and rock previously marked in the Admiralty Chart have been expunged.

   Approximate position, western extreme, lat. 11° 36½′ S., long. 175° 7′ E.
   Approximate position, north-eastern extreme, lat. 11° 29′ S., long. 175° 20′ E.
   Approximate position, south-eastern extreme, lat. 11° 39½ S., long. 175° 23½′ E.

4. Hazelholm bank is 5 miles in length in a north-east and south-west direction and 2½ miles in breadth, with a general depth over it of 24 fathoms, a ridge with from 17 to 20 fathoms encircling its northern edge.

   Approximate position, centre, lat. 12° 48′ S., long. 174° 1½′ E.

5. Louisa bank:—Depths of 17 fathoms were obtained on the western edge of this bank, in approximately lat. 11° 45′ S., long. 175° 56′ E.; but the bank has not yet been properly examined.

AUSTRALIA—INNER ROUTE.

Dangers recently found between Night island and Zed (z) reef.

THE British Admiralty has given notice (No. 73 of 1897) of the existence of the undermentioned dangers between Night island and Zed (z) reef, found in a recent survey of the locality:—

1. Glennie reef, of coral, dries 3 to 4 feet at low water springs, and is about a quarter of a mile long in a north-east and south-west direction and two cables broad; with foul ground stretching half a mile westward of it.

   From the centre of the reef the beacon on Tih Tih (tt) reef bears W. ½ S., distant 11¼ cables; and beacon on Vee (v) reef N. by W ¼ W.

Approximate position, on Chart No. 2921, lat. 13° 8′ 40″ S., long. 143° 37 15″ E.

2. Morris rock, a small coral knoll with a least depth of 5¾ fathoms on it at low water springs, and 12 to 13 fathoms close around, is situated with the beacon on Vee (v) reef bearing N. by E., distant 1½ miles; and High Round hill (1543) W. ¾ N.
3. Ashton rock, of coral, with a least depth of 5 feet at low water springs near its centre, general depths of 2 to 8 fathoms, and 7 to 8 fathoms around, is about a cable long and half a cable broad. From its centre cape Direction southern summit (500) bears N.W., distant 3 1/10 miles; and Chapman island (No. X) N.E. by E. ¾ E.
4. Halloran rock, of coral, with a depth of 26 feet on it at low water springs, and 15 to 16 fathoms close around, is situated with the beacon on Wye (y) reef bearing S.S.E. ¾ E., distant 10½ cables; and cape Direction northern summit (411) S.W.

NOTE.—The positions given are with reference to the position of the land in the vicinity, which is not absolutely correct as shown on the present charts.

In due course the charts will be corrected from the recent surveys, and the existing charts will then be cancelled.

SOUTH-WEST PACIFIC—LA BRILLANTE SHOAL.

Further search for this shoal.

WITH reference to Notice to Mariners No. 202, dated 8th October *last*, issued by this office, the British Admiralty has given further notice (No. 74 of 1897) that information has been received from Commander J. W. Combe, H.M. Surveying Vessel *Waterwitch*, that he has recently made a close search, during two days round a beacon anchored in 1,200 fathoms, on the elevation, from a bottom of a general depth of 2,000 fathoms, found in the former examination of La Brillante shoal, in approximately lat. 23° 14′ S., long. 170° 6′ E., but no less water could be found.

La Brillante shoal has consequently been expunged from the Admiralty Charts.

[First Publication.]

NEW ZEALAND—COOK STRAIT.

(1) South island—Farewell spit light exhibited from new lighthouse.

THE British Admiralty has given notice (No. 76 of 1897) that on 19th January 1897, Farewell spit (Bush-end point) light would be exhibited from a new lighthouse, recently erected in a position 176 feet eastward of the old lighthouse:—

Farewell spit light is a *revolving* light with a period of *one minute*, showing the following sectors:—*white* from about S. 79° E., through south and west, to N. 70° W.; and *red* from about N. 76° W. to N. 42° W. (over spit end), as before.

It is elevated 97 feet above the sea and visible in clear weather from a distance of 15 miles.

The lighthouse, 88 feet high, is an open framework, iron structure, painted red and white, in bands. The old lighthouse would be taken down as soon as possible.

Approximate position, lat. 40° 33′ 0″ S., long. 173° 1′ 55″ E.

NOTE.—The shoal off Spit end has extended recently; depths 2 fathoms less than those shown on the chart having been found for nearly 2 miles in a S.E. by E. direction from Spit end. Vessels should not enter the sector of red light until at least 6 miles distant from Farewell Spit lighthouse.

Further Notice will be given if necessary as to the arcs of the sectors of the new light, their exact limits not having been ascertained.

(2) *North island—intended light on Cape Palliser.*

Also, that, about June 1897, a light will be exhibited from a lighthouse in course of erection on Rocky point, eastern side of cape Palliser:—

Cape Palliser (Rocky point) light will be a dioptric, *group-flashing white* light with a period of *thirty seconds*, showing *two flashes*, separated by an interval of *three seconds*, in each group.

It will be elevated 258 feet above high water, and visible seaward, over an arc of 214°, distance of 23 miles in clear weather.

Approximate position, lat. 41° 36′ 45″ S., long. 175° 18′ 45″ E.

Further Notice will be given when the date of the exhibition of the light is known.

NOTICE TO MARINERS—No. 44.

[First Publication.]

AUSTRALIA—Fitzroy river.

Additional leading lights near Rocky Point.

The Port-master, Brisbane, has given notice (No. 1 of 1897) that a pair of small white leading lights have been placed on False Point (7 cables below Rocky Point), Fitzroy river, which, in line, bearing S.E. by E., lead through the gut between Rocky Point and the south-west extreme of Egg Sand, with a depth of 11 feet at low-water springs.

The front light is 3½ feet and the back light 18 feet above high water, the distance between them being 950 feet.

After passing Rocky Point a vessel will leave the line of lights and proceed as before.

Chart affected—No. 363; and Australia Directory, vol. 2.

JAPAN—Kiusiu.

Koshiki islands—Light on south point of Shimo no Koshiki.

The British Admiralty has given notice (No. 38 of 1897) that, on 15th December 1896, a light was exhibited from a lighthouse recently erected on Tsurikake saki (Shimo no osa), the southern point of Shimo no Koshiki:—

Tsurikake saki light is a *first* order, *group-flashing white* light, showing a group of *two flashes every minute*; elevated 462 feet above the sea, and visible from N. 85° W., through north and east, to S. 61° E., a distance of 26 miles in clear weather.

The lighthouse, constructed of brick, painted white, and 36 feet high, is ten-sided in section.

Approximate position, on Chart No. 358, lat. 31° 37′ 30″ N., long. 129° 41′ 15″ E.

(*Variation 4° Westerly in 1897.*)

This notice affects the following Admiralty Charts:—China Sea, No. 1263; Amoy to Nagasaki, No. 2412; Western coasts of Kiusiu and Nipon, &c., No. 358; Also List of Lights, part VI, 1896, page 120; and China Sea Directory, vol. IV, 1894, page 473.

AUSTRALIA—VICTORIA.

Port Phillip entrance, West channel—Alterations in buoyage.

THE British Admiralty has given notice (No. 23 of 1897) that, owing to recent changes in the southern entrance to West channel, port Phillip, the undermentioned alterations would be made in the buoyage, on 30th November 1896:—

1. Swan spit *gas* buoy (*occulting red* light) would be moved S. 18° W., a distance of 4½ cables from its previous position.

Approximate position, lat. 38° 15′ 50″ S., long. 144° 42′ 25″ E.

2. No. 4 buoy, red, would be moved eastward, a distance of 1½ cables from its previous position.
3. Swashway buoy, red, marking the eastern end of Royal George shoal, would be moved N. 70° W., a distance of one cable from its previous position.

CAUTION.—As the depths in this channel have altered since the survey of 1891, the Admiralty Charts should be used with caution until they have been corrected. A note "Depth altered since survey" has been placed on sheet No. 2747*a*.

JAPAN KIUSIU—WEST COAST.

(*1*) *Sunken rock northward of Matsu sima.*

THE British Admiralty has given notice (No. 33 of 1897) of the existence of a sunken rock, now named Tsuguno iso, with a depth of 3½ fathoms on it at low water, situated northward of Matsu (Mats') sima, in a position with Matsu sima summit (708) bearing S. 12° E., distant $1\frac{6}{10}$ miles; and Ko sima N. 65° E.

Approximate position, lat. 32° 57′ 20″ N., long. 129° 35′ 55″ E.

The island situated about west, distant half a mile from the above position is named Binno and not Kooshe as marked on the chart; also, the island situated about S. W. by S., distant 6½ cables from that position, is named Kushi. The summit of Kushi is 195 feet above high water, and of Binno 72 feet.

(*2*) *Yezo, west coast—Rock south-eastward of Yagisiri.*

The Japanese Government has also given notice of the existence of a rock, 10 feet high and about 10 yards in extent, situated S.S.E. ½ E., distant 8 cables from the eastern point of Yagisiri.

Approximate position, lat. 44° 24½′ N., long. 141° 26′ E.

SCHEME FOR THE SUPPLY OF FILTERED WATER TO THE TOWN OF BERHAMPORE.

MUNICIPAL DEPARTMENT.—MUNICIPAL

Calcutta, the 2nd March 1897.

RESOLUTION—No 1158M.

READ—

A letter from Sanitary Board, No. 478.B., dated the 4th February 1897, submitting, for the sanction of Government, plans and estimates for a scheme for the supply of filtered water to the town of Berhampore, together with a letter No. 54M., dated the 20th January 1897, and its enclosures, from the Commissioner of the Presidency Division on the subject.

Read also—

The previous correspondence regarding the water-supply scheme.

In April 1894 the Municipal Commissioners of Berhampore expressed a desire to improve the water-supply of their town, and instructions were issued by the Sanitary Board for the preparation of a scheme, with an approximate estimate of the cost of carrying it into effect. The Sanitary Engineer inspected the town, and on his report, which was drawn up in consultation with the local officers, it was decided that the best plan would be to pump water from the river Bhagirathi into settling-tanks, and distribute it, after filtering, through the ordinary street stand-posts for five or six hours in the morning and three or four

hours in the afternoon, as is done at Dacca and Burdwan. The approximate cost of such a scheme, which would give a supply of eight gallons per head per diem, was estimated at Rs. 2,21,800, or in round numbers Rs. 2,25,000. As soon as this was known, the question of providing the necessary funds was considered, and as it was not possible for the Municipality to carry out such a project without substantial aid from private or other sources, a deputation of the leading inhabitants of Berhampore waited on Maharani Surnomoyee, C.I., of Kasimbazar, in order to seek her aid towards the financing of the scheme, and that generous lady, with her characteristic liberality, at once offered to bear the entire cost of the scheme, provided it did not exceed Rs. 2,21,000, on being assured that Government would grant the services of an engineer free of cost, and that the Municipality and the District Board would undertake to bear the cost of maintenance of the works when completed. In August 1894 instructions were issued by Government to the Sanitary Board to undertake the preparation of a scheme under the supervision of the Sanitary Engineer, with the assistance of a surveyor on Rs. 250 a month and a draftsman, the expenditure on this account being met from Provincial revenues, in case it could not be provided out of the total limit of cost. The Board, with the approval of Government, deferred the preparation of the plans and estimates until the water of the river Bhagirathi had been thoroughly tested and analysed. Samples of the water were taken at different seasons, and analysed, with the result that it was found to be "organically safe," and convertible, under a proper system of filtration, into a good supply. The settlement of details such as the position of the pipe lines and standposts occupied some time, but the Sanitary Board have at last succeeded in drawing up a complete scheme. The total cost is now shown to be Rs. 2,38,883, the reasons for the increase being (*a*) that it was not known, at the time the rough estimate was prepared, that the water of the Bhagirathi required such careful filtration; (*b*) that provision has been made for house-connections; and (*c*) that the present estimate provides for a constant supply of water. It appears, however, from a report submitted by the Magistrate of Murshidabad, that the estimate is susceptible of reduction under certain heads, and that the actual expenditure in the execution of the works will probably not exceed the original estimate. Subject to this proviso, the Maharani agrees to pay the whole cost of the scheme, which may, therefore, be regarded as financially sound. The Municipal Commissioners of Berhampore have resolved to bear the entire cost of maintenance and to impose the necessary water-rate. As regards the carrying out of the project, it is proposed that this should be undertaken by the Magistrate of the district in consultation with the Maharani.

The Lieutenant-Governor sanctions the scheme as drawn up by the Sanitary Board, and approves the proposal that it should be carried out by the Magistrate of the district in consultation with the Maharani. Sir Alexander Mackenzie desires to take this opportunity of thanking the Maharani for her munificent gift, which is only one of her many acts of public spirit and liberality, and which will confer a lasting boon on the town of Berhampore. This Resolution will be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

H. H. RISLEY,

Secretary to the Govt. of Bengal.

DISTRESS IN THE PRESIDENCY, CHOTA NAGPUR AND OTHER DIVISIONS, EXCEPT THE PATNA DIVISION.

No. 611(Fam.).—The 2nd March 1897.—The following are published for general information.

M. FINUCANE,
Secretary to the Govt. of Bengal.

No. 609Agri. (Fam.), dated Calcutta, the 1st March 1897.

From—M. FINUCANE, Esq., Secretary to the Govt. of Bengal,
To—The Secretary to the Government of India, Revenue and Agricultural Dept.

IN continuation of this Government's letter No. 455Agri (Fam.), dated the 16th February 1897, reporting on relief operations in the Patna Division, I am directed to submit famine statements A and B for the districts of Nadia and Khulna, together with the following report on the condition and prospects of the Presidency and other Divisions in Bengal.

2. *Presidency Division.*—Of the districts in the Presidency Division, there is nothing new to report with regard to the 24-Parganas, in which there is no distress at present, nor any immediate prospect of necessity for relief. In Murshidabad, as reported in paragraph 9 of my letter No. 447Agri.(Fam.), dated the 16th February 1897, there is some probability of distress, especially in a tract bordering on the affected area in the north-west of the district of Nadia. Test works have been opened, and the situation is being carefully watched.

24-Parganas, and Murshidabad.

In the district of Jessore the worst tracts are an area of 106 square miles in the north-east of the Magura subdivision, situated mostly in thana Muhammadpur but partly in thana Magura and out-post Salikha, and an area of 168 square miles in thana Bangaon. The total population of the two tracts is about 163,000. The most important crop in these tracts is *aman* or winter rice, which, in consequence of deficient rainfall from July to November, was a total failure, the average outturn, except in *bils* or swamps, being estimated at about two annas. The crop next in importance is the *aus* or autumn paddy, the outturn of which last season was only about six annas; the *rabi* crops also, which are of minor importance, have suffered for want of rain. On the other hand, jute is largely grown in the tracts in question, and yielded a good outturn. Another resource of the people of these parts is the date-palm, which is extensively grown and affords a means of subsistence to many till the middle of March, when the tapping season closes. In consequence of high prices, some slight distress is being felt, and a small number of persons has been placed on gratuitous relief. But distress requiring the opening of relief works is not considered likely to appear till March or April, and may last till the end of June. The Lieutenant-Governor does not apprehend that relief measures on an extensive scale will be required in this district.

Jessore.

The area now affected in the district of Khulna is 442 square miles with a total population of 262,000 persons, comprising thanas Asasuni, Magura and Kaliganj in the Satkhira subdivision, and a portion of thana Paikgacha in the Sadar subdivision. Nearly the whole of this area consists of reclaimed Sundarban lands, and is intersected by numerous tidal rivers and channels, the water of which is salt during the greater part of the year. Practically the only crop grown is winter-rice, the aggregate area occupied by other crops being, it is believed, not more than 2 per cent. of the total cultivated area. The failure of the rice in this area is not so much due to shortness of the rain as to impregnation of the soil with salt water arising from the failure of the local landholders to keep up embankments. Their attention has been called to the matter, and it has been pointed out to them that the responsibility for relieving distress in

Khulna.

this area rests primarily with them. In the first five months of 1896 the rainfall recorded at Satkhira and at Nakipur, another recording station in the Satkhira sub-division, fell short of the normal by 6·04 and 9·17 inches respectively, and was not sufficient to wash out the salt from the soil The lands had, moreover, been submerged by a storm wave in October 1895, which partially destroyed the crop of that year and left a large deposit of salt. The result of this combination of unfavorable circumstances and of the short ill-distributed rainfall from July to November was that the winter-rice crop almost entirely failed over the greater part of the area in question. There can be no doubt that the failure of the winter rice crop for two successive seasons has caused distress among the people, but although relief works have been opened in the affected tract since December last, the number of labourers employed on them is still small. At the end of January there were three relief works open, but the total number of labourers shown in the famine statement A now submitted is only 147. Since then the number has increased, the total number reported on the 21st February being 351. It is remarkable that there are no women among the relief workers. This is reported to be due to the social customs of the people of the district which debar women from seeking employment on relief works. The number on gratuitous relief at the end of January was 142, and, on the 20th February, 727, of whom 374 were women.

The condition of the affected tract was reported at the end of January to have undergone no change. There is no *rabi* crop, and food stocks were reported to be small, but grain was being imported by the local dealers Two more tracts are considered likely to be affected in this district, viz., an area of 60 square miles with a population of 46,000 in thanas Satkhira and Magura, where distress is apprehended from the middle of March, and 201 square miles with a population of 96,000 in thanas Mollahat and Morelganj of the Bagerhat subdivision, but the Commissioner has not yet put this Government in possession of complete information regarding these tracts.

Nadia.

In the district of Nadia distress is spreading, and the areas affected at the close of January were:—

Thanas.	Square miles.
Kaliganj	109
½ Nakashipara	67·50
½ Chapra	65·
½ Meherpur	66·50
½ Gangni	63·00
Karimpur	193 00
½ Daulatpur	72·00
¾ Tehatta	135·00
¼ Naopara	44·25
	815 25

The population of this area is reported to be 428,644.

The tracts where distress first made its appearance are the Kaliganj and Nakashipara thanas of the sadar subdivision and thana Tehatta of the Meherpur subdivision. This portion of the district is known as the Kalantar, and is a low lying tract subject to floods and well adapted to the cultivation of winter rice. There is very little land in this area suited to the cultivation of *aus* or autumn paddy, or of *rahar* (*cajanus indicus*), but rabi crops, such as wheat, gram, linseed, &c., are largely grown. In consequence of insufficient and unseasonable rainfall, the outturn of the *aus* crop was not more than 6 annas and the winter rice was almost a total failure, the estimated outturn being only one anna. Of the *rabi* crops, generally speaking, wheat and lentils as well as *khesari* (*lathyrus sativus*) and peas have totally failed, and the other crops which have yielded some outturn do not materially affect the condition of the tract in question. The condition of thanas Karimpur and Daulatpur in the Meherpur subdivision, as described by the local officers, is similar to that of the Kalantar. The principal crops grown are rice and *rabi*. Last year the average outturn of all crops taken together was not more than 8 annas. This year the *aus* yielded only about a four-anna outturn, while the *aman* or winter rice has been a total failure, and the prospects of the coming *rabi* are reported to be gloomy. A great part of the population of both tracts consists of landless labourers and poor cultivators.

Test works were started early in December. In the report for the second-half of January, it is stated by the local officers that two test works and two regular relief works under Civil Officers, and one relief work under the Public Works Department were open during that period, and the total numbers on relief works and gratuitous relief at the end of the month were 8,229 and 1,084 respectively. The only other form of relief given was in the grant of loans, and it is stated that Rs 15,950 were advanced under the Land Improvement Loans Act to 25 applicants during the period under report.

3. *Chota Nagpur Division.*—Particulars regarding the Chota Nagpur Division were furnished in paragraph 8 of my letter on estimates of expenditure No. 447Agri.(Fam.), dated the 16th January 1897. The Commissioner's report for the second half of January shows no change for the worse in the condition of the districts of Lohardaga and Singbhum.

Palamau.

As regards the district of Palamau, under the recent orders of the Government of India, a subsidy of 8 annas a maund (up to a limit of 50,000 maunds) from general revenues has been sanctioned in aid of the importation of grain up to the end of March. The causes of distress in the district of Palamau were fully described in the papers submitted to the Government of India with my letter No. 381Fam., dated the 11th February 1897, are briefly as follows:—Palamau does not in the best of years produce sufficient food for the support of its population, but depends on certain tributary states and the district of Lohardaga to make up the normal deficit in the food supply of the district. This year, in consequence of the general failure of crops, these sources of supply have stopped. There was only a five-anna winter rice crop, preceded by a *bhadoi* or autumn crop of 9½ annas, and by poor harvests in 1895-96. The whole district, with an area of 4,905 square miles and a sparse population of about 600,000 persons, is reported to be affected. Prices are unusually high, being in places less than 8 seers per rupee. The worst portion of the district is a broad tract, of which the area has not yet been reported by the local officers, running from east to west through the centre of the district. It is within this tract that the scarcity of supplies for sale and the consequent high prices are most felt. In the block to the north of this tract, the state of things gradually improves until the Gaya border is reached, where no indication of distress is at present visible. The corresponding block to the south abounds in forest products, and does not as yet give any great cause for anxiety. During the period under report relief measures were still being organised. The telegraphic report of the 21st February shows that on that date there were in Palamau 2,602 persons on relief works and 409 on gratuitous relief.

Manbhum.

In paragraph 8 of my letter No. 447Agri (Fam.), dated the 16th February 1897, it was stated with regard to Manbhum that the outturn of the winter rice crop averaged about 5 annas in thanas Gobindpur, Tundi, Nirsha, Chas and Chandil, comprising 1,280 square miles with a population of 361,000 persons, and that, with the exception of thana Chandil, this area included the greater part of the tracts affected in 1873-74. It was also stated that the Deputy Commissioner was of opinion that if the *mahua* crop failed, two-thirds of the district, with a population of 800,000, would be affected. He did not, however, anticipate much distress before March. A report since received shows that while thana Chandil does not at present give reasons for anxiety, distress has suddenly made its appearance in thana Tundi in the Gobindpur subdivision, and the Commissioner of Chota Nagpur writes that it certainly now looks as though the distress in Manbhum were approaching that of 1874. The prospects of the *rabi* crop in this district are poor. With regard to this and the other districts of the Chota Nagpur Division, the Commissioner wrote on the 12th February that the *mahua* was not yet in flower, but that if the weather was favourable that crop might still be a good one.

Hazaribagh.

No material change is reported to have taken place in the condition of the district of Hazaribagh as described in paragraph 8 of my letter of 16th February above quoted, but prices were high, ranging from 8 to 11 seers per rupee.

4. *Orissa Division.*—The Commissioner of the Orissa Division reports that neither in Angul nor Balasore is there any reason to suppose that scarcity is imminent, and he is of opinion that very ordinary relief measures will suffice for both districts. Cuttack remains in a state of uncertainty, but what is known shows the necessity for watchfulness, especially with regard to the following areas:—

	Square miles.	Population.
Sadar subdivision	278	208,000
Banki Government estate	117	58,795
Jajpur subdivision	324	173,000
Kendrapara subdivision	173	88,400
Kujang Ward's Estate	320	69,877
Kanika ditto	265*	85,563
Total ...	1,477	683,635

* Exclusive of 174 square miles lying within the district of Balasore.

In Puri distress has made its appearance, and measures of relief are being taken in certain tracts near the Chilka lake, which is also the area in which distress first manifested itself in the great Orissa famine of 1866, but the Lieutenant-Governor is not in possession of precise information relating to the area and population affected.

5. *Bhagalpur, Rajshahi, Burdwan, Dacca and Chittagong Divisions.*—There is now nothing to add to what was stated with regard to these Divisions in paragraphs 11 to 14 of my letter No. 447Fam., dated the 16th February 1897.

6. Maps of the districts of Nadia and Khulna showing the areas affected are herewith enclosed.

Monthly Famine Statement A for the five weeks ending Saturday evening, the 30th January 1897.

OILSEED CROPS IN BENGAL.

THE following is published for general information.

REV. DEPT., *The 2nd March 1897.*

M. FINUCANE, *Secretary to the Govt. of Bengal.*

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL.

First forecast of the oilseed crops of Bengal, 1896-97.

N.B.—Returns have been received from all districts except Darjeeling.

Explanatory.—The chief oilseed crops in these Provinces are:—(1) rapeseed and mustard, (2) linseed, (3) *til* or gingelly, and (4) other oilseeds, *e.g.*, castor-oil and *sirguza* (niger oilseed), &c. Two varieties of *til* are grown, viz. (*a*) the *bhadoi til*, which is sown during the rains and reaped early in the cold weather, and (*b*) the *rabi* til, which is sown in the cold weather and reaped shortly before the setting in of the rains. Both varieties are included in the present report.

2. *Character of the season.*—The monsoon season of 1896 was exceptionally dry. It also ceased early. The month of October was practically rainless, and no general rain was received over the Province till the third week of November. The absence of rain during this period and the deficient rainfall of the previous months produced a want of moisture in the soil which interfered seriously with the sowing of the oilseed crops. In December there was no rain in Lower Bengal and Orissa. In North Bengal there was general light rain on the 31st, and in Bihar and Chota Nagpur light rain fell on the 25th and 31st. In January, rain was very light throughout the Province, in most parts practically nil. During the first fortnight of February, good and general rain fell in Bihar and Chota Nagpur, and showers were recorded in North and South-West Bengal, and also in Backergunge and Noakhali in East Bengal; it is probable that this rain which has fallen since the district returns were submitted may have improved prospects.

3. *Area cultivated.*—Exclusive of Darjeeling, for which no returns have been received, the total area sown with oilseeds in Bengal during the current year is estimated at 3,604,600 acres against 4,182,900 acres estimated to have been sown in 1895-96. This shows a decrease of 578,300 acres, or 13·8 per cent., on the area sown last year. The decrease is due to the early cessation of the monsoon rains, and subsequent want of rain which left the soil generally too

dry for sowing. An increase in the area sown this year is, however, noticeable in Bogra, Pabna, Patna, Gaya, Shahabad and Malda. In Gaya and Malda the season is said to have been favourable for sowing. In Patna, wheat lands, and in the remaining districts mentioned above, rice lands, which could not be sown with these crops owing to deficient rain, were utilized for growing oil-seed crops.

4. *Character of the crop.*—On reference to the appended returns, it will be seen that out of 44 districts from which reports have been received, no district returns an average crop (of oil-seeds taken as a whole) amounting to 16 annas; nine districts, viz., Dinajpur, Bogra, Tippera, Patna, Gaya, Muzaffarpur, Darbhanga, Purnea and Malda, report crops from 12 to 15 annas; and 18 districts, viz., Jessore, Rajshahi, Jalpaiguri, Rangpur, Pabna, Dacca, Mymensingh, Faridpur, Backergunge, Noakhali, Shahabad, Saran, Champaran, Monghyr, Bhagalpur, Cuttack, Balasore and Hazaribagh, report crops from 8 annas to less than 12 annas. The remaining 17 districts, including all the districts of the Burdwan Division and most of the districts in the Presidency and Chota Nagpur Divisions, return crops less than 8 annas.

Fourteen districts now return better crops than those of 1895-96, four districts equal crops, and the remaining districts worse crops. Taking the Province as a whole, the crop of the present year would appear to be much the same as that of the previous year, and may be estimated at 10 annas against 10½ annas estimated for the previous year, but this outturn will be obtained over a smaller area than in 1895-96. The poor outturn of the year may be ascribed to the deficient rainfall of the last monsoon season and to subsequent want of rain in October and throughout the greater part of November.

The rain which has fallen since most of the returns appended to this note were written may have improved the prospects of the crop. If so, the improvement will be noticed in the final forecast which will be issued about the 21st May 1897.

N. N. BANERJEI,
Assistant Director of Land Records and Agriculture, Bengal.

Countersigned.

W. C. MACPHERSON,
Director of Land Records and Agriculture, Bengal.

Secretary to the Government of Bengal.

STATISTICS OF THE SEA-BORNE TRAFFIC OF CALCUTTA IN FOOD-GRAINS.

No. 513 Statistics.—The following memorandum and statements are published for general information.

M. FINUCANE,
Secy. to the Govt. of Bengal.

STATISTICAL DEPARTMENT,
The 2nd March 1897.

Memorandum.

The sea-borne import and export traffic of Calcutta in food-grains during the week ending the 21st February 1896 and 1897 is shown in the following statement:—

	15TH TO 21ST FEBRUARY			
	1896.		1897.	
1	2	3	4	5
	Cwts.	Mds.	Cwts.	Mds.
Imports.				
From Foreign Ports ...	3	4	.....	.....
„ Indian „ ...	27,121	36,915	109,325	1,48,803
Total ...	27,124	36,919	109,325	1,48,803
Exports.				
To Foreign Ports	220,616	3,00,283	149,106	2,02,950
„ Indian „	51,861	70,588	25,372	34,534
Total ...	272,477	3,70,871	174,478	2,37,484

Imports.—The different staples comprising the import traffic are shown in the table below, and the figures for the week are compared with those for the corresponding period last year:—

	15TH TO 21ST FEBRUARY			
	1896.		1897.	
1	2	3	4	5
	Cwts.	Mds.	Cwts.	Mds.
Food-grains.				
Rice	14,441	19,656	95,936	1,30,58
Paddy	9,024	12,283	8,724	11,87
Wheat	.....	.....	.....	.....
Gram and pulses	3,659	4,980	3,920	5,33
Other food-grains, such as jowar, barley, oats, &c.	.....	.....	745	1,01
Total ...	27,124	36,919	109,325	1,48,803

As in previous weeks, the chief feature of the import trade is the considerable quantity of rice, amounting to 89,635 cwts., received in Calcutta from Burma. The imports from Chandbali showed a falling off of 7,754 cwts. as compared with those for 1896. The shipments of rice from Balasore remained practically the same as in the previous year, but this port supplied 1,763 cwts. of paddy against nil in 1896. The bulk of the imports of gram and pulses came from Coconada and Chandbali.

Exports.—In the following statement the total quantity of each kind of food-grains exported by sea during the third week of February 1897 is compared with the figures for 1896 :—

	15TH TO 21ST FEBRUARY			
	1896.		1897.	
1	2	3	4	5
Food-grains.	Cwts.	Mds.	Cwts.	Mds.
Rice	253,910	3,45,600	154,989	2,10,957
Paddy	3,463	4,713	22	30
Wheat	1,216	1,655	577	785
Gram and pulses	13,789	18,768	16,283	22,163
Other food-grains, such as jowar, barley, oats, &c.	99	135	2,607	3,549
Total ...	272,477	3,70,871	174,478	2,37,484

Foreign Ports.

The export trade in rice with foreign ports declined from 212,376 cwts. in the corresponding period of last year to 137,657 cwts. during the week under report. The exports by sea in the preceding week were 29,462 cwts. The shipments to Mauritius, West Indies, Cape Colony, and Natal amounted altogether to 63,222 cwts. against nil in 1896, while to Arabia, the United Kingdom, and Ceylon, the exports decreased by 86,238 cwts., 6,093 cwts., and 3,254 cwts., respectively. On the other hand, there was a complete cessation of exports to Germany, Abyssinia, and Aden, which together received 31,645 cwts. of rice in the corresponding period of last year. The figures under gram and pulses showed a slight advance of 4,010 cwts., due chiefly to comparatively larger supplies having been despatched to Mauritius, United Kingdom, Reunion and Trinidad.

Indian Ports.

In the case of the coasting trade, the exports of rice decreased from 41,394 cwts. to 17,332 cwts., those of paddy from 440 cwts. to 22 cwts., those of wheat from 1,195 cwts. to 441 cwts., and those of gram and pulses from 8,756 cwts. to 7,240 cwts. As regards miscellaneous food-grains, the figures rose from 76 cwts. to 337 cwts. The decrease in the rice trade was chiefly in the supplies carried to Bombay, Madras, and Travancore, while the quantity of gram and pulses shipped for Rangoon aggregated 1,656 cwts., against 3,407 cwts. in 1896.

Detailed statements showing the sources of supply and the places of destination, both as regards Foreign and Indian ports, are given below.

Statement No. I, showing the Imports of Food-grains into Calcutta from Foreign and Indian Ports during the week ending 21st February 1896 and 1897.

STATISTICS OF THE SEA-BORNE TRAFFIC OF THE MINOR PORTS IN BENGAL IN FOOD-GRAINS.

No. 514Statistics.—The following memorandum and statements are published for general information.

M. FINUCANE,
Secy. to the Govt. of Bengal.

STATISTICAL DEPT.,
The 2nd March 1897.

MEMORANDUM.

THE comparative statements below give statistics of the import and export trade of the minor ports of Chittagong, Narayanganj, Balasore (including both Balasore and Chandbali), Cuttack and Puri during the week ending 7th February 1897, as compared with the trade of the corresponding period of 1896 :—

Total ...	1896 ...	38,400	65,356	103,756	1,41,223
	1897 ...	11,755	15,393	27,148	36,951

Imports. Owing mainly to larger supplies of rice, paddy, and gram and pulse from Narayanganj and Burma, the import trade of Chittagong showed a rise of 1,668 cwts. The Balasore trade also showed an improvement of 137 cwts., which was due to large despatches from Calcutta. Of miscellaneous food-grains none of these were sent to Balasore in the corresponding period of last year.

Exports. Balasore and Puri showed a decline of 82,789 cwts. and 5,143 cwts., respectively, in consequence of smaller despatches of rice, paddy, and gram and pulse to Calcutta; there were no exports to other Indian and Foreign ports. The trade of Cuttack was confined to Mauritius, to which 11,755 cwts. of rice were sent against *nil* in the corresponding period of 1896.

Detailed statements showing the sources of supply and the places of destination, both as regards Foreign and Indian ports, are given below:—

Statement showing the quantities of Food-grains imported into Chittagong from each Foreign and Indian Port during the week ending 7th February 1897, as compared with the trade of the corresponding period of 1896.

EXPORTS OF FOOD-GRAINS BY THE EAST INDIAN RAILWAY.

No. 557-Statistics.—The following statements show the quantities of rice and other food-grains—

(*a*) Exported by the East Indian Railway from Howrah during the period from 1st January to 20th February 1897 inclusive;

(*b*) Exported by the East Indian Railway from Kidderpore Docks, Chitpore, and the Port Trust Railway during the period from 31st January to 20th February 1897 inclusive.

During the month of January the quantity exported from these places was 87,800 maunds. 14,63,292 maunds were therefore carried up-country from Calcutta by the East Indian Railway between 1st January and 20th February 1897; the destinations to which 13,75,492 maunds were shipped appear in the statements below. Of this quantity, 9,53,007 maunds (or about two-thirds) were carried to the North-Western Provinces and Oudh, and 1,81,588 (about one-eighth) to stations in these provinces; the rest (2,40,897 maunds) were carried to other provinces.

M. FINUCANE,
Secy. to the Govt. of Bengal.

STATISTICAL DEPT,
The 2nd March 1897.

Statement showing the quantities of rice and other food-grains exported from Howrah by rail from 1st January to 20th February 1897.

WEATHER AND CROP REPORT.

For the week ending the 1st March 1897.

Burdwan.—No rain. Weather getting much warmer. A considerable amount of ploughing was done after the late rain, but the ground is again becoming hard. Prospect of *rabi* crops fair. State of cattle fair. Fodder and water sufficient. Common rice selling as follows:—

	Srs. c.	Srs. c.	
Sadar	10 0	to 12 0	per rupee.
Kalna	10 8	to 11 0	
Katwa	10 15	to 11 2	
Raniganj		10 4	

Birbhum.—Rainfall nil. Weather seasonable. Sugarcane crushing nearly finished; outturn poor. Price of rice at Sadar 9¾ seers, and Rampur Hàt 11½ seers per rupee.

Bankura.—No rain. Weather seasonable. Pressing of sugarcane continues. Ploughing going on in places, but more rain is wanted. Fodder everywhere sufficient. Water insufficient in a few places. Cow-pox reported. Rice selling at Bankura 11½ seers and Vishnupur 11 seers per rupee.

Midnapore.—No rain. Weather hot. Prospect of indigo good. *Rabi* crops are still being gathered. Threshing of *aman* going on. *Boro* is being sown in Binpur and Gopiballavpur. Cattle-disease reported from Salbani, Naraingarh, Khespur, Binpur, and Bonapura. Fodder and water sufficient. Common rice selling as follows:—

	Srs.	
Sadar	11	per rupee.
Contai	12 to 13	
Tamluk	10½	
Ghatal	10½ to 12½	

Hooghly.—No rain. Want of rain felt throughout the district. *Rabi* suffers for want of moisture. Common rice sells from 8 to 11 seers per rupee.

Howrah.—Rainfall nil. Weather hot with clouds. Prospects of *rabi* not good. Fodder and water sufficient. Common rice sells from 8½ to 10 seers per rupee.

24-Parganas.—No rain. Weather warmer with cloud. Prospects of standing crops poor. Ploughing going on for the next crops, but rain wanted. Fodder and water sufficient. Some cattle-disease in Budge-Budge thana. Prices slightly fallen. Common rice sells as follows:—

	Srs. c.	
Sadar	9 to 10 8	per rupee.
Barasat	10 0	
Basirhat	10 8	
Diamond Harbour	10 10	

Murshidabad.—No rain. Weather seasonable. Prospect of *rabi* crops not favourable. Indigo and mulberry doing well. Pressing of sugarcane still continues. Fodder sufficient. Common rice sells as follows:—

	Srs.	
Sadar	10½	per rupee.
Jangipur	10½	
Kandi	11	

Four test-works open.

Jessore.—No rain. Weather hot in the day, nights cool; generally clear; occasionally foggy in the morning. Harvesting of *rabi* crops almost over. Lands are being prepared for cultivation of *aus*, but more rain is wanted badly. Fodder and water available Sporadic cases of cattle-disease reported from Bangaon. Common rice sells as follows:—

	Srs. c.	
Jessore	10½ to 11 8	per rupee.
Jhenida	10 0	
Magura	9½ to 10 0	
Narail	10 10⅔	
Bangaon	10 0	

Khulna.—No rain. Weather getting hot. *Boro* doing well. Rain wanted. Sowing of *til* going on. Common rice sells as follows:—

	Srs.	
Khulna	10 to 12	per rupee.
Bagerhat	12	
Satkhira	9½	

Numbers employed on four relief-works—

	Men.	Women.	Children.	Total.
Relief-workers	422	nil	85	507
Dependants			Not ascertainable.	
Otherwise relieved	159	628	313	1,100
			Total	1,607

Wages calculated at 10 seers per rupee. No cattle-disease. Fodder available. Water getting scarce.

Rajshahi.—No rain. Prospects of standing *rabi* crops very poor. Transplantation of *boro* not yet finished. Lands are being prepared for *bhadoi* rice and jute. Sowing of jute commenced in some places. Fodder available everywhere. Scarcity of drinking-water reported from some places. Common rice selling from 9 to 11 seers per rupee. Two test-works open. Numbers employed on Saturday, 27th Feb ruary—

	Men.	Women.	Children	Total.
Test-workers ...	560	Nil	25	585

Price of rice at relief-works, 10 seers per rupee.

Dinajpur.—No rain. Weather somewhat hot in day, cool at night. Condition of standing crops fair. No report of any cattle-disease, nor any complaint for fodder and water. Price of common rice, 9 to 12 seers per rupee.

Jalpaiguri.—No rain. Days warm, nights cool. Preparation of land for *betri* paddy going on. Harvesting of mustard and some other *rabi* crops commenced. Prospect of tobacco fair. Fodder and water sufficient. Average price of common rice, 8½ seers per rupee.

Darjeeling.—Rainfall at Sadar ·01. Weather seasonable. Hills—Wheat and barley coming to perfection; *tori* and potatoes being harvested. *Bhutta* being planted. Terai.—*Haimanti dhan* being threshed; ploughing for jute and *bhadoi dhan* going on. Price of coarse rice:—

	Srs.	
Hills	9	per rupee.
Terai	9 to 11	

Bhutta, 13 to 20 seers per rupee.

Rangpur.—No rain. Lands mostly prepared for *aus* and jute and sowing going on. Rain wanted. Harvesting of mustard finished; prospects fair. Common rice selling at 9 to 10 seers per rupee. Fodder and water sufficient.

Bogra.—No rain. Weather growing warm. *Cheena* suffering for want of rain. Sowing of *kaun* retarded. Fodder and water sufficient. Common rice selling at head-quarters 10 seers 14 chitaks per rupee and in the interior from 8½ to 12 seers per rupee.

Pabna.—No rain. Weather seasonable. Prospects of standing crops fair. Rice sells at 8 to 10 seers per rupee. Fodder sufficient. Numbers on Saturday, 27th February—

	Men.	Women.	Children.	Total.
Test-workers ...	47	Nil	6	53

Dacca.—Rainfall nil. Weather seasonable. No change in the prospect of standing crops. Fodder available. There is want of drinking-water in some parts of the district. No cattle-disease. Common rice sells at 10 to 11 seers per rupee.

Mymensingh.—No rain. Weather clear; warm days, cool nights. Lands under cultivation for *aus* paddy and jute. Pulses reported to be doing well. Average price of common rice 10 seers per rupee. Drinking-water sufficient at present.

Faridpur.—No rain. Weather seasonable. Prospects as before. Rain wanted. Common rice selling at 9½ to 11 seers per rupee. Fodder and water available.

Backergunge.—No rain. Days hot, nights cool. Prospects of spring crops not fair. Common rice sells from 9 to 12 seers per rupee.

Tippera.—No rain. Weather cool with intermittent foggy mornings. Rain badly wanted to facilitate ploughing. Fodder and water available. Price of rice:—

	Srs. c.	Srs.	
Sadar	9 8	to 11 0	per rupee.
Brahmanbaria	10 10	to 12 0	
Chandpur	10 8	to 11 4	

Noakhali.—No rain. Prospects not good. No cattle-disease. Fodder and water available. Price of rice, 9 to 11 seers per rupee.

Chittagong.—No rain. Weather unusually dry. Rain badly wanted for *rabi* crops. Water and fodder sufficient. Rice selling at 8 to 10 seers per rupee. Sporadic cattle-disease reported.

Patna.—No rain. Prospects of *rabi* continue assuring. Lancing of poppy progressing favourably. *Rabi* crops are being harvested. Fodder and water for cattle sufficient. Prices in Barh rising slightly. Price of common rice at Patna, 11 seers per rupee. Numbers on relief on Saturday, 27th February—

The figures for the district as regards relief-works are incomplete, as many public works in Mudhubani have not sent in returns.

Monghyr.—No rain. Strong west wind during the latter part of the week. Standing crops doing very well. Prospect of *rabi* excellent. Harvesting commenced. Cattle-disease in Begusarai thana. Sufficient fodder and water. Common rice sells as follows:—

	Srs. c.	
Monghyr	9 to 11 0	per rupee.
Begusarai	9 11	per rupee.
Jamui	8 to 10 0	per rupee.

Bhagalpur.—No rain. Weather seasonable; wind westerly. *Rabi* crops are approaching maturity. Harvesting will be general after 15 days. Peas are being already harvested. Prospect of *mahua* crop in Banka favourable. The price of *kurthi* in the Sadar subdivision is 13¾ seers per rupee and in the Supaul subdivision 15 seers. The price of *marua* in Supaul has fallen from 14 to 14½ seers per rupee. The price of common rice in Madhipura remains

stationary at 10 seers: it remains stationary in other places also, viz., Sadar 10 seers 2 chittacks, Banka 10 seers 10 chittacks, Supaul 10 seers. Fodder and water sufficient. Some cattle-disease reported. Numbers on relief on Saturday, 27th February—

Total ...				8,160

Purnea.—No rain. Mustard and tobacco harvest proceeds; outturn good. Prospect of standing *rabi* crops fair. Molasses being manufactured at Kishanganj. Lands being ploughed for next *bhadoi* crop. Sporadic cases of cattle-disease reported from Araria. Fodder and water sufficient. Price of common rice:—

	Srs.	
Sadar	9½	per rupee.
Kishanganj	10	
Araria	11	

Malda.—No rain. Weather getting warm. No change in the prospect of crops. Common rice selling at 8½ to 11½ seers per rupee. No cattle-disease. Fodder sufficient. Want of drinking-water reported fram Shibganj, Gomashtapur, and Nawabganj thanas.

Sonthal Parganas.—No rain. Weather clear with west wind. *Rabi* doing well. *Mahua* promises well. Mango in flower. Price of common rice 8½ seers per rupee at Rajmahal and 10 to 11 seers elsewhere; of maize 11 to 14 seers. Fodder beginning to fail. Water-supply fair. Jamtara private works open; test-works opened, but accounts not clear; Godda works not attended; Deoghur proposed.

Cuttack.—Rainfall nil. *Dalua* doing well. Condition of men and cattle generally good. Rice only available in places in small quantities. Price of common rice—

	Srs.	c.	
Cuttack	11	13	per rupee.
Jajpur	14	7	
Kendrapara	14	7	
Banki	15	12	

Balasore.—No rain. *Sarad* rice being threshed. *Dalua* crop flourishing, and is in ear in places. Sugarcane being pressed. Price of rice varies from 12 to 14 seers per rupee in the interior. Rice sells at 12 and 14 seers per rupee at Balasore and Bhadrak respectively. Fodder and water sufficient.

Angul.—No rain. Cultivators engaged in ploughing their fields and planting sugarcane. Day-labourers have found work in field since the late rain. Condition of people good. Cattle-disease continues. Fodder sufficient. Price of coarse rice, 16 seers per rupee in Angul and 13½ seers in Khondmals. Coarse rice sells at 11 seers per rupee at head-quarters of Angul Sadar subdivision only.

Puri.—No rain. *Dalua*, *mandia*, and *mug* grow fairly well. Land being ploughed for next rice crop. Fodder and grain scarce in tracts adjoining Chilka. Price of common rice stationary.

Hazaribagh.—No rain. Weather hot for the season. Paddy-fields are being ploughed. Rice selling at 8 to 9 seers per rupee. Preparations are being made to start relief works.

Lohardaga.—No rain. Ploughing continues. State of standing crops good. Rice sells at 8 seers per rupee at Ranchi and 8 to 12 seers in the interior. Fodder and water sufficient. Cattle-disease reported from some police-stations. Grain in stock sufficient for the present.

Palamau.—Rainfall nil. Weather cold. *Rabi* doing well and ripening. Eight-annas yield expected. *Mahua* backward. Prices risen further. Sixty-three markets selling below 9 seers, against 57 markets last week; 17 markets against 21 at 9 seers; 10 markets against 12 below 10 seers. Six hundred and fifty-eight maunds bounty rice arrived; price asked 9 seers 11½ chitaks (since reduced to 9 seers); sales slow in consequence. Numbers on relief—

	Men.	Women.	Children.	Total.
Relief-workers	1,687	1,282	980	3,949
Otherwise relieved	92	117	44	253

Manbhum.—No rain. Weather seasonable, Sugarcane being transplanted in places. Cattle-disease reported from thanas Raghunathpur, Barabazar, Chas, Chandil, and Purulia. Fodder and drinking water sufficient at present. Average price of common rice 10 seers per rupee at Sadar and 9½ seers at Govindpur. Stock of food-grains sufficient at present. 1,921 men, 1,321 women, and 250 children—total 3,492—on nine test relief-works on 27th February. Details of those on gratuitous relief not available, but such persons between 4 and 5 thousand.

Singhbhum.—No rain. Rice plentiful. Price of rice 8 to 12 seers per rupee.

General Summary.—There was no rain during the week. The *rabi* crops are maturing, and are being harvested in some parts. In Bihar the *rabi* crops continue to promise well, but in the rest of the Province (except in portions of the Rajshahi and Chota Nagpur Divisions) the prospects are poor. Spring rice is doing well, having been benefited by the late rain. The ploughing of lands for the early rice and jute is going on, but more rain is required. The prospects of opium in Bihar are very favourable. Tobacco is reported to be a good crop. Sugarcane pressing continues. Fodder-supply is generally sufficient. Scarcity of drinking-water is reported from some districts. The prices of food-grains have fluctuated slightly in some districts. In the distressed districts the prices of the staple grain on which the famine wage is based are—Nadia (common rice) return not received, Khulna (common rice) 10 seers, Rajshahi (common rice) 10 seers, Patna (common rice) 11 seers, Shahabad 10½ seers, Saran (Indian-corn) 10 seers 1 chitak, Champaran (Indian-corn) 10 seers, Muzaffarpur (Indian-corn) 10½ seers, Darbhanga (Indian-corn) 10 seers, Bhagalpur (common rice) 10 seers. There was a slight fall in the price of Indian-corn in Saran and Muzaffarpur.

The numbers on relief on Saturday, the 27th February, were –

Nadia	...	Return not received.	
Khulna	...	1,607	
Rajshahi	...	585	
Pabna	...	53	
Patna	...	61	
Shahabad	...	5,965

The total fall from 1st January to 27th February 1897		1·63
The average fall of the corresponding period for 24 years, Surveyor-General's Office		1·40

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h. and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed, open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; ⌓, dew; = fog.
